Q3 **Last Name**

Short Text

McKay

Q4 **Name of organisation/business**

Short Text

Yumm Productions

Q13 **Do you think we've got the category locations right?**

Multi Choice

Yes

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

You have listened to feedback, and expanded the zone for nighttime sound, so more business can thrive, and the nightlife of Ōtuatahi can be vibrant and healthy

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Response No: 2

Contribution ID: **38540**

Q2 **First Name**

Short Text: Marjorie

Q3 **Last Name**

Short Text: Manthei

Q4 **Name of organisation/business**

Short Text: Victoria Neighbourhood Association Inc

Q13 **Do you think we've got the category locations right?**

Multi Choice: No

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: No. There are areas that should not be in Category 1, as explained below and on the attached Supplementary Information

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Please see the attachment

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: The focus of this feedback in on Victoria St & surrounding area only. We do not like anything about what is proposed in this context.

Q18 **What don't you like about the proposed plan change and why?**

Long Text:

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text:

No one should be subjected to noise louder than what medical and public health research (and personal experience) tells us is detrimental to well-being.
Regardless of where or when; regardless of whether there's a Stadium nearby and regardless of whether owners of hospitality / entertainment venues say they can't "survive" unless the noise limit is significantly increased. I am sure that many
people, including those in the VNA neighbourhood, are unaware of the difference between 45db and 60 or 65 db. Council and Council staff would be aware, which makes the Preferred Option even more disappointing and shameful.

See the attached submission on the following page

Feedback on Plan Change 21 (Noise Review) submitted 26 July 2025

From: Victoria Neighbourhood Association Inc vnachristchurch@gmail.com
Supplementary information, attached to the CCC Submission Form, emailed to letstalk@ccc.govt.nz

Background to this feedback

1) The Victoria Neighbourhood Association's boundaries are Victoria St – Bealey Ave – Colombo St – Salisbury St. This covers Montreal, Durham, Beveridge, Conference and Peacock Streets; Gracefield Avenue; Knox Lane and Airedale Place.

2) There currently are 174 members (residents and/or property owners). For our consultation re Plan Change 21, we focussed on the 134 members who live here full-time. To do this, we had to overcome problems caused by inadequate and misleading information CCC posted to residents:

   - The 1st letter dated 3 July, with no mention of Victoria St being one of the "key changes….to allow louder night time noise";
   - 2nd letter dated 7 or 9 July, identical to the first, with no explanation why it was re-sent;
   - 3rd letter dated 11 July, apologising for an administrative error resulting in some people receiving the 1st letter with the wrong name on envelope. The original letter was reproduced on the back—which some people said they didn't even see—with the addition of *"Victoria Street"* inserted into the original sentence. It was not highlighted, there was no explanation about why it was omitted in the first place and, therefore, was completely overlooked or discarded by many.

3) At a meeting with Council staff on 10 July organised by ICON, two VNA members explained that omitting any reference to Victoria St had already caused confusion, with numerous members contacting the Committee to say Victoria St was <u>not</u> affected by the proposed increase in Noise Limit, despite us having informed them otherwise. At that meeting, we asked for another letter to be sent out, with a clear explanation of how/why Victoria St was omitted in the 1st letter and making it clear what was being proposed. This wasn't done (in what ended up being the 3rd letter, referred to above).

4) Because of the poor communication and subsequent confusion, three VNA members undertook to contact as many residents as we could in the available time to make sure they were informed about the proposed changes and implications. We also needed to know whether VNA had a mandate to provide feedback on behalf of members and, if so, what that feedback should be.

5) We managed to contact 62 residents in this stage of our consultation. <u>None said they support the Preferred Option re Victoria St or surrounding streets; 45 explicitly confirmed their opposition.</u> Some said they were going to submit their own feedback too, but we have no idea how many did. From this consultation, and comments received when we first informed members of the Noise Limit Review, <u>we are confident that VNA has a mandate to provide this feedback.</u>

More about Victoria and surrounding Streets

1) The unique configuration of Victoria – Salisbury – Montreal Street intersection means that buildings with a Victoria St address back directly onto Montreal St, with no buffer in between. There is even a pedestrian walkway & carpark connecting the two streets. Directly across (on Montreal St) is a row of historic cottages dating to the 1800s.

Walkway connecting Victoria & Montreal Sts

Location of a post-EQ licensed premise w/ music

Some of the historic cottages on Montreal St, immediately across from Victoria St walkway shown above

2) The one-block long streets adjoining Montreal St (and therefore only a few metres from Victoria St) have a mixture of older, original houses; others from the 1970s-1980s; newer townhouses from 1990s; in-filled dwellings from 2015, as required in the District Plan; and more recent multi-unit developments with very small apartments.

6 Beveridge St

Older dwelling & townhouse from 2000s, 6 – 8 Peacock St

More photos on next page

Early 2000s townhouse & original cottages, 3 – 7A Conference St

Another historic cottage, Montreal-Conference cnr

Renovated original house at 11 Conference St & townhouses built in 2000s

Otautahi social housing, 14-16 Conference St

3) The relevance of the above is that (i) this is an established neighbourhood, where people lived long before any licensed premises with late night trading and (ii) very few houses meet the insulation standards required of new dwellings located near entertainment venues—many have no noise insulation at all. **This makes Victoria St and the streets surrounding it unsuitable for Category 1 noise limit.**

4) The above also answers the comment one Councillor made (during discussion on the LAP or Noise Limit): *"I guess they* [venues] *were there first, so to me that takes priority".* Obviously, that is not the case for Victoria St—**a point we ask Council staff to include in their report / recommendations presented to Councillors after Community Engagement.**

5) The interface between late night trading (soon to be the "default" of 4:00am) and higher noise limit, is likely to make Victoria St more attractive for venues to re-establish here, as was done post-EQs. The impact on nearby residents was clearly document in VNA's 2013 – 2017 Log of Incidents, supported by the Medical Officer of Health, Police, CDHB Liquor Licensing Officers and Crime Prevention through Environmental Design. **Ruling this point "out of scope" (16 July Webinar) is unacceptable. It's a likely outcome of Plan Change 21, and as relevant as any arguments made by hospitality owners about why they want higher noise limits.**

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text: It is vital to the wellbeing of culture in New Zealand that allowance is made for its existence and recognition of such in Christchurch will send a clear message to the rest of the country.
For far too long now, our live music based hospitality industry has suffered from the constraints of noise restrictions. In our 33 years of operation as a live music venue, we have watched so many venues around the country get closed down, the inevitable outcome being the reduction of performance opportunities for touring artists and consequently the discouragement of these arts.

Q13 **Do you think we've got the category locations right?**

Multi Choice: Somewhat

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: The area east of the south east frame. See below.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: No

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text: More flexibility with usage creates opportunity for a more vibrant central city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: It doesn't make sense to me constraining the scope of this planning to the Four Aves. Sure from a planning perspective it's a neat box to work in, and the goal of focusing effort on areas that saw so much damage and change is necessary. But when you look at the reality of 'urban' development on the ground now (particularly hospo supplying stadium related potential), it's skewing east over Fitzgerald, and south over Moorhouse, with the Stadium accelerating the movement, and the planning proposals seem to be ignoring this change - planning for the past? Particularly the region east of Fitz by the south east frame, it's the same type of built structure as inside, with similar businesses setting up. What does this all mean for hospo businesses who want to set up on the eastern city fringe? It's this mixed use activity that helps struggling areas become something, and these same areas offer cheaper rates for the the kind of independent business that make a city vibrant (and CBD change has priced out). It should be win/win, if you let natural change happen. Plan around the stadium. 1km radius around the stadium (easy walk) is a more relevant zone to focus on for these issues, stretching to Nursery and Stanmore, if we're planning for change that's happening right now. Regarding Stanmore Central I'm talking with independent/hospo businesses who can service Te Kaha, the kind of businesses that create positive activity and build value in an area, and collectively we need confidence in planning rules to convince them to put down roots and ultimately enable quality development. Focus on where the issue is relevant please. Blinkers off.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Q17 **What do you like about the proposed plan change and why?**

Long Text

We are generally in favour of the updating of the Central City Noise Rules to more clearly accommodate louder bar and night-club activities in appropriate areas.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

We don’t think the limits are permissive enough for the loudest entertainment activities. And the wide area covered by Category 1 and 2 would support the establishment of entertainment activities in dominantly residential environments where noise would cause unreasonable issues. The rule change also reduces protection of other habitable spaces in Category 2 areas. Refer attachment,
introduction and points 1-2, 4.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

There are a number of wording issues in the Central City rules (either existing or created) that could be addressed as part of this exercise. Refer attachment, point 3, 5-9.

See the attached submission on the following page

Introduction

We are generally in favour of the updating of the Central City Noise Rules to more clearly accommodate louder bar and night-club activities in appropriate areas.

However Category 1 night-time noise limits at 65 dB LAeq and 80 dB LAmax will not be sufficient for the loudest bars with outdoor music or open doors (for example Fat Eddies / Terraces or a revamped Sol Square) and perhaps night-clubs with basic construction. Such venues will therefore be constrained by the limits should residential activities be established adjacent

Conversely the overwhelmingly residential/accommodation areas north of the stadium and to the east to Fitzgerald Ave which are either not commonly acoustic insulated older building stock or are typically insulated to 30 dB Dntw + Ctr or less for newer construction prior to the recent revisions to the stadium contours, are now more likely to have bars established within and will be subject to higher noise limits. We expect these are key residential populations contributing to the Council goal of increased population within the Central City. The establishment of a bar operating at the proposed Category 1 limits and times would reduce amenity and may be contrary to desired planning outcomes.

Primary comments:

1. We therefore favour retaining some areas where residential activities are not permitted with allowance to generate higher noise levels, particularly at night, and reducing the size of the proposed Category 1/2 areas to not include areas where residential is the expected and desired dominant activity. We acknowledge that bars/clubs have established in areas not intended when Central City replanning took place post earthquakes, in spite of the existing rules, however these bars/clubs are typically not complying with Category 2 or Category 3 noise rules and additional scrutiny at consenting stage or enforcement should reduce such incidences. The somewhat increased Category 1 and 2 areas would still allow for increased flexibility of location for typical closed-door bars.
2. Related to exempted outdoor people noise – some of the One Central development is CCZ which isn't explicitly protected in 6.1.6.2.10 and therefore hypothetically a bar could open with noise from people in an outdoor area not being restricted by limits, immediately adjacent to those residential units. Perhaps developer's legal controls on the land usage would prohibit a bar establishing in those areas. Are there other predominantly residential areas with zoning not reflected rule 6.1.6.2.10 that could end up in that situation? Or has Council decided that outdoor areas with unrestricted outdoor people noise immediately adjacent to residential/accommodation is acceptable? (For context, in rule 6.1.5.2.2 only high density residential zoning is provided protection from outdoor areas of bars in Category 3 areas.)
3. The summary of changes on the Council website is inconsistent with the Draft Provisions Rule 6.1.6.2.9 wording regarding the proposed reduction requirements to sensitive activities within Category 2 i.e. the webpage states for Category 2 under the Draft Rules column "*outside-to-inside noise reduction of 35 dB for bedrooms and 30 dB for other habitable spaces"* whereas in the Draft Provisions Rule 6.1.6.2.9, it states "*30 dB Dtr, 2m, nT, w + Ctr for bedrooms.*" We assume the Draft Provisions wording is correct.
4. The Draft Provisions rule 6.1.7.2.1.a.i.C removes the requirement for road traffic noise assessment in Category 1 and 2 areas. In the Draft Provisions Rule 6.1.6.2.9 for Category 2 there is no reduction requirement for living spaces, therefore living spaces may be less protected from road noise than is currently the case via rule 6.1.7.2.3. If this downgrade in assessment standard is not intended, road noise rule 6.1.7.2.1 could apply to Category 2 areas, or apply 30 dB Dtr, 2m, nT, w+Ctr for other habitable spaces in Rule 6.1.6.2.9.
5. Rule 6.1.6.2.9 a.ii states *"…If windows are required to be closed to achieve the internal design sound levels, then a mechanical ventilation system and air conditioning unit are required.*" As Rule 6.1.6.2.9 is providing performance requirements for the façade, internal noise levels in this context does not make sense. Windows will be required to be closed to achieve 30 dB and 35 dB façade reductions. This sentence should be updated to state "*A mechanical ventilation system and air conditioning unit are required."*

Secondary matters:

6. Rule 6.1.7.2.1 is not clear as to whether air conditioning, where required, may only be a single unit located in and serving a main habitable space or must be one or more units serving each bedroom or other habitable space separately. After the previous 6.1.7.2.1 revision Council needed to issue a

missive to say a single unit in a main space was acceptable. If this is still the intent, this could be used as an opportunity to state that clearly in the rule.

7. The emergency generator exemption rule 6.1.6.2.1 refences rule 6.1.5.2.1 and outside of Central City hours only which could be read that the rule is only intended for application outside of the Central City. Assuming the emergency generator rule is intended for use inside the Central City, this could be a good time to reference rule 6.1.5.2.2 and make the hours generic to either case.
8. The approved construction solutions in Appendix 6.11.4 are out of date and from feedback we receive we understand these are not practical construction options. We suggest these are updated or removed. Note the sound reduction limitations of external joinery systems and the absence of industry testing supporting suitability for installation where higher reductions are required such as in 35 dB Dntw + Ctr situations. Secondary framing installation affects operability of windows and complicates access to outdoor areas. The Council could use this review as an opportunity to reset expectations around external joinery framing and bring consistency to assessment approaches.
9. Rule 6.1.6.2.9 requires acoustic insulation for sensitive activities which includes non-residential activities such as care buildings and educational facilities but the rule only gives criteria for bedrooms and “habitable areas” which is a narrower term usually related to residential living only. This discrepancy could also be cleared up.

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think you have extended the Category 1 area to an appropriate space.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The proposed changes from what I can tell will not allow for much live outdoor music to be played. A live band will breach the 65 limit. I think there should be a specific increased noise limit for outdoor live music between the hours of 6pm-10pm with a limit of 75 dB. This will add to the vibrancy of Christchurch and should not affect the residents too adversely if it is restricted to being before 10pm.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Outdoor live music does not seem to be accounted for.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text Independent Music Venues Aotearoa offers our enthusiastic support for District Plan Change 21 and appreciates the extensive work and support Christchurch City Council has provided since our organisation and members' initial submission regarding this issue in 2022.

Music venues are essential cultural infrastructure in Christchurch. They sustain the music and creative industries, contribute immensely to the night-time economy, and are vital to the city's cultural identity and wellbeing.

As it stands, live music venues are vulnerable to land-use conflict, where urban densification can create reverse sensitivity noise issues with new residential activity. Without appropriate provisions within the District Plan that identify their activity and provide a framework for compliance, venues cannot operate with confidence that they will not be restricted, or that future residential development won't generate new reverse sensitivity issues.

The proposed changes in PC21 are an important step in recognising the value that music venues add to Christchurch City. They provide a framework for managing noise that ensures established venues can continue to operate, while also creating scope for the expansion of live music infrastructure and attracting investment in Christchurch's night-time economy.

We appreciate that the proposed overlay in PC21 has been designed to incorporate the majority of operating music venues in the city, as well as adjacent entertainment and hospitality venues. Identifying music venue operations and high-noise activity in the District Plan will ensure that decision-making around residential development is well-informed and mitigates the potential for reverse sensitivity issues.

We also appreciate that the increase of night-time noise limits to 65 dB in Category 1 is paired with a requirement for increased insulation in residential dwellings, to achieve a 35 dB reduction. This will provide clearer provisions for music venues to attenuate sound, while also ensuring that residential developments are appropriately designed for inner-city that does not risk sterilising the culture and nightlife that make Christchurch such an attractive place to live.

The changes to the LIM process that the Council has already introduced are another important measure to ensure developers, residents, and businesses in Christchurch are well-informed about night-time and higher-noise activities in the city. Alongside the proposed District Plan changes, we appreciate the important work the Council has done to engage with and inform the wider public on how noise management is vital to protecting music venue operations and is integral to the vision of Christchurch as a cultural powerhouse and night-time destination.

The music venues of Christchurch are part of an interconnected live music infrastructure across New Zealand. They

sustain our touring network, provide creative and professional opportunities for artists and industry professionals, serve as community hubs, and are central to the cultural identity of the city.

The proposed changes in PC21 are a key step in ensuring these venues survive, continue to deliver for the city, and generate opportunities for the music ecosystem of Christchurch to grow.

Q18 What don't you like about the proposed plan change and why?

Long Text

While the proposed overlay in PC21 incorporates the majority of music venues in Christchurch, it would be valuable to establish a planning mechanism to specifically identify live music venues by their activity in the District Plan and can be utilised as a repeatable tool by Council that might be applied to future music venue locations.

The Council could consider a bespoke overlay that identifies music venue operation (based on delivery of outcomes that support artists, industry workers, community Christchurch arts & NTE strategy, sound management etc) and 'spot-zone' appropriate noise requirements over venues that exist both within the proposed overlay and in other areas where music venues may already exist, or may be looking to establish new business.

We recommend considering the Special Entertainment Precinct model that has been effectively deployed in Australia as a valuable reference.

There is further opportunity within this work to develop a planning mechanism that can proactively respond to the development of Christchurch as a thriving, culturally vibrant city that supports the live music ecosystem.

Q19 Overall, do you support the proposed Plan Change?

Multi Choice

Yes

Q20 Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?

Long Text

The increased noise limits and insulation requirements proposed in the Plan Change are important steps in providing a more practical and achievable benchmark for music venues to operate within. However, there remain fundamental concerns that noise enforcement is still governed by ambiguous legislation, allowing noise to be deemed "unreasonable" by Council officers without the requirement for professional sound measurement.

This creates significant uncertainty for venues. Even when demonstrating best practice and operating in good faith within the established noise limits, an individual may still consider live music a disturbance and lodge a complaint. In response, a noise officer has the authority to shut down operations, confiscate equipment, or issue a fine. Additionally, the accumulation of complaints can jeopardise a venue's ability to retain a liquor licence or continue operating.

It is therefore essential that the Council works closely with the noise compliance team to develop clear best-practice procedures, ensuring that all affected parties can understand and comply with the noise provisions outlined in this Plan Change.

In light of recent announcements regarding Resource Management Act reform, we also urge the Council to advocate to central government for an exemption to allow continued progress on delivering Plan Change 21. Furthermore, we encourage the Council to engage with the Ministry to support the development of legislation that provides appropriate mechanisms for managing noise and enabling cultural activity across New Zealand.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text Any area that includes residential housing that predates the 2015 insulation regulations.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice No

Q17 **What do you like about the proposed plan change and why?**

Long Text We like the fact that there is an acknowledgment that new venues did not in the main gravitate to the part of the city that Council had earmarked with a 60 decibel allowance. In principle, we can see that establishments setting up outside the 60 decibel zone face restrictions in choice of music, etc. We could support that the allowance be raised in certain cases (addressed below). However, we think it needs to be ultimately recognised that these establishment knowingly chose to set up outside the 60 decibel zone.

Q18 **What don't you like about the proposed plan change and why?**

Long Text We don't like an increased allowance to 65 decibels in the proposed Zone 1 and we don't like the extension of limits to 24 hours a day, 7 days a week.

We note that some establishment have been successfully operating at the current upper limit of 60 decibels and within the currently existing range of hours. We can see a case for equalizing the current situation where this can be done unproblematically (see below), but not for raising the current maximum limit or for extending the operating hours.

For example:

The current category 1 (60 decibels) could be enlarged to take in establishments south towards St Asaph Street, where there is a cluster of venues, if there is no housing that pre-dates 2015 insulation standards close enough to be affected. We do not see why residents should be made to arbitrarily suffer from an increase in noise through no choice of their own.

We expressly do not support any change to current arrangements for Victoria Street which is a very narrow strip and at some remove from the heart of the current entertainment district. Venues currently operating there are doing so largely as a historical accident (when the most immediate central city was affected by the earthquakes). And in many cases, venues, or potential venues, back directly onto residential dwellings as a consequence of the street configuration in that location. Furthermore, current limits applying to the area in question were specifically negotiated with affected residents relatively recently and they should not be dispensed with without much more active consultation than has been carried out under the present proposal.

Q19 **Overall, do you support the proposed Plan Change?**

Long Text

Thank you for the opportunity to provide feedback on the proposed changes to central city noise limits.

I acknowledge and support the Council's aim to balance a vibrant night-time economy with the needs of a growing residential and business population in Christchurch's central city. However, I would like to raise some concerns from the perspective of a hotel operator that caters to domestic and international visitors seeking rest, comfort, and relaxation within the city centre.

1. Visitor Accommodation Is a Key Component of the Hospitality Sector
Hotels are an essential part of the city's hospitality and tourism ecosystem. Visitors attending concerts, dining out, and enjoying nightlife ultimately rely on accommodation providers to rest and recharge. Increasing noise limits in the city centre, especially during the night-time hours, risks negatively affecting guest experience, sleep quality, and overall satisfaction.

2. Impact on Guest Experience and Brand Perception
Higher noise levels—especially after 10 PM—could lead to increased complaints, negative online reviews, and reduced repeat visitation. In a competitive market, maintaining a high standard of rest and comfort is crucial, particularly when Christchurch is positioning itself as a premium destination for both business and leisure travel.

3. Burden of Insulation Compliance on Accommodation Providers
Many central city hotels, including those operating in heritage or pre-2015 buildings, were not originally constructed to meet modern acoustic insulation standards. Retrofitting these buildings to comply with increased noise

requirements would place a significant financial burden on operators—particularly small, independent, or recently recovering businesses post-COVID. These additional costs are difficult to justify at a time when the sector is only beginning to regain momentum.

4. Consider Generational and Purpose-Based Visitor Differences
Not all visitors come to the central city for entertainment. Many—particularly older travelers, families, and corporate guests—seek tranquillity and rest. A one-size-fits-all noise increase may deter these visitor segments, potentially narrowing the city's appeal to a limited demographic.

Suggested Alternatives and Considerations:
• Support for Soundproofing at Entertainment Venues:
Instead of increasing permissible external noise levels, a more balanced solution would be to require or incentivize entertainment venues to improve their own internal sound insulation, limiting noise spillover without affecting the broader environment.

• Implement Time-Based Noise Limitations
To balance the needs of a vibrant night-time economy with the wellbeing of residents and visitors, I recommend the Council introduce time-based boundaries for elevated noise levels. Specifically, noise should not exceed a defined threshold beyond a certain hour in the evening, such as after 10 PM or 11 PM—when rest and comfort become a priority.
This approach ensures that entertainment and hospitality venues can operate successfully during peak hours, while also respecting the rights of those in accommodation and residential settings to enjoy a quiet environment overnight. Such a policy would help maintain the appeal of the central city to a diverse group of visitors and residents, including those seeking relaxation, business travellers, and families.

Conclusion
I appreciate the Council's efforts to enhance the vibrancy of Christchurch's city centre. However, to maintain a sustainable and balanced city experience, it is crucial that visitor accommodation is recognised and protected within this planning framework. Supporting entertainment should not come at the cost of guest comfort and long-term tourism reputation.
Thank you for considering this submission.

