34361	<p>What do you like about the plan and why?</p> <p>What don't you like about the plan and why? The traffic plan will affect our access ways to our property and customers parking to visit our business. Pedestrians do have and have had a place to cross safely as has been the case for the tens of years i have been here. We do not support the use of a lot of speed humps as the road has already been congested by the speed humps installed at Aldwins /ferry intersection early this year. as this bring ferry rd to a stand still .during busy times of the day. WE do not think four crossing are required in such a short distance.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Don't know/not sure</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans?</p>	doug drake - doug drake motors, owner operator
34406	<p>What do you like about the plan and why? The new pedestrian refuge island is good idea. Pedestrian safety is of vital importance so to provide a refuge island for crossing on the sections of Ferry Road shown has considerable merit.</p> <p>What don't you like about the plan and why? It is the view of the AA District Council for Canterbury/West Coast that the use of raised speed humps on the sections of Ferry Road coupled with the pedestrian refuge lands are not only counterproductive to easing congestion but also pose a danger to emergency vehicles. As ambulance and fire services will be traveling at speed to reach an accident scene or incident, travelling at speed over these speed humps on a main road like Ferry Road would mean vital emergency equipment could be damaged and could endanger the well being on people on board, like patients etc.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans?</p>	Ben Selby - The AA District Council Canterbury/West Coast, Vice Chairman
34463	<p>What do you like about the plan and why? Our comments are in the attached PDF file.</p> <p>What don't you like about the plan and why?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p>	David Palmer - Greater Ōtautahi, Member

34728	<p>What do you like about the plan and why?</p> <p>What don't you like about the plan and why? The current speed bumps at the intersection of Aldwins/ Ferry Road Installed last year) have already massively impacted our business (and others along Ferry Road). At peak traffic times, traffic is backed up to Woolston Primary School (corner Hopkins and Ferry Road) making access difficult, particularly for veterinary emergencies. Adding yet another traffic flow obstacle (pedestrian crossings) will only exacerbate the problem. Installing a pedestrian crossing would only cater to those too lazy to walk down to the Ferry Road intersection where there is already sufficient pedestrian support to cross safely.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans?</p>	Nicola Broad - Ferry Road Veterinary services Ltd t/a Animal & Bird Hospital, Owner

35477	<p>What do you like about the plan and why?</p> <p>What don't you like about the plan and why?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands?</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Reducing the off road parking will affect the local businesses. When there is no car park, potential customers will keep on driving. Most of people have limit time for lunch break. They want to pop out of the car and get some food then leave quickly. Without car park in front of our shop, it will be difficult for us. It is well known that the economy doesn't do well. Most of businesses are struggling to survive. Although we always think in a positive way, there are not many customer around. Recently numbers of businesses were closed. We are trying our best to keep all of our current employees. But we can't afford to lose more customers.</p> <p>No customers = no businesses. No businesses = No jobs, No businesses plus no jobs= more people will live on benefits= more problems in the local community.</p>	<p>[REDACTED]</p>

33634	<p>What do you like about the plan and why? Yes to pedestrian crossings but no more speed bumps that road is already really bad for traffic jams and speedbumps will only further jam up the roads</p> <p>What don't you like about the plan and why? Speedbumps that road already gets really backed up speedbumps are increasing traffic and backing it up</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans? I like the idea of some crossings or breaks but just not speedbumps it already takes me 10-15 mins just to get from ferry aldwins to ferry wilsons</p>	Sydney Butler
33638	<p>What do you like about the plan and why? Yes put an island for pedestrians to wait, however during peak hours, the traffic is stopped so it's already safe for pedestrians to cross. More raised platforms increase traffic and congestion.</p> <p>What don't you like about the plan and why? No more raised speed humps. Yes put an island for pedestrians to wait, however during peak hours, the traffic is stopped so it's already safe for pedestrians to cross. More raised platforms increase traffic and congestion</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? Have you actually seen the intersection at aldwins/ferry? Peak traffic cars are still running red lights. The way traffic actually moves across that intersection, is more harmful with speed humps, than it was without. I travel this road multiple times a day, and in no way will more raised platforms do any good.</p>	Nicole Egan
33639	<p>What do you like about the plan and why? Nothing. It's ridiculous and slows traffic even more. Instead of say 5 mins it will take 15 mins. It's time away from loved ones. Time you never get back. People slave for others why slow down their commute to get to and from work or school?</p> <p>What don't you like about the plan and why? The safety platforms. Less people stop for them including pedestrians. Use crossing lights instead. And stop wasting people's time sitting in traffic that doesn't need to be congested even more.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? What happened to looking left and right before crossing?!</p>	Staanakaalicia Guilford

33640	<p>What do you like about the plan and why? Nothing it going to slow traffic even more it backed up along ferry road bad now because of speed humps at ensors ferry Rd intersection</p> <p>What don't you like about the plan and why? It going to slow traffic even more make a overhead bridge.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Your going to cause more traffic jams it puts a strain on bus drivers with backed up traffic . Traffic backing up causes emergency services to not be able to get through in timely manner.</p>	Aleisha Hibbs
33649	<p>What do you like about the plan and why? Addition of no stopping lines and pedestrian refuge islands, makes it much safer for pedestrians</p> <p>What don't you like about the plan and why? Speed humps. Slows traffic, causes congestion, extra unnecessary wear and tear on car suspension components and negative effects on emissions from cars, slowing down and powering up</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans?</p>	Anthony Holliday
33650	<p>What do you like about the plan and why? I'm excited for more pedestrian crossings + happy about the speed bumps, I think it would be great to have more safety on this bit of ferry road as I walk by here a lot to get to the shops.</p> <p>What don't you like about the plan and why? I am happy for more speed bumps but I've noticed there's a lot of congestion on ferry road, especially during rush hour. The speed bumps at the ferry road/ensors road *seem* to have caused more congestion - I'm all for speed humps and for slower speeds, but in my observation it seems that people get frustrated with the bumps and try to speed over them or really take the piss out of going through the 'yellow' light (which is often red by the time people are going through it). Ferry road is so busy already and I think commuters are frustrated. I believe these speed humps are a good idea for this section of ferry road, but I think they'll need to be designed in such a way that people can't just fly over them anyway. Sometimes it's quite annoying that I can't turn right onto Olivier or Mathesons from ferry road due to the islands, but im okay not having that luxury if it keeps pedestrians safer. However, I do think that this creates more congestion on ferry road. If I could actually get off ferry road sooner, there would be one less car there (if that makes sense?). This is a similar problem at the ferry/ensors intersection - because cars are flying through orange and red lights it's very difficult to turn right onto Linwood Ave when I'm on ferry road going toward the city. The traffic light doesn't give a green for right turning so I have to wait for the light to go yellow meaning only one (maybe two cars) can go through. This means that sometimes I will just continue going down ferry road and turn right onto Bordsley street to get to Phillipstown. This is fine, but it does mean that more cars are staying on ferry road for longer. Maybe some action to try and get more cars off ferry road could help with safety? I've been a big fan of the speed bumps and pedestrian crossings in Linwood village (like cashel street and stanmore road round about). The updates for this area seem to slow people down and create a more pleasant driving experience. I'm hopeful and positive that the changes on ferry road will do the same :)</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p>	Cleo Dubois

	<p>Is there anything else we need to know before progressing these plans?</p>	
33653	<p>What do you like about the plan and why? Adding in an Island for pedestrians</p> <p>What don't you like about the plan and why? I don't like the added hump. Ferry Road is already congested as it is during peak hours. Adding this will only back the traffic even further to Fitzgerald Ave or Aldwins Road. Added Island will do</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? Island is a good idea but no speed humps</p>	Soala Latu
33655	<p>What do you like about the plan and why? HATE IT</p> <p>What don't you like about the plan and why? Slows traffic way too much causing delays and congestion which is more dangerous</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? STRONGLY OPPOSE</p>	Acacia Lane
33658	<p>What do you like about the plan and why?</p> <p>What don't you like about the plan and why? Speed humps especially the number suggested within a small stretch of road.</p> <p>As one of the 20,000 vehicles that uses this road on an almost daily basis, this plan would make this route to/from work unusable for me. I would need to divert to using Rutherford and Brougham Streets. Particularly as at more peak traffic times the changes proposed are to the stretch of road that is the worst grid locked area of Ferry Road.</p> <p>Like a number of vehicles I need to brake to either an almost or full stop to then slowly move over each hump, this hugely impacts the overall flow of traffic; this is particularly frustrating and inefficient at areas like this when there are no pedestrians.</p> <p>The speed humps at the Ferry Road and Ensors Road intersection are particularly severe and have only exacerbated the traffic flow issues on Ferry Road and it's my opinion this plan would too.</p> <p>In contrast the lower speed limit (30KM) through Heathcote St/Ferry Rd and Palinurus Rd/Ferry Rd in combination with pedestrian refuge islands and some speed tables (not humps) seems to serve both motorists and pedestrians well.</p> <p>Speed tables or the longer and lower raised platforms seem to be a much more moderate approach that help to slow the 30KM traffic and allow pedestrian movement while not interrupting flow of traffic when there is no pedestrians anywhere near as much.</p> <p>I would much prefer another slower speed area and if there are speed slowers, please consider using less severe raised obstacles to improve traffic flow.</p>	Victoria Chandler

