We think this proposal and plan looks great. Our after school clubs and holiday programmes use this park often, as do many of the local families attending our programmes, and the more amenities, and play equipment the better! Two different level pump tracks is great, so not clogging one with little kids and old kids not being able to enjoy it/vise versa. The resurfacing of the basketball area is also great, being one of the fastest growing sports, and easy to play in small numbers too. Great job!

Introducing Disabled Persons Assembly NZ

We work on systemic change for the equity of disabled people

Disabled Persons Assembly NZ (DPA) is a not-for-profit pan-impairment Disabled People's Organisation run by and for disabled people.

We recognise:

- Māori as Tangata Whenua and Te Tiriti o Waitangi as the founding document of Aotearoa New Zealand;
- disabled people as experts on their own lives;
- the Social Model of Disability as the guiding principle for interpreting disability and impairment;
- the United Nations Convention on the Rights of Persons with Disabilities as the basis for disabled people's relationship with the State;
- the New Zealand Disability Strategy as Government agencies' guide on disability issues; and
- the Enabling Good Lives Principles, Whāia Te Ao Mārama: Māori Disability Action Plan, and Faiva Ora: National Pasifika Disability Disability Plan as avenues to disabled people gaining greater choice and control over their lives and supports.

We drive systemic change through:

Rangatiratanga / Leadership: reflecting the collective voice of disabled people, locally, nationally and internationally.

Pārongo me te tohutohu / Information and advice: informing and advising on policies impacting on the lives of disabled people.

Kōkiri / Advocacy: supporting disabled people to have a voice, including a collective voice, in society.

Aroturuki / Monitoring: monitoring and giving feedback on existing laws, policies and practices about and relevant to disabled people.

The Submission

Disabled Persons Assembly (DPA) is pleased to provide feedback to the Christchurch City Council (CCC) on the South New Brighton Park Development Plan.

We support the proposals outlined within the updated development plan to make the park more accessible and user friendly for all Christchurch residents and visitors.

In this brief submission, we make recommendations on how to further improve the plan from a disability perspective.

Shared pathway

DPA has concerns around ensuring the safety of all users.

Primarily, we would like CCC aim to reduce the risk of collisions between pedestrians and cyclists on the pathway.

DPA asks that the shared pathway is of significant width to safely accommodate the needs of different users including wheelchair and mobility aid users, cyclists and walking pedestrians.

DPA asks that the shared pathway has separate spaces for cyclists and pedestrians to navigate safely around each other.

New picnic tables

DPA supports the placement of picnic tables across the park for users.

DPA asks that at least one of the picnic tables is an accessible one, enabling wheelchair and mobility aid users to be seated alongside non-disabled people.

Mobility parking

DPA welcomes the proposal to improve vehicle parking both inside and outside the park.

DPA asks that more mobility parking spaces are created within the new parking area.

Toilets

All toilets should be upgraded to become fully accessible.

Seating

DPA recommends that seating around the park be at different heights and in the shade.

Ensuring that seating is at different heights means that disabled and non-disabled people alike can easily raise and lower themselves on and off it with minimal effort.

Tree planting

We support the planting of new native trees they will provide shade and a great aesthetic for the park.

DPA recommends that new and existing trees are managed to prevent any roots protruding from them across paths.

Protruding tree roots are a real accessibility and safety issue, especially for disabled people hence arborists need to regularly check and manage any overgrowth.

Given ECAN has denied our Estuary edge flood protection repairs why would we build or repair any facilities until the area is flood secure?

13 years after the Earthquakes we still do not have security. An absolute disgrace.

2 weeks ago major flooding , the estuary track washed away and the Ebbtide board work pushed off it’s piles.