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text:

I have been working as a lighting artist / engineer / technician for 13 years and I am based here in Christchurch. I have been providing lighting services to many outdoor events around the South Island with a large Christchurch audience, and I have worked on many indoor events run in Christchurch City which are almost exclusively located outside of the four avenues, in creative spaces such as the XCHC and suitable vacant industrial / commercial locations which have a higher tolerance for noise. After years of experience in the night time music industry, where I am responsible for lighting spaces at night time, I have learnt a lot. The primary lesson I have learnt is the importance of creating safe spaces for people to interact. This is achieved by providing appropriate lighting but also many other techniques not related to lighting such as high level of creative artistic involvement, appropriate volume control throughout the night which attendees feel comfortable with, the design of the venue layout, and implementing procedures such as to have Greeters who provide information on the intention and conduct of the event to attendees. I have a strong understanding that when people feel safe in a space, this is the most important ingredient to allow people to relax to be their best selves, people are able to communicate effectively between each other, this results in positive human interactions that allow for personal growth and improved well-being. With daytime activities mostly based around work and family, the night-time allows adults the opportunity to have positive social interactions with others. These benefits are significant, and I do not feel are well represented when the term "night time economy" is referred to. Events are bringing to the people of Christchurch (when done appropriately) a significant improvement in mental health and connection for the attendees. I want to make sure whatever path we choose, we achieve both tasks; to protect the health and wellbeing of residents who live close to event locations and venues, and secondly to protect the night time businesses and organisations who are doing

more than trying to make a living, but who are regularly providing safe spaces for hundreds of residents of Christchurch City, spaces where we see positive healthy human interactions, the benefits of which ripple out into the rest of the community for some time after the event. I am acutely aware of the challenges involved in finding suitable locations required to create these safe spaces, a space which can both support the growth and wellbeing of attendess but also a space which does not have a negative impact on the community surrounding the event caused by both the noise of the music and the noise of people leaving and entering the venue. The locations where my company operates require more than being located within a fixed zone of the city, sometimes being slightly further away from the known night-time area is actually important, as the events we run are trying to make sure excessive consumption of alcohol and bad social behaviour are not tolerated. By being in a location such as the proposed central city area, our events would be exposed to a dis-proportionally large audience of people who are not aware of the conduct by which we run our events, this audience has the potential to bring with them older cultural norms of strong alcohol focused night-time behaviour, this has a dis-proportionally large negative impact on the behaviour and culture of our events. Please consider how any new changes to night time economy noise plan can support the business and venues which are trying to support the Christchurch audience in a positive social way. Realise that alcohol licensing and effective noise management is more about the ability to stay open late and provide a safe space for people to interact than it is about making money. Also consider the reality that venues and events, who for economic or strategic reasons, currently exist outside of the proposed area, or may exist in the future and also want to be supported by the Community and Council.

Consultation: Draft Plan Change 21 to Christchurch District Plan

Thank you for the opportunity to provide feedback on Draft Plan Change 21. Overall, CRC supports the preferred policy options identified in the draft, and acknowledges the balanced approach taken to enable increased business activity in the Central City while managing the effects of increased noise on sensitive activities. Please see the table below for detailed feedback.

See the attached submission on the following page

Clause 3 Schedule 1 RMA consultation – CCC – Plan Change 21 – Noise

Key aspect of draft Plan Change	Position	Explanation	Recommendation
Changes to the spatial extent of noise categories.	Support in principle	CRC supports in principle the changes to the spatial extent of the noise categories which aims to align the category areas with where development has occurred. This will support housing intensification in the Central City while allowing businesses to operate and mitigating the effects of increased noise on sensitive activities. CRC considers that the draft changes give effect to Objective 5.2.1, Objective, 6.2.6 and Policy 6.3.6 of the Regional Policy Statement (RPS) It is noted that the draft Category 1 noise limits and insulation requirements favour venues over noise sensitive activities. This may be an issue if there is land suited to high density residential development that is included in the expanded Category 1 area. Objective 6.2.2 and Policy 6.3.7 of the RPS direct that housing intensification should occur in the Central City.	Retain approach of managing noise by changing the spatial extent of noise categories. Changes to the current mapping should be considered where there is opportunity for significant housing development.
Option to remove some older residential areas with no sound insulation from the expanded category 1 and 2 areas.	Support	CCC has indicated that as part of the preferred option pockets of existing, older residential activities, which do not have sound insulation, could be excluded from the expanded boundaries. CRC considers that exploring this should be a priority as the amenity effects of the increased noise levels could be significant. Objective 5.2.1 and Objective 6.2.3 highlight the importance of enabling the wellbeing of people and communities and providing quality living environments.	That these areas are identified through the plan change process and provision is made for them to be removed from Category 1 and 2 in so far as is practicable.
Changes to the activity status of sensitive activities in Category 1 areas.	Support	A restricted discretionary activity status for sensitive activities is appropriate, given the expanded spatial extent of the proposed Category 1 areas, particularly as development and housing intensification should be supported in the Central City. Encouraging housing intensification in the Central City aligns with Objective 6.2.2 and Policy 6.3.7.	Retain

Minor amendments to 6.8.1 matters of discretion.	Support	CRC considers the expansion of Category 1 areas and the change to a restricted discretionary activity status for sensitive activities within these areas make the specific matters of discretion particularly important. The minor amendments to the matters of discretion accurately reflect the mix of activities anticipated by the Plan for the Central City. This supports Objective 5.2.1, which seeks to avoid conflicts between incompatible activities, and Objective 6.2.2, which promotes mixed-use developments, particularly in the Central City.	Retain
Increase the noise limits that apply for entertainment activities at 'nighttime'. Category 1: 60 to 65. Category 2: 50 to 60	Support in principle	CRC supports the proposed increase in noise limits in conjunction with insulation requirements for sensitive activities which protect health and wellbeing of occupants, provided the insulation requirements do not discourage or prevent housing intensification within the Central City. In Category 1 areas, the changes would reduce compliance costs for venues in managing noise. In contrast, for Category 2 areas, the financial burden on venues is expected to be greater than that on sensitive activities. CRC considers that the proposed amendments give effect to Objective 6.2.6 and Policy 6.3.6 of the RPS, which promote enabling business activity. However, the noise limit proposed for Category 1 areas is higher than Auckland and Wellington. This raises concerns in relation to Objective 5.2.1 and Objective 6.2.3, which seek to ensure wellbeing and high-quality living environments. Shifting the responsibility for noise mitigation primarily onto sensitive activities may undermine housing intensification, which would be contrary to Objective 6.2.2 and Policy 6.3.7.	Retain, provided increased noise can be mitigated through amended insulation requirements and those requirements do not impact the feasibility of housing intensification.
Amendments to sound insulation requirements for sensitive activities	support	CRC considers that insulation requirements are sufficient to protect amenity and wellbeing which gives effect to objective 5.2.1 and objective 6.2.3 of the RPS. It is noted that compared with the insulation requirements for Category 2, the Category 1 insulation requirements will have a higher cost for sensitive activities. This could reduce housing intensification which is not in line with objective 6.2.2 and policy 6.3.7.	Retain.

Amendment to Rule 6.1.7.2.1 – *Sensitive activities near roads and railways* to apply it to new buildings for sensitive activities in the Central City Consequential deletion of rule 6.1.2.3 *Sensitive activities near roads in the Central City* to simplify the framework and avoid duplication	support	CRC supports the consistent approach of having the same requirements as the rest of Christchurch inside the central city. CRC considers requiring insulation which is relative to the level of noise generated by the specific road allows for place based solutions and costs incurred to be relative to the level of noise. This will allow key transport corridors within the city to be protected and gives effect to Policy 5.3.7, Policy 6.3.5, and Policy 6.3.7.	Retain

Dear Sir / Madam

Draft Plan Change 21 (Central-City Noise) – Feedback from Distinction Christchurch Limited – Statement of Intent

On 25 June 2025, Christchurch City Council (**Council**) publicly invited feedback on the Draft Plan Change 21 (Central-City Noise) (**PC21**).

Distinction Christchurch Limited owns the Distinction Hotel at 14 Cathedral Square, which is located within a *Category 2: Lower Noise Level Entertainment and Hospitality Precinct* in the Operate Christchurch District Plan (**ODP**) maps. Distinction Christchurch Limited welcomes this opportunity to provide feedback.

Planz Consultants Limited (**Planz**), who assist Distinction Christchurch Limited with its policy work under the Resource Management Act 1991 (**RMA**), has prepared this feedback on behalf of Distinction Christchurch Limited.

14 Cathedral Square

The site at 14 Cathedral Square is legally described as Part Lot 1 DP 24251 and has a site area of 1417m^2. The zoning of the site is 'City Centre,' and it is within the 'Central City Core Overlay,' 'Central City Walking Catchment,' and the 'Central City Inner Zone.' The site is surrounded by a variety of office, accommodation, retail, food and beverage and public buildings. See **figure 1** below for the site location and zoning:

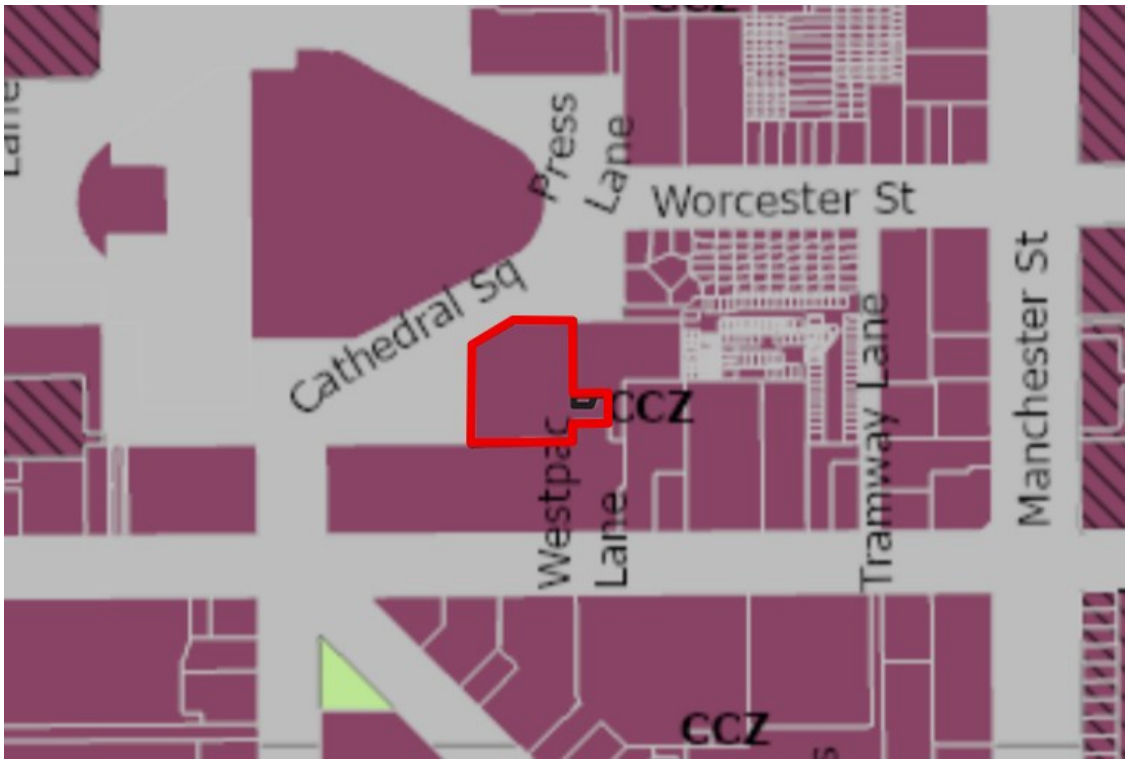

Figure 1: Distinction Hotel – 14 Cathedral Square Zoning.

PC21 Feedback

Distinction Christchurch Limited acknowledges and supports the goal of PC21 to support a vibrant night-time economy within the central city, and the need to provide for increased noise limits around One New Zealand Stadium at Te Kaha, and commercial areas south of Lichfield Street. Integral to the outcomes sought in draft PC21 is the need to appropriately balance the needs of noise generating activities (such as bars and night clubs), and the needs for sensitive activities to be protected from unreasonable noise effects. The 'tool' for achieving this balance in PC21 is proposed to be the application of various noise limit 'categories', with Category 1 having the most enabling noise limits, through to Category 3 with the most restrictive. Determining the geographic extent of these mapped category areas relies on identifying both the location of noise generating activities e.g. the stadium and established hospitality areas, and critically also requires identification of any concentration of existing sensitive activities such as residential units or visitor accommodation.

Distinction Christchurch Limited considers that the proposed application of a 'Category 1' area to the area surrounding Cathedral Square is not appropriate, given the high concentration of both existing and consented visitor accommodation in this area. This concern is outlined further below, however, to demonstrate the concentration of visitor accommodation in proximity Cathedral Square, please refer to **figure 2** (showing the wider area subject to PC21) and **figure 3** (showing a closer view of the area surrounding Cathedral Square) below.

Please note in **figure 2 and figure 3**, the accommodation in proximity Cathedral Square has been highlighted in light blue, and other visitor accommodation in the area is indicated with red markers (Source: Christchurch City Council Spatial Open Data Portal). Six of the hotels are consented, but not yet constructed and open to the public, as indicated by blue squares. The remainder of the visitor accommodation highlighted on the map is existing and operating.

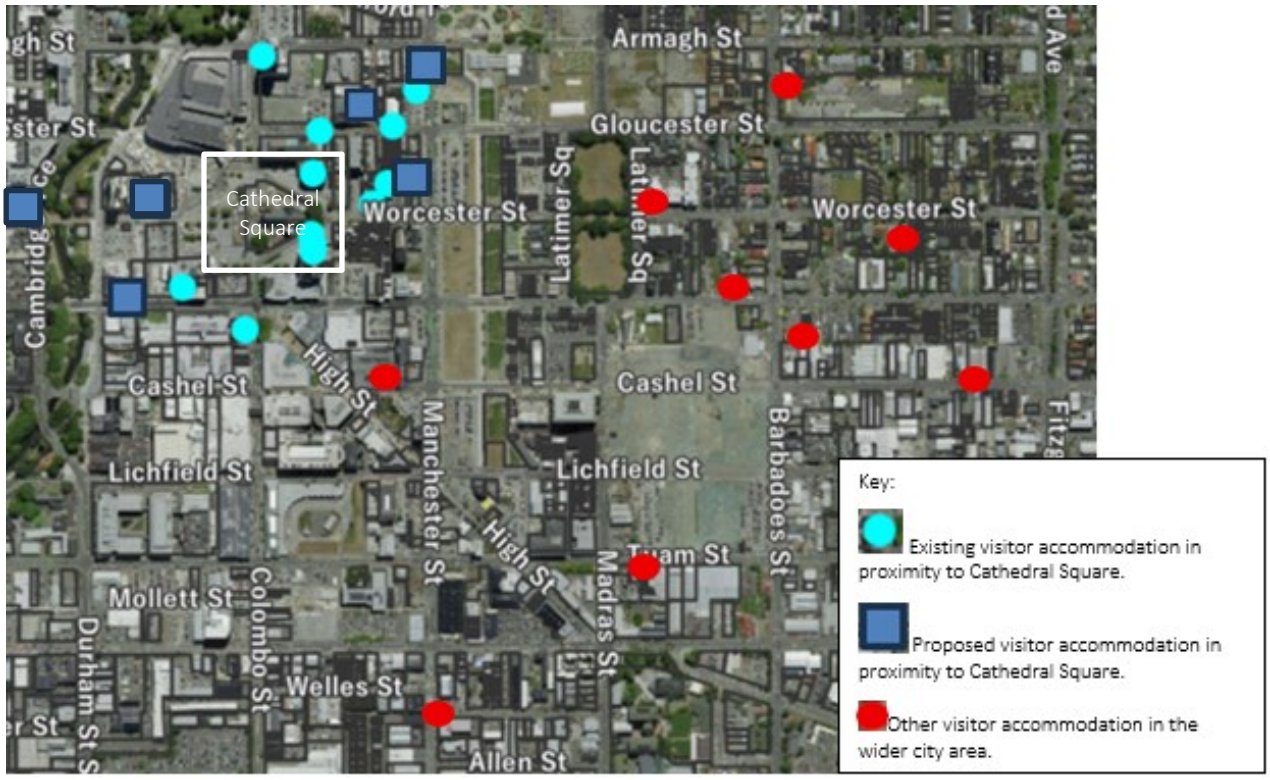

Figure 2: Visitor accommodation in Central Christchurch (Source: Canterbury Maps, Overlay: Christchurch City Council Spatial Open Data Portal, other known resource consents).

Figure 3: Visitor accommodation in Central Christchurch (Source: Canterbury Maps, Overlay: Christchurch City Council Spatial Open Data Portal, other known resource consents).

The name of each of the visitor accommodation providers (highlighted in light blue in the map above), and the number of rooms provided in each, is outlined in the table below:

Visitor Accommodation	Location	Number of Rooms
1. Cathedral Junction Building Apartments	113 Worcester Street	5 (1-3 bedrooms)
2. Christchurch City Hotel	699 Colombo Street	46 (1-bedroom)
3. Crowne Plaza Hotel	764 Colombo Street	204 (1-bedroom)
4. Distinction Hotel	14 Cathedral Square	182 (between 1-2 bedrooms)
5. Adina Heritage Hotel	28-30 Cathedral Square	26 (between 1-3 bedrooms)
6. Hotel 115	115 Worcester Street	37 (between 1-2 bedrooms)
7. Ibis Hotel Christchurch	107 Hereford Street	155 (1-bedroom)
8. Novotel Hotel	50 Cathedral Square	154 (1-bedroom)
9. Quest Christchurch	113 Worcester Street	67 (between 1-3 bedrooms)
10. Fable Christchurch	166 Gloucester Street, Central City	171 (between 1-2 bedrooms)
11. Urbanz	273 Manchester Street	53 (including dorm-style rooms)

As can be seen in the map and table, there are 11 visitor accommodation providers within the defined map area, and six proposed (blue squares) which are not included in the table. The total number of **existing** rooms in the area is **1100**, and as the majority of the visitor accommodation rooms provide at least a double bed, and often more than one bed or bedroom per room, the actual capacity of the area will likely be for at least 2000 guests. Noting that there are at least six other consented hotels within the area, the guest capacity is very likely to increase in the future.

It is considered that the proposed boundaries do not suitably 'protect activities that are sensitive to noise overnight' in this area, which is a key goal of PC21. The primary purpose of visitor accommodation is to provide for overnight stays, and thus the activity is particularly sensitive to noise overnight. The PC21 proposal, if enacted, would increase the noise limits in the area surrounding Cathedral Square from 50dBL_{Aeq} (current Category 2 night time limit) to 65dBL_{Aeq} (proposed Category 1 night time limit), which is a significant increase, noting that the decibel scale is not linear. It is therefore considered that the comparatively high concentration of visitor accommodation to hospitality outlets in the area warrants the maintenance of the 'Category 2' noise level, to protect the amenity and wellbeing of overnight guests.

It is also important to note that any residential activity or visitor accommodation within a 'Category 1 Precinct' is currently a discretionary activity in the ODP. This indicates the lack of compatibility of these activities with Category 1 noise levels. To apply these noise levels in an area with a concentration of over 1000 visitor accommodation bedrooms will result in adverse effects on overnight guests, and is considered incompatible with the PC21 goals, as well as the overall objectives and policies of the ODP. The proposal also does not give effect to the relevant provisions of the Canterbury Regional Policy Statement, specifically those that seek to protect amenity values and wellbeing.

The provision of higher noise limits around the stadium, along Oxford Terrace, and in the areas below Hereford and Lichfield Streets, where there is a higher concentration of hospitality and entertainment

outlets is considered appropriate, and will allow for adequate provision for a vibrant night time economy in the city.

On this basis, Distinction Christchurch Limited would like to propose that the approximate following area, highlighted in red **figure 4** below, is retained as a 'Category 2' area:

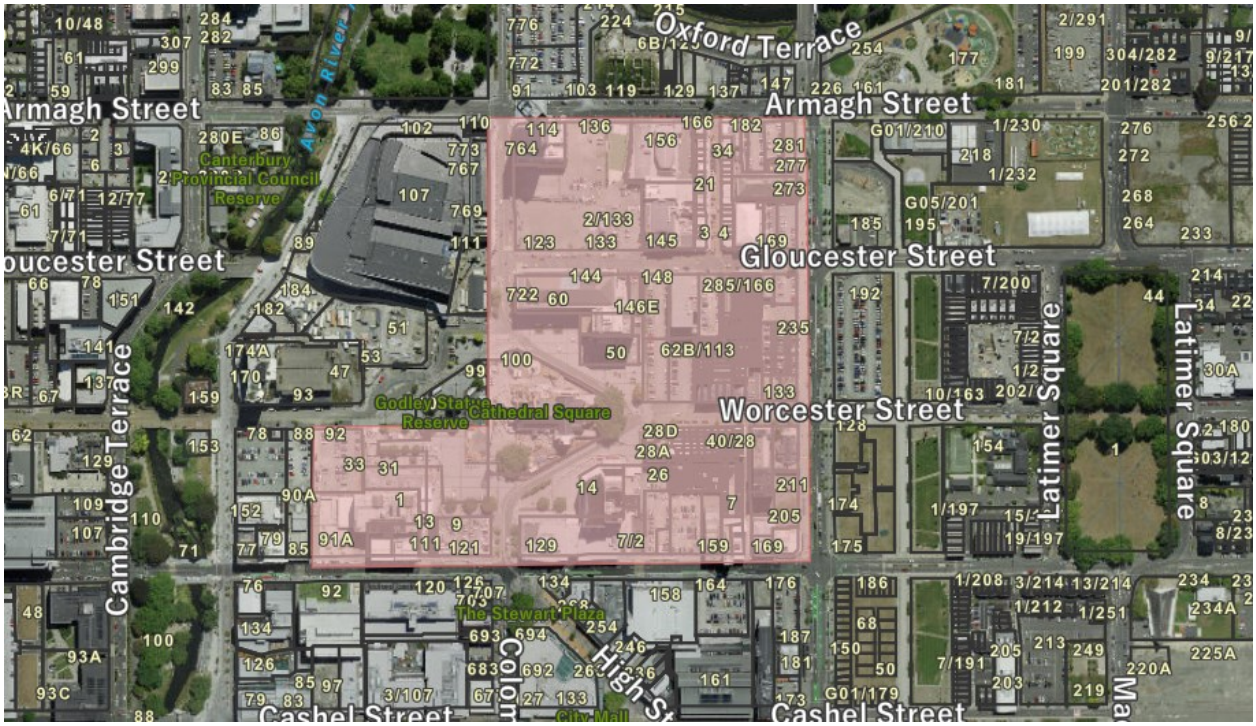

Figure 4: Approximate area that Distinction Christchurch Limited seeks to retain as a 'Category 2' area (Source: Canterbury Maps).

Specific Matters

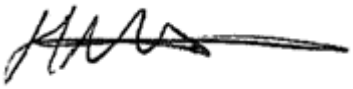

Matter	Discussion
Proposed Central City Entertainment and Hospitality Precinct Overlay Planning Map	The proposal seeks to inappropriately prioritise higher noise levels from entertainment and hospitality venues over the protection of sensitive activities in some areas. As noted in the bulk of the letter, there is a concentration of visitor accommodation surrounding Cathedral Square, as highlighted in the map provided as **figure 2** and **figure 3**. Visitor accommodation is particularly sensitive to noise effects due to the primary purpose of the activity being to provide for overnight stays. While Distinction Christchurch Limited acknowledges the need to support a vibrant night-time economy, it is considered that higher noise limits are not appropriate where there is a large number of sensitive activities in an area. On this basis, Distinction Christchurch Limited seeks to maintain the Category 2 precinct over the Distinction Hotel and other visitor accommodation in proximity to Cathedral Square, as outlined above.