	<p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans?</p>	
33662	<p>What do you like about the plan and why? I think the plan for Mathesons crossing is great as it's really difficult to cross and I've been hit by a driver not paying attention before. I cross here every weekday on my way to work.</p> <p>What don't you like about the plan and why?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	Hannah Taylor
33664	<p>What do you like about the plan and why? Nothing</p> <p>What don't you like about the plan and why? 4 Speed bumps to slow down over 20,000 vehicles. They will only contribute to the congestion of traffic already along that road. People only walk across that road because they are too lazy to go to the two controlled crossings that are already there</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Great question you put here. Not. You ask if there's anything you need to know BEFORE PROGRESSING. That means you have already decided and it's going to happen and our input means nothing.</p>	Lorraine Tutty
33665	<p>What do you like about the plan and why?</p> <p>What don't you like about the plan and why? No more speed humps</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p>	Manaaki Gage

	<p>Is there anything else we need to know before progressing these plans? Don't do it no one wants them, stop wasting money</p>	
33666	<p>What do you like about the plan and why? Nothing. It's only going to add to the congestion since the last speed humps were put in, and only 1-2 cars can get through at each green traffic light</p> <p>What don't you like about the plan and why? Speed humps are so expensive, a simple pedestrian crossing would be fine and the congestion along that road is so bad as it is. We as ratepayers cannot afford any more rate increases.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Please for once listen to the ratepayers as it doesn't seem like you do even when we take the time to fill in these surveys.</p>	Sharon Crane
33670	<p>What do you like about the plan and why? Efforts to slow speeds on a busy stretch of road. This will benefit me as a commuter cyclist who bikes this stretch of road every day</p> <p>What don't you like about the plan and why? Could we protect the cycleway better?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	Jack van Beynen
33672	<p>What do you like about the plan and why? Nothing about this is acceptable. Waste of money.</p> <p>What don't you like about the plan and why? We don't need more platforms or cycleways. Cyclist already have a dedicated route 1 block south through phillipstown. You have slowed the traffic to a crawl with the mess at Aldwins ensors intersection. The traffic barely flows all day.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans?</p>	Brent Terry
33674	<p>What do you like about the plan and why? I do agree a crossing needs to be in place as I have also noticed many pedestrians crossing ferry rd, particularly between the shops and it will be nicer to know where the specific crossing is, rather than them crossing at multiple points on the street.</p>	Natasha Tilbury

Submissions received on the Ferry Road pedestrian safety improvements, August 2025

ID	Feedback	Name
	<p>What don't you like about the plan and why? I used to drive down ferry multiple times a day, to and from work. But traffic is so busy and it flows even slower now with the speed humps on at the ferry / ensors intersection. Speed humps will have the desired effect of slowing traffic down, but at what cost when the road already backs up so much I refuse to use it anymore.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Don't know/not sure</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? I think something need to be done, to that section of Ferry Rd for pedestrians but also traffic.</p>	
33675	<p>What do you like about the plan and why? Nothing</p> <p>What don't you like about the plan and why? The issue is traffic queues caused by the recent ferry road changes at aldwins rd which have resulted in long queues of stationery traffic. I have witnessed several near misses, an accident and nearly been hit my a car turning across the cycle lane between stationery cars, also nearly hit a pedestrian stepping into cycle lane between stationery cars.</p> <p>More road humps will increase congestion and does not protect pedestrians who will NOT use the refuge zones and will walk through stationery lines of cars into cycle lanes, opposing traffic lanes traveling at 50kmh with zero visibility for motorists / cyclists until they step into the traffic.</p> <p>I have almost been hit by a car turning across into a side street on Ferry Rd through a line of stationery traffic who could not see me coming in the cycle lane due to poor visibility.</p> <p>I have almost hit a pedestrian who stepped out between stationery cars into the cycle lane without looking.</p> <p>I have seen a motorcyclist hit by an oncoming car when turning out of a side street onto Ferry Rd through a line of stationery traffic.</p> <p>Someone is going to be killed as a result of poor visibility due to increased congestion caused by the recent changes. And made worse by any additional changes that increase congestion.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Someone is going to be killed as a result of poor visibility due to increased congestion caused by the recent changes on Ferry Rd. And made worse by any additional changes that increase congestion.</p>	Daniel Leonard
33678	<p>What do you like about the plan and why? Pedestrian crossing with refuge is a good idea. Lots of people use that area and want to cross the road</p> <p>What don't you like about the plan and why? Speed humps, despite what the Coulcil seems to think, are not a good idea. Long term, they cause issues with car suspension. Slowing traffic down may seem fine, but it causes a flow-on effect, which causes delays and other problems down the line.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p>	Chris Fleming

	<p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans?</p>	
33679	<p>What do you like about the plan and why?</p> <p>What don't you like about the plan and why? Because of the humps there will be traffic back up x10. It's already apparent at the Ferry, Ensors,Aldwins intersection. Which in turn is not making it safer because people are running slower, making them more anxious about being on time, causing restlessness and not paying attention. This in turn will cause more accidents, the very thing you're trying to avoid. Not only that public transport will also not be able to run on time due to having to slowdown once again due to the humps!! Making the drivers anxious about running on time, and brassed off passengers as well. They in turn take the lateness out on drivers. Not ideal for anyone involved!!</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans?</p>	Sue McPherson
33680	<p>What do you like about the plan and why? I don't</p> <p>What don't you like about the plan and why? Putting speed bumps everywhere doesn't fix anything. It also just slows down all emergency services. Also damages all cars suspension costs every one extra money</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Stop putting speed bumps everywhere and look at other ways to protect pedestrians</p>	Jay Price
33682	<p>What do you like about the plan and why? Pedestrian crossing is a good idea, but not four!</p> <p>What don't you like about the plan and why? The speed bumps!! Use traffic lights or zebra crossings</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p>	Megan Colmore

	<p>Is there anything else we need to know before progressing these plans? Stop putting speed bumps everywhere!!</p>	
33684	<p>What do you like about the plan and why? Safe crossing areas identified by data</p> <p>What don't you like about the plan and why? Too many crossings in a short space, two expensive to construct, no need for 4 crossings on data shown.</p> <p>A map showing all 4 crossings on the stretch of Ferry road would highlight too many crossings</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Would create too much vehicle congestion in such a short area</p>	Michael Crabtree
33687	<p>What do you like about the plan and why? I don't like anything about the plan</p> <p>What don't you like about the plan and why? Ferry Road is congested enough in peak hour traffic</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans?</p>	Tensia Williams
33688	<p>What do you like about the plan and why?</p> <p>What don't you like about the plan and why? I don't think adding speed humps is the right way to go about it, better signage, road mark the road better and drop the speed limit through that section of road</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? Get the community feed back and don't just go ahead and add speed humps</p>	Thomas Wilkinson
33690	<p>What do you like about the plan and why? Nothing</p>	John Germain

Submissions received on the Ferry Road pedestrian safety improvements, August 2025

ID	Feedback	Name
	<p>What don't you like about the plan and why? I don't think it's necessary. People can already cross safely. No more speed bumps!!!! Creates huge congestion and problems. How many people have actually been hit in these areas?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Waste of rate payers money.</p>	
33694	<p>What do you like about the plan and why? It is good to include more crossings, and the speed bumps are a proven way to reduce crashes and incidents, while not getting in the way of vehicles.</p> <p>What don't you like about the plan and why? Nothing</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	Harrison McEvoy
33697	<p>What do you like about the plan and why? Safe crossing points on Ferry Road are essential. It's such a busy road and people need to be able to cross safely and potentially have refuges to wait safely. Wheelchair users, mobility scooter users, mobility walker users and parents with prams need to be able to get across safely and struggle to do so. I've spent time in a wheelchair and tried to cross using it. It was impossible to wait in the existing pedestrian island. I've seen people in wheelchairs having to stop traffic to get across safely (photo evidence supplied)</p> <p>What don't you like about the plan and why? It's taken too long to get to this stage. Over five years is too long to wait after a pedestrian fatality (See attached photo). It keeps the joint use of the footpath for car parking.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans? If there is a way of doing the pedestrian crossings without the humps, I'd like that to be a potential option. I'd hate for a backlash against speed humps stop the installation of the pedestrian refuge islands. If there is a way of removing the car parking on the footpaths as well that would be great. That's one reason why it's hard for people in wheelchairs, using prams, walkers etc to get across the road. The kerbing keeps breaking up due to the vehicle use across the footpath - making it dangerous if a wheel hits a broken piece of road/footpath. See photo evidence</p>	Marie Byrne
33702	<p>What do you like about the plan and why? There are often people crossing along ferry road and it can be nerve wracking as a driver knowing if they are about to step out in front of you or not. The slower speeds will help. Bikers also sometimes zip across in front of cars to cross the the median so these crossing points may make it easier and safer for them to cross.</p>	Bridget Malcolm

	<p>It makes sense slowing speeds near the bus stops also as this is a popular crossing point</p> <p>What don't you like about the plan and why? I think they're good as long as they don't create confusion about whether or not it's a pedestrian crossing- I.e needs to be clear who has right of way</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	
33704	<p>What do you like about the plan and why? It is great that some focus has been brought back to Derry Road safety. I have been actively engaged with this process for over 10 years and for the most part, Ferry Road has remained unchanged.</p> <p>What don't you like about the plan and why? Speed bumps on Ferry Road. The existing ones at the intersection of Aldwins is terrible. Motorists going straight accelerate to make it through the intersection on a Green then brake at the speed bump. Traffic backs up in the in resection. Additionally, I'm seeing right turning traffic now turning in front of briefly slowed oncoming traffic, narrowly missing cyclists and the oncoming vehicle as they accelerate after the speed bump. They have genuinely made this intersection less safe. Just consider a right turning arrow!</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? Ferry Road is a necessarily unpleasant road to walk, drive or bike. Separate the footpath from the road. Ever tried walking down there with a dog, pram, small children or all of the above? Perhaps see about winding the footpath inside Edmonds Gardens in order to extend to two Eastbound lanes at Ensors then pedestrians actually have a nice experience. Spend some time in Peak traffic observing the speed bumps on Ferry Ensors to understand why they aren't working with the current traffic light sequence.</p> <p>There remains ambiguity and safety concerns regarding cyclists continuing East on Ferry Road from the Nursery Road, Wilsons Road cypeway departure. Still no signage or visibility enhancements for the road users and residents along what is supposedly road but is also residents' access to their properties along this stretch. I'm coming home to 227 Ferry Road after school and kindy pickups, turning into oncoming cyclists flying through what they think is a cypeway on which they have right of way. It is extremely stressful and we suffer daily abuse from cyclists not understanding that it is how we get to our driveways. We've had council and engineers look into this and be horrified. Nothing has been done and it is a miracle nobody has been injured or killed yet. Thanks for your consideration. If this reaches anyone and something is done, I want to know your name because you'll have done more than what anybody else has achieved in the 16 years we've been trying to have this resolved.</p>	Amy Young
33706	<p>What do you like about the plan and why? Pedestrians definitely need a safer space to cross the road and they are in a good location</p> <p>What don't you like about the plan and why? The cost, hopefully (as other projects seem to cost a crazy amount of money to install) isn't too much for a simple fix for the area.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Don't know/not sure</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p>	Shauna synnott