Hard Edge required immediately

Resurfacing the basketball court (especially so it drains) and adding correct court lines (measured out key, 3pt line, half court and boundary) is a great start for this space and an asset to the community. Investing in better hoops would take this space to a greater level. Basketball has proven to be the fastest growing sport in NZ. There is a shortage of hoops to play on nationwide, which is felt in this community. The courts at the nearby school and the half court near the south Brighton surf club are not in great condition either. Basketball is a sport that has many options from practising on your own to adapting the sport to play one or many. As a basketball coach, player and staff at Canterbury Basketball I believe the community would benefit from having a decent full court to play on in our vicinity. It would be great to see new correct height hoops installed while resurfacing.

It would be great to see the current bbq table get picnic tables at it. In addition the new bbq area location should be deeper into the park where younger children are clear of running towards road and families with older children can bbq closer to the areas of the park that draw them there as well.

Other: Ecological benefits of tree planting

Q19 **Is there any other feedback you'd like to share?**

Long Text

From 2015 to 2020 I oversaw a volunteer restoration project in the reserve that built on previous Christchurch City Council restoration. This was in an area close to the existing play area. After 5 years of implementing this ecological restoration project it became apparent what plant species do well within this environment.

The reserve currently contains a large number of exotic species and these provide little to no ecological benefit. Some are even quite invasive, such as the wilding radiata pine. Planting exotic tree species within the reserve will provide very little benefit to kereru, the key native bird species that have established a breeding population within the reserve.

Rather than plant a number of isolated exotic specimen trees, I recommend put resources into additional infill planting, weed control or wilding pine control of areas that have already been restored. If Council decides to proceed with planting trees as isolated specimen trees, the species that I would recommend would be totara, kanuka, ngaio. All can withstand dry conditions and eventually become reasonable sized trees, ngaio and kanuka are probably the more dry tolerant species. Restoration grade plants are probably best planted as more established plants will struggle to adjust from nursery conditions to harsher natural conditions.

Hi, there's not an option for South New Brighton in the suburb drop box ;)
Wondering if it would be possible to have a dog park somewhere in the area to keep dogs safely away from the kids area and estuary.
It would also be cool to have more information about the local flora and fauna around the playground so that families understand how special this area is.

Q19 Is there any other feedback you'd like to share?

Long Text

Play spaces that suit both toddlers and older children are needed in these areas.

There are lots of tules around playgrounds within childcare spaces these days, which limits childrens opportunities to risk take. It would be great for council playspaces to provide these opportunities; balancing, ropes and rope climbing, tunnels, heights, differing levels and surfaces, etc

Pump tracks

Q12 **Pump tracks comments**

Long Text

I feel that the two proposed pump tracks are not a good fit for the needs of the community. As a local skateboarder with over 35 years experience in the sport I am disappointed at the lack of vision in this plan. We deserve a facility that caters for all local users of many different abilities.
Pump tracks are a one dimensional obstacle that stifle creativity and skill development. Users will soon bore of doing laps and will crave something more to challenge themselves.
We already have a large pump track in the Bexley reserve that is well built but often empty. I have been there once or twice but soon became bored going around in circles.
I have been involved in helping create a DIY skate spot in South New Brighton at the adjacent basketball court. People have contributed their own obstacles (some obstacles are not so good) to this area and this has created a meeting point for local skateboarders that is popular. It has created a skateboarding scene in our area that has been lacking for decades due to substandard facilities. We love having this in our community and with some council support we could make this area both user friendly for skateboarders and basketballers.
I approve of a small pump tracks for younger children but please consider catering for the variety of skill level in the whole community. Please reconsider the building of two pump tracks and spend some money on obstacles and areas that skateboarders actually want and would be proud of.
Thanks for your time
Duncan Hunter.