Conclusion

Distinction Christchurch Limited thanks the Christchurch City Council for the opportunity to provide feedback, prior to the need for formal submissions on a notified Plan Change 21.

The response provided has raised concerns with PC21 as drafted. Distinction Christchurch Limited respectfully requests that the Council consider the adverse effects on visitor accommodation surrounding Cathedral Square, and amends the proposed boundaries to reinstate the 'Category 2' area overlay in this area, to ensure the map aligns with the listed goals of PC21, and the objectives and policies of the ODP.

Yours sincerely

Love that this includes music spaces like Dux, Flux, Space Academy, Darkroom, Hide, Galaxy and A Rolling Stone!

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

That noise complaints aren't managed with a dB reader - just based on the individual noise control officer's personal opinion.

That the plan change wouldn't come into effect until at least mid-2026 and that doesn't help in the meantime.

That most new townhouses are Air BnBs or investment rentals, not actually homes for owner-occupants.

That Air BnBs next to venues are being advertised as peaceful and quiet, as pointed out by Councillor Moore at a council meeting in early 2025.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

• We purchased our residence [redacted]ichfield St September 2020, after researching District Plan which showed it was in entertainment zone, night noise limit 60Db which we were comfortable about.
• Reason for purchase to be close to our business professional services and be amongst the vibrancy of the CBD
• It soon became apparent that the owners and operators of the Dux bar did not care about District Plan noise limits, believed they could do what they liked as they were a bar. We put up with them generating industrial noise several nights per week, in the vicinity of 80—90Db, for about 18 months, I approached them and asked that they moderate noise, I was just laughed at.
• I called Noise Control many times they did not act.
• Next step I engaged my acoustic engineers to measure noise. The evidence of excess noise was presented to council and only then did council approach the Dux management.
• Dux has moderated their noise levels but still exceed limits from time to time.
• The Dux has bands on two open levels facing our residence.
• The Dux should be required to operate bands indoors, in a suitably insulated building.
• Christchurch City Council must enforce District Plan noise limits.
• My business operates in Selwyn District in the Rolleston Industrial Zone, Our noise levels are actively measured, limits at boundary of Industrial Zone, enforced by SDC.
• Coolpak must submit an acoustic report with each building consent application, then before we can obtain code of compliance, acoustic engineers are required to measure noise levels and confirm we comply.
• I expect the same level of protection at our residence in CHCH CBD, that is enforced on my business at Rolleston which employs 180 people.
• As a principal I object to any change in DP noise levels, as I believe when you purchase a property you are entitled to be able to rely on the District Plan.
• The Dux knew the limits when they set up their bar. I don’t trust the operators of the Dux to have any respect for residential neighbours without enforcement.
• Should there be any change to the district plan noise limits, Christchurch City has a responsibility to monitor and enforce limits.
• I have attached a photo of the Dux showing the two open levels where they operate bands.
• I support the New Stadium and expect the way it is built the noise won’t be an issue for neighbours.

Q17 **What do you like about the proposed plan change and why?**

Long Text

It will allow musicians and entertainers to create, perform and take part in the vibrant night life of Christchurch. We are vital to this night life and want to share that with the residents of the city that enjoy live music and entertainment. We also depend on live music venues to support our careers, creativity and a make our income through shows and events. Without the venues we will not be able to sustain this career choice and Christchurch will lose the most important parts of being a city. The diversity of our residents and the art we all love to consume.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: The residential pocket of land to the south east corner of Manchester and Kilmore Street where (the Williams apartments encompassing 242 Manchester Street -162 Kilmore Street)

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: Nothing - the existing areas are where bars and noisy activities can take place - there are plenty of places bars etc can establish themselves within the existing zones - and in good economic times there are plenty. - there is no benefit making the houses already here have to put up with more noise.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: Existing residential properties will be exposed to more noise and often with bands in bars etc anti social behavior can result.
The stadium is likely to be noisy and inconvenient for existing residents. This was noisy activity (sthe tadium) should not have been approved before consultation.
Citys are for people and the residents will be its lifeblood. Any additional commercial activity should be secondary to those woith established homes.

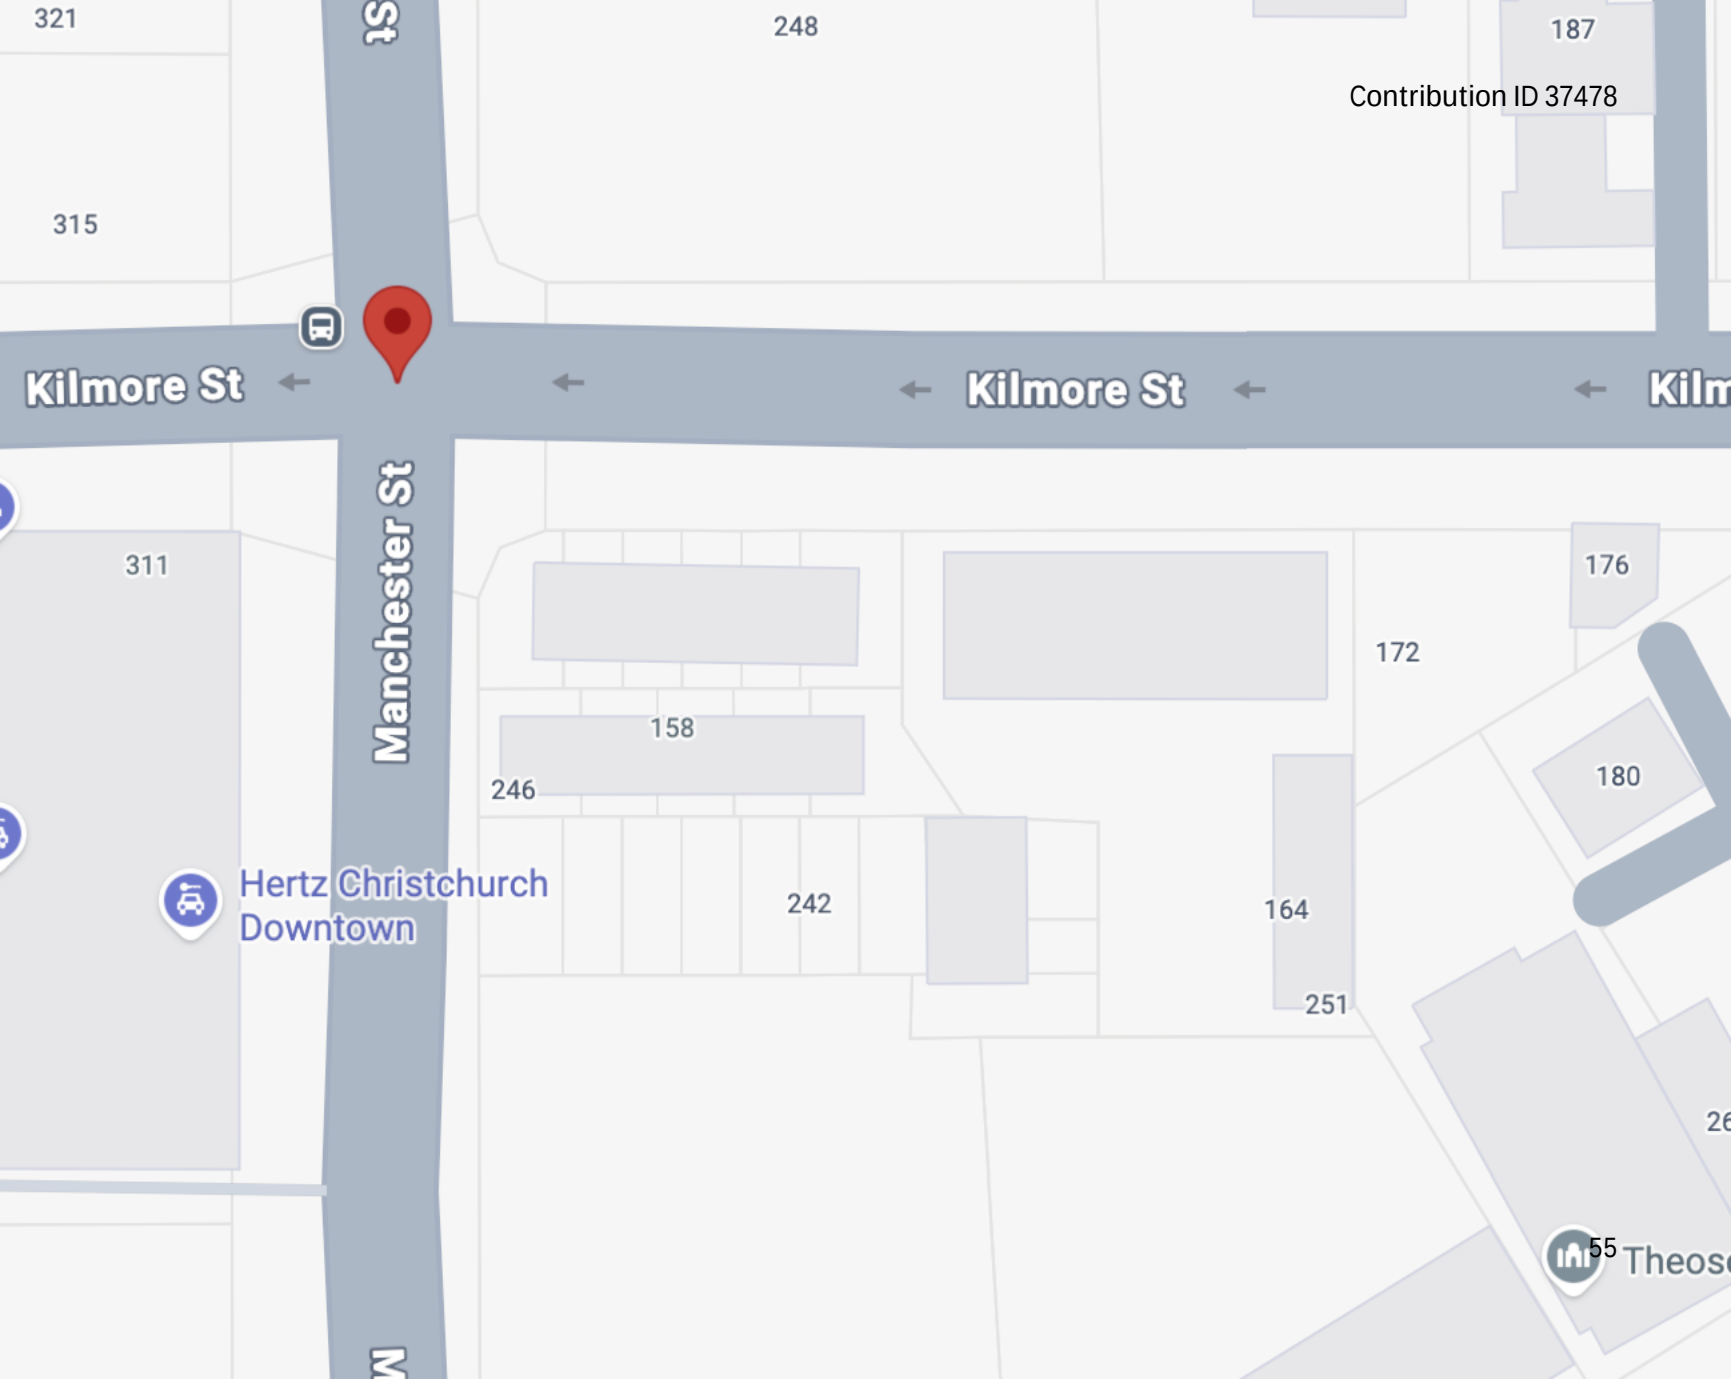

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text: The stadium - concert noise right next door to new homes already approved - not good process.

Short Text Atlas Quarter (Body Corporate 513813)

Q13 **Do you think we've got the category locations right?**

Multi Choice Somewhat

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text Welles Street shouldn't be in Category 1.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text We accept that a certain amount of noise is a given with inner-city living, and we want to support the established live music precincts in our city (which are largely covered by the proposed Category 1).

In a large complex like Atlas Quarter, there will naturally be a range of opinions among owners and residents, depending on their appetite for noise, their proximity to the relevant businesses, and their reasons for living in the city centre.

Q18 **What don't you like about the proposed plan change and why?**

Long Text It doesn't make sense to move Welles Street to Category 1. The body corporate committee does not support this late addition.

Atlas Quarter was here first, before the arrival of live entertainment venues on Welles Street. Resource consent RMA/2016/3605 for 44 Welles Street acknowledged that our residential complex was being built and took our needs into account when setting noise limits for the venue.

Muy Muy (44 Welles Street) is the only live entertainment venue on the street, and its needs have already been adequately provided for through a resource consent and noise management plan. Other hospitality businesses are quieter bars or restaurants with no need for loud music late at night. We have worked closely with businesses on our street to ensure the vibrancy of the street by finding a balance between business and resident needs.

The Welder is unsuited for live entertainment due to an uninsulated roof which causes sound to be projected straight up towards Atlas Quarter apartments. We worry that Category 1 would send a message that most commercial buildings on Welles Street are of a suitable specification for loud noise late at night when that simply isn't the case.

My understanding (as per RMA/2015/1398 quoted in RMA/2016/3605) is that bedrooms at Atlas Quarter "achieve an external to internal reduction of 30dBA" rather than the proposed 35dB. The basic double glazing isn't as sound-proof as one might hope. Therefore, Category 1 would be inconsistent with the design of Atlas Quarter, despite being a modern and well-regarded apartment development.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

The plan change depends on adequate enforcement and on businesses being adequately insulated and enclosed. We hope that support and education will be provided to enable this to happen. Adequate funding will need to be provided in future District and Long Term Plans.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text The city needs to be a vibrant place with space for music and arts of all types. This rezoning will future-proof the city to ensure that spaces like ours at A Rolling Stone, and all the rest of the community of city music venues, are able to continue without threat of loss to Christchurch artists,musicians, and concert-going public, and to the livelihoods of those like us, who have put our hearts and souls into our venues for the good of the community. It's so important for the mental health and wellbeing of people, young people especially, to be involved in music. We provide a safe, friendly, welcoming environment for musical artists of all genres to perform, to meet up and interact with others through music, and to bring joy into the lives of the citizens of Christchurch through their music. All ages, all abilities are welcome here. We've worked tirelessly over the last seven years to build up this venue. While we have never had any issues with noise complaints from the surrounding housing, it is absolutely possible for that to change at any time in the future with further development happening close by all the time. It would be devastating for us and for the local music community if noise complaints caused the loss of the venue. Venues like ours are closing all over the world because of economic pressures, yet we provide the heart and soul of the city and contribute to the rich fabric of Christchurch. It's concerning that that fabric is being lost because developers are able to turn central Christchurch into a giant rest home of apartments, with residents who are not interested in a vibrant and rich city able to dictate the rules. Where will the young musicians and artists of the future play if there are no small music venues to hone their skills? You don't become Lorde or Ed Sheeran by going straight from your high school stage to an international stadium! We also provide a stage for many many community groups, schools, and music teaching schools for their student performances. Experiences like that are priceless, probably the highlight of some Christchurch children's lives. It's important that the council is able to protect opportunities like that for the future. It's also important that all venues in the city have the same levels of protection because we are all equally important in our own unique way - we all provide a slightly different option, perspective, experience, but all of those are valid and hold the same level of importance. We are all part of the fabric of this city and we applaud the council for recognising that and seeking to protect it.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It covers a larger area encompassing most of our established live-music venues, including those towards the outer limits of the 4 avenues. We have only a small number of venues in Ōtautahi whose main focus is to support local artists, and it is crucial that these are protected. Keeping the status quo might threaten this small but vital infrastructure that sustains the creative community at a grass-roots level.
I fully agree with the idea that city centres are dynamic places and that we should support and encourage festive and artistic activities at night. This needs to be made clear to those who choose to reside in or near the city.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I bought a house in the city because I want to live close to businesses and interesting things happening in the city. I believe raising the sound limits will encourage the night economy, make the city more vibrant, and encourage more young people to live in the city centre- exactly what I wish to see for Ōtautahi.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

No issues with it.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I can see how its out of scope for this plan, but I think specifically traffic noise could be discouraged more in the city centre. Cars are the death of liveable urban spaces. Acoustic cameras (essentially the noise equivalent of speed cameras) could be installed at intersections to fine loud antisocial vehicles - easily the worst type of sound in the city, especially at night.

Q17 **What do you like about the proposed plan change and why?**

Long Text

It will allow Christchurch to grow into an Arts powerhouse and the Top Arts Nightlife location for New Zealand. Having lived for years in Auckland and Wellington, and now returned to Christchurch I am excited by the Metropolitan Growth. If we don't protect the ability for the Artist Scenes of Christchurch to grow we will return to being plain and unremarkable, only with more bored people with nothing to do.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like that it gives a wide scope of the city and includes current venues I love (Flux, Galaxy, Space Academy, Darkroom etc) and will allow Ōtautahi to flourish as the creative powerhouse and cultural capital that it is!

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I'm concerned about the time that this could take to be actioned, and don't like that noise complaints can continue to be made against venues in the interim. I'm concerned that not enough responsibility is put on property developers to sound-proof/insulate new builds, and also inform prospective residents of the reality of inner-city dwelling - including how positive it is to be so close to thriving nightlife!

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like that it supports night-time economy. We can’t expect to be a modern city that’s exciting to live in if we don’t support a central city nightlife.
Music and other noise-creating activities are part of that nightlife.
I also like that the proposed changes have considered and included the location of existing venues for music and other entertainment. Supporting existing venues is important to maintaining a rich history of culture in our city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I like the proposed plan changes but also think they could’ve been even more bold with areas they included and permitted noise levels.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It helps to save local business in a time of need, where in most cities venues are now at risk of shutting down due to unreasonable noise complaints. DarkRoom, for instance is located in Otautahi's industrial area. Where there are no neighboring shops nor even housing, thus is the prime location for a music venue.

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think there is no nightlife in Christchurch central currently and this change will make it even worse. Didn't know Christchurch had turned into a retirement village with nowhere to go after 10pm

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I think there is no nightlife in Christchurch central currently and this change will make it even worse. Didn't know Christchurch had turned into a retirement village with nowhere to go after 10pm

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

For residents who live on central city they should accept that it comes with noise. I lived in Melbourne cbd for years and that wasn't an issue. If it's an issue maybe you should reconsider if living in central Christchurch is the right place for you to be living.

Q17 **What do you like about the proposed plan change and why?**

Long Text

It is important that businesses that are in the centre of town are allowed to make noise in order to create a vibrant, exciting environment.
This is what town is for, a hub. Living there should have a tacit understanding that you are moving into a thriving, humming environment that you cannot have control over.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Christchurch is home to possibly the most lively underground music scenes in New Zealand. We need to make sure that small venues such as space academy, darkroom, arcadia can continue to operate as they are the backbone for local artists and bands. The more persmissive noise limits allow for this and give greater opportunity for future venues to open.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Proposed zone changes will allow existing local music venues including Darkroom, Rolling Stone and Space Academy to operate effectively. These venues are hugely important to the vibrant Christchurch music scene which is currently one of the best in New Zealand! Venues such as those listed above foster community and are actively working to create a safe space for local artists, young and old to share and develop their talents. We want Christchurch to remain a creative, cool and characterful city. the earthquake has made us the place to be and given us a youthful inner city. Lets make the most of it and support our arts scene by lifting noise restrictions! What is good for arts and music is good for Christchurch! Maybe one day the local bands we see playing at our small local venues can be filling out Te Kaha!

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Understanding that living in the central city comes hand in hand with noise and night-time economy. As someone who volunteers for a local alternative/student radio station, I can see first hand that the music scene especially needs safe and legal places to engage with their crafts. I personally believe that encouraging night time economy including gigs and concerts is a key factor in the overall longterm earthquake recovery of our city and their artists.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I believe that then protection of our hospitality venues should come first; and the sound proofing of surrounding accommodation or businesses second. Without a thriving hospitality scene in Christchurch - community, music, arts and socialising dies.

This is a long time coming.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

The bars were there first and you know what you're signing up for when living in the city. this town has finally got more diverse and cool events that I frequently go to. I used to live next door to space academy and never got annoyed by the noise. I only moved due to the terrible parking and needing a garage for my second car.

Q17 **What do you like about the proposed plan change and why?**

Long Text: Acknowledging the growth, and exciting venues the city will be hosting into the future.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: Some of the residential areas eg along Huanui Lane being green-zoned which sets a questionable expectation that life in our future CBD will be quieter there which may be difficult to enforce, administer, and enforce. Acknowledge that its a fine line, though perhaps note that residents in these areas may have to fundamentally accept noise in the CBD and from the stadium. Will be a net benefit for the city overall.

Short Text:

Q13 **Do you think we've got the category locations right?**

Multi Choice: Somewhat

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: The area around the stadium should have strict noise limits. Other established venues should not be affected by the changes.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: The immediate surrounding area around the stadium should be a 2 not a 1.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text: The biggest issue I see is the new Stadium creating too much noise at night. New developers should insulate homes properly if they are going to build next to established locally owned venues. If a venue has already been operating, they should not have to spend more money to accommodate the new housing. The stadium on the other hand, as a new development, has the obligation to respect the houses it's built around.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

The culture and life of the city needs us to have viable music venues and similar activities in the city centre alongside residential development. We need both. Good sound insulation will support this.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Somewhat

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Zones in addition to the CBD, General industrial areas where, globally, it is common for entertainment and particularly emerging /musicians to develop their practice in more affordable areas of a city should be considered. Waltham, Sydenham, Addington.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

No

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It puts the work on those who are in the commercial landscape instead of burdening the arts with more costs / changes they need to make (because there isn't support or funding for those changes...)

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

It's taken 10 years to consider and even begin to act on the behalf of the music industry? Over a decade of development and this hasn't been priority much less it hardly even seems like it's even been on council radar. If it has, is there a single act you can show that you've done something to support a venue? Because all there is evidence of is that venues have been punished and criticized; seizures of sound systems, fines, and threats from noise control and council to the very establishments that provide cultural value, economic stimulation in tourism, hospitality and arts, positive mental health benefits without proof (db readings). There is seemingly no separation from an industry venue/music establishment, than a house party in a residential neighborhood. It's disheartening that you look at this from a central city area, and not the area of the music / entertainment establishments. Why not just implement that if you're building housing within 100m of a business specifically catering to the music industry, you have to follow these appropriate procedures. That is relevant for the music industry to thrive whether it's in the CBD or not. Also it does not address any of the requirements Airbnb/visitors should be advised by hosts whether there is an operating entertainment/music outfit in the area, or noise control should be required to ask the caller more information; like if they are a permanent resident, or guest/airbnb guest.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It supports businesses, venues and events who are outside of the high-end, commercial scene of nightlife in Ōtautahi outside of our current noise plan.
Grassroots spaces are the backbone to our city's creative spirit, the voice of our rangatahi, and are in need of protection. These spaces foster so much opportunity for growth, platforms, connection and collaboration, which is something we want to feel is supported and not squandered by legal powers out of our reach. My career as a graphic designer started within these underground spaces, which is all the reason to support the next generation of individuals coming through these venues.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I love that long-running businesses like Space Academy, Darkroom, Dux Central, and A Rolling Stone will be able to survive and thrive. I love that new dwellings will be built to a higher spec, like the existing ones should have been to start with.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I can't make up my mind about the late addition in and near Welles Street. As I wrote on behalf of the Atlas Quarter body corporate, I have concerns about the late addition of this neighbourhood to Category 1 when:
- many commercial buildings in their current state on Welles Street are incapable of meeting the rules even for Category 2
- the blocks to the north and south are only proposed to be Category 2
- Muy Muy already has a resource consent and noise management plan that meets its needs
- Atlas Quarter was built under the old rules with only 30 dB noise reduction for bedrooms (including bedroom windows that I find let in far too much noise).