	<p>Is there anything else we need to know before progressing these plans?</p>	
33708	<p>What do you like about the plan and why? I like the speed bump and islands, it's much easier to cross with islands in the middle</p> <p>What don't you like about the plan and why?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans? I hope they have lighting specifically over them, some people dress like ninjas and think cars can still see them</p>	Grace Lynskey
33710	<p>What do you like about the plan and why? I do not like this plan!</p> <p>What don't you like about the plan and why? I think this plan is absolute rubbish!! Putting speed humps in here is about as ridiculous as putting the speed humps down at the Ferry/Aldwins/Ensors Rd intersection (where you were told by the locals not to do it, that this was a stupid thing to do, clearly now proving its point!). The bumps further down the road have caused this congestion up near Mathesons because traffic can no longer flow properly through the Aldwins/Ensors intersection. I have witnessed this at different times of the day when traffic used to flow smoothly before those bumps were in.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? What does make things difficult here is the merging of the two lanes to one and people then slowing down suddenly to turn into Mathesons Rd. THIS is what causes incidents. Going from two lanes to one and then speed bumps is a recipe for disaster! You can't stop people from being stupid at crossing the road. They cross wherever they like and more likely than not, won't even use any pedestrian crossing if you put it in there. Please listen to the locals who use this road frequently. We're sick of our rates being wasted on things we don't want! And what about emergency services?! They don't want them either!</p>	Angelina Craven
33711	<p>What do you like about the plan and why? I dont like it one bit</p> <p>What don't you like about the plan and why? Its congested enough down there with the stupid road humps, adding more is going to back right up and make more dangerous as everyone be in a hurry.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p>	Jaimi Cameron

	<p>Is there anything else we need to know before progressing these plans? No more road humps</p>	
33714	<p>What do you like about the plan and why? Although I do not walk around this area, I acknowledge the need for pedestrian crossings across this portion of Ferry road as I do cycle and drive along here regularly and see people cross the road using the median strips or raised islands. Purpose-built pedestrian islands are a great way to facilitate road crossings without physically stopping vehicle traffic - I make use of them in other parts of town when I am walking.</p> <p>What don't you like about the plan and why? Multiple raised traffic humps on a key road. I believe the islands alone provide sufficient aid to pedestrians needing to cross Ferry Road. I do realise that the speed humps will tend to make vehicles slow down, however I question whether this outcome considers what affect the speed humps may have on a wider scale as it will naturally disrupt traffic negatively, regardless of the time of day.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans? I hold the believe that a good proportion of pedestrian-vehicle accidents along this area have ocured due to pedestrians trying to cross the road quickly in order to avoid standing in the median strip which is used by turning vehicles, and that providing a safe space in the middle of the road will allow people to cross without the anxiety of having to stand in an active part of the road while waiting for a sufficient gap in traffic.</p> <p>The potential for traffic to come to a halt 'upstream' can create dangerous situations for cyclists as the cycle lane will likely have moving cyclists along a line of stationery cars, which can create dangerous areas with vehicles turning through gaps stationery traffic without taking into account the active cycle lane. Although this currently occurs every weekday, it could make this problem worse.</p>	Sean van Schouten
33717	<p>What do you like about the plan and why? Pedestrian crossings are a good idea</p> <p>What don't you like about the plan and why? Speed bumps- the ones you've installed on the exit of intersections are a real hazard. Drivers don't expect them, and they often almost cause a bunch of cars to rear end each other. Having speed bumps on the entry to an intersection is weird enough but understandable. Just don't do it any more on the exit- you will cause more accidents. I am a cyclist and often have people swerving left into my cycle lane when they realise there is a speed bump after the intersection.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans?</p>	Robbie Averill
33718	<p>What do you like about the plan and why?</p> <p>What don't you like about the plan and why? I'm not sure if the safety of cyclists has been considered in this. This is very important to me.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands?</p>	Rosie Grant

	<p>Overall, do you support the Ferry Road pedestrian improvements? Don't know / Not sure</p> <p>Is there anything else we need to know before progressing these plans? Please make sure this won't be unsafe for cyclists e.g. if cars get backed up, they can usher other drivers through queues of cars to turn into a side street and often don't check for cyclists before doing so.</p>	
33720	<p>What do you like about the plan and why? Great that attention is being paid to Ferry Road as it is a major road used by many in the eastern suburbs. Pedestrian safety is also important.</p> <p>What don't you like about the plan and why? As you probably noticed in your camera tracking, Ferry Road is incredibly congested and experiences traffic back ups many times of the day, on weekdays and weekends. Although pedestrian safety is important, adding more speed bumps to this road is not the answer. Please give us some other options to consider. I would imagine that first focusing efforts on making the road less congested like adding a bus lane to encourage public transit and take some cars off the road would also be a way to increase pedestrian safety - the traffic is the problem, and speed bumps will only cause more traffic jams and frustrated drivers.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Thank you for investing in Ferry Road. Please come up with another plan to present to us, speed bumps are not the answer. The new speed platforms on Ferry and Ensors has make traffic worse and (anecdotally) made drivers frustrated, making poor decisions. We need improved roads, infrastructure, and public transport, not just more speed bumps.</p>	Kara Scherer
33723	<p>What do you like about the plan and why? Installing a pedestrian refuge may be sensible, but the effectiveness of speed humps in addressing this particular challenge is highly questionable.</p> <p>What don't you like about the plan and why? strongly oppose the installation of speed humps as proposed. While improving pedestrian safety is important, speed humps are a blunt and unnecessary measure that worsens existing issues on Ferry Road. Traffic congestion is already a serious problem in this area, and the addition of speed humps will only increase travel delays, vehicle emissions, and driver frustration.</p> <p>I also question the basis of the data informing this proposal. The area often sees unpredictable foot traffic from vulnerable individuals, including homeless people and those affected by drug use, who are unlikely to adhere to designated pedestrian crossings. Installing a pedestrian refuge may be sensible, but the effectiveness of speed humps in addressing this particular challenge is highly questionable.</p> <p>I urge the Council to reconsider this approach and instead explore smarter, less disruptive solutions that balance road safety with traffic efficiency.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Don't know / Not sure</p> <p>Is there anything else we need to know before progressing these plans? 	I urge the Council to reconsider this approach and instead explore smarter, less disruptive solutions that balance road safety with traffic efficiency.	
33726	<p>What do you like about the plan and why? Yes to more speed bumps!!</p> <p>Since the huge queues caused by the raised islands at Aldwins Rd I have witnessed several near misses with cars trying to turn in and out of side streets through stationery queues of cars which have no chance seeing cyclists in the cycle lane.</p> <p>What don't you like about the plan and why?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	Avnish Goyani
33727	<p>What do you like about the plan and why? I think the islands in the middle of the road for pedestrians is a good idea, giving them a safe place to cross.</p> <p>What don't you like about the plan and why? I think adding four sets of speedbumps is a bad idea, Ferry Road is a main artery into and out of the city. This is just going to slow travel times down even more, make drivers more frustrated and angry, and more likely to make poor decisions. (ie driving too fast over the speed bumps, making them a hazard).</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans?</p>	Marcel Peek
33728	<p>What do you like about the plan and why? Burns more fuel.</p> <p>Go for traffic islands they do work but with no bumps</p> <p>What don't you like about the plan and why? If the council is anti green go for the bumps. If we think green the use of speed bumps are certainly fuel users both busses and cars. If the council has a go for pollution go for the bumps.</p> <p>Tennison St is a mess</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Don't know/not sure</p> <p>Overall, do you support the Ferry Road pedestrian improvements?</p>	Allan Bain

	<p>What don't you like about the plan and why? Its just going to cause even more congestion and headaches for us residents and road users</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Make the traffic flow freely then there wouldn't be such a backlog and people wouldn't make dangerous decisions to get to their destination</p>	
33864	<p>What do you like about the plan and why? Pedestrian refuge islands. These would improve safety without negatively impacting the traffic slow.</p> <p>What don't you like about the plan and why? Speed Humps. Ferry road is a busy road link and due to the number of vehicles that use it speed humps are not appropriate here. They would have a large negative impact on the traffic flow, which will compound when the road is busy causing delays and driver frustration. Safety can be improved by other means, without disrupting traffic so much on a main road.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? The plans would be reasonable, if it wasn't for the speed humps.</p>	David Thomson
33887	<p>What do you like about the plan and why? Pedestrian crossings.</p> <p>What don't you like about the plan and why? Raised pedestrian crossings that slow down traffic.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? People do need a place to cross safely. But people also need to learn patience. Drivers and pedestrians. A zebra crossing is all that is required. Not raised. This is a main thoroughfare for many trucks, carrying loads, buses & as it is, gets extremely backed up at the slightest sight of peak hours. This will slow it down more. Educate on patience instead of trying to dumb everything down so much.</p>	Jessica Taylor
33894	<p>What do you like about the plan and why? pls include some names of firms occupying the site. These are what I notice when I travel past, not the street numbers</p> <p>What don't you like about the plan and why?</p>	chris abbott