Pump tracks

Q12 **Pump tracks comments**

Long Text

This is exciting there is planning for up grades for this area. Pump tracks are fun for all types of kids and adults and encourage movement. I think a pump track is a good idea however not two. There is already an amazing pump track nearby that has multi level skill pathways. As you would have noticed a very poor skate area was erected some years ago and over time locals have built some fun features and others have dumped other types of skate obstacles. As a local I have seen this has attracted more people to the basketball court area than I have ever seen before. I believe using the funds for one of the pump tracks to make some basic low cost skate features and or a mini ramp such that 44 Ramps can construct would better diversify the plan and service the current and growing use of the area for kids and their parents on skateboards, rollerskates and scooters and compliment the one pump track and basketball court. I myself and other families I know in the area and abroad bring their kids with our skateboards and basketballs and use both of these facilities. The surface on court is still in good condition, perhaps this part of the budget could be redirected? This area is a wonderful sunny space away from the hustle and bustle that we all enjoy. I hope you take this consideration seriously, having the money spent on two pump tracks would be a disappointing result and I know other locals that may not submit their feedback feel the same way.

Really loving the improvements! Can’t wait to use the new areas once done. Just have some general feedback in regards to playground planning... the swing sets with 5 or 6 swings, all facing each other... please stop putting these in any playground developments. The chains make it almost impossible to get in and out of the swings... you never see people using these and obviously not great or usable for wee ones. I encourage council staff to go and try them out before putting them anywhere else □□. Nothing wrong with the tried and tested baby swing and saddle swing side by side options, or the parent and baby swings that are starting to pop up □□

Being a mother to a child who is within the local school who has a sister with a disability. It would be amazing to see these paths make the area more accessible. From my point of view I know the school has regulary taken my son to the playground when his sister absolutely hates this playground as there is very little she can do there and when she was a wheelchair user it wasn't accessible. She may no longer use a wheelchair but if those pathways are being used for bikes scooters foot traffic then it's critical they are accessible for all.

Long Text

For me again accessibility but also the ability to supervise your children from seating spaces is essential. Having space to fit anyone who uses a wheelchair in to the end of a table makes a big difference. I am a bit concerned that I don't think there's a planned expansion of the small toilet block and I'm no certain if the plan will allow any future expansion of play equipment. Currently the range of options require significant skills / abilities which is not optimal for families like our or those who may have an infant / toddler and school aged.

Something that I'm always aware of is there is growing numbers of children and adults who have significant additional needs. This particular playground for any individual who is a runner and may not have water awareness possess significant risk. Personally having taught children who are talented in escaping parents or caregivers at speed I would be thinking about how to use the paths, planting and possibly some fencing in sections. So that it limits some risks, makes it a little bit more secure. So it's just that allows greater chance in locating the individual before they hit the estuary / jetty area. Our daughter is no fast mover and will happily sit for long periods of time. However last time I went with her brother I remember he moved behind an area with trees and garden taking sometime to locate him. He's got awareness of risk would not wonder. I also Beleive that this kind of planning can also provide a bit of additional safety from any dogs in the area that maybe not controlled to the optimal level. As it can successfully limit some of the current openness where dogs can come so many directions.

I wouldn't suggest completely fencing as it would loose the New Brighton atmosphere and it's by far to big and open in space. The other thing worth considering in longterm plan is having a section devoted to dogs so they do have an enclosed space to run etc instead as it is a growing concern to many of us parents. Our daughter has been attacked by an off lead dog for a longtime she would cling to me and would not walk. So I do feel that even if it's just a big running space with trees etc that we can prevent significant injuries and enhance the enjoyment of all users by planning specifically for dog owners. It may not mean every dog owner keeps their dog leaded outside the dog park but should deter

Pump tracks

Q12 **Pump tracks comments**

Long Text

Pump tracks should be for everyone, and can be designed as such. Refer Bexley Park pump track.
Pump tracks such as those shown as examples are not suitable. They should be more than just a bumpy asphalt path.
Get a qualified professional to design it, as you would any other long term infrastructure.

Pump tracks

Q12 **Pump tracks comments**

Long Text

With a lot of kids and young adults in the area who either skateboard or scoot why is there not a consideration for a small skatepark approach to this area rather than two pump tracks? Having one pump track and skate area similar to St Albans park would provide a much broader use appeal for the area. As you mention in your plan there are complimentary nearby pump tracks in the area already.