Equally, though:
- I don't want to be the handbrake on the development of a vibrant city
- I'm not directly impacted in my apartment at the south-west of Atlas Quarter
- I would hope apartment living attracts the kinds of residents who want to live in a vibrant city centre with a night life.

I acknowledge that city noise is something you get used to. I sometimes struggled with aspects of it when I first moved into Atlas Quarter, but after spending a few nights in Kuala Kumpur for work, getting back home to Atlas Quarter I didn't notice a thing!

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text: It supports local music venues and bars which are essential to our night time economy and MN ake Ōtautahi a great place to live. More people living in the central city is also wonderful and necessary as we grow. But central city living is not and should not be treated like living in the suburbs. The privelige of living so close to so many wonderful amenities must come with the tradeoff of greater noise and the other features of closer proximity to neighbourhood businesses etc. Our venues and hospitality need to be prioritised if we want a vibrant and growing centre.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

My favourite gigs are on st asaph where high density housing is going up and the stadium is obviously going to be making noise too! I want to attend fun events with a reasonable noise limit.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Response No: 135

Short Text:

Q13 **Do you think we've got the category locations right?**

Multi Choice: No

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text:

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Yes I disagree with placing areas north of Kilmore Street into the proposed Category 1 (orange) or Category 2 (green) zones. These should remain unchanged, consistent with existing classifications (see point 1).

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: While some adjustments to zoning boundaries are warranted in light of the city centre's ongoing development (particularly with the nearing completion of the new stadium), this should not necessitate an increase in permitted noise levels. Instead, it presents a timely opportunity to refine zoning boundaries while maintaining the current decibel limits, which have served residents well. The areas south of Kilmore Street, now proposed as Category 1 zones, largely consist of post-earthquake
rebuilds. These newer dwellings have been constructed to modern standards,
incorporating advanced thermal and acoustic insulation. As a result, they are better equipped to mitigate external noise, including elevated sound levels from
entertainment venues or traffic. This contrasts with the older housing stock north of Kilmore Street, which lacks such insulation and would be disproportionately affected by any increase in allowable noise

Q18 **What don't you like about the proposed plan change and why?**

Long Text: I strongly oppose increased noise levels for areas north of Kilmore Street. These neighbourhoods include longstanding dwellings that were retained post-earthquake, preserving our heritage but also leaving them vulnerable to inadequate
soundproofing.
The existing noise limits - 60dB (Cat 1), 50dB (Cat 2), and 45dB (Cat 3) - are adequate. Increasing these limits while simultaneously expanding the zoning boundaries makes little sense and risks undermining residential wellbeing.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text: I do not support the proposed increases to noise limits across the three
categories. These limits should remain at their current levels: 60dB (Category 1), 50dB (Category 2), and 45dB (Category 3). I do support the proposed zoning boundary adjustments, with the exception of areas north of Kilmore Street, which I believe should remain unchanged due to their existing housing stock and acoustic vulnerability. Additionally, I support the introduction of mandatory sound
insulation requirements for future developments. However, these measures should be aligned with the existing

noise limits in each category rather than used to justify higher thresholds.
I am particularly concerned about bass-heavy music and low-frequency noise, which standard dB(A) measurements often fail to capture accurately. These sounds travel further, penetrate buildings more easily, and can be disruptive even at low volumes. Prolonged exposure has been linked to sleep disturbance, stress, and other health issues. I would like to know how the council plans to measure and regulate low-
frequency noise. Will methods like dB(C) or frequency-specific monitoring be used? Without clear standards, residents may be exposed to harmful noise that’s difficult to control.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Yes. Victoria St and streets immediately surrounding it should not be in Category 1. Unlike the actual City Centre/CBD (which Victoria St should not be considered part of), this area is very close to older, established neighbourhoods. Any increase from

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text:

Q18 **What don't you like about the proposed plan change and why?**

Long Text: Yes. Victoria St and streets immediately surrounding it should not be in Category 1. Unlike the actual City Centre/CBD (which Victoria St should not be considered part of), this area is very close to older, established neighbourhoods. Any increase from the current noise limit would cause unnecessary problems for residents living nearby, as experienced post-EQs. I recently attended a meeting with Council staff re the Plan Change and was not given any reason for proposing an increase in noise limit for Victoria St. This area is completely different from other Category 1 locations, given the proximity to residences, here long before any licensed premises with late night trading or loud music.

If the locations of the prescribed Categories need to be extended to take into account changes within the City Centre and/or near the Stadium, then that is probably legitimate. However, there is no compelling reason to increase the noise limit beyond 60db, regardless of location. I was very surprised to read the response to a question sent to the Webinar regarding medical/health research that very clearly shows the negative impact of noise, especially related to sleep deprivation. I was disappointed that the response re low-frequency bass focussed on the exclusion of suburbs, instead of answering the substantive issue about the impact of vibrations from bass on mental and physical health. That omission is actually quite shameful. Also, at the same meeting with Council staff referred to above, they were unable to explain HOW low-frequency bass was “taken into consideration”. In summary, I do not accept the rationale for increasing noise limit anywhere. 60db allows entertainment venues to operate, especially given that measurement of noise is an average over 15 minutes, which allows for significant spikes which measurement would consider “acceptable”, regardless of the time of night, how often a spike occurred, how close the venue is to residences etc.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

The response to another question sent to the Webinar about the interface between noise level and consumption of alcohol is also surprisingly bureaucratic. Classifying something as relevant and obvious as this interface—which every publican would be aware of and used to their advantage—as “out of scope” is inconsistent with Council’s stated priority of reducing alcohol harm. There is ample research about this particular issue, which should have been taken into account when proposing an increase in noise limit, but obviously was not.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Areas that are obviously night locations and in town have been identified. Good representation of 90% of where people spend time.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Limits seem very harsh around area like the stadium where they are going to be loud at night. Seems poorly thought out.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

If noise around housing in the city centre is a big problem focus on those areas, not venues that clearly benefit everyone.

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Keep the music venues going, support new +local talent.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Don't understand why sound proofing wasn't standard all along

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text:

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text:

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text: It considers realistic (more so at least) noise limits for the city centre, as a musician who plays the odd gig this affects me as it affects anyone. It is unreasonable for people to demand quiet in the CBD.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: I don't like that it has taken so long to find a solution to this, but I like the proposed change.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text: I think those who want property in central Chch need to understand that live events are a key part of this city and they represent an important part of local economies as well as being a key part of Chch culture. Chch is the current epicentre of various music scenes in NZ.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

Allowing music venues to cater for continued growth of local music and continued support from Council for these venues to stay is vital #supportlocal

Q18 **What don't you like about the proposed plan change and why?**

Long Text

With a new city, wanting people in the city, city dwellers should understand live music is part of living in the city.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Concerned about the huge number of townhouses + potential future issues city dwellers will then put onto live music venues to quieten. Don't kill thriving culture for a few ugly townhouses.

Don't know / Not sure

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I have thought about noise over the years as lived on Deans Ave and tormented by ‘roadants’/biyi racers for about 2 decades!
And been directly affected by grating park event & netball noise though not choosing to attend it and living many metres away. Due to both high volumes/thonking viibrations and our prevailing Easterly winds.

Unwanted noise is extremely stressful unhealthy and we all know it is used as a form of torture!
So its great you are considering it carefully.

CHC Natural Resources respected & protected

That noise/volume could/should be rsestricted within 500- 1000 metres of any NATURALresource/environment eg Hagley Park other parks/rivers coastlines

To keep these priceless taonga as intended (green natural rest & passive recreation.).

Incl respectfullyeeds slow traffic speeds next to these so people get the benefit of them and those actively using them are asafer accessing them safely eg wlakers joggers dog and chilldren walkers etc who have to park nearby and nervously cross busy streets to access them

CHC Prevailing Easterly
And to cleverly factor in the fact that noise is carried in waves by our prevailing easterly wind in CHC.
So places down wind are protected a bit.

eg I have often been rudely and intrusively bothered by park event or harsh ongoing netball noise when they use loud speakers tho I am way over across the park at Deans Ave, due to the prescence or absence of the easterly
Its unfair if you have decided NOT to attend a concert and its not your taste in music/entertainment etc to have to endure it anyway, often all day.:o

CHC HIgh water table
This carries thonking vibration along the ground, through foundations and up th wall studs right into peoples homes.

Protect the Vulnerable
& we must remember and protect the vulnerable while balancing every need.
Because not everyone is well.
People may be stressed/ may have headache/migraine/flu/ cancer etc esp an aging population. They cant just go somewhere else easily or even afford to if not working due health.

And if you cant avoid intrusive stressful noise INSIDE your own home OR you cant ventilate it on a scorching hot day because you are trying your best to block the noise its pretty awful.

Double Glazing
Not all homes are dbl glazed as well and even dbl glazing isnt enough to protect from intrusive noise at volume becaue of the ground water level it will be a thonk thonk vibrating through tthe soil and up into the home.

Ear Pods
I think this is hte best solution if anyone want to make entertainment noise over eg 50 dB

Nowdays tech is so fab and so cheap that they could hand them out at events with tickets.
Then those who want high volumes could have bluetooth able ear plugs and all have them on and blast themselves to heaven and back!!

While those who want to listen to nature can also have their needs met.
The obligation for ear pods would naturally be on those who want to exceed what is normal/average/natural.

RatePayers Precedence
I do think CHC rate payers needs should take prescedence as they are paying a bit more for everything.

Thats the end of my quick thoughts for you.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think that local live music venues such as Darkroom are essential to allow local music to grow, and give people a place to enjoy a wide range of music, not just overseas bands that can still out stadiums. Newcomers should not be able to automatically get their way when they are moving into what they know is a well established live music area.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

There is balance between new infrastructure and established businesses that contribute significantly to the culture of Christchurch.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I'm happy with it all

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It protects the existing community as well as the new. Places like the Darkroom that foster safe creative spaces can still thrive without forfeiting the comfort of a home environment. It’s a win win

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Yes

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It’s fair. The city shouldn’t stop because people are living in it, that would kill business. If people choose to live inner city, then hustle and bustle is part of that. Let it grow and let the businesses benefit!

Q18 **What don't you like about the proposed plan change and why?**

Long Text

N/A

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It ensures there will he nightlife and culture in Christchurchs future.
Why rebuild when not all people can exist as they want?
If you rent or own in a city.... Shouldnt it be because you like a City vibe, including the noise? If you want quiet, move to the burbs.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I dont like that it is even an issue ,really. Its so silly and fustrating that people would buy in a city and then complain. Christchurch deserves to hum after all we have been through. It derserves life and culture and vibrance.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Multi Choice

Don't know / not sure

Q17 **What do you like about the proposed plan change and why?**

Long Text

I support Category 1 extending to include the area around St Asaph Street between Madras Street and Fitzgerald Ave. This area has some long standing live music venues and some new venues that residential housing is encroaching upon. I do not believe it is fair to destroy the music venue's ability to operate when they were there first. I don't know enough about dB or insulation limits to comment if they are appropriate, but the proposed residential development next to the Dark Room should not go ahead as they are unlikely to adequately insulate them from a live music venue directly next door.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

NA

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

We need higher noise limits in the central city to allow it to have a thriving nightlife and attract more people to visit and live here.

We also need to allow venues, especially those that existed before residential infill, to continue operating as they have without threat of being shut down due to new neighbours complaining about noise.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

I believe it's fair to have increased noise level for bars and bands.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Noise levels shouldnt change once properties are built. as that's why people built there or live in this location in the first place.

Will we as the property owners need to ...
1. change the current insulation of our property?
2. Provide a new ventilation system?
3. Will the council cover any of these costs?

Q17 **What do you like about the proposed plan change and why?**

Long Text

It's great that the council is to bring more night time vibes into the city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

As a resident of [redacted]Cashel street, I can't help but to notice that we're in a very awkward zone which is between Barbadose Street and Fitzgerald Ave, a mixed area of somewhat commercial/residential area. We have now 330,332, 333,338,339,340, 346 all as residential buildings with combined over at least 60 potential house holds(us being one of them), I have noticed that 65 dB at boundary of buildings at night time can still be very disturbing. Maybe our zone should be reconsidered as this corner of the town are currently sitting in the orange tier of the noise control plan and visually and realistically it's more like an residential area.

To be specific on the maps:
-Block between Clarkson Ave,Fitzgerald Ave, Linchfield Street and Cashel Street.
-Upper block surrounded by Hereford St,Cashel Street,Barbadoes St and Fitzgerald Ave.
-Block surrounded by Worcester St, Hereford Street, Barbadoes St and Fitzgerald Ave.

The blocks list about are currently under catagory 1 which seems concerning as those are mostly residential buildings.
I wish the council will reconsider our zone to maybe fall into catagory 2-3 as 65 dB outdoor noise at night time seems not sustainable for long term residents like ourselves.

Warm Regards,
Bruce

Long Text

As a resident of 332 Cashel street, I can't help but to notice that we're in a very awkward zone which is between Barbadose Street and Fitzgerald Ave, a mixed area of somewhat commercial/residential area. We have now 330,332, 333,338,339,340, 346 all as residential buildings with combined over at least 60 potential house holds(us being one

of them), I have noticed that 65 dB at boundary of buildings at night time can still be very disturbing. Maybe our zone should be reconsidered as this corner of the town are currently sitting in the orange tier of the noise control plan and visually and realistically it's more like an residential area.

To be specific on the maps:
-Block between Clarkson Ave,Fitzgerald Ave, Linchfield Street and Cashel Street.
-Upper block surrounded by Hereford St,Cashel Street,Barbadoes St and Fitzgerald Ave.
-Block surrounded by Worcester St, Hereford Street, Barbadoes St and Fitzgerald Ave.

The blocks list about are currently under catagory 1 which seems concerning as those are mostly residential buildings.
I wish the council will reconsider our zone to maybe fall into catagory 2-3 as 65 dB outdoor noise at night time seems not sustainable for long term residents like ourselves.

Warm Regards,
Bruce

Q17 **What do you like about the proposed plan change and why?**

Long Text

I support changes that support current and future arts/music/gathering places in the CBD, and enable them to put on lively events at night time. People should expect noise as a trade-off of living in the city centre, but requiring the must effective possible insulation for inner city housing seems extremely important.

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The proposed plan does not allow for dwellings in the proposed Category 2 that do not have sound insulation/mechanical ventilation.
In the current category for [redacted] Oxford Tce, the inside sound from the bars is audible though much of the time this is negligible. Our concern is that increasing this from 45 dB to 60dB will make the bar noise much more intrusive.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

On the occasions that we have made noise complaints this appeared to be from open doors and windows in the bars and speakers on outdoor balconies along Oxford Terrace between Cashel Mall and Hereford St. Ater discussing this with two bar owners, one bar owner (Botanic) enclosed their balcony and repositioned speakers and followed up with sound checks. This did reduce the noise and we are grateful.
We are concerned that the proposed changes will bring a return to earlier noise levels, open windows and doors facing the street and speakers on balconies.
How will noise levels be monitored? Who will monitor it? When will it be monitored? Will this information be made public? What recourse will we have if these changes go ahead, if we are kept awake Thursday, Friday and Saturday nights/early mornings? Will CCC still have a 'noise complaint' procedure?

The increase in decibels to 65 is a huge increase from the current 45. With no specified time limits on hours or days stated this could mean loud music until the small hours of the morning which would impact on our neighbourhood. There are often consequences of drunken revellers, loud speech, slamming doors that spills out from the 'restricted area' denoted in the proposed mapping change in the late hours, disturbing residents.

Don't know / not sure

Q17 **What do you like about the proposed plan change and why?**

Long Text

I've no clue if the insulations rules are alright but I absolutely agree that we need to change noise limits to ENHANCE the CBD. We as a city have lost so much and now we have a brand new city built for 2025 and beyond so 100% need to lift the limits to ensure the city has a wonderful nightlife and vibe. Nightlife brings ambience and good vibes, and having lived in Europe for several years can confirm that it was makes a bustling city. I am even looking at purchasing an apartment in the East Frame to be in amongst it all in future so plzzz let this go through.

Q18 **What don't you like about the proposed plan change and why?**

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It creates a balanced way forward for both residences and businesses/general night life. A central city has to feel lively and PC21 will help demarcate that from the rest of the city.
As someone who lives in the city, I am fully in favour of the proposed changes.

Q18 **What don't you like about the proposed plan change and why?**

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text:

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Yes. Victoria Street and the streets which are surrounding Victoria Street should not be Category 1 or 2. Victoria Street is an area that is immediately surrounded by established residential housing much of which is older housing.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: Nothing there seems to be no rational reason to increase noise limits other than a few bars have asked for this, which does not reflect the overall view of the people of Christchurch who live in the area impacted. The proposed increased in noise levels are in excess of the recommendations by the World Health Organisation.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: From what I understand the proposed changes to noise limits has been driven by "a few bars in the CBD" there is no widespread demand to lift noise levels across the entire area of the Four Avenues. The planner at a meeting with ICON residents said that there were bars and live music venues in St Asaph Street that have also been operating and their noise levels are higher than the current permissible noise levels and this area was not planned to have high noise levels as it was not in the entertainment precinct under the current plan. The question was asked why the Council have allowed such operations to be in an area not suitable for this type of operation - there was no reasonable response to this and it was obvious that the Council have caused this by allowing live music venues to operate in an area that was not in the planned precinct for late night entertainment venues. This is an issue that sits with poor planning by Council and you are now making this a problem for residents to "suck up" rather than the Council actually fixing the problem of having entertainment venues operating in area that is appropriate and fits with the agreed plan. Council are just changing the Rules to clean up their poor planning and mistakes.

If the new Te Kaha stadium requires increase in noise limits then apply to only this area, do not apply an increase in noise levels across the entire area within the Four Avenues, and certainly including Victoria St in this one size fits all is inappropriate given the immediate area surrounding Victoria Street is an established residential area, many of which are older homes - some of which are historic, such as the workers cottages on Montreal Street.

Add to this there are up market hotels (The George and Mayfair) whose guests will also be negatively impacted if late night (potentially 4am closing under the recently changed rules), this in turn has the potential to negatively impact on these businesses. We want Christchurch to be a place that attracts high value visitors and not for them to be turned off by rowdy late night drinking patrons and loud music causing them to complain that they are not able to sleep. Enabling late night bars and loud music/noise in the Victoria Street area is not something that the businesses and the reseidents want for this area. We saw the effects of this post quake and the negative impact this has on the area.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

The combination of enabling 4am closing and loud music is not in the best interests of the public in general from a wellbeing and health perspective. Evidence suggests that loud music encourages alcohol consumption. Extended opening hours of bars encourages increased alcohol consumption. In combination both will add to our already problematic issues we have as a community of excess alcohol caused harm. The Council should be doing more to help manage the harm caused by alcohol rather than encouraging and enabling it. Council's proposals under Plan Change 21 is not conducive to encouraging safe communities.

Secondly, the World Health Organisation states that people need to have noise limits below 40dB to be able to have a quality sleep, noise levels above 40dB can cause a disrupted sleep and increase stress levels which can result in anxiety and depression leading to mental health issues. We already have enough mental health issues in New Zealand and a significant lack of health professionals and funding to support these patients. It is outrageous that the CCC is proposing changes to permissible noise levels that can cause harm to its residents, and this harm is well researched and documented. For some houses in the Victoria Street area you are proposing that having noise levels of 60dB 24/7 is reasonable for people to be able to get a good nights sleep - do you understand that 60dB is one hundred times more intense that 40dB? This has the potential for causing significant harm and increasing the already dysfunctional and overburdened health care system.

Finally, during the post quake period many late night bars were temporarily enabled to operate in Victoria Street as the CBD was broken. The negative impacts of this on residents are well known to both residents and the Council. We had damage to our property, noisy patrons slamming car doors, partying/shouting and preloading in our streets, vomit in gardens and footpaths, empty bottles left in gardens and the streets. Our streets felt unsafe. This is a side effect of enabling late night bars to operate in proximity to residential housing. We don't want this back. At this time (post quake), the Council enabled this as a temporary measure and we put up with it. Following this period the CCC have continued to treat Victoria Street as part of the CBD/city centre - it is not, it is primarily a residential area with one street of commercial businesses, many are boutique, specialist, and high end retailers.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

The noise levels proposed are not extreme - but it opens up the opportunity for live music to be more widely supported.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

We want people to live in cities, but there has to be an energy that makes it beneficial! Christchurch is a superbly easy place to get around - flat and relatively compact.

so we have to create cultural opportunities, events, art, music, sport... all requires the ability to make noise!

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: No

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Yes. Victoria Street shouldn't change from category 2 and the surrounding residential neighbourhood should stay outside of any category. It has older houses within it. This area shouldn't be considered central city.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text: I like that the category boundaries south of the river haven't been changed much, nice to have given certainty to businesses.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: It seems like Victoria Street is the only area where the category boundaries have changed substantially. Why is this?
I lived on Montreal Street at the time of the earthquakes, there was considerable disruption to my life when entertainment venues opened up in Victoria Street, due to the centre of town being no longer accessible. The weekend nights were continually interrrupted with noise, fighting and worry about property damage. There was typically cleaning up to do the next day. It was a difficult time not being able to sleep or relax in the weekends. When the city opened up again, 4 years on, the neighbourhood let out a sigh of relief.
I have moved to Gracefield Ave, not far away and at times I can hear music and yelling in the small hours still.
I am very upset that these proposed plan changes mean that some of my neighbourhood will go through what I did and I wouldn't wish that on anyone. We are a very cohesive residential community, come and have a look. Raising both the decibel level and extent will damage the neighbourhood.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text:

1) Why is Victoria Street still being considered as part of the central city, it's not. It's the often the way visitors to the city enter it and it was hard to keep it in good condition after the earthquakes when the bars were there. It's surrounded by residential. It's different.
2) As I age, I am more aware of my hearing and what is happening to it. Raising all the decibel levels seems crazy. Especially the Victoria Street area and surrounds, where you are proposing huge increases in level (50 to 65 - Victoria Street after 11, 45 to 60 - surrounding residential). Sleep will be impossible at times, especially in older homes. Please rethink this area.

Q17 **What do you like about the proposed plan change and why?**

Long Text

The two venues that I am passionate about are The Darkroom and The Space Academy which are on St Asaph Street between Fitzgerald and Barbadoes. They provide an essential space for new, emerging and young Christchurch and other New Zealand musicians to perform. They are safe and encouraging environments for our young musicians and are key to the heart of a city like ours which has a strong musical heritage. They need to be able to operate as venues without excessive noise restrictions that I fear will happen with the newly built apartments around these venues. The Darkroom was a beacon after the 2011 earthquakes. It was the first venue to open and gave hope when you would otherwise walk to the end of the street and see the barricades for a broken and dark city. We need to support a space like this and let the venues thrive.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

City apartment living should never take away the vibrancy of the music and arts of a city. There is noise and it needs to be accepted if you want to live next to a venue.

Q19 **Overall, do you support the proposed Plan Change?**

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The proposed plan change takes 44 Peterborough Street from Category 3 to Category 2.
This is foolhardy.
Over the years noise has been a continuous problem, particularly on Friday/Saturday and Saturday/Sunday.
With the venues operating until three and four in the early mornings, and their customers in various stages of drunkenness the noise levels are too high.
The venue doors need to be closed and the music and noise contained within, say before 11 pm.
Yes, one can phone the CCC noise people (in Auckland!) but any action taken is practically worthless. So we all stop phoning/complaining.
There may be bylaws but there is no enforcement, no incentive for the venue operators to comply.