	<p>at first glance it looks great</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans?</p>	
33895	<p>What do you like about the plan and why? As mentioned, there is no place to safely cross Ferry Road, which effectively acts as a wall between the neighbourhoods on either side. I like the speed humps, as we all know that speed limit signs are routinely ignored, so forcing people to slow down with humps is a far superior solution. I like the no-stopping areas around the crossings to make it easier for pedestrians (especially children) to see and be seen without being blocked by a truck.</p> <p>What don't you like about the plan and why? I'd prefer pedestrian crossings, but I understand that the cost of these would be much higher. As the built environment changes in this area to higher density, with more people on foot, hopefully these crossings can be upgraded.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	Patrick Kennedy
33927	<p>What do you like about the plan and why? I hate everything about it.</p> <p>What don't you like about the plan and why? It's bad enough trying to drive down Ferry Road towards Woolston without putting anymore of those idiotic speed bumps in. Getting down Ferry Road is a bloody nightmare since the new speed bumps have been put in. And to the person who thought of this stupid idea all I can say is you need to find another job.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Stop wasting us ratepayer's money on these idiotic ideas. Deal with issues that matter.</p>	Cynthia Johnson
34011	<p>What do you like about the plan and why? a crossing is needed, not 4. put the crossing in where the medical center and 24 hour bakery is. that will be enough.</p> <p>What don't you like about the plan and why? 4 is too many</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p>	Karl Russell

	<p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? fix the underground infrastructure first. the road has been opened twice recently to fix the stormwater... and still not fixed. also the driveway outside my house is dangerous turning left.</p> <p>the speed humps at the ensors/ ferry road intersection that was just installed is enough to slow the traffic, and drivers are courteous along this stretch of road.</p> <p>the speed hump as you are leaving the intersection on ferry road heading towards Woolston is the dumbest thing i have ever seen... again it keeps the traffic slow, but makes it harder for traffic wanting to turn right onto Aldwins road for school student drop off, coming the other way!</p>	
34019	<p>What do you like about the plan and why? I like that crossing Ferry Rd will be easier and safer! I was actually stuck here trying to get across near Bordesley St just the other evening and it was quite stressful even at 7pm at night, and hate to think what it would be like if you had a child, children's buggy or a wheelchair to navigate, or if it was peak hour traffic. I also think the speed humps are a good idea - they generally seem effective at slowing traffic, and I think that's why they evoke strong reactions from some people - because unlike a sign telling you slow down, you can't ignore them as easily. I also like that the cycle lanes will be highlighted with the green paint - Ferry Road can be quite full on to cycle down.</p> <p>What don't you like about the plan and why? I can't really comment on the detail as I live further down Ferry Rd, so I'm not super familiar with this area and how residents use it.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans? Thanks for making this area safer to cross, and safer to cycle down.</p>	Anne Heins
34021	<p>What do you like about the plan and why? I like nothing about the plan.</p> <p>What don't you like about the plan and why? I'm sick of the council making it unpleasurable to drive around Christchurch with the constant building of speed humps and lowering speed limits in an attempt to make people use their undesirable public transport. It's a waste of money and foolish what the council has done to the roads over the last decade. I've crossed Ferry Road on foot many times without getting hit by a car. How many people per annum get hit by cars in these locations that would justify this wasteful spending?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans?</p>	Matthew Dauwalder
34194	<p>What do you like about the plan and why? I only ever drive a car down this road. I like that you are improving the area for the people who live in the area. I know what it's like trying to cross a busy roads in Christchurch and overseas where roads are very anti people</p>	dave gardner

	<p>What don't you like about the plan and why? na</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans? Please try to make the edge of the footpath/road as flat as possible so it's not hard for people on mobility scooters, prams, children bicycles to cross. A good way to do this would be to raise the crossing area on the road higher, maybe extend the speed bumps so people are crossing over the bumps? since no stopping is going on the sides of the road, is it possible to make the pedestrian islands even wider, by pushing the car and bicycle lane more towards the footpath?</p>	
34224	<p>What do you like about the plan and why? Support pedestrian crossings on Ferry Road as this is a difficult road to cross.</p> <p>What don't you like about the plan and why? Concerned that when exiting Ryan Street by car it will be very difficult to turn right particularly in heavy traffic. Currently you can use the centre lines to pull out and merge into traffic. The island appears to make this difficult. Ryan Street is a no exit street with an increasing number of houses and traffic from the school. We would support a concept that includes better ingress and egress onto Ryan Street particularly when traffic is backed up at the lights. It can be extremely difficult to enter the street from the left on Ferry Road too in busy traffic.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? Please spend time observing traffic movements onto and off Ryan Street in heavy traffic.</p>	Treena Davidson
34270	<p>What do you like about the plan and why?</p> <p>What don't you like about the plan and why? RYAN STREET CROSSING: MY OBSERVATIONS -very few people cross the street at this point. I am very aware of this as I back out of my driveway many times a day. I need to be very aware of cars/bikes turning out of Ryan St and heading to town as we would crash ,if I did not wait for them before proceeding to back out on the road. I rarely encounter pedestrians coming across at this point. I therefore question the need for "the improvements " at this location. - I see students from Linwood high School using the lights to cross at the Aldwin/Ensors/Ferry Rd intersection. They walk from the school thru the playing fields, then thru Edmonds gardens, rather than use Ryan St to gain entry to the school (from the South) -Traffic heading out of town is often backed up from the traffic lights many times during the day and especially between 4.30 and 6pm (It would be easy to cross the road at these times as the cars are at a stand still). This also makes me wonder why would you put speed humps on part of the road where traffic is often at a stand still and when there are speed humps only 100 meters up the road before the controlled intersection.</p> <p>ISSUE RELATING TO 322 FERRY RD (property in 2 titles)</p> <p>- I note that the crossing will not affect my entry to my property. I however am not that young and may not be living there for much longer. My property is over 1300 sq metres and is in two titles. Developers are continually wanting to buy the two sites. I note that for the east title site (should it ever be developed in the future, which no doubt it will be, as my house is 135years old) drivers</p>	Anna Ward

	<p>would not be able to turn directly into this site (because of the structure of the proposed crossing restrictng access), if they come from town. Instead they will need to drive to the Aldwins/Ensors rd intersection and do a U turn there. The road is a single lane and it would be difficult and dangerous to do this, and in doing this would hold up turning traffic going into Ensors rd.</p> <p>MY OVERVIEW/CONCLUSION The development of four crossing over Ferry Rd between Wilsons Rd and Aldwins Rd would be OVER THE TOP of what is required in terms of improved safety. I would be happy to discuss these issues further</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans?</p>	
34271	<p>What do you like about the plan and why? I like the the expansion of refuge islands to make it safer for pedestrians and the no parking lines to improve visibility for all.</p> <p>What don't you like about the plan and why? I'm not keen on speed humps and would like to see instead a speed reduction for this stretch of road. One thing that speed humps create is to place cars into their most fuel inefficient mode of driving, that is, slowing down and speeding up multiple times. This creates a lot more pollution which the city has a legal and strategic obligation to reduce. pol This is contained in the likes of the Local Government Act 2002 and the RMA Act 1991. The Councilil has also commitments to reduce emmissions to set targets to net zero. There is already speed humps at the Ferry, Aldwins, Ensors intersection and I'm concerned that already frustrated drivers will react badly to four more sets of them in a short stretch of road. This would also cause even more congestion to the morning and afternoon traffic which is pretty bad already!</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? I support lowering the speed limit for the safety of pedestrians.</p>	Bill Marks
34287	<p>What do you like about the plan and why? good that pedestrian access across Ferry Rd is addressed.</p> <p>What don't you like about the plan and why? do speed bumps actually work?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Don't know/not sure</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans? Im not sure it would be necessary to have a give way sign at the end of Ryan street as its pretty obvious you have to give way. I only hope that this work does not make it harder to turn right right</p>	irene Marks

	<p>out of Ryan street. Hopefully the "island" wont be too close to the intersection. From your survey its interesting to see that most people crossed the road out of the mad butcher to Isabelle Pl rather than by Ryan Street. Would it be better placed where the people cross?</p>	
34297	<p>What do you like about the plan and why? Nothing.</p> <p>What don't you like about the plan and why? The proposed plan will contribute to 400m of stalled traffic along this section during the most of week day hrs and a lesser extent on the weekends. This is a major road.</p> <p>Speed humps have the adverse affect to impede the flow of traffic. Traffic engineering analysis is known to show that vehicle flow along the entire Rd will be restricted to the slowest speed at the restriction point being the speed humps.</p> <p>Speed humps contribute to decreased safety for vehicles. The humps are a hazard to low slung vehicles. Drivers loose awareness and attention when confined to vehicle queues exacerbated by additional speed humps.</p> <p>There is already two island crossing at each end of the proposed plan. Oliviers Rd and near Aldwins Rd. Why do we need more.</p> <p>The proposed additional speed hump pedestrian crossings have refuge Islands in the middle of the road. These are a major hazard to emergency vehicles and prevent easy traffic by pass.</p> <p>The proposed crossing near Ryan St is silly. From observation there seems to be no significant foot traffic trying to cross at this location. Ryan St does not seem to be the favoured access point to the high school. Most go through the Edmonds garden. The published foot counts seem to confirm this.</p> <p>Ferry Rd can generally be crossed safety as it is often congested or stalled with back up traffic.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? 	<p>Wider footpaths = shorter crossing distances</p> <p>More designated places for people to cross, slower speed limits, speed humps</p> <p>What don't you like about the plan and why? Again, a missed chance to create protected cycleways to connect into the network. Easily achievable. Why another unnecessarily wide flush median (why?!?)</p> <p>Why the three month wait between consultation, community board session, and another three to six month wait for construction? This could all be done and dusted in 2025. People want bang for their buck from their rates. This looks like a pretty straight forward project and could be done much more quickly. Risks being paused "cos it's election season"</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans? Commend the concept and won't let perfect get in the way of good. However, again, the lack of protected cycleway is almost a bingo card item at this point.</p> <p>Too much of a chance for people with their reckons to challenge what is proven to work. They've got honest anxieties, and that's understandable, but they're a vocal minority</p>	
34366	<p>What do you like about the plan and why? Nothing</p> <p>What don't you like about the plan and why? No-parking zones, islands & speed bumps aren't going to improve safety. All it's going to do is make exiting Bordesley Street onto Ferry Road, heading toward Moorhouse, even more difficult than it already is. You'll make already frustrated drivers even more frustrated, meaning a potential increase in accidents.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? It would be better if there were traffic lights at the Bordesley/Ferry intersection, and "keep clear" zones marked at the intersection.</p>	Melissa-Lee Mitchell
34373	<p>What do you like about the plan and why? Nothing</p> <p>What don't you like about the plan and why? 4 crossings and islands in such a small space is unnecessary and over the top. Why is a painted pedestrian crossing not sufficient? This plan is uneconomic given how much it will cost to benefit only a handful of people.</p> <p>Ferry Road is a major transport thoroughfare, slowing it down with more speed bumps and crossings will make congestion worse, no consideration seems to have been given for this in the plan. Why can't pedestrians walk a few meters to an already existing crossing? It seems this plan may in part be motivated by laziness on the part of some pedestrians.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p>	Jose Aquino

	<p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? These speed bumps will impede emergency services using Ferry Road.</p>	
34378	<p>What do you like about the plan and why?</p> <p>What don't you like about the plan and why? There will be too many speed humps down Ferry Rd with this proposal. Zebra crossings are an effective way to cross without needing speed humps. Speed humps should remain at intersections with lights. I already frequently drive over the high humps at the intersections of Ferry Rd/ Aldwins Rd, and also at Aldwins/ Linwood Ave. My preference is to have a zebra crossing or a dedicated island for pedestrians only and have seen these work very effectively.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans?</p>	Dan Harris
34575	<p>What do you like about the plan and why? I like your idea removing the carparks around the crossing. That's really necessary.</p> <p>What don't you like about the plan and why? I don't like that the crossing close to Olliviers Road is planned to be after the intersection instead of before the intersection, like it is now. That's further from the bus stop so many people will still cross in a different place, closer to the bus stop.</p> <p>The speed bumps don't seem great to me either. They will stop the traffic even if there are no people crossing the street at all. It would make more sense to install a traffic light instead. This will also greatly help people with reduced mobility to cross the street there. I often see a guy in a wheelchair who waits for ages there because the cars just don't stop for him.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Don't know/not sure</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? I'd really appreciate if CCC also looked into crime safety in this area too. It's gotten much worse in the past year.</p>	Aleksandra Nakusova
34595	<p>What do you like about the plan and why? Safer for pedestrians</p> <p>What don't you like about the plan and why? I assume all crossing will have bricked platforms. That would be good. 4 speed humps is quite a lot, maybe not for all crossings. Just the ones opposite Olliviers and Mathesons.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Don't know/not sure</p> <p>Overall, do you support the Ferry Road pedestrian improvements?</p>	Dean Walker

	If people wish to cross a busy arterial route they need to factor that into their thinking. This idea that traffic in both directions needs to be impeded so one person can cross the road like some grand parting of the red sea is absurd.	
34724	<p>What do you like about the plan and why? A couple of crossings in strategic positions may work to help pedestrians</p> <p>What don't you like about the plan and why? This plan is poorly thought through. Peak hours traffic is high volume and is very slow so no issue for Pedestrians and most cross where they choose and will not use crossings. They speed humps on both sides of Ferry Road crossing is very dangerous and badly done so more will only cause more issues. Having lived in this area for 40 years I have never seen traffic management worse.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? Signage to support islands and crossings only needed. Some Pedestrians need to take responsibility for their own behavior</p>	Christine Speak
34726	<p>What do you like about the plan and why? Refuge islands making it easier for pedestrians to cross</p> <p>What don't you like about the plan and why? Speed humps, after the installment of speed humps at Aldwins road the traffic on Ferry Road is much worse. Fewer cars are able to pass through the intersection causing congestion. Don't want more congestion in my local area.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? The speed humps will lead to more congestion on an already busy Road. This will inadvertently make it more dangerous for pedestrians due to more conflict points, queued cars or trucks may hide pedestrians waiting to cross. I have witnessed frustrated drivers driving dangerously along this stretch of road, more traffic may lead to erratic movements of drivers and lane change related crashes. I have witnessed on numerous occasions drivers using the cycle lane to undercut traffic.</p>	Rachel Peters
34729	<p>What do you like about the plan and why? Helping pedestrian cross safely. That will also have the good effect to stop the continuous flow of cars</p> <p>What don't you like about the plan and why?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	Antoine Desnos

	<p>What don't you like about the plan and why? The raised speed platforms are absolutely ridiculous. They cost more money than the council or us ratepayers can afford. They achieve nothing other than congest the roads.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Stop spending money we don't have. We cannot afford to carry on like this any longer.</p>	
34743	<p>What do you like about the plan and why? Nothing. It is such a waste of money and time that could be better used for more worthwhile projects.</p> <p>What don't you like about the plan and why? Costs Further adding to the congestion that is already bad enough. Cars don't travel fast during high peak times due to traffic congestion, which is also when most of the pedestrians Will be crossing. The speed bumps aren't great for cars Those who are going to travel fast still do with the bumps anyway.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans?</p>	Lisa Wright
34748	<p>What do you like about the plan and why? The pedestrian islands are a good idea as it the number of cars and people trying to cross can be a problem</p> <p>What don't you like about the plan and why? The speed humps, the Aldwin and ferry road crossing is a joke now with less traffic getting through and longer wait times meaning I see more people running oranges and reds in frustration. It isn't improving safety at all especially as it's got crossing lights for pedestrians.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans?</p>	Cara Thomson
34750	<p>What do you like about the plan and why? It is really important to have safer places to cross in the areas identified. I drive Ferry Rd everyday, and almost every day there is a pedestrian crossing traffic unsafely. Having safer places to wait in refugee islands is a great idea. However, having four speed bumps down the section of road will cause major delays and congestion on the road.</p> <p>What don't you like about the plan and why?</p>	Kim Turner

Submissions received on the Ferry Road pedestrian safety improvements, August 2025

	<p>I don't think four speed bumps are necessary, they will slow traffic too much and cause too much congestion. During busy times of the day, this is already standstill traffic - which can be safely crossed with a refuge island.</p> <p>The problem is not the traffic going too fast down Ferry Rd, its always very slow... the problem is there is so much traffic.</p> <p>Having some islands and better signage is an appropriate level of action.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands?</p> <p>No</p> <p>Overall, do you support the Ferry Road pedestrian improvements?</p> <p>Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	
34752	<p>What do you like about the plan and why?</p> <p>This uses very granular data to determine the best place for pedestrian crossings, which I think is the best-practice way of doing this. As pedestrians do not have safe places to cross and there have been deaths here in the past due to this lack of crossing points, I think that this plan will be very effective and dramatically improve safety. I support both the pedestrian islands and speed humps, as well as the revised cycle lane markings.</p> <p>What don't you like about the plan and why?</p> <p>It's all pretty good</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands?</p> <p>Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements?</p> <p>Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	Jackson Davey
34757	<p>What do you like about the plan and why?</p> <p>What don't you like about the plan and why?</p> <p>My husband and I are concerned about how emergency traffic and that includes fire, ambulance etc will be able to negotiate the humps, at this time the vehicles travel along the median if this is to raised what happens, if the traffic moves over to the footpath what about the cyclists.</p> <p>We also feel there is no need for this arrangement at Ryan St as the pedestrian crossing is so close.</p> <p>Our neighbour is concerned about the constant thumps of cars travelling over humps might affect the foundations of mostly older houses.</p> <p>If there are to be humps people ask could the humps be painted so they are more visible.</p> <p>The 25 k speed restriction - at peak times the traffic travels about this speed anyway.</p> <p>What does "Bus Friendly Humps" mean?</p> <p>The Flower shop owner is concerned he will not have parking outside his shop - how will his deliveries and vehicles bringing stock be able to do this as there is a bus stop in the area next to his shop?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands?</p> <p>Overall, do you support the Ferry Road pedestrian improvements?</p> <p>Somewhat</p> <p>Is there anything else we need to know before progressing these plans?</p> <p>I write this answer on the behalf of others in the area.</p>	Jennifer Hoskin