Note: In London, there are hundreds of pubs located alongside residential areas. The pubs close at 11 pm, and above the exit door is a notice asking the pub patrons to be mindful of noise and the local residents.

Peterborough Street (West of Victoria Street) needs to remain at Category 3 (or better.)

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

This plan change is solely for any present businesses or those to come.
And costs to them.

I support many of the local businesses but most do not affect my quality of life through incredibly hours and the resultant noise levels.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: I have lived at this address for 32 years. I remember the changes successfully achieved to adopt the current levels for Victoria Street and why residents and neighbourhood groups advocated for them. Previous to the current levels the noise limits and closing hours led to intoxicated patrons creating damage to properties and to public property. This was well documented. Litter and urination in the street were also a part of the problem. Post the changes the situation was more conducive to living close to Victoria Street towards Durham Street and Cranmer Square as well. The City wants more people living inside the four avenues. Will the change foster this in current residential areas which have a range of housing types. My home has double glazing installed in 1993. It excludes the current noise levels but I know it will not exclude the proposed levels. Hospitality outlets on Victoria Strret would be encouraged to move to live music venues if the noise levels were raised. The City has also spent considerable funds creating a city scape in this area. Current noise levels and closing hours still result in damage to plants containers and public property. That will increase if we increase those noise levels and support later closing. That is because customers who can't speak due to noise levels are encouraged to drink more, resulting in a reduction in behaviour standards. I also note that due to the current noise level status that the proposed change is actually three times what it is now in Category 2, while Category 1 is doubled. If the changes are approved the City Centre would rate as the noisiest in the country. I lived on the viaduct in Auckland for a few months in 2016. Thankfully their noise limits were not at the proposed Catergory 1.

Additionally our health authorites say that Category 1 levels are dangerous for our hearing. Are we really supporting levels for workers in these venues being beyond usual health and safety limits. And don't customers and residents deserve better?

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

From professional experience as an architectural designer and personal experience living in large cities with mixed use and apartment living, I don't think mechanical ventilation should remove the requirement of natural ventilation. This is as it requires constant maintenance which may be difficult to enforce. Lack of maintenance affects the performance of the ventilation systems in the long term such as air quality and may lead to system failures. Also, in emergencies or power cuts, it is essential to have the option of natural ventilation. Therefore, I think natural ventilation should be kept as a requirement in category 1 & 2.

Q17 **What do you like about the proposed plan change and why?**

Long Text

I strongly support any changes to support the entertainment industry in the central city as it will improve the vibrancy of the city and generate economic activity. In the Earthquake, many music venues such as Al's Bar were lost and it's vital for such venues to return to the inner city.

Changes such as this could also incentivise the opening of a larger venue similar to the Powerstation in Auckland (which has a capacity of 1000). The lack of a venue of around this size in Christchurch is a factor in why many music acts only go to Auckland and Wellington.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text We've lived in the central city since 2019 and have enjoyed the experience, although the noise generated by the hospitality industry, particularly in the Riverside area, has been challenging at times . We have struggled to get much assistance from the CCC and this has been disappointing.
Over the last couple of years, we've seen an improvement in noise reduction, largely due to face-to-face meetings with the restaurant and nightclub owners , with some been been very helpful and other not so considerate.
It's also possible that, with the recent economic downturn, the hospitality industry is experiencing a decrease in demand, which could impact late-night music events and other entertainment options.
I also note that the loudest event we've experienced was a council-organised event held near Winnie Bagoes Restaurant several years ago. It was by far the loudest event we've had, and I'm sure the excessive bass sound contributed to the noise. I'm certain the Phone Hotline was in overload, but surprisingly, the event wasn't turned down or turned off. Instead, it was allowed to continue until the very end at full volume.

In our experience there are a number of questions that need to be answered

I've reviewed several applications to the Council for proposed hospitality businesses and have noticed on several occasions that the accompanying noise plan, provided by a planning type company, supports the application. These plans detail the potential noise sources from the venue, its impact on surrounding businesses and houses, and how the noise will be controlled. In one particular case, the Plan (from Planz Consultants) provided a detailed description of how the noise would be mitigated. Without drawing conclusions, I request that the committee overseeing this submission review the Fat Eddies application and see if they are aligning themselves with what the plan requested.

I note also that there appears to be a different standard to how sound is recorded for both parties . Riverside hospitality businesses have there sound measured across the river (West Side) This is approximately 50 metres from where the noise is been generated .
It also appears that the sound receiver will have it measured at the property boundary .
Should the measuring of both not be consistent ... i,e at the boundary ?

I have been advised in the past that the CCC does not actually own any sound measuring device that is suitable to make accurate readings. This was advised on several occasions by CCC staff circa 2021/21. I have recently been advised by the CCC that "The Council has noise monitoring equipment that can accurately monitor sound levels. This

equipment - with appropriate upgrades - has been used by Environmental Health staff for the last 40 years. However, it does need to be checked and calibrated on a regular basis and at times it may not be immediately available."

I have also recently asked if the CCC could conduct sound tests at 1am as most sound problems tend top be in the early hours of the morning , CCC Replied, "After-hours staff will initially respond to complaints at night, but if it is established that there as an issue with any particular venue, Council staff will organise and carry out targeted monitoring"
This reply does not install confidence . If after hours staff initially respond, how are they supposed to tell if the noise is over the limit. , Guess ? Why can they not carry modern digital DB meter to make an on the spot assessment and take immediate action on what is required .

The 24 Hour hotline for noise complaints is not a great service in my opinion and more often than not it is very difficult to even connect a call due to the volume they are receiving . In some cases the the hotline has advised that it will be sometime until they have someone available to check on the problem. The CCC has advised that "The contract for this service has just been renewed so it will be continued" But I would like to suggest that it requires increased staffing levels to allow it to function correctly

More attention needs to be given to Bass music . This type of music is the most invasive as it tends to amplify through buildings and is a more distressful type of noise (see CCC concert noted above) In some cases Bass does not register well on DB meters so it can be hard to quantify .

-Hospitality businesses should not be allowed to use outside speakers. These appear to be used at high volume to lure customers into a venue . Often there is a competition as one business tries to outdo the other. In some cases these speaker have been so loud they have ben the sole cause of a noise complaint.

Having the Alcohol Board keeping an eye on noise complaints appears to have worked recently and may have helped to keep DB levels in check recently

I believe the sound level should stay at Status Quo of 45db . This a good standard and no increase is required . More onus of responsibility should be put on the hospitality business to meet the standard , perhaps they should be forced to have mechanical ventilation / closed windows and higher standard of glass, speakers that face inwards etc etc and then they would have no problem achieving a higher sound level without affecting neighbours.

- Changing the noise level is very unfair on existing home owners in the area. Our house was effectively a new build with the latest double glazing standards circa 2019 . Too change the specification now would be very expensive and to my mind unfair on us at the CCC had made no mention of the any possible changed to to Noise limits etc . There are many houses in our area that will have the same problem.

Q19 **Overall, do you support the proposed Plan Change?**

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

We do not like it because 60dB is already too noisy for us (resident in category 1 area)
The bar next door operates until 2am in the morning and the noise affects our sleep significantly.
We would like noise limits to be 50dB or lower after 11pm (which is reasonable bed time)

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

The noise limits should also be different depending on the time. Less noise level is appreciated in late evening period.

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Ensuring that hospitality venues can hold events (sometimes noisy events) contributes to a thriving Christchurch economy. This plan change gives residents choice. People who want to be near events (likely young people without children) can live in the central city near those venues, and people who don't want noise can live further away.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text:

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: The area north of Salisbury St along Victoria St should not be changed. This is central to an established residential area - densely settled, and many homes older. The area was well established as a residential zone before hospitality developed.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: The need to change the limits etc in the area surrounding the new stadium is necessary.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: There is no articulated reasoning for why the noise limits should be changed in the existing residential area around Victoria St, north of Salisbury.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Multi Choice No

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text The area added south of Lichfield should definitely not be included in category 1. The existing noise levels should remain as these areas have large residential populations within them.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice No

Q17 **What do you like about the proposed plan change and why?**

Long Text I'm ok with parts of it, such as extending the limits around Te Kaha and in areas that are specifically designed as nighttime entertainment areas such as the Terrace.

Q18 **What don't you like about the proposed plan change and why?**

Long Text The late inclusion of south of Lichfield is an unnecessary intrusion into a mixed use zone and introduces higher limits where there is already conflict. The change puts the onus on those receiving the noise to insulate against intrusive noise. What is obviously missing is a requirement for those generating the noise to insulate so the noise escaping the venue is lower. If music venues insulated to stop sound being emitted then they can play as loud as they want inside the venue. This polluter pays principle should apply.
As a central city resident I have no concerns about Te Kaha . While it is outdoors, the events are not every night, are well run and of limited hours, respecting the wider impact and benefiting large numbers. In contrast, the bars in the south of Lichfield area are older, cheap buildings with little or no sound insulation, and were never designed as music venues often in recycled venues immediately adjacent to dense residential apartment blocks. This is a sharp contrast to the modern bars around the Terrace for example. Some of the bars south of Lichfield also have a history of flouting noise limits, and I am aware of nearby residents being physically assaulted by the bouncers when they have asked for excessive noise to be turned down.
The lack of insulation at source would make a huge difference. For example I have heard sound coming from the open rooftop bar of Engineers well after midnight. If they want to play loud music, install a basement venue, or even within the building, where it is contained. Similarly I have been in an apartment in Atlas Quarter when the noise generated from a private party at the Welder was literally causing ornaments to shake off off a shelf. In that instance you could look down into the venue through the Perspex roofing that had no insulation of any kind. A requirement for venues to insulate to prevent sound escaping if they want to have loud music seems a reasonable requirement. It may cost them to do so but that is a cost of business. We do not also businesses to pollute the air, water, or land with chemicals and rubbish so why should they pollute with noise rather than manage it.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Polluter pays should apply to noise pollution.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Loving Christchurch's live music scene, which I feel is currently the best it's been for a long time. It's a testament to the handfull of venue's that have nurtured this development post earthquakes and through the covid epidemic. Its vital to protect these venues from incurring crippling compliance costs / risk of closure. They are the life blood of the city. The proposed plan change provides far greater certainty particularly for smaller venues and more broadly for performers, musicians, promoters and audiences

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

I don't think that Victoria Street should be Category 1 or the surrounding streets should be Category 2. I think that the status quo for that area should prevail. There is a significant difference between this area with mixed/residential and the CBD.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

I don't like the proposed plan changes for Victoria Street and the surrounding area.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The proposed increases noise limits significantly. The increase for Victoria Street from 45db to 60db is huge! This will impact on sleep, families, hearing loss and alcohol comsumption.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

These proposed changes have raised serious concerns for me as a resident living in the central city. I don't think the proposal for Victoria Street is acceptable.

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think a vibrant nightlife is important, and this enables it with the status quo

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I think there is probably room to have a tighter requirement for both new venues and new building on noise mitigation, while allowing the post-quake venues to continue into the future until they come due for refurbs.

Q19 **Overall, do you support the proposed Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

A lot of international bands that tend to play at smaller venues don't come to Christchurch and only go to Wellington and Auckland and play at venues such as Meow in Wellington or the Powerstation in Auckland. Anything that can be done to make it more viable and cost effective to come and play in central Christchurch needs to be encouraged.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Short Text:

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: St Asaph Street

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: I understand the consideration for people living in town etc, but if you don't like the noise that is already there, you shouldn't build or buy in the city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: It will hurt local music venues in town, and there are so many local artists that won't have a place to perform and share their creative outlets, this will also impact venue owner/operators, and generally make Christchurch a boring place to live. The noise thresholds are far too low.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Multi Choice

Don't know / not sure

Q17 **What do you like about the proposed plan change and why?**

Long Text

The new category 1 zone focused around One New Zealand Stadium makes sense, and leaves room for new venues to pop up over the years around what will probably be a source point for afterparty hungry hordes after a One Stadium event. This seems to be the most reasonable approach, balancing the interests of residential developers and current music venues.

Q17 **What do you like about the proposed plan change and why?**

Long Text

I live [redacted] Rope st City Centre my property backs on to the Diamond Lounge.
The music (predominately the Base) is loud and they operate to 5.30 am every Friday and Saturday and a couple of times to 6.30 am.
If the outside door is open (often in Summer) then the noise is real loud, they are literally over my fence.
They have another venue in town (Calendar Girls) I don't see their need for this venue .
But in saying this, I think it would be fair if their hours be reduced to 2.00 am finish time.

Will these proposed changes benefit me in any way.

With Thanks
Brendan Wahrlich
PS: Please email me their conditions of hours and when is the next review of these hours.

Short Text

Wade

Q3 **Last Name**

Short Text

Hunter

Q4 **Name of organisation/business**

Short Text

Q13 **Do you think we've got the category locations right?**

Multi Choice

Somewhat

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Possibly. If certain areas already host clusters of entertainment or hospitality venues — for example, parts of St Asaph Street west of Colombo, or Victoria Street — and already experience high ambient noise levels, it may make sense to bring those into

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Yes. Some fringe residential blocks near the Avon River or close to transitional housing on the edges of the CBD may not be appropriate for higher noise thresholds, even if they’re technically "central." Including them risks placing vulnerable residents

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

I appreciate the attempt to balance a thriving night-time economy with residential needs. Recognising that noise is part of urban vibrancy is mature policy thinking, and setting clear categories gives a stronger framework for both developers and residents to understand their expectations.

Also, aligning noise limits with insulation rules is an overdue and welcome move. It brings coherence to the plan, and helps reduce the mismatch between activity and amenity expectations.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The bluntness of the zoning approach risks painting complex neighborhoods with one brush. Just because an area is within a certain radius of entertainment venues doesn’t mean it’s equally appropriate for higher noise allowances.

The plan also risks favoring commercial interests over residents, particularly in Category 1, where venues may push the upper bounds of acceptable noise and shift responsibility for mitigation onto residential developers or tenants.

It’s also unclear how this change will interact with enforcement. How will ongoing noise complaints be managed under the new rules? If a venue operates legally within 65 dB but residents still experience regular sleep disruption, what recourse do they have?

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Yes. The plan does not address temporary noise from events or construction, which can often be far more disruptive than ongoing ambient noise. For example, open-air concerts or roadworks near Te Kaha Stadium or Cathedral Square can spike well above the proposed thresholds.

There is also no mention of compliance mechanisms or how these new rules will be monitored and enforced. Without adequate oversight, noise limits will remain theoretical, and residents will have little recourse.

Lastly, I'd like to see more consideration of neurodivergent individuals, older adults, and people with disabilities who may be more sensitive to noise and less able to move or adapt. These populations are often overlooked but should be central to urban planning decisions.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I really appreciate that the council listened to music venues when they asked for help, and residents when they expressed a need for a vibrant, exciting, diverse music scene they could be proud of. The proposed changes ensures Christchurch will greatly benefit from a nighttime economy, which is the economy my family and I most actively participate in. Developers, residents and those advertising inner city air B&B's need to know that we don't want our CBD to become a retirement village and lose the one aspect of our city that draws in local and international musicians and their passionate audiences.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Many - the amount of homes that are being bought up as air B&Bs, RMA reform making processes even longer, noise complaints about venues from people choosing to stay in the CBD, where noise should be allowed - if you want a quiet CBD experience, then go to a small town, not a city! The CBD should be noisy, exciting and vibrant - for peace and quiet you can go to any suburb - even mine, Waltham, that is very close to the CBD but incredibly quiet and peaceful. I'm also worried that some venues are being blamed for all noise regardless of the source - especially the Darkroom, when Space Academy is right across the road. There seems to be some scapegoating going on, which needs to be addressed.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Nothing.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The council has given opportunities for residential developments to be built for people to live in the CBD. This makes it a convenient place to live. Now that more people are living in the CBD, the council wants to raise the noise level for residents, possibly making it an unpleasant place for them to live with the noise level.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Christchurch is currently the highest in New Zealand with the council's approval of 60 db. Changing this to 65 db will effect the well being of residents living in Christchurch CBD. No other CBDs in New Zealand have 65 db noise limits.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

i like that there would be more insulation to existing and future buildings ensuring more noise reduction so that live music venues dont have to suffer and change what they are doing.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

i am upset that the changes will impact the live music community. music brings life into the city and is an integral part of the cultural landscape for the people of Ōtautahi

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

the buildings should be built/renovated to maximum possible noise cancellation so music venues dont have to turn down. i think that if you make the choice to live in a city centre then you should expect there to be noise 'pollution'. do not make what was there before the houses have to change their ways to accomodate for noise. music brings joy. maybe there could be suggestions about tennants purchasing ear plugs and being prepared there will be noise

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Christchurch city needs to get its heart and soul back - the nightlife is currently non existent and only in a few spaced out places and it doesn't feel like a central community exists in the heart of the CBD. I live in the city and I would love to see more events, more live music more reasons for people to come spend time in the city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I'm concearned that current air bnbs in the city are specifically being listed as "in quiet neighbourhoods" while they are right next to clubs and venues. Thus leading to noise complaints for venues who should never have had complaints at all if the airbnb listings were just honest and people knew where they were staying

I am also concerned about how many of the new builds going up are turning into air bnbs

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Not really- I honestly believe if people want a quiet neighbourhood then they should choose to live in a subdivision rather than the CBD. There are plenty of people who love the music and hearing people out and about enjoying themselves and our city. City's are noisy no matter what but we should be encouraging the magic people are creating in the city, not dismissing it

Q17 **What do you like about the proposed plan change and why?**

Long Text

The Stadium should be able to host large music events and not be restricted by noise levels. I've been to concerts in city centers before where the volume was turned down for the headliner's big finale, and it detracted horribly from the experience and I definitely wouldn't go back.

Reading festival is a example of where the noise restrictions have hampered the experience over the years. And now it's all anyone talks about when Reading is mentioned - terrible sound levels for the headliners - don't bother.

I would rather have a few noise complaints from time to time, than have everyone who visits the stadium for a concert say the same thing - the sound quality ruined the gig.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I'd prefer less restrictions on the noise levels. Maybe a special case exemption for large concerts granted twice a year?

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I don’t believe it’s fair for tenants, property owners and landlords of central city to erect their flats any buildings next to well established and cherished venues to suddenly demand that the noise be lowered. These places are the startup of local talent. You can’t have a famous band be a famous band on startup, they need places like the “darkroom” and others to perform and make a name for themselves. By restricting and controlling the noise output and time of the allowed noise you limit the creative growth of our music and culture. My brothers band played their first gigs in places like these and without them they wouldn’t have made a name for themselves. This proposal to limit the noise is simply ridiculous. Shame

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

By restricting the noise you hurt the venues ability to do the one thing it’s meant to do, which will kill the business itself.

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think that the music scene in Christchurch has been dying via venues shutting and I think allowing the townhouses to impose on the night life would cause the city to loose its spark. Music is what makes a city special and if we're not careful the Christchurch live music will cease to exist and the culture would be worse, and frankly less people will be attracted to studying here or traveling here. Seems like the minority that buys town houses near the venues have been having a opinion over something that involves everybody in Christchurch, I think that if your going to buy a townhouse near a venue you should be informed about the noise and pre warned so people aren't illuded or decieved. I don't think it would put away any younger buyers, I'd love to hear music outside my house all the time.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Nothing, you will ruin an already struggling hospitality and music scene in chch central

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Reducing noise limits will seriously damage small hospitality business who rely on night life
In the same regard the music industry will struggle
Chch has a lot of underground music talent which should be encouraged to thrive in ways the benefit the city and local business
Also the huge tax payer investment into the new stadium will also be effected
We should be encouraging music and sports events at that stadium to bring revenue back into the chch economy
This is a terrible idea, you should be reaching out to potentially effected local businesses for their input

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I understand the health of local residents, but I feel those residents must empathise with Christchurch's need of art and culture. Especially after the earthquakes, there is are only a few spaces for people to enjoy the artform of music and dance that is so important to ones health and wellbeing! I think in order for Christchurch to rebuild itself not only materially but culturally, there needs to be more acceptance of noise. I think for those not willing to compromise their quiet nights in the weekend should move somewhere that meets their needs of quiet. I think because Christchurch has started from the bottom (post 2011), people have forgotten that it used to have a thriving nightlife and city culture. To re-integrate night life culture again will bring more togetherness and community.

Q19 **Overall, do you support the proposed Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think this is a great change. Having a night life is important to any thriving/growing city, it helps attract tourists and locals alike.

Having smaller venues is so important to the arts. They are where smaller, up and coming artists learn and grow their craft. It also give people with less money somewhere to go watch live events with out having to pay large sums of money like at the Theatre or Stadium.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

My only concern is if it goes far enough. Are the DB limits too low? are the areas too small?

Q19 **Overall, do you support the proposed Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

So glad it extends across the middle of the city and to the SALT Quarter and Darkroom etc etc. Those guys got such an important part of the central city rebuild started and made so many people want to move back into the city. They continue to be such a cultural jewel in our crown and it makes sense that if you like music then you can move nearby, and if you don't like the idea of vibrant music playing late at night then you can live literally anywhere else!

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I haven't followed the support available too much. My business is on the terrace round the back so we haven't really been affected by noise issues, and personally I love living in the centre of town. I always have loud noise beside where I live, whether it's fire engines or roadworks or cars blasting music or DJs setting up to play music while the marathon happens.

I would hope that people who decided to live on St Asaph St have the same attitude, especially considering they went up knowing they were beside music venues. I hope that any responsibility could be put on those homeowners if there are changes to be made. However the increasing of noise tolerance is perfect.

I belive we should support young peiple relasing their energy throu dance and sharing music. Mysic has been rooted in us since thousands of years. It's been alwas connecting us. I belive it's the best antidepressant. I wish we could allow little bit more noise in areas where it doesn't bother people. With our technology and noise reduction materials we can have parties and noise which won't bother anyone. I come from Europe and parties go on non stop, it's just sometimes about knowing your limits, being respectfull and kind to one another.

No

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Yes, in the vicinity of music venues.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Some of the changes seem fine when not in the vicinity of well established venues.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

It hasn’t taken into consideration the cultural value of small music venues that have been an important component in encouraging young musicians to establish themselves and also key to a thriving nightlife in the inner city.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Somewhat

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

I think your cat 1 areas should reach further into the cat 2 space around existing venues

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

no

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

The requirement on residential buildings to have noise insulation. I would hope people moving into central are there for is vibrancy and night life too - they shouldn't be such snowflakes that they then complain about it being noisy.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I think the category 1 nightime limit of 65db is too low! Cat 2 areas are too close to existing venues (like Victoria Street). I don't want my favourite venues having to close because someone has decided to build residential close to existing venues. The dux de lux central is prime example of a resident getting an existing very popular music venue with a long history silenced. I worry that the venues on the east end of st asaph street like the darkroom and space academy may be forced to follow suit under proposed settings.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I don't think the category 1 area around the new stadium extends far enough. Stadium gigs are LOUD, don't stifle gigs with these low limits. Let the music play.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think it is important to allow higher noise limits in central areas so that Christchurch can support a vibrant nightlife. Any nearby accommodation should be adequately insulated, and people buying or renting accommodation in the area should see the proximity to hospitality venues as a positive, not as a burden.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I think the category 1 noise level could be higher.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I have concerns that there are a lot of quite recently built accommodations around long-standing hospitality venues and near the stadium that are now being used for short term accommodation. I think if people are staying in those places they need to be thoroughly aware of the noise levels they should anticipate and be discouraged from making any noise complaints unless there are noise levels that could not have reasonably been anticipated in context. I think it is totally unreasonable the the housing built near Space Academy and Dark Room may not be adequately sound proofed, given those venues have been there for so long. They should not be subject to nose complaints just because developers would not invest appropriately.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

That way we can attract more international artists to the country for concerts as well has have live sporting matches in the city. New Zealand keeps getting passed over because we don’t have enough viable concert locations, as well as ludicrous laws around how long concerts can be, this could help change that

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Increasing noise limits and expanding the boundaries of higher noise areas is key to supporting our city to continue to grow, and will support music and arts communities, as well as adjacent industries like hospitality, events, retail, etc, to flourish in the city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Though it may come through other rules, I do think even more pressure should be put on developers to create really well sound insulated properties, the requirement for sound proofing should be increased in residential new builds within at least the category 1 boundary

Q19 **Overall, do you support the proposed Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Yes, I think it’s vital that live music and entertainment venues have the chance not just to exist but thrive in the city. Anything that helps them stay alive is a positive.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The decibel increases to me although helpful seem minor. If anything they don’t go far enough. As far as I’m concerned if you want to live a quiet peaceful life, then go live in the suburbs or in the countryside. Do NOT move to the central city, complain about something that was there years before you ever were and ruin it for everyone else.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I do not have any concerns about noise. I have concerns about the music and arts scene in Christchurch. If Christchurch wants to be taken seriously as a global international hub of arts, culture and things to see and do, it needs to have a thriving nightlife and liberal attitudes that allow these venues to thrive. These recommendations are an important first step. I love Dark Room and Space Academy so if they endorse these plans as helping their businesses survive then I wholeheartedly support it. This is of huge personal importance to me. I want to be proud of my city and to be able to live somewhere you can watch developing artists, quirky and cool things and an alternative lifestyle. It’s so important this legislation passes so that this can continue to be possible now and well into the future. Otherwise we risk becoming a bland, sterile, awful city.

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

My primary concern is that increased levels of noise will be permitted that could disturb my peace and quiet, especially after 9pm at night, where I live.

I oppose any changes that would allow more noise than is already permitted in the central city.

Look, it’s not possible to encourage more people to live in the city centre if their sleep as well as peace and quiet will be disturbed by excessive amounts of noise. We can’t have it both ways.

Victoria Street north of the Avon should not be category 1. Residential areas north of the Avon should not be category 2.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Increasing noise limits that will affect residential areas where many extant residential properties do not have adequate noise insulation, thus having an undue impact on those residents.
Increased noise limits for businesses will invariable lead to an increase in anti-social behaviour. In addition to increased noise there will be an increase in littering including food waste (with associated vermin issues), vomit, broken glass and wanton vandalism.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Including businesses on st asaph street that have been there before housing was built across the road from them, who have been keeping the cities night life going since the earthquakes: space academy, darkroom, hide club
These venues are also fantastic supporters of local, national and international artists! Hide club has even been nominated for best club in international drum and bass awards. International artists know of this place and want to play there.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

I don't like anything about the proposed change. Council wanted people to live in the city and we have purchased our retirement house there. As older people we are more subsectable to noise and will obviously live with the limit limits but as there was never any indication of increasing those limits until now e feel that it is unfair and totally inappropriate for Council to now decide to up the noise level when we have already purchased our house. You may well make changes to any new buildings but that is too late for us. The inner city is a great place for retirees to live but older people do not cope well with a lot of loud noise.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

If you wanted to do this then the appropriate time would have been at the beginning when you were announcing you wanted 20,000 people living inner city. At that time you could have announced both and then made it monitory for houses in Cat 1 to be Triple Glazed with appropriate noise reducing insulation. Its too late for that now unless Council are offering to come and retro fit our homes??

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Yes

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

The proposed changes ensure that the city centre will remain a visible venue for music and nightlife, similar to other New Zealand cities.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I have nothing to object to in the proposed changes.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

It ensures that existing businesses that host live original music artists can continue to operate.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I am unsure that the sound levels are set appropriately for live music.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

As mentioned above. I am not sure the decibel setting is adequate. Chch is renowned for a few musical acts, Bailter Space and The Gordons being two. I doubt either would be able to perform in Christchurch at these settings.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think as a growing, progressive city it is so important that our regulations follow a similar line. Harm comes when we try to over patrol environments that are bred out of creativity and expression. Allow people to enjoy facilities and make Christchurch a location everyone wants to visit!

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I think if people are going to buy residential buildings in the city centre they need to have some sort of clause in their agreements that they understand they have moved into an area with higher noise levels. Reworking an entire epicentre around individuals who did not do enough research before committing to purchases of property should not then come at the expense of a city's ability to provide entertainment and joy to everyone else.

Q17 **What do you like about the proposed plan change and why?**

Long Text

I recognize the desire of some people to ruin their hearing in the name of enjoyment. The noise level increases are reasonable, but should be constrained to certain hours, and particular week-days. I believe that 7pm to midnight, on Fridays and Saturdays, would be acceptable. Other occasions could be granted by specific application.
Low-frequency noise travels much further than higher frequencies, which is why ship's foghorns are low frequency. It would be useful to restrict the allowed energy levels of low-frequency sound, where this is electronically produced (eg. Music through loud speakers). I know that measuring low-frequency energy is difficult, because the effect can be generated by higher frequencies spaced apart at the low-frequency harmonics.
I would support North Hagley Park being allowed higher noise levels for the various entertainment functions held there.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

We live in the new Zone 2, which requires mechanical ventilation. Ours is a relatively new tower block, and although it is fitted with heat pumps in each apartment, there is no mechanical ventilation and it would be impossible to retrospectively fit it to the building.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Yes, there is no mention of restrictions on Time of day, and weekdays allowed, where higher levels are permitted. I think that higher levels should be allowed but only with such restrictions in place.
The noise level increases are reasonable, but should be constrained to certain hours, and particular week-days. I believe that 7pm to midnight, on Fridays and Saturdays, would be acceptable. Other occasions could be granted by specific application.
Low-frequency noise travels much further than higher frequencies, which is why ship's foghorns are low frequency. Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Expanding the noise areas is a sensible way to have a more vibrant town center and grow Christchurch as a destination and attraction for visitors.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

There remain holes, for example Airbnb and accommodation providers should be required to inform people accurately about the expected noise in the area.

I also think in general we need less air bnb homes in the Cbd.

Finally I don't think a 72hr suspension is the right approach for a first time warning of noise limit breach. There should be an escalating system that gives people a warning based on whether it's an honest mistake or repeated pattern of escalation or breach.

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Beveridge St is very quiet at present and if the noise volume was to be increased from cafes nightclubs etc certainly wouldn’t be such an enjoyable place to live.
Also I live alone and my rates are through the roof, living in this area, if the noise in evenings were to increase I would want to have our rates lowered.
Certainly would put buyers off this area.

Q19 **Overall, do you support the proposed Plan Change?**

I would like to see live music venues and venues which promote the arts, music and nightlife to be allowed to florish. Having sound levels which live music and social venues can comfortably run means that the city remains vibrant and it will promote events and happenings in the city.

Many of these venues have been around for a very long time and Council, for the sake of ensuring that Christchurch does not become boring or does not see NIMBY's strangle out the livelihoods of many and the culture and social lives of even more, should promote their existence.

I like that Council listened to music venues asking for help.

I like that the proposed higher noise areas, includes some of the very important business that have helped reshape the heart and soul of this city, (Rolling Stone, Space Academy, Darkroom, Flux, Hide)

I am concerned that so many of the new residential builds are immediately made as AirBnbs rather than housing city residents, which in my opinion is not supportive of a local housing plan (and only increases the problems at hand).
The listings also fail to mention any note of noisy surroundings, despite being a few meters only from music venues. This automatically increases unfair noise complaints from uninformed 'clients'.

Central cities are meant to be vibrant.

Noise control officers serve a 72 hours notice by default, which in the case of music venues, essentially shuts down the venue for an entire 3 days of operations.
Changes need to happen faster, because in the meantime venue continue to get complaints from new residents...

Long Text

This plan much better reflects post-quake development than the original. It offers much more sensible guidelines about new residential builds, which are currently leveraging the idea that cities are lively and vibrant places in their marketing and rationale, but are then stifling that activity. This will better support arts, culture and live music by ensuring that bylaws reflect our creative ecosystem and nighttime economy. It also better protects residents, while ensuring they have great access to places like Darkroom, Space Academy, and Flux, let alone all the places west of the stadium that have been contributing so much to the city's post-quake identity. This will help develop the inner city community, as part of the move to keep bringing more people into town as visitors and residents, without pushing out those people and business who have dedicated years to making this a great place to be.

Overall, I am really appreciative of the way that council has worked with local venues and other inner city residents and businesses to find a balanced and sensible solution to this that will ultimately benefit all parties, while keeping space for new residential developments and new businesses and venues. It seems like it has been really collaborative. It has been really perverse to see the city's nighttime economy, and all these tenacious businesses, caught in the crossfire, especially when activity can be shut down for 72 hours on the basis (a surefire way to kill a business) on the basis of complaints - some of which have been served to the wrong address. The idea that a single inner city resident can stop a venue like the Dux from hosting live music (which for decades, across sites, has been its stock and trade) is honestly bonkers.

I live in this area and this proposed change will have a significant positive impact. Thank you!

Long Text

While it's great to see council listening, and everyone working together towards a common goal, this has taken a really, really long time. It has made visible problems with noise control - a lack of proper dB readings, notices delivered to incorrect addresses, the impact of this on established businesses. It also illustrates problems that arise

when so many buildings that were ostensibly supposed to be about bringing new residents to the city are being used as AirBnBs and similar.

At the east end of the zones, these new builds have been constructed by developers who were fully aware that soundproofing and ventilation standards were in practice too low for the area, and that the placement of new residential properties were going to be a problem. It's important that visitors have somewhere to stay, but it is so misleading for these businesses to market their properties as peaceful inner city sanctuaries, when in actual fact they are next door to a music venue - it is no wonder people get upset. You only have to go on these sites, or real estate sites, to see how many are not disclosing that they sit next door to music venues or other places that contribute to these economies. I had a look this morning and saw places on busy roads, that back onto music venues, advertising themselves as a 'retreat', a 'peaceful haven' and a 'serene getaway' - seriously!

The additional requirements to residential new builds are a great step, really sensible, and will be really helpful (and make those places more livable in general for everyone). Nonetheless, current rules incentivise this sort of duplicity and only benefit developers who hit and run, caring little about these sorts of problems, then absentee landlords - not the people who live and work here. There are better ways to get people to want to live in the city, and to cater to vistors.

Entertainment venues that promote culture, connection, and community are what truly keep the heart of any city beating. Having live in New York, London, Shanghai, and Seoul, I know what it means to be a resident in a vibrant and thriving city. Christchurch is growing, and that's what excites as an entrepreneur moving my business to this country. This sort of plan is good for everyone. It keeps the culture alive, it helps small businesses thrive, and it requires developers to meet standards that any international city ought to meet. These changes allow small business that define the cultural identity of Christchurch to continue delivering what the community needs most - space for connection. This plan is an opportunity to hold our infrastructure co-creators to a higher standard (one that should have been met a long time ago).

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I'm sure you'll get lots of feedback from development companies with lots of money who want to keep cutting costs. This plan is for the people and that's what I love about it. The only thing I don't like is disingenuous efforts by large companies to undermine the efforts of critical cultural institutions for the sake of penny pinching. Don't listen to these people.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Cities are loud places. The New York City subway operates around 95dB. To pretend that live music venues should be facing the threat of closing because our city's developers can't build to a code that the rest of the world find easy, is a clear indicator of corner cutting. The victims if this does not go through will be the people - small business owners, artists, residents.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Already when the bars on Welles Street (most notably Muy Muy) have events on we can hear it the music and particularly the bass noise in our apartment, but it is tolerable, although we have to play low music to get off to sleep otherwise we can hear the bass noise from the venue.

I do not see the need to increase the noise level as the current 60dB appears sufficient (this is also matched by both Wellington and Auckland). Once patrons are inside the venue the music can be heard clearly at this level. Venues are busy already. Why does the noise level need to be increased and where has this come from?

We have a good relationship with the two bars next door, it has not been problematic, they advise us of upcoming events and oblige when we inform that the noise is too disturbing and we are trying to sleep.

So I would question the need to raise the noise level at all. These events prove to be popular and are well attended by patrons with the current noise levels.

Raising the noise level would possibly increase street noise with patrons leaving the venue having to shout to be heard. This is an occasional occurrence currently but again tolerable.

We moved into Welles street over 6 years ago and did our due diligence with noise levels on a night time from the local bars and made the decision to move in. To now change the noise levels on residents who have lived in the area for so long does not seem to have a compelling justification, when the vibe and atmosphere already appears to work very well.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

This increase proposed is potentially damaging for residents mental health.

Long Text

The city is growing rapidly, and it needs a thriving, protected cultural centre to match. The area under discussion includes many much loved venues such as Flux, Space Academy and Darkroom, all of which support a diverse and growing community of artists and the social life of countless residents and visitors. They provide immense value to Christchurch, which, as Council has envisaged, is poised to become a real cultural hub. It is vital that they be formally protected in the bylaws. This change also benefits residents, both current and prospective, by clarifying what can be expected from living in the central city. For such reasons as these, I support the proposed change.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

At present, Noise Control officers often operate outside of clear procedures or protocols. Reports from music venues are that complaints are served subjectively, in many cases without serious reference to decibel readings, and even to the wrong address. The notices themselves usually suspend a venue for an entire weekend. This sends completely the wrong message to our arts and culture sector. If a noise complaint is to be served, Officers must follow a clear, defined set of protocols, and appeals by venues must be met with genuine engagement and dialogue from Council, along with the willingness to resolve problems that it has already displayed.

I am also concerned that a large amount of new 'residential' housing is actually being turned into Airbnb-style accommodation, many of which are also next to music venues. These are often advertised as 'peaceful' or 'quiet', which does not accurately reflect the noise that can be expected in central Christchurch, even during the daytime. Furthermore, these were built as homes for people to live in, not as hotels. It is disturbing that central city housing is so quickly turning into a rarity, commodified to the benefit of landlords and the highest-paying tourists. The potential influence of these interests does not reflect the spirit of partnership between Council, venues and residents that this change exemplifies.

I urge the Council to make this change with all possible urgency to help our city's culture thrive now, not in some future plan.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice:

Q17 **What do you like about the proposed plan change and why?**

Long Text: It encourages the right sort of activities to be held in the right places. The city centre should be a vibrant location, and this promotes activities that will help address the donut nature of the city post-earthquake. While I understand the need to respect residents' needs within the city, that is a trade off you make for being close to the action. We have no shortage of growth outwards for people looking for a more subdued lifestyle, but the city should be where all the major entertainment types of events should be based.

I think the proponed plan is not considering the surviving of fundamental venues as darkroom and space academy. Those spaces are incredible important for communities of artists and musicians and there is unbelievable that people that voluntary decide to leave on these places now pretends to the entire community change because of them. Also, the level of insulation on external wall of the townhouses is ridiculous compared with other countries, the proposed plan is protecting the investment of business groups of people. The building insulation for every external walls could be easily increased helping to protect the fire stability as well. The plan must think on long therm.

Long Text:

Q18 **What don't you like about the proposed plan change and why?**

Long Text: We have lived on the Montreal St end of Conference Street for 18 years and were really affected by the noise and drunken behaviour from the bars that opened in Victoria Street after the earthquakes. Since the bars have reopened downtown our neighbourhood has returned to the pleasant living we now enjoy. We believe the Plan Change will double the noise levels and encourage more bars to open in Victoria Street with loud, live music. Especially if bars are allowed to stay open until 4am.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Having thriving bars and venues is critical to a city's culture and nightlife. Suburbs are the suitable place to expect reduced volumes overnight - not the city. It was not fair to expect venues, who have operated in the area for years, to change their services due to encroaching housing developments. I support this initiative and I think this is a proactive step in achieving a more vibrant nightlife after years of inattention.

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Nothing at all

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The noise lift in the Victoria Street areas will disrupt residential life, and the safety of properties from the clientele that will fill the neighbouring streets.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Victoria Street neighbourhoods are not central city, they are quiet upmarket areas on the outskirts of Central City and so Victoria Street being included in the lift is not appropriate or considerate for all those who dwell there.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Giving jurisdiction for gig venues to operate at the required dB levels means that the culture of the city can thrive and be upheld. Culture and Arts is an important function of any well-balanced society. In terms of problems which arise from dwellings that are nearby to said venues, it must be said that a number of these (the new developments neighbouring Space Academy comes to mind) were built thereafter Space Academy was established. Moreover, local small-venues within the city centre are key to forging good community bonds and therefore a good sense of social welfare. A noisy inner city is part and parcel to choosing to live so close to the CBD. Think the Octagon in Dunedin - the bars there are definitely not going to close their doors early just because of noise complaints from tenants choosing to live above them; that would destroy the nightlife and culture of the city!

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Yes

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: Nothing I don't think there is the need to increase allowable noise. I understand if there is a need arounfd the new stadiaum but can't that be for nonly the times there are events on in the same way this is used for events in Hagley Park and in Auckland Eden Park?

Q18 **What don't you like about the proposed plan change and why?**

Long Text: You are proposing the Christchurch becomes the noisest city in NZ just because a few bars in the CBD have asked for increases to allowable noise the CCC is proposing to apply this throughout the entire city.

I particularly don't like that you are applying this to the Victoria Street area which is not part of the CBD or city centre - this is very obvious from the map you have provided as part of this proposal. There are older houses that are in the immediate blocks behind Victoria Street (both on the east and west sides) that will be negatively impacted by this proposed increase in noise. They do not have the latest insulation, double glazing or mechanical ventilation. Therefore a strongly object to this plan change particularly for the Victoria Street area as their will be significant and negative impacts on residentials causing sleep disturbance as well as broader impacts on our communicty and neighbourhood.

The increase in noise to 65dB and 60dB will impact people's ability to sleep which is not good for their mental health. The World Health Organisation recommends that we need to have dB below 40 for a healthy sleep. Proposing to have noise on an average of 60bD in some residential streets surrounding Victoria Street is not in keeping with looking after our people and communities to keep them safe. I work as a mental health councillor and expect the CCC to help look afteer people not change planning rules that have the potential to harm people by adding to issues relating to mental health.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text: Yes. See below:

1. Safety and crime. Extending bar hours as you have already done (until 4am I understand) correlates to increased crime. Add the ability to have loud music which encourages drinking resulting in intoxicated patrons that hang about the area preloading and/or hanging about in the streets as the move to and from bars often parking in our quiet residential streets. We saw this after the 2011 EQ in Christchurch when a number of bars were allowed to set up in Victoria St as the city centre was broken. Victoria St temporally became a late night entertainment area for the city. There were numerous issues caused to residents and property in the area as documented by the Victoria Neighbourhood Assn. Some residents were so disturbed and scared they moved from our streets - this was the case for some young families. Others felt too scared to venture out to restaurants in the evening as the area was overrun with drunk people who were loud and obnoxious. we don't want a return to this. The noise from intoxicated patrons in our streets included slamming doors, cars revving, loud shouting, arguments, fighting which all added to feeling unsafe as well as interupted sleep. These negative consequences impacted the areas that have a noise allowance of 45dB on your map. So these are all factors that need to be considered that impact on pur quality of life.

2. I live in Peacock Street in a very old worker's cottage. I bought my property many years ago and value the quiet residential nature of the street as I'm sure my other neighbours do. We take pride in our street and maintain a well connected community. I did not purchase a property to live in the CBD and do not want to live in the CBD so don't treat our streets like the city centre by applying he same rules to our neighbourhood as you do for the central city - we are primarily a residential area, we are not the city centre and don't understand why you keep treating us in this way. We are a residential area.

3. We currently have to deal with enough noise as it is. Between the boy racers on Bealey Ave and the events in Hagley Park there is already enough sporadic noise than impacts on our lives. We do not need the City Council adding ongoing, very unhealthy noise allowances on top of what we already deal with as residents. Increasing the noise limts to 65dB adn 60dB is not healthy and not necessary and will negatively impact significantly on our quality of life and mental health, and does not meet the objectives of the CCC and their obligations to its residents.

Short Text:

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text: I think it is great that the council has spoken with music venues to find a suitable solution. It is important that residents are aware of noise when living in a city centre however it is a fundamental part of a city allowing spaces for the music and arts to grow and thrive. I have lived in Christchurch for 4 years now and a bit part of why I love living her is the music scene. I didn't anticpate to stay here as long as I have because I thought the music and arts scene was minimal, but it is great to see it growing and thriving.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: I do worry how many new builds will become Air BnBs rather than residential homes and flats for locals. I hope that spaces remain affordable and accessible for artists and creatives to live and thrive in these areas.

Q17 **What do you like about the proposed plan change and why?**

Long Text

Post quake the city has really blossomed organically in areas that weren't initially designed to accommodate these art and music hubs. I like that this proposal is responsive, not resistant, to the realities of what the CHCH artistic scene is doing and accommodating the changes that have happened for the last decade. It also means the increase in noise allowance across a wider area allows for more opportunities for venues and other creative hubs to spring up and take advantage of the changes and potentially be the start of a really robust Christchurch local nightlife scene. Christchurch has gone through a lot and these spaces really do mean the world to many communities, so its great that the city is allowing them to thrive and opening the door for new possibilities to bring the central city back.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I support the goal to have a vibrant nightlife. This means that people need to be able to enjoy music and other noise (such as cheering from sports) outdoors and indoors, in bars, restaurants and other places where people gather in an organised way, particularly with the new statium opening.

Encouraging or requiring mechanical ventilation will cost money but will also have the added benifit of a more comfortable temperature controlled home.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

It is not clear how noise from unorganised activities will be managed, for example, people congregating in parks and open spaces etc.

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think you've got it about right given the information you have at this time. However, I would like to suggest that you defer making any final decisions regarding the plan change until we've got more data on the likely noise effects of the Stadium . I think you should therefore go ahead with the current proposed changes but with the proviso that if after a years experience with a live stadium it may be necessary to adjust the parameters to better reflect the actual noise levels and the needs of the surrounding community and businesses.
You've engaged with the community very well todate. Thanks you!

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Allowing chch businesses and local residents to co-exist is part of a healthy city, local residents having better insulation and ventilation will only improve them quality of life. Chch needs a thriving night life to encourage tourism and stimulate the local economy.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Better insulation and ventilation should be extended to suburbs outside the four squares, as the new stadium will likely create noise problems for a wider area of people living in Otautahi.

Short Text: no

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Upper Victoria Street , between Victoria and Park Terrace is residential housing area, these houses are +25 years old , the noise insulation of older houses going to struggle with increase in allowed noise levels.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: I am ok with increase levels to the main hospitality areas of Oxford Terrace , Cashel street and the new stadium to maintain hospitality industry

Q18 **What don't you like about the proposed plan change and why?**

Long Text: Upper Victoria Street , between Victoria and Park Terrace is residential housing area, these houses are +25 years old , the noise insulation of older houses going to struggle with increase in allowed noise levels. At current limits with all windows and doors shut, some noise penetrates, with increased allowed noise levels in residential property we will experience more noise within dwelling. The residential older houses don't have the air circulation and insulation that the commercial buildings have.