	We feel it would be good to have a better crossing outside the chemist/post office and also at Grafton Street but do not support one at Ryan St.	
34760	<p>What do you like about the plan and why? I'm ok with pedestrian refuge islands. They will keep people in a centralised crossing location and hopefully keep crossings more uniform.</p> <p>What don't you like about the plan and why? The use of speed humps is ridiculous on a main arterial route entering the city. I own and operate (for the past 11 years) Claudes Kitchen. A business at 390 Ferry Road, that is reliant on passing customers, and the addition of the speed humps at the Aldwins/Ferry intersection has added nothing but misery to the local residents and businesses alike. We have noticed a 50% drop in customer numbers between the hours of 730am-930am and 2pm until we close at 3. This happened the day of the speedhumps opening due to the traffic being backed up for so long. Adding yet more speed humps will simply drive commuters off this route and add more to the linwood ave entry into town. It can take 5 sets of light changes now to turn right off Ferry Road onto Aldwins heading into town. The traffic is a nightmare. Which just encourages dangerous crossing habits, because people see stopped cars and take their chance. I urge you to reconsider the addition of the speed humps, as traffic rarely if ever hits 50kph during any working hours of the weekday. Maybe a change of the speed limit to 40kph would achieve the same results r.e. lowering severity of crashes, and keeping the traffic flowing smoothly. I urge you to all drive the road, several times a day for a week, to see what it is like in real world conditions before you make any decisions that will affect locals and commuters negatively for years to come. On a side note..... Also consider the removal of the speed hump for traffic leaving the Aldwins/Ferry intersection on Ferry road. Slowing traffic both entering and exiting (but strangely only on the one exit) makes no sense and let's even less traffic through in a light change, causing more people to rush through the changing lights.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Walk a mile in the shoes of the locals before you make a final decision. On our side of town we seem to be seen as people that don't know how to look after ourselves and need direction, when the truth is we are fine, and would prefer support upgrading the quality of our roads and footpaths. You don't see speed humps every 70 meters down Papanui road. But boy is it smooth with nice footpaths, same goes for Wairaki road, Barrington street, Cashmere road.... I could go on.</p>	Paul Middleton
34763	<p>What do you like about the plan and why? I don't like it.</p> <p>What don't you like about the plan and why? Traffic is already terrible, especially after the aldwins rd changes. This will only make it worse.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans?</p>	Benjamin Jamieson
34765	<p>What do you like about the plan and why? I appreciate the focus on pedestrian crossing and safety for pedestrians.</p> <p>What don't you like about the plan and why? I disagree with the addition of more speed humps. Ferry road is still an arterial route and speed humps disadvantage traffic at all times. It would make more sense to have preventative measures only during times when extra safety measures are pertinent. More speed humps will impact businesses along Ferry Road who have already had to bear the impact of extensive road works and changes. It is important to uphold their interests too.</p>	Rachael Norcross

	<p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	
34766	<p>What do you like about the plan and why? Nothing! The new speed bumps on Aldwins Rd/Ferry are just terrible - especially the up ramp coming into Ferry Road from West to East direction. This causes back up resulting in cars stuck in the intersection when the lights are red as cars have to brake to continue through the intersection. Absolutely the worst thing I've ever seen!!!!</p> <p>What don't you like about the plan and why? As above. The speed bumps are an absolute joke and cause havoc on Ferry Road / Aldwins. Cars backed up past Portstone every day and cars stuck in the intersection after the lights are red due to cars having to brake to cross the intersection. This is a MAIN ROAD. There is no place for speed bumps. Build a tunnel under the road. You wouldn't do this on Moorhouse, so why here?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? This Council is ruining this City.</p>	Kate Whithear
34767	<p>What do you like about the plan and why? The pedestrian crossing is a good idea</p> <p>What don't you like about the plan and why? The speed bumps is a terrible idea most crossing are druggys they will cross no matter what . The main reason for a no is traffic gets congested on that road a lot. So it will only bring out more silly people and road rage.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? That you aren't listening to people. I am still waiting for all the kids that will be apparently be cycling from the schools to the pool on smith street when you decided 13 speed humps would be a good idea . I have seen them walk and bus but no kids cycling from the schools to the pool .</p>	Jackie Campbell
34768	<p>What do you like about the plan and why? I don't like anything about the plan. If pedestrians cannot wait for a clear space to cross the road, why should cars suffer. The more humps you put in delays emergency services getting to their destination. Could be a matter of life or death.</p> <p>What don't you like about the plan and why? As a driver, speed humps are a ridiculous waste of money. I know your motive is to get cars off the road but i would hate to be in a bus slowing down the going over the hump then speeding up repeat...</p>	Carla Boyce

	<p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Find something else to spend the money on and let cars move as they were meant to do.</p>	
34773	<p>What do you like about the plan and why? Nothing</p> <p>What don't you like about the plan and why? Everything.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? If you are elderly and lying, by yourself with no one around waiting for an ambulance you will regret putting all these ridiculous speed bumps in. I also look at this from a business point of view, everytime you do these works on Ferry Road, you ruin the livelihood of multiple small and large business owners. Why can't you do the work at once and be done with it rather than ruining everyones lives?</p>	Liam Greer
34775	<p>What do you like about the plan and why? Islands are fine, if you want to do that I don't really care either way</p> <p>What don't you like about the plan and why? Speed bumps are unnecessary and only increase congestion. Ferry Road is a major road and to deliberately increase congestion is just silly. I know staff will claim that it won't increase congestion but that is simply wrong as evidenced by the increased congestion resulting from the Ferry/Aldwins speed humps. There is overwhelming public opposition to more speed humps and council needs to follow the wishes of the residents. Emergency services have expressed their opposition to speed humps and this alone should be enough to put a stop to this nonsense.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Stop wasting ratepayers money</p>	Brian Hill
34777	<p>What do you like about the plan and why? I like nothing about the plan waste of time and money. There is nothing wrong with traffic flow and there mis no congestion whenever I use the road.</p> <p>What don't you like about the plan and why? Waste of time and money will only clog the flow of traffic.</p>	Geoffrey King

	<p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Yes where is the money coming from other than our back pockets!!!!</p>	
34782	<p>What do you like about the plan and why? That pedestrian safety is a consideration</p> <p>What don't you like about the plan and why? The distance between each of the planned pedestrian refuge and speed humps, will only add to an already extremely congested, main arterial road. Perhaps subway or over bridge would be more appropriate, also enabling the flow of traffic better, than the already added speed humps at the ensors rd/ferry rd intersection</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans?</p>	Sam Newton
34788	<p>What do you like about the plan and why? Ferry Rd from Aldwins to Leyden has always seemed it needed pedestrian support, given the length of road and density of users. So this is a much-needed and welcome improvement. I frequently drive the stretch of road, and would welcome more pedestrian support; I also cross Ferry by foot around Barbour occasionally.</p> <p>What don't you like about the plan and why? Going from zero to four speed humps in one step may not be the most efficient for the council. If the costs are a potential hurdle, then I suggest an adaptive approach where CCC installs two initially (at Matheson and at Bordesley), and then conducts the same type of desire line monitoring. You might find that the proximity of the first two installations is sufficient to lower unsupported pedestrian crossings to an acceptably low number. If not, then add the other two. But please include the same pedestrian crossing monitoring after installation to build a dataset to evaluate the efficacy of the work.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	Daniel Collins
34809	<p>What do you like about the plan and why? Pedestrian islands are enough.</p> <p>What don't you like about the plan and why? That's way too many speed bumps. The bumps are bad for cars, it's not fair on those who need to travel in private vehicles. We're all struggling already with cost of living and more wear and tear on vehicles makes this worse. Speed bumps should be for side streets only, not main roads.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands?</p>	Letitia Lum

	<p>No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Where there are speed bumps coming up to lights. The light timing needs to be adjusted as less cars are getting through.</p>	
34816	<p>What do you like about the plan and why? Putting in Speed humps has got out of control with this council</p> <p>What don't you like about the plan and why? Speed humps - Damage to cars</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? Stop wasting money</p>	Jayne Daly
34826	<p>What do you like about the plan and why? Nothing apart from the fact it's trying to make people safer.</p> <p>What don't you like about the plan and why? The speed humps won't make crossing better they just make driving worse. Most of the time traffic is already so backed up and at a stand still that crossing is easy. The rest of the time it's quiet enough to easily find gaps to cross. Stock to adding refuge islands on their own, it's a more than adequate solution.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? Ferry is already horribly congested, this should be a key factor to think about along side pedestrian crossing routes.</p>	Hollie Tilbury
34831	<p>What do you like about the plan and why? There's nothing to like about this plan. No more speed bumps. We don't need more congestion causing speed bumps slowing the flow of traffic.</p> <p>What don't you like about the plan and why? No more congestion causing speed bumps slowing the flow of traffic. Creating problems for emergency services.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p>	Andrew Herring

	<p>Is there anything else we need to know before progressing these plans? Do not continue with this plan. Total waste of rate payers money which could be spent on more important things</p>	
34959	<p>What do you like about the plan and why? the refuge island</p> <p>What don't you like about the plan and why? The speedbumps: Speedbumps are supposed to be designed to suit the intended speed of the road (50kmh) The speedbumps which are currently already there are designed for 30 kmh (as best). This makes the road a lot more dangerous and opens up CCC for liability since i can now damage my car by doing the allowed speed limit. Also putting speedbumps on intersections with traffic lights makes no sense at all, that is not the purpose of a speedbump. The people who came up with this haven't quite understood how speedbumps work. Back in europe I studied as a civil engineer and road (safety)design was a primary part of that. In short the design of the road must fit the intended speed, on Ferryroad that is not the case. Because of this ferryroad now has traffic jams at times where there weren't any, which is bad for the environment.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? Make the design-layout of the road fit the design-speed of the road. This is roading 101. Adding random speedbumps, which size does not match that, is a waste of ratepayers money, makes the road more dangerous and is bad for the environment.</p>	hans smeets
34968	<p>What do you like about the plan and why? It's terrible. It would slow traffic down far to much and create bottle necks further down the road</p> <p>What don't you like about the plan and why? The speed bumps. It's not necessary Pedestrians can use the walk relief areas without needing speed bumps. Stoooooop with he bumps!</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? No more bumps</p>	Liz Murchison
35005	<p>What do you like about the plan and why? I think it's great ferry road is getting pedestrian used. It's super busy and these changes will make it safer for people to walk</p> <p>What don't you like about the plan and why? I think it needs to take into account that there's a major cycleway on the road and ensure the design takes that into account for both cyclist and pedestrian safety</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p>	Molly Magid