I disagree with Category 2 noise limits increase for Dublin Street household dwellings. This will increase noise when all windows and doors are shut. Victoria street isnt popular for hospitality night life and bars. More popular hospitality restaurants and bars are on Oxford terrace, Cashel street and the focus should be there.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Live music is essential for city night life culture. If you live in the CBD you need to understand you are living in a city centre and it will be loud.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

The new stadium is going to be incredibly loud. Bars and music venues are going to seem so quiet by comparison. Developers might need higher requirements on sound proofing in residential homes.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like that the area with higher noise limits has increased to include significantly more of the venues in the city. Having the areas clearly mapped out allows for people to anticipate the level of noise to expect if living in various parts of the city. Likewise, event organisers have the peace of mind that their event won't get shut down early because of noise.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I like everything about the change.

Every city I have lived in around the world has a vibrant night-life, apart from Christchurch. Music and entertainment are a big part of this and we have such great talented artists to help shine the spotlight on. We should be proud of our small but diverse city, surely we can make it work for everyone. Too many have said this city is a ghost town after 9pm, any night of the week. Please allow some reasonable city standards for noise levels and music, and stop being so conversative around the night-life. It's really hard to go out as it is with winter weather but when everything shuts early or is dead, it isn't very motivating or compelling. Please, please, please can you listen to the people a d small businesses surrounding the city and they will tell you how difficult it is to help make a city rich in culture. Our topography is music and art, and we have a responsibility to ensure we can support their futures!

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Christchurch has come a long way since the earthquakes — the city's transformation is well underway, with stunning new buildings and creative installations popping up all over. But now it's time to take things to the next level.

New Zealand is brimming with incredibly talented artists and musicians, and Christchurch deserves to be a world-class stage — a place that not only showcases our own talent but attracts international acts too.

At the moment, it feels like inner-city peace and quiet is being prioritised over the vibrancy a thriving nightlife could bring. It's a bit backwards. Like other great cities around the world, Christchurch has the potential to be a buzzing, multicultural melting pot — full of energy, creativity, and life after dark.

This city deserves a nightlife that matches its heart

Q18 **What don't you like about the proposed plan change and why?**

Long Text

There's got to be consideration for small businesses and help for existing buildings and businesses not just big property developers.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: No

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Victoria St

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text: To ensure a vibrant 'inner city' noise limits do need to accommodate entertainment options, most residential in that area has been built recently and those buying property there will know that noise from music etc is part of the environment. As new properties they will be insulated against noise. I agree with the new noise limits around the new stadium etc.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: Extending the area into Victoria St, in my view is totally unreasonable, this is a residential area; to a large extent without the insulation of new build's. Victoria St would be better promoted as a more sophisticated restaurant area than a noisy bar area. Victoria St was simply not able to compete once the inner city bars were re established after the earthquake. It is a narrow strip and lacks the density to make it a great time wandering from bar to bar.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Victoria Street is adjacent to a residential area that will be negatively affected by the higher decibel rating. I lived in Peacock St for 30 years and even in my newly built house was affected by Street noise on weekend nights. Noisy areas attract late night party people whose noise and behaviour is disturbing. I often park near Victoria St to walk into town at night and when the bars are in full force I don't feel safe. A Noisy atmosphere adds to the atmosphere of drunken behaviour. It was shocking behaviour during the
earthquake times with vomit and hooligans .

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I left the area after 30 years in Peacock St because of the boy racer noise most weekend nights. If you want a vibrant inner city allowing noise is not a good incentive for people who actually live there and have no option to go home for a quiet night of sleep.
Low decibel noise is not considered in your plan. It is mentally harmful for residents in Victoria St area.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I am incredibly supportive of anything that will help to continue increasing Christchurch’s profile as a vibrant, culturally inclusive, fun, active and busy city. The plan sounds sensible - increase noise in the central city directly around the busiest parts, while not having a disproportionate impact on areas that are more peaceful out int be suburbs. It sounds like a win-win

Q18 **What don't you like about the proposed plan change and why?**

Long Text

There is nothing that I oppose in this proposal

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

People who visit me in Christchurch (from elsewhere) often remark that it seems peaceful (and boring) - the peace is nice but it shouldn’t be at the expense of fun and activity and life and dynamism - our city is vibing right now and we need to ride that wave

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: No.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text: It provides for a vibrant central city. The 15min timeframe is excellent - allows one really awesome loud song as permitted (Proclaimers - Urban Walkable Catchment song using wrong metrics - replace miles with metres, Hope that made you sing it). However, as my property is located within a Category 3 noise area, I am not sure how this will work for when the Warriors are playing. Depending on how their season is, I am aware that noise limits could be breached just from watching a game, which is unfortunately really cause this year might actually be their year.
Great to see the following:
- the noise 'zoning' expand beyond current/operative spatial areas - and it should expand even more!
- the removal of the daytime LaMax (thus no maximum levels?)

Q18 **What don't you like about the proposed plan change and why?**

Long Text: Category 3: 45 dBA is too low and does not take into account ambient noise from the surrounding environment. This means that the receiving noise environment would never met 45dBa as noise is over this - That is a suburban residential environment low noise requirement (kids doing tiktoks in the shared driveway would totally breach this!), and does not take into account central city inner city living. We are not suburban - we are located in a vibrant central city with noise and accept this. I didn't move into a boring sub-urban area to grow old and be boring!! I moved into the Central City purposefully for a buzzy and exciting environment for me and my young daughter. We want this plan change to go even further to allow for Cat 2 for the entire 4 Aves. If you don't like noisy and dense environments, don't live in the central city.
Cat 1 and 2:
- Noise insulation requirements could be provided via Building Consent compliance with Building Code G6/AS1, meaning the DP rules are an example of Council over regulation.
https://codehub.building.govt.nz/resources/g6as1-amd-2
In many case new buildings are insulated to comply to around 65dbA. Why require another set of compliance at PIM/RC phase when developments should be able to show compliance at Building Consent phase? Hopefully this will be addressed in the S.32 report.
Compliance with mechanical ventilation: How will the consent planners know this provision will have compliance? Will this place an additional cost to provide reports to show compliance with this provision? Also this assumes that when sleeping we want our windows closed - no! We love our windows open to hear events on in the city (with the right wind direction, Sparks in the Park, Electric Ace and Hidden Lakes are wonderful to hear!). Again, hopefully this will be addressed in the s32 report re compliance and regulatory costs above benefits gained in this location, and noting that this may only apply to new buildings or large significant alterations (i.e over 10m2 or greater??).
Cat 1: Retain existing operative LAMax of 85 (proposed to be 80 - strike out on Table 2)

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Consider a restricted discretionary framework/pathway to allow for the establishment of nighttime entertainment activities within Cat 1 and 2.

The city needs more places for DJ's, in particular grimy, dirty drum and bass and techno. The Council has done a wonderful job in celebrating opportunities to retain and attract youth, and create tourism and art opportunities via supporting urban street art, events and music. These activities keep our youth/students in our region, attract others to come and study here, and support the Council priority for increasing vibrancy of our ever evolving central city.

Q17 **What do you like about the proposed plan change and why?**

Long Text

Protect the music and culture life in Christchurch. Allow artist to perform in the city. Places like the Darkroom Bar, Space Academy, Rolling Stone, allowing local artist to perform and this needs to be protected. Living in the city comes with an acknowledgement of noise that will exist in the area. While assurances need to be in place to make sure this is not fair or excessing, expecting areas around these pre-existing establishments to be quiet would be unrealistic and selfish. I have lived in the center city for over 5 years now and have never had issue with excessive noise from these establishments, and would love to see these protections come into effect.

Q18 **What don't you like about the proposed plan change and why?**

Short Text:

Q13 **Do you think we've got the category locations right?**

Multi Choice: No

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: All zones north of Kilmore Street should remain at 45dB (Category 3) or 50dB (Category 2) as currently designated.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Yes. I disagree with placing areas north of Kilmore Street into the proposed Category 1 (orange) or Category 2 (green) zones. These should remain unchanged, consistent with existing classifications. Victoria St is an inappropriate place for these higher

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: While some adjustments are perhaps understandable due to city centre growth and the nearing completion of the new stadium, this represents an opportunity to update zoning boundaries without altering the current decibel limits. Areas south of Kilmore Street in the proposed Category 1 zones have a higher proportion of newly rebuilt housing with improved thermal and acoustic insulation. These are new housing developments so people are moving into an area that may expect to have noise.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: I strongly oppose increased noise levels for areas north of Kilmore Street.
I have lived for 18 years at [redacted] Beveridge St. It is a quiet, well connected and growing community. It is in the schools zone for Christchurch Boys and Girls High and in proximity to several high quality private schools. The area needs to stay relevant and attractive for all age groups, especially families and students.
One of the reasons for opposing increase noise limits is uncertainty of effect. Beyond assuming tripling noise limits will not be conducive to a maintaining the current amenity value of the Victoria area, this proposed change proposal cannot, and does not, address what venue behaviour will ensue (for example and in extremis, 24/7 outside loud speakers set at the noise limit?), let alone what effect it will have on residents.
Just like we residents cannot precisely predict what the effect increasing noise limits will have on residents, neither can, or does, the proposal give any indication of effect. How therefore can the Council possibly justify making these proposals, let alone implementing them?
One reason that we Victoria Steet area residents are so sensitive about this subject is because the area was delightfully quiet at nights until post-quake when the central city was cordoned off, and late night bars moved into Victoria St. We had about 4 years of major disruption with late night noise (till 4am), which only stopped being a problem when the Oxford Terrace strip re-opened.
Given that a long standing aim of the City Council is to get more people living in the central city, it would be logical to expect the Council would do all in its power not to force out existing residents, while doing all it can to attract new residents to this well-established and diverse residential suburb.
There is no problem with Victoria St having hospitality in the form of bars, restaurants and cafes. Indeed these are compatible with residential. In fact the Victoria Street bars, cafes and are well patronised by local residents. The only thing that should not be on Victoria St are venues that need these new higher noise limits, and bars open after 1am. The new noise limits along Victoria St should not be changed.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

The existing noise limits—60dB (Cat 1), 50dB (Cat 2), and 45dB (Cat 3)—are adequate. There has been no justification given for proposing this change other than some vagaries about stimulating Christchurch night life. This would be at the potential expense of the amenity value, and potentially the health and well-being, of residents in the Victoria Street area. I believe the burden of proof for this change is on the Council given they have initiated this proposal, and on this point the consultation document contains no such proof.
Why would Christchurch wish to triple noise limits after Auckland and Wellington have both recently reduce theirs, and in a predominantly residential area at that?
Increasing these noise limits while simultaneously expanding the zoning boundaries makes little sense and risks undermining residential wellbeing in the Victoria district. I do not support the proposed increases to noise limits across all three categories. They should remain at 60dB, 50dB, and 45dB respectively. I do support the proposed boundary adjustments—except for those north of Kilmore Street, which should remain as they are.7.

Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?
I am concerned about how exceedances are measured currently, and especially how low-frequency sound, which poses significant health risks ranging from short- term discomfort to long-term harm, will be measured and regulated.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

We seem to losing music venues and options for nights out rapidly and we need them to keep the city alive. Not sure if its bad planning or poor construction but to have new build tenants complain about established venues isn't cool. What is a city without night life? Life needs music and adults need places to go at night. I thought that would be obvious. New tenants of buildings close to venues should know what they're getting themselves in to.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Established venues should able to continue with whatever they were doing before the new builds and maybe even stay open for longer during the night/early morning.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Closing times of venues should be later and there should be more options for a night out, rather than less.

Short Text:

Q13 **Do you think we've got the category locations right?**

Multi Choice: No

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: Everything within the 4 Aves should be category 1. Anything less will stifle business operations for existing venues and be a major barrier to new venues opening.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Change all category 2 areas to be category 1

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: It's good you have slightly expanded category 1, but you haven't gone far enough. Expand it all the way to the 4 Aves.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: The major burden of sound mitigation (insulation and sound deadening) should land on builders & developers of new apartment complexes. Additionally those who purchase residential properties should be required, by law, to agree they understand they are going to be living in the CBD and that comes with additional noise, therefore they legally can't complain.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text:

I used to live in an uninsulated, single glazed flat upstairs in the Cashel Mall during the pre-quake days. Late night noise from Oxford Tce etc came with the territory and you didn't chose to live there if you had a problem with it. Anyone who complained about noise, vomit or urine in their doorway moved elsewhere. It took most people a week or two to get used to the noise and sleep through all but the worst of it.
Developers taking advantage of uninformed apartment buyers are more at fault than existing venues and should therefore shoulder the fianancial burden of building with adequate sound proofing and retro-fitting it where they have failed to install it during the build process. The stadium was planned for years before Fletchers started churning out cheap tacky apartments next door to it, they can not claim they were not aware of this and push the stadium into lower sound levels than originally consented. Every residential property sold within the 4 Aves should have a clause in their purchased agreement stating they are aware of the extra noise in the area and they have no right to complain about it.

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Carriage quarter and east frame should be within category 2

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Some residential areas, such as the East Frame where I reside, should remain within a lower noise category. The East Frame was designated for low and medium density residential use, and there is now a risk of it being subjected to the highest permitted noise levels in the country. While nearby blocks may be mixed-use developments, the East Frame is not, and its residential nature should be respected in the application of noise regulations. We understand the council’s intention to enhance certain areas of the city for entertainment purposes. However, it is important to strike a balance between these objectives and maintaining a high quality of life for local residents. In contrast, areas such as those south of Cashel or Lichfield Streets, as well as the eastern and southern surroundings of Te Kaha, are more appropriately suited to higher noise levels.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Please keep the east frame and carriage quarter as category 2 as these are primarily residential and an increase in noise levels will reduce quality of life and make sleep more difficult. There is already a lot of noise from traffic and late night drinking

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

East Frame residential developments should have lower level

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

It is of course good to increase the area where more nighttime activity can take place.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The insulation requirement for city centre residential is pretty low for the proposed noise level that would be the highest in the country

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

The council wants to increase the city centre population but the low rise nature of areas like east frame is not insulated or planned appropriately for higher noise. There is a risk that more just decide not to move to city centre or turn property they already have into short term letting.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: No areas within the Avenues should be Category 2, everything within the four Avenues should be Category 1.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text:
It is allowing louder noise in the centre city.
It's a move in the correct direction for the city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text:
I disagree with the statement above why the same rules wouldn't work everywhere "However, there would be negative effects on the health and comfort of building occupants within noise-sensitive activities that have been set up without sound insulation, and this could happen across a very large area. This option also involves the greatest costs for new noise-sensitive activities. It isn't preferred, because it doesn't solve the problems between noise-making activities and noise-sensitive activities. It would also probably mean some new residential activities would have to pay for sound insulation they didn't need if new venues didn't actually set up nearby."
People who already live in the centre city choose to buy a house there if they don't like the noise they can sell it and move to suburbs or upgrade their own homes.
No new venues are going to be set up in areas where they arent allowed to make noise. So if you want to make a change that the people of Christchurch have said they want, which is to allow loud noise in the centre city, do it. Let them make louder noise everywhere so it encourages a vibrant city where people want to live and open venues.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text:
There should be exceptions for specific events where no nosie restrictions are enforced or monitored.
Example being, New years Eve, national sports events, All Blacks, Black Caps games, Electric Avenue etc.
Maybe a limit to 5-10 nights per year where this occurs.
Another option is to add even louder noise limits on Friday and Saturday nights.

Q17 **What do you like about the proposed plan change and why?**

Long Text

Extending the category one areas around TeKaha, including most of the city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The current sound and insulation requirements for residential buildings are inadequate and require significant improvement. Implementing stricter regulations, such as increasing wall thickness or enhancing insulation materials, is crucial to ensure better acoustic and thermal performance. For instance, new rules could mandate the use of advanced insulation technologies like double-glazed windows or sound-absorbing materials in shared walls.

CBD housing should have a minimum requirement for noise insulation that reflects the lifestyle of living in a city. As Christchurch continues to grow, we can only hope that the city will attract people to live right in the hub of it all - I believe a key part of providing attractive housing that supports holistic wellbeing is to ensure that noise insulation is accounted for in early design of new housing.

Long Text

We live at [redacted] high Street and note our property is now in the proposed category 1 area.

Currently we are in level 2 - but we are in what was developed as a quiet zone of the city as it was the SALT quarter.

We have had ongoing issues, well documented with council, in regard to our neighbours Flux Nightclub. Your plan looks like it will legitimize and exacerbate our issues and concerns.

Flux regularly exceed 80db at our house until 1am. This can make it impossible to sleep some nights - and to hear our own music with friends on our deck in the evening on other nights - anytime up to 1am.

We are excited about living in the city and near the stadium, but ..

A) we are unhappy that the council has been unable to enforce their current noise standards - so why should we believe they will do better when this becomes an approved activity?

B) this could make things a lot worse! are there any restrictions on the number of Nightclub venues? Are we going to become surrounded by these?

C) are there any guides on what we can expect? Will this remain until 1pm and will these levels be every night? Currently on a weekend in summer, we can have extreme noise levels (as above) all three nights on a long weekend. I don't believe this to be fair and reasonable.

D) what requirements will you have of venues with open air facilities. It appears all your controls are on the recipient of the noise, at their location, not the source.

E) How will you measure this at recipient"s residence when these are not at ground level? You talk about indoor spaces and noise restrictions in the residences, implying that the recipient needs to be enclosed to avoid the noise. What for us with an upper deck? This is majorly impacted by Flux due to the chimney structure of their outdoor space. How will you measure their noise at our premises when it is above ground level? What standards do you impose on venue to manage their noise?

F) How will you maintain your own H&S standards in the city. Eg: box Quarter require tenants to sign a contract that says they will not complain about noise levels. (Even though these would be well above H&S standards) Does the council hold any responsibility for upholding noise levels? Can a venue contract outside council by-law?

G) we would also like to hear about your management plan for the number of venues, and any restrictions around the number of nights for loud music and how to plan to manage and enforce this.

H) the areas you identify on st asaph street are generally restaurants, this is quite different from Nightclub noise. Are you distinguishing between the types of venue and activity?

We would like to see a distinction between types of venues included in this plan. We currently live also across from boxed quarter restaurants and Ara residences. The noise from these venues would be intermittently over 65db. But it comes and goes and is just the sound of living in the city - rubbish collection, street sweeping and the odd late night singer wandering home (some are very good), sirens ..

Thank you. A lot of questions.

We are excited for the stadium and love being in the central city, but concerned that without due consideration it will be difficult for the CCC to manage these changes to the plan in a real world scenario. This would greatly impact on us and others already living in the city.

I would like to see a special exemption for noise around the stadium and then category 1 as a corridor through the city to the strip for loud late night venues. Category 2 with restaurants etc surrounding that. This would keep the city tight and also be in the spirit of the city"s original plan of zones and late night entertainment focused around the centre/river area.

We look forward to hearing from you and having our questions answered.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

An additional point for us is how we manage bass sound in the city as this isnt necessarily related/relevant to decibels and doesn't respect walls and windows. Your own noise control will be able to speak to this.

Our noise concerns aren't so much about restaurants as with night clubs and live music venues- and how to clearly manage expectations and needs of those businesses, their customers, a vibrant city and city living residents.

I appreciate this is all tricky. There is a small window of opportunity for street cleaners, construction etc to happen - while they have access to the streets and amenities and still respecting the needs of city business and residents. I don't envy you this challenge.

We are supporting a vibrant corridor down the new cashel/lichfield street to a great city life centred around the strip

Q4 **Name of organisation/business**

Short Text

Q13 **Do you think we've got the category locations right?**

Multi Choice Yes

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text It supports a vibrant nightlife which will be a financial benefit to the city. I can't wait for the stadium to kick off and hendo develop sol square again.
Unifying the categories and increasing the levels are great for the city and central is where the nightlife should be.

Q18 **What don't you like about the proposed plan change and why?**

Long Text 1. I would like to know why the bedroom space is at a higher 35 dBA when the habitable rooms is lower at 30dBA. I would expect it to be quieter in bedrooms so sleep can be archieved and not disturbed. Many of the the residential units in the city have bedrooms upstairs which I believe are more exposed to receiving sound pressure from events. Also are you saying that all the apartments built recently around the east frame have insulation and construction that can achieve these levels? Even the ones across from the Church on Manchester or across from the Dux?

2. Can the Council influence the construction of venues? Especially around the entrance and exit of venues where sound may escape into the environment. Venues with foyers or stairs up or down from the main venue can help reduce the sound escaping into the environment, when its compared to one main door straight out onto the street constantly opened and closed for patrons.

3. How does the Council intend businesses to manage crowd noise coming from their venue's outdoor area or the surrounding street?

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text However,my gut is saying that many boomer NIMBY's will still complain, and it will be mostly from the low frequency bass traveling through the hard central city materials and reverberating through poorly constructed apartments and of course Te kaha patrons peeing in their front door.

Don't know / not sure

Q17 **What do you like about the proposed plan change and why?**

Long Text

As a lifelong musician trained in Ōtautahi Christchurch, the opportunity to perform and attend live music, in particular live bands, is crucial to my sense of well-being and belonging in this city. So much would be lost if we can't keep these venues. Darkroom and Space Academy in particular mean a lot to me.

Q18 **What don't you like about the proposed plan change and why?**

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Yes. Near and around Victoria Street

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text:

Q18 **What don't you like about the proposed plan change and why?**

Long Text: It is already loud at the weekends from the boy racers and traffic down Bealey Ave. We do not need higher noise level Victoria Street. I do not agree with increasing the noise limits around this area. We live between Durham and Montreal and it is already noisy. Because we live in the city we already tolerate a certain level of traffic noise but we do not want or need more.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text: You have not taken into consideration the noise we are already experiencing from increased traffic down Bealey Ave. There are plenty of areas in the city for bars to open late, we do not need loud music from bars and people down Victoria Street as well.

The One Central Development around Rauora Park are purely residential, and upgrading them to Category 3 is ridiculous.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

I appreciate that the proposal aims to support a lively night-time economy and recognise the importance of music and hospitality in creating a vibrant city. Encouraging entertainment in appropriate areas is vital for a thriving urban centre, and I fully support efforts to grow that side of our city. However, this needs to be done in a way that doesn't compromise the liveability of the central city for residents who have already invested in it. A successful city is not just one where people visit, it's one where people also want to live. The current proposal, while well-intentioned, risks tipping that balance too far, undermining the very community it seeks to energise.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

My partner and I chose to put down roots in the central city because we believed in Christchurch's vision of a vibrant, liveable, and thriving urban community. We own two properties in an area currently classified as Category 1, now proposed to be downgraded to Category 3 under these changes.

This proposal is incredibly disheartening. We bought into this area with the understanding that central city living would be supported, protected, and encouraged, not slowly eroded. The shift to Category 3 would significantly reduce night-time noise protections while removing sound insulation requirements altogether. That's not what we signed up for.

It feels like the city is turning its back on residents like us. People who have committed to inner-city living, who contribute to its culture and community, and who genuinely want to see it succeed. Instead of being supported, it now feels like we're being pushed to the margins to make way for other priorities.

We've championed this neighbourhood. We've invested here not once, but twice, because we believed the city wanted to grow its residential heart. This proposal sends the opposite message, that residents in these areas aren't valued, and that the kind of mixed, dynamic community we were promised isn't a priority after all.

Please don't undermine the confidence of those who have backed the city's regeneration with their homes, livelihoods, and trust. Reconsider this change, and continue to support the balance that makes the central city truly liveable, not just loud.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Yes, one concern that hasn’t been fully addressed is how cumulative noise impacts will be managed, especially in mixed-use areas where multiple venues or activities operate in close proximity. While individual noise limits may be within compliance, the combined effect of several sources operating at or near the limit can still create a disruptive environment for residents. There also appears to be little clarity around how compliance will be monitored or enforced, particularly at night, when noise is most intrusive for those living nearby.