	<p>Is there anything else we need to know before progressing these plans?</p>	
35007	<p>What do you like about the plan and why? The plan allows pedestrians to safely cross the road in strategic places along this stretch of road. The refuges make it easier to cross and the speed platforms propagate traffic flows to a sensible speed and encourage more defensive driving.</p> <p>What don't you like about the plan and why? None</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	Alex Fletcher
35054	<p>What do you like about the plan and why? Good to have more focused crossing points and speed management either side to minimise any potential harm</p> <p>What don't you like about the plan and why? Given the amount of traffic, it will be interesting see whether in some cases a priority crossing (eg zebra) might be required in due course instead</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	Glen Koorey
35059	<p>What do you like about the plan and why? I like that you're thinking about Ferry Rd and the impact of heavy traffic on movement between residential neighbourhoods on either side. It creates a disconnect between the eastern fringe neighbourhood hubs (Philipstown, Stanmore, Richmond) and the southeastern (Opawa, Waltham, St Martins) when they have a lot in common, and there's reason to go between. The plan is a win for pedestrians.</p> <p>What don't you like about the plan and why? Doesn't solve the old problem for bikes. The current intersection design nearby allows bike traffic from Nursery to Wilsons, but not the other way! Either you ride in the wrong direction through the lights on the right, or you ride OVER the central hump. Doh! There's a useful cycle route north-south through Philipstown, connecting major neighbourhoods, ruined by a couple of impossible stretches. Such a wasted opportunity. I used to commute with my boy from home (Elm Grove) to school (St Marks Opawa), and it wasn't possible for him to ride this alone.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans?</p>	Matthew Talbot

Submissions received on the Ferry Road pedestrian safety improvements, August 2025

	Might be an opportunity to design the crossings wide enough for bike refuge too? Start encouraging riders to use quiet back streets instead of making such a big deal about cycleways. For many cyclists this is a perfect solution. Nursery Rd *should* be a filled with cyclists... direct north south connections .. low traffic .. Mathesons, Olliviers .. too ..	
35069	<p>What do you like about the plan and why? Nothing this is stupid and a waste of money</p> <p>What don't you like about the plan and why? Everything, no thought has gone into the real issues in this area and the congestion is already getting worse this is only only to make it worse.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Fix the roads and curbs!! The basics need to be brought to an acceptable level before looking at ways to improve safety.</p> <p>Don't waste our money!</p>	Patrick White
35080	<p>What do you like about the plan and why? It's great that people have safer locations to cross Ferry Road. Clearly people were crossing anyway, so allowing them to do so with an island and speed bump to help them is a positive move.</p> <p>What don't you like about the plan and why? None of the proposed crossings give people the right of way. The proposed solution works well in very congested traffic and low traffic, but will still be difficult to cross in busy, but free flowing traffic. Can at least one of the most used locations get a zebra crossing or traffic light?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	Stephen Ashley
35089	<p>What do you like about the plan and why? Nothing</p> <p>What don't you like about the plan and why? Everything- stop the speed bumps</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Teach how to cross the road - not blaming drivers all the time. Growing up we used comment senses before crossing the road. Now don't tell me that cars are traveling quicker no as the were less safe than they are now. You are slowing traffic which causes more problems. This will make back roads busier. Stop this over reaction now you do not have our permission!!! Read the comments</p>	Kevin Johnson

35112	<p>What do you like about the plan and why? Nothing</p> <p>What don't you like about the plan and why? traffic volume already holds up commuters travelling from City to Christchurch East so I believe that the proposal will further exacerbate the issues. Would like to see statistics that show how many persons have been injured whilst crossing this section of road vs the immense costs and hold ups to business's and commuters. We manage to cross Ferry Road from Olliviers Road using the sections in the middle of the road that allow pedestrians to cross one side safely until safe to cross the other side.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Yes cost vs actual statistics of injuries to pedestrians/cyclists in Ferry Road</p>	Charmaine & Brian Rielly
35113	<p>What do you like about the plan and why? There is nothing I like about the plan.</p> <p>What don't you like about the plan and why? Council only wants to slow traffic down and only consider speed bumps and not any other considerations.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? Council needs to remember that motorists pay tax which filters down to business their attempt on Ferry road and Aldwins road cnr has been nothing but poor in their design.</p>	Anthony Planicka
35120	<p>What do you like about the plan and why? I like that the issue of safe pedestrian crossing of ferry road, between ensors and Wilsons roads has been identified. I like that the options have some basis of data capture to determine possible location of crossings. I also like that the bus stops will be better marked.</p> <p>What don't you like about the plan and why? I think that the section could better suit three crossings rather than the proposed four. I'm not convinced a crossing at Ryan is required. I would not like to see any variations which could impact the travel of buses and cyclists, given these are important to reduce congestion.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans? Identify and action properties where hedges and vegetation restrict the width of the footpath. Look at parking issues at the shops near Isabella place. This impacts pedestrian access and cyclists when passing the shops.</p>	Greg Byrnes

35156	<p>What do you like about the plan and why? I agree that there should be pedestrian safety island as it is a busy street</p> <p>What don't you like about the plan and why? I don't like speed bumps. Why? I would do what is designed to do and that is slow the traffic down. Unfortunately, in peak time the traffic is already travelling at a slow speed. Not only that it would cause congestion. We have seen this in a number of areas where the speed limit has been reduced to 30 kmh, just look what has happened along Lincoln Rd and other main arterial roads. I still can't why Montreal St is 30kmh. We have three pedestrian islands placed along Worcester St between Linwood Ave and Woodham rd. Which turns out to be a waste of time due to the fact that there is hardly any foot traffic even on schooldays and speedbumps have been placed by the islands. What I have heard from some Neighbours have told me that they can hear the thumps as the cars go over the bumps as I have observed around the city that lot of drivers don't even slow down even more and that includes buses. I see this often at the raised intersection on Lincoln Rd. And please do not lower the speed limit as this would also lead to congestion</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	kyle haskell
35162	<p>What do you like about the plan and why? Nothing</p> <p>What don't you like about the plan and why? 1) Having looked at the supporting evidence provided in this consultation, you are looking at four changes to this stretch of road when one of the sections of pedestrian numbers is less than or well less than the other three images. Even to the extent of being 5.5%, 7%, 13.5% of the other three, yet you still propose to install speed bumps and islands. 2) There is absolutely no information about accidents involving pedestrians for any of these areas, therefore no information of the harm that needs to be mitigated. 3) Having looked at the images of crossings over two 12 hour periods I note the vast majority of these crossings took place using current islands in the middle of the road. This indicates to me that pedestrians successfully use the current islands, even though between them there are only two designated pedestrian areas for crossing. 4) There are no images for crossings around the Bordesley Street area to justify additional work, especially given only 19 crossings were recorded in the two 12 hours period. 5) That speed bumps are being considered in an area that is often over congested and can be backed, at least on one side of the road, up to half or more of the total distance being considered. Outside of peak times there are sufficient breaks in the traffic which allow safe crossing of the road for pedestrians. 6) The speed bumps designed to supposedly assist with crossing the road are likely to have a detrimental affect on Ferry Road property owners access to and exit from their driveways. Having lived in the area, on Ferry Road, over 44 years, I am used to having to judge the breaks in the traffic to enter and exit our property. But I am extremely concerned that the introduction of speed bumps will greatly change the traffic flow loosing any alignment between the Moorhouse Ave and Aldwin Road lights that create the opportunity to right exit our property. I see this happening because the flow of traffic will have more slowing down points due to the four speed bumps in each direction, so as one direction slows down the other direction is picking up speed, therefore, with different drivers behaving differently it will make it harder to judge appropriate gaps to safely move into traffic flows. 7) With bedrooms in the front of our house I have noise concerns because of vehicles slowing and accelerating due to the proposed bumps which creates more noise than cars travelling at a steady pace. I have noted the ongoing noise from cars travelling over the cords on the road, I assume are for monitoring numbers of vehicles and speeds. These are two small cords but you can clearly hear the thump, thump as each car travels over them, especially at night. Given the noise from a small thing where cars do not slow down, I am dreading the noise from large speed bumps. And speed bumps always seem larger on this side of town.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? I do not see any value in speed bumps, nor in adding new islands.</p>	Mary White

	If work is needed it would be for the current islands to have more pedestrian walkways through them and to ensure they are wide enough for two or three people and level with the road so they are not a tripping hazard, which the current ones appear to be.	
35169	<p>What do you like about the plan and why? I don't like anything about the plan, have you driven down ferry road recently? I think since you did your survey the amount of traffic that goes down ferry road has changed considerably. There is so much less traffic now with a lot of the businesses disappearing from the centre of the city. There aren't a lot of people walking on there. This plan is a complete waste of my my tax which I pay to the government. It would be better spent on enhancing the rail road system. Also from a health point of view I think most of the people living in this area could do with a break from noisy construction for a bit.</p> <p>What don't you like about the plan and why?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? You should know this , but most of the people living in this area have been through a lot of noise and dust from buildings being removed and roadworks. I think going ahead with more is going to really impact on people's health. I think most people a wise enough to slow down when it is necessary and really putting things up above people's heads is it such a good idea with poss more earthquakes possibly looming. Spend it on something else.</p>	Jeanette Ward
35196	<p>What do you like about the plan and why?</p> <p>What don't you like about the plan and why?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands?</p> <p>Overall, do you support the Ferry Road pedestrian improvements? 35242	<p>What do you like about the plan and why? I'm glad this is being address because it is difficult to cross Ferry Road when I'm walking my dog. I want Phillipstown to be more walker friendly.</p> <p>What don't you like about the plan and why? Are the refuge islands enough? I don't trust drivers to stop. The Council needs to be incentivising non-car transport, and reducing the importance of roading for cars over other modes of transport.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans? Please do communication campaigns on why speed bumps are important otherwise drivers become frustrated if they do not see a reason for them. Also, please look into Tuam St- similar problem with it being a major commuting route and it's hard to cross.</p>	Hannah Murdoch
35267	<p>What do you like about the plan and why? I do not like anything about the plan. There is no sense in putting bumps on the road because the traffic is already restricted.</p> <p>What don't you like about the plan and why? Losing carparks because this will impact on local businesses. The traffic will be even more restricted, especially near the lights if speed humps are added. The numbers of pedestrians recorded crossing the street does not appear to be reflected in the locations chosen.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? It would make more sense to put a traditional pedestrian crossing where it is most needed, away from the lights, and possibly near the 24 hour bakery. This would be at a much less cost to the CCC and would require cars to stop for pedestrians.</p>	Tamotu White
35281	<p>What do you like about the plan and why? I strongly support making Ferry Road safer for pedestrians to cross. This applies to all pedestrias, but especially young people, elders, and others who's movement is slower. Pedestrian refuges are good for getting across one direction of traffic flow at a time. Speed humps are good from slowing traffic to safer speeds. Keeping parked cars clear of the approaches to the refuges enables pedestrians and motorists etc to see each other better. New stop and give way signs will help signal the need to stop or slow - safer for cyclists and others.</p> <p>What don't you like about the plan and why?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans?</p>	Kari Hunter

Submissions received on the Ferry Road pedestrian safety improvements, August 2025

	<p>Consider making a couple of these refuges into full (stripey) pedestrian crossings.</p> <p>Please ensure that the pedestrian refuges have dimensions that will allow people with wheelchairs and wheeling cycles (including long ones), etc, can safely use them. I bus, cycle and drive on Ferry Road. (When cycling, I more often use Charles St and Wilsons Rd, where I feel much safer, but sometimes I cycle Ferry Road.) When I want to cross the road with my bike, depending on traffic flow etc, I sometimes feel safer getting off my bike and walking across. Some pedestrian refuges are a bit short for this, and the front or rear wheel protrude into the traffic lane.</p> <p>I would also favour reducing the speed limit along this whole section of Ferry Road to 30kph.</p>	
35282	<p>What do you like about the plan and why? Nothing</p> <p>What don't you like about the plan and why? The places you have highlighted as high use by pedestrians aren't overly high especially near bordesley st which was the least used.</p> <p>The only place I see of value to add pedestrian crossing is in front of the 24hour bakery/dairy - however, there is already an island there! Adding speed bumps would make it even harder for those exiting Olliviers road (Drivers) than it already can be during busy hours. There are lights to cross at at either end (Aldwins & Wilsons).</p> <p>As we (my children & I) often walk Ferry road and safely cross these areas I see no need to waste taxpayers money to make an already congested/busy road have more obstacles. Are there approximate ages provided in crossing details? From what I've witnessed it's mostly adults, and teens, children accompanied by adults, or children crossing at the lights. I previously lived on Ferry road for 20 odd years and can see this only adding frustration not safety, especially as you have not said these will be zebra crossings etc, or given many details.</p> <p>Side note. Why are speed bumps on the east side so high?! I have never experienced them like this in any other part of Christchurch. Are you putting them in where you live or just targeting the 'East'?</p> <p>Please just leave it as it is. I can see people trying to get out of side streets during busy periods and this proposal making it; 1. more difficult, and 2. More dangerous ie cars turning out onto Ferry rd, cars slowing for speed bumps/crossings only to accelerate afterwards, not to mention cyclists by passing bumps.</p> <p>Have you looked into the damage on infrastructure these speed bumps may cause especially with bus use. Many travel Ferry road as part of their route which has been known to damage pipes etc.</p> <p>Removing of car parks on a busy road, adjacent to facilities used by many ie the atm is again making it more dangerous than if proposed changes go ahead.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans? Don't. You already over spend on unnecessary projects increasing rates charges every year.</p> <p>Under 800 people crossing over x2 Busy 12 hour periods, compared to 20K cars doesn't justify huge costs involved, disruptions caused to the negative outcome these would provide.</p>	Sunema Tusa
35310	<p>What do you like about the plan and why?</p> <p>What don't you like about the plan and why? Speed humps!</p>	Wayne Boyd

	<p>Don't need Stop signs at a T-intersection.</p> <p>Stop wasting ratepayers money.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? No</p> <p>Is there anything else we need to know before progressing these plans?</p>	
35313	<p>What do you like about the plan and why? I bike through here regularly and sometimes drive. It is difficult to get across the road as a pedestrian or cyclist to get to various businesses I support slowing traffic down and making it easier to cross the road.</p> <p>What don't you like about the plan and why?</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans? The Smith Street crossing should get the same treatment as it is used by a lot of cyclists and pedestrians.</p>	Anne Scott
35320	<p>What do you like about the plan and why? This is the same for each crossings: <ul style="list-style-type: none"> • Providing a focused point where people cross greatly improves safety. • Speed humps also greatly improve safety by helping ensure speed is not excessive. • The control signage at intersections brings consistency which also helps improve safety. <p>We know people can be distracted while driving or otherwise make mistakes. Safer speeds mean the consequences of those mistakes will be less severe (people will less likely to be killed or receive serious injuries).</p> <p>It has been said, what about night, why should drivers slow down? Fact is people can be out and about at any time - people go to places irrespective of transport. At night it is even more important to travel at a safe speed, as there is not the visibility. There can also be a mistaken assumption there won't be any pedestrians.</p> <p>Also at night drivers can forget to turn their lights on, or have faulty lights. This is a serious problem, on any given walk in the evening I see at least one driver without their lights on (often it is more than one). I'll also see many drivers with faulty lights.</p> <p>In addition to drivers not seeing, the risk with no lights or faulty lights is that pedestrians may not see a vehicle when crossing. This is why speed humps are needed and why they are especially important at night.</p> <p>Sunstrike can also reduce visibility, this is especially applicable on east-west/west-east roads. Again speed humps help ensure safe speeds and reduce the chances of a bad outcome should a collision occur.</p> <p>What don't you like about the plan and why?</p> </p>	Allan Taunt

	<p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? Yes</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Yes</p> <p>Is there anything else we need to know before progressing these plans? Value the science in making decisions. Help people understand the science.</p> <p>Also realise most people are not aware of what it is like to be a vulnerable road user in a collision. Most people think they are better than the average driver and don't believe they will make a mistake. Reality is, everyone makes mistakes (in some cases, people even don't realise they have made a mistake!).</p>	
35323	<p>What do you like about the plan and why? I am making this submission in my personal capacity as a former resident of the area. My submission represents my personal view and does not represent the collective view of either the Council or the Community Board that I am a member of.</p> <p>I support improving the safety for pedestrians and cyclists crossing the road. This is long overdue.</p> <p>What don't you like about the plan and why? I am concerned about the impact of the speed humps on buses (and their passengers), emergency services and other heavy vehicles that use this route. I am concerned that it will lead to more vibrations and shaking for the houses and buildings in this area. This plan doesn't seem to cater for cyclists going along the MCR through Charleston who wish to travel to Te Ara Tai college near Ryan Street or to other locations in Philipstown. I think it would better to have signalised crossing to create gaps in the traffic rather than speed bumps and provide a safe cycling crossing. I am concerned that the plan doesn't make any mention of the condition of the road, the future use of the road for bus priority and the potential road widening to four lanes. If the road is in poor condition and there are future plans then it would be good to know how this works aligns and creates synergy with what is proposed to come after. Otherwise, it is probably more efficient use of resources to install transitional/temporary safety measures and bring work forward to complete and construct the permanent design rather than having to dig up the safety improvements in a year or twos time at considerable cost and inconvenience.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands? No</p> <p>Overall, do you support the Ferry Road pedestrian improvements? Somewhat</p> <p>Is there anything else we need to know before progressing these plans? There needs to be greater transparency with the future plans for this stretch of road. It would be good to be able to see the bigger picture and understand what other works are planned so that informed feedback can be given. For example, if traffic lights or more car parking removal is proposed as part of the bus priority plans, then surely this is very relevant to the feedback people may wish to give on this proposal as the cumulative impact with be greater than what is on this consultation plans. Likewise if the road needs to be fully reconstructed because it is in such poor condition, then perhaps residents would prefer to have that done first to reduce the vibrations from heavy vehicles that currently occur rather than making the problem worse by installing speed humps before fixing it. It would be useful to provide some information to the community about the performance of speed humps in regard to creating vibrations for local residents. And what issues (if there have been any) are in this regard on previous speed hump projects. I know from having lived on Ferry Rd near Leyden Street that there is frequent shaking of the houses from heavy vehicles at present. I would not like to see this get worse.</p>	Yani JOHANSON
35326	<p>What do you like about the plan and why? Hi there good that you are looking at pedestrian safety</p> <p>What don't you like about the plan and why? A big NO! To speed bumps the ones at Aldwins Rd have made the intersection much worse and I have seen a lot more near misses as people suddenly slow then speed up.. It's terrible and they should be removed. So no more! Please.</p> <p>Do you support the use of speed humps to slow vehicles down on the approaches to the refuge islands?</p>	Paul Young