Additionally, the plan doesn’t seem to address how changing activity patterns over time will be managed, for example, if a quiet residential block gradually becomes surrounded by louder venues, how will the plan adapt to continue protecting residents? A stronger focus on transition management, ongoing review, and responsive enforcement would help reassure residents that their quality of life will remain a priority as the city evolves.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

The homes around the One Central development (around Rauora Park).

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

I agree that the inner city should be vibrant. Reviewing and amending current noise limits makes sense. But this should not be a blanket approach that impacts new and existing residential areas. Any increases should be limited to areas that don’t have large residential neighbourhoods.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

CCC and The Crown sought for people to move to the inner city, to live and help the city rebuild and prosper. We have done so, and you are now moving the goalposts. We appreciate that living in the city comes with noise, but you are planning to transition us from a category 3 area, to a category 1 area. An increase of 20+ DB. Any venues immediately next to the large inner city residential areas should be restricted to existing noise limits, or you risk those of us that own and occupy in the inner city leaving. Inner city Christchurch residential areas will become a ghetto of Airbnb’s and short term rentals. Where’s the sense of community in that?

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

Music venues are a vital part of a vibrant city. To limit noise levels such that they depress nightlife & entertainment will be a backward step. Increasing insulation levels in dwellings & other businesses seems a reasonable way to deal with noise levels associated with concerts, sports games, etc, in the CBD.

Short Text: NA

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: No, it should not change, many people were encouraged to sell their homes after retiring and move into apartments in the inner city or close to. Some started this
after the rebuild after the quakes. Some paid a lot of money for these apartments, sold their 2nd cars , being close to the park , river, cafes, restaurants etc. wanting to enjoy
their quiet enjoyment. NOW.... they are faced with louder music than expected, the council should have considered this when giving the go ahead for the site for the new stadium.
There is no parking for apartment owners close to their residence, will only get worse, especially near the stadium, they have to walk 2-3 block for the nearest parking building. Crazy.
Why does the music have to be SO loud. I intend to invest in a hearing aid company, when I want to retire in a few years, that business will be booming.

Q18 **What don't you like about the proposed plan change and why?**

Q17 **What do you like about the proposed plan change and why?**

Long Text: I like that you guys are actually understanding the importance of night time economy and nightlife culture. It benefits so many people and also helps cities to thrive. I've been in Christchurch for 6 years and I have never been to a city in the world where noise has been so restrictive as Christchurch. Everywhere else embraces night life culture which adds to economic growth, here on the other hand all I see and hear is, older generations with money moving into a city (where there is noise) and complaining about the noise. It's really unfair and selfish to be honest. To speak candidly the houses build in the city before the council gave consent should have been insulated properly for noise before being built. Also houses being built next to established music venues then tenants complaint about the noise is the most obtuse thing I have ever heard of. Please keep this in mind before signing off on houses in the city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: I feel you are missing representing venues on saint Asahp street they are not included in cat 1 or 2. There were town houses erected there last year next to 3 already established venues and they have had serious issues with tenants. This needs to be rectified and venues need to be able to operate without noise complaints from selfish tenants

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Good rationale for the different noise categories and where they are placed. It seems like good care has been put into where each category goes, and a good balance has been made between allowing for a night-time economy, while keeping established residential areas safer from noise.

Zoning Category 1 based on which areas already have the highest insulation requirements is smart. I also think expanding Category 1 to include the clusters of music venues (both east and west of Te Kaha) is a good move.

Wider spread of Category 1 and Category 2 areas seems more appropriate for a Central City environment. At the same time, good to keep already established residential zones as Category 3.

Appreciate wider spread of acoustic insulation requirements to Category 1 and 2. Adding mechanical ventilation requirement is a good move.

Appreciate suggested insulation requirement for homes near noisy streets. From experience, I can say when living near those roads, night-time traffic is more of an issue than nightlife.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I'd consider expanding the Category 2 area further. There are some semi mixed-use areas even in the residential zones that I think would benefit from more lenient noise limits, and acoustic insulation requirements. This would enable more mixed-use development and nightlife, making for a more interesting Central City.

Though this could have a negative impact on established homes that aren't adequately insulated. So I can understand the rationale of the current categories.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Construction or roadwork noise in the early morning or late night can be a common frustration in town as well.

Q17 **What do you like about the proposed plan change and why?**

Long Text

I frequently support and see local bands inside the bubble at venues such as Darkroom & Space Academy and am happy I will continue to be able to do this if these new rules come in.
The central city should be focused on allowing events to happen instead of hindering businesses that have been there for years.
Without these venues and opportunities, local talent will not be developed anywhere near to the same extent.

I also like that housing developers are being made to install more sound proofing, this seems like the obvious solution especially when building in city areas.
It doesn't make sense for developers to save what would be an insignificant amount of money to them on sound isolation for new builds around the city to then see local venues forced to shut down due to noise complaints they knew the tenants would have but didn't care enough to plan around.

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Venues like Flux, Space Academy, and The Darkroom are vital to Christchurch’s arts and music scene. Christchurch has become one of New Zealand’s most prolific music hubs, and that creative energy contributes to our local economy. It attracts students to study at our universities and polytechnics, who then stay, work, and support local businesses. But that ecosystem is under threat—constant noise complaints from nearby residents risk undermining the very culture that gives the city its unique identity.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text It is very important to me that music venues are protected from reverse sensitivity complaints. As more infill intensification occurs across the city, the conflict between residents and music venues will continue to escalate.

Designating the central city core and Te Kaha surrounds as category 1 is a sensible approach. Many of the live music venues I visit are in this area, including Space Academy and darkroom.

Overall, taking the approach of encouraging compliance rather than enforcement is preferable to me. This will always be a tension in a city, but the reality is that when individuals make the choice to move into the central city, they will be exposed to the noise of the night life. Therefore it cannot be acceptable that established music venues are silenced by people choosing to move in hear them. Similarly, we need to encourage more small and medium music venues to open in the central city. We therefore need to protect the ability for new businesses to open in this area, and for them to do so in a way that complies with the rules.

A vibrant night life is a major reason that many residents, particularly young people, choose to move to the central city in the first place. Therefore, having a district plan that protects that night life is critical for ensuring that our central city is an attractive place for people to live.

Q18 **What don't you like about the proposed plan change and why?**

Long Text If possible, I'd like to see some changes made to how noise complaints are dealt with, to reduce the burden on venues. Some suggestions on how this could be done:

1. Provide grants to music venues to set up permanent noise monitoring stations outside their venues with a public data dashboard managed by the council. This would take the guesswork out of venues remaining compliant with noise control limits, and allow for residents to prove for themselves that the venues are compliant. I expect that if residents knew what is and is not compliant, they would complain less.
2. Adopt a compliance over enforcement approach, where noise complaints are accrued for a given night, and the venue contacted the following day to let them know that they exceeded limits. This would be preferable to the expensive option of sending out a noise control officer to "shut down" an event. Over times, venues are likely to comply if problems with noise are surfaced.
3. Establish a sound management fund that venues can apply to for additional noise insulation retrofitting of their venues. Priority should be given to the venues that accrue the highest number of complaints.
4. If it does not exist already, create a special noisy business license system, which would allow businesses to apply for a license to operate above the proposed plan limits for short periods. For example, a business could apply for a license to have an increased 75dBA limit between 7pm-11pm on Friday nights. They would need to pay a license fee,

and the continuance of the license would be dependent on how effectively they comply with the district plan rules, as well as their own license conditions. This is similar to the alcohol licensing system, where activity is permitted conditional on the business complying with the terms of their license. Compliance with the terms of the license would be determined by random spot checks by noise control officers during periods when the license is active.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Mechanical ventilation should be a standard requirement for any townhouse anyway, the district plan should be amended to require this globally.

Q17 **What do you like about the proposed plan change and why?**

Long Text

A large part of the reason why I enjoy living in Christchurch is the number and variety of different events and venues that can be attended year round. This plan change makes sense if we want to bring more major events to the city and to get the best utilisation out of our brand new stadium. Moreover, I support the nightlife and other entertainment venues continuing.

A large part of conducting business is centred around certainty. Event organisers need to have certainly that they will not be unexpectedly shut down for the purpose of existing, i.e. running their events.

As a resident who lives in a new home, I have benefitted already from superior home insulation and mechanical ventilation standards.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

In an idealistic world, some (or all) of these costs would be transferred to the entity causing the issue to occur; however, I recognise that this is impractical and likely totally unfeasible.

My concern is that this will impose further additional costs on new home construction, which are already high today, and for residents who do not have the money to spend, some may suffer from a lack of home insulation and/or mechanical ventilation. Perhaps Council could consider using some of the commercial rate collection to fund noise mitigation for those existing residents who are impacted.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Not mentioned is the impact to residents from bass. I personally find bass much more impactful than sound itself. This is in part because it can travel long distances, including from the central city to the far side of Wigram (a staggering distance!), as well as it is hard to mitigate. Insulation will help to reduce exterior noise but it will not help to reduce bass. The effects of bass can be profound and include an inability to asleep.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

Without reference to what 65 decibels is it is hard to know what the difference would actually be, however I am fully in support of allowing a more vibrant nightlife for music/entertainment

Q18 **What don't you like about the proposed plan change and why?**

Long Text

It will be hard to get landlords to increase insultation in areas that have older builds, however at the same time there must be an expectation when living centrally that it might be louder. I live within the proposed zone and have no issue with increasing the sound, Christchurch continues to grow and if we don't change the sound rules to make up for these changes and conitinue growing nightlife it will be to the detriment of the city.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

It can be hard to determine through a written plan what those differences in sound really mean in day-to-day.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like everything about this plan, this will allow venues such as Boo's, Flux, Smash Palace, Dux Central, Darkroom, and Space Academy to thrive. These are some of the venues that keep the creative culture and night life alive in the city. Christchurch has been gaining notoriety as the most artistic and interesting city in NZ over the last 2 or so years and these and other venues have definitely been a part in that growing reputation. This proposal with allow the arts to flourish.

Q18 **What don't you like about the proposed plan change and why?**

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

A city centre should be loud, vibrant and active most of the time and especiallyat night. This is the appropriate space for live music, street parties, sports events etc. If you choose to live in the city centre, you accept that this will be the case. It is the defining and most attractive feature of a city centre. All city's operate in this way.
To put it more poetically:
"You don't go down to a beach and complain about all the sand."

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I don't have any complaints. I just hope that it passes. Christchurch city centre needs help to get back to a place where you an expect a good night out in the city without the "neighbours" complaining.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Short Text:

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text:

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text: Christchurch should have a nightlife / night-time economy.
The proposal finds a balance for nightlife, with the Council's preferrred increase in the number of people living in the city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: I would make the entire CBD/ 4 aves have the category 1 rules.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text:

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I love that it prioritises the cultural aspects of live music and city night life, and the benefits they have across many areas; collective wellbeing, social connections, and business. The areas are reasonable and cover enough area to still allow for growth.

Q18 **What don't you like about the proposed plan change and why?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It allows for live music venues to really thrive and support local artists.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

If I was someone who lived in the CBD who didn't like noise, I would fee like I would be getting pushed out... But then again, if I was someone who didn't like noise, I wouldn't choose to live in the CBD - regardless of which country or city I was in.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

N/a

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I think the new housing developments should be the places that have to bring their soundproofing up to the level that enables their residents to be undisturbed by the venues functioning as they are. It's on those housing developers. They make so much money from the splitting and parceling of land, they can afford to soundproof these new houses. Grass roots venues who have been in the same place for years and years do not have the same resources as land developers- and these venues do a lot more for our communities.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think that it's a great idea for night time activities and entertainment to be supported in the city centre. These are what will help to keep the city thriving. As long as residents are well informed about the noise levels occurring, then there shouldn't be as many issues. If you choose to live centrally in any city, there is always a risk of noise, especially at night time.
The insulation is important and the mechanical ventilation such a great idea.

Q17 **What do you like about the proposed plan change and why?**

Long Text

I live directly above the area of the new addition. I regularly hear noise from people outside enjoying themselves (even when it's freeze cold - I don't understand). I imagine this change may encourage additional development of hospitality in the area & I look forward to it. I think having these rules described and publicised is a great thing for people looking at moving into the area.

I look forward to being able to hear concerts from my balcony when the stadium is complete.

I really appreciate the need for mechanical ventilation in the requirements!

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I'm surprised there's not more Cat 2 over the Montreal area, though I don't have any specifics.

Q17 **What do you like about the proposed plan change and why?**

Long Text

What:
The proposed plan change
a) recognises the distribution of night life activity in AND AROUND Christchurch CDB, and
b) permits accommodation within Category 1

Why:
a) above permits night time activities over a much wider area in the central city. That flexibility is forecast to improve the variety and sustainability in cultural experiences - as well as hopefully improving business opportunity and viability

And allowing central city accommodation within Category 1 will hopefully improve accommodation viability also - and the businesses associated with that too.

These are a well over-due improvements to the out dated and poorly mode-d existing rules

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I personally think the thermal insulation requirements for accommodation in NZ are NOT high enough. We need to be at the same standards as most of western Europe

In France, improved thermal insulation was coupled to updating sound insulation in refurbishment, renovation and re-development (see https://www.euronoise2018.eu/docs/papers/187_Euronoise2018.pdf)

Christchurch could massively improve its central city housing stock - and desirability for visiting and living, if we would follow a similarly coupled approach

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

As you said - living in the central city comes with different noises than living in a suburb. Those who choose to live centrally should consider that before moving there. If you want a vibrant city centre, mixes-use spaces are essential. That includes entertainment venues and residential inits thriving in the same space.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

Sensible zones, and the right idea to simulate the local economy. Potentially limits just a bit too high.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

This will be the highest noise level allowed in any city in NZ, 60dB seems plenty. You can't get grown of businesses if people can't find a place to live, and most of the new accom is in central city.
However, in our experience living in town, it is the curfews and the businesses that regularly break them (slate room for example) that actually cause the problems.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

If you will have people able to attend to genuine noise complaints early hours in the morning then that should help. Otherwise, 60dB rather than 65.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think that the existing entertainment venues are accommodated by this plan. These venues are why people want to live here. I came to Christchurch from Canada. From just outside of Toronto. I had so much access to music and the arts there. I came with my family after the earthquakes. Seeing the arts community struggle through was hard, but they showed such tenacity. The only times I leave my house is to go to live music. It would be so sad to see venues close. Especially venues that have stayed open through the earthquakes.
Among other venues, I frequent the darkroom. I was so worried when this plan first surfaced that it may have to close, so I'm happy that it won't be affected. I heard the argument that people would not want to live among concert venues where it's loud. On the contrary, I loved living where live music and the arts thrived 24/7. That is what draws people to a place not what keeps them away.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

There is only one part time under age music venue and it's in Papanui. If under age people don't get into the habit of going to live music, they don't go when they are of age. This plan not only doesn't plan for under age venues, it fails to accommodate future under age venues. This is not a fault of the plan, but it should make long term considerations like this when considering growing its population.

Q19 **Overall, do you support the proposed Plan Change?**

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

I agree with expanding the zone of 2 to allow for a more lenient noise level to include st Asaph street and the surrounds as they hold many treasured music venues that are integral to christchurch's music scene and the joy of many people including myself.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I agree also that living in centre city comes with the expectation that nightlife and music venues will produce noise and choosing to live in that environment is a decision that should be made with that in mind. With that in mind, increasing the dB leniency of zone 2 and 1 further will allow for flourishing nightlife and music scene where they belong. Additionally there could be insulation code changes to central city living environments of zone 2 ? To prevent the nightlife paying the price of having residents who may have made uninformed decisions regarding nighttime noise.

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Nothing. It was already not working for residents of central Chch, whit noise and base noise (especially) affecting the wellbeing and sleep patterns of locals. Businesses don’t care about residents and pardon le but you don’t need a tone of noise to be a « vibrant and lively « city. Just look around you in Australia and Europe. Where buildings are properly built and insulated, bars and all go along well with locals. I hope this isn’t a fake consultation and that decisions haven’t already been made.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like that it is a positive move because, it gives current and new future private businesses freedom, support and help to create a more thriving, energetic and attractive city centre. Promoting night life and social activity, helping the city steer away from the dreaded "donut" city with a dead centre. Where the only things that have precedence and recognition are major projects.
I like that it is a clear and realistic plan to help housing developers build properly sound insulated housing, for sellers to be transparent for the levels of noise expected in the areas and for buyers so they know before they buy what kind of noise levels there will be.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Potentially the incurred cost to current business and dwelling/house owners for sound insulation to meet the new requirements. As I think that a lot of new home buyers in the city centre were not thoroughly explained the levels of noise and expectations concerning noise levels by the companies selling the current housing within the four avenues. It seems a bit unfair that current and new home buyers and businesses must fork out the payment when they didn't have anything to do with the current planning and zoning issues.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

In favour of the change. As a young person living in the CBD I feel as though Christchurch's night life would benefit from the changes. I also believe this would help with the current lack of live music venues and help draw more acts to the city. Some venues (such as Flux on St Asaph Street) suffer from pointless noise restrictions after a certain time and this change would help them.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

N/A

Q19 **Overall, do you support the proposed Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

Expanding the area where loud noise can be generated is a practical move for the city. It previously made little sense. New Regent Street in particular has a fantastic opportunity to be a nationally recognised hospitality area and enabling higher noise outputs is essential to achieving that.

There needs to be some consideration about what insulation requirements are required for noise sensitive activities in heritage buildings (which cannot be easily modified) and whether other methods should be allowed (such as restrictive non objection covenants).

The LaMAX for night time hours need to be retained. Removing it will lead to unavoidable breaches, making the plan change unworkable.

The exception for noise from outdoor areas of licenced premises is a good one - I suggest removing the setback reference however as practically that has not been used in many consenting processes. Making the rule clear so that it is explicit that noise in outdoor areas is excluded from the noise levels would be clear for all.

In category 1, the allowance for the great noise limits should be extended further. It is not clear from the suggested edits but it appears it has been reduced from 3am to 11pm? This should be at least to 1am bearing in midn that the noise rule is applying to activties within a building.

Need to add a policy in the mix to strengthen the rules. Currently it appears that there are no new policies. This should be reviewed.

Under 6.1.6.2.10 Licensed premises outdoor areas in the Central City - it should be made explicit that legal roads are not a boundary under this rule as that would create a false compliance point.

Q18 **What don't you like about the proposed plan change and why?**

Q17 **What do you like about the proposed plan change and why?**

Long Text

Congratulations for making these proposals! The existing vibrant night life locations in Christchurch were facing potential extinction, and as a sometime member of Christchurch's music community I welcome the changes. Both increasing the permitted level of noise, as well as vastly expanding the area in which noisemaking is permitted, will do a great deal to ensure that Christchurch's growing reputation as a destination for music lovers continues.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

While I'm not entirely sure exactly that 65dB sounds like when outside a building, according to brief internet research it's about the level of normal conversation. I'd argue that this is still too low, especially given that many venues have outdoor spaces that will surely exceed this when filled with excitable punters. Given that the noise complaint rules give fairly sweeping powers to enforcement officers, venues having to shut down due to repeated complaints remains a potential problem.

Also, to the best of my knowledge, noise limits are policed only through these complaints, and so in large part the effective noise limits are really driven by whoever happens to be living nearby.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

This is going to be extremely detrimental to the night life in Ōtautahi, we already have majority of our clubs restricted to the strip around Hereford St, not much else goes on, this change would mean that all vibrant live music venues would have to vacate the area and try set up shop elsewhere, I don't think you guys are going to pay for it, it's not something every venue has the money to do. We need to keep an essence of happiness in this city, local acts need a place to perform.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Yes, the fact that constant changes to the roads can happen all over the city and keep me awake at night can go unnoticed, but someone moving into a house near one of the very few venues we have in this city has a problem with the noise that they failed to research before moving in and complaining about it is incredibly selfish and irresponsible.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like the organic approach of working around what is already existing, factoring in where the scene is expanding/growing and allowing them to be included in the new areas. I think this is important because where these grassroots venues are set up is in areas that are perhaps affordable (as opposed to favouring new developments with more commercial venues). I think this supports the actual scene and not some kind of ideal about what the gov wants to be where (i.e. 100 day blueprint process).

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I think it should be revised after maybe a 3 - 5 year period. There was no mention of this being an ongoing discussion but I'm assuming this might be already the case? I think it would be interesting to see how this supports new venues and events in 3-5 years. See what's working and what's not. Adjust decible levels as needed etc.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Yes - encourage and stimulate business in the areas where it existed and was accepted first, ensuring hospitality thrives. This will add tot the growing vibe of Christchurch.

Those residents moving into and now living the central city should not be surprised.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think the limit is too high, 65 dB is higher than any other city in the country. I would be happy with 55 or pushing it 60 with enforced time restrictions. Times were not specified in these details so please let us know.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I want to ensure the noise isn't excessive and happening at all hours. As long as there are guidelines that are enforced I see no issue. But the max dB should be lower. There should be earlier limits during the week and reasonably later times for the weekends.

Ideally, around homes it should be more commercial/retail and further out can be more nightlife.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

No other concerns. Thanks

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice No

Q17 **What do you like about the proposed plan change and why?**

Long Text Don't get me started on the location of the stadium, as a maser planner, I really struggle to see how this will operate within a highly residential dense zone.
However, to create a thriving and active CBD, the responsibility needs ot be for developers who build residential, to have good sound mitigation measures.
the CBD, while being mixed use, needs to thrive, so priority needs to go towards commercial and entertainment activities, these should not be stopped becuase of noise complaints, if you live in the CBD, you should know you will be in a place of activity and increased noise, if you want to live somewhere quiet, go live in the suburbs.
I guess the issue is, if house builders got in before commercial and therefore resident are complaining while more and more commercial is coming online. I am sorry, it is a CBD that needs to be active and vibrant. In Nov 2023, we moved back from the UK to NZ, we went for dinner in the CBD one Saturday night, we were flabbergasted that most restaurants were closing or taking last orders around 9:30pm, this is ludicrous. As more and more places are opening around the CBD, it is getting better and better, but you go to any successful city and the CBD is an incredibly vibrant centre full of noise and activity. Please do not cater to people complaining about noise, we needs to support business to create a vibrant and rich city centre full of hustle bustle and of course noise.

Q18 **What don't you like about the proposed plan change and why?**

Long Text It feels like this could significantly reduce the commercial, retail, dining and entertainment offerings for Christchurch.
If you buy within the CBD, in a mixed use zone, you need to accept a certain noise level, if you like the hustle and bustle of the CBD, that will be ok, if you want calm and quiet, you should not live in the CBD, we need the CBD to be a vibrant active location, not a quiet sleepy zone with no activity.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text The concern for a healthy vibrant CBD should be the main priority, we need to promote all commercial and retail, dining and entertainment offerings in the CBD, anything within the 4 avenues. I cant believe you have left Cashel Mall out of this zone. If people choose to live in the CBD, then it is up to them to ensure their houses are insulated from noise.

as a master planner who has worked on large scale and even new city developments we have never seen a major stadium been put so close to a CBD and to a large number of residents, the only benefit of walking distances to CBD, but I'm interested to see how transport parking around events will work when most New Zealanders drive. and even if concerts/events attract visitors, a high proportion of visitors will be local. Anyhow that being said, the stadium has been in the pipeline for years, so I would hope they can operate without restriction, to put on successful events. I would hate to see events be scaled back because of noise complaints from residents, I'm sorry, if you chose to live next to a stadium, you need to expect a lot of noise and disruption.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

As a massive fan of live music i believe these changes will allow existing venues to continue to thrive and others to develop in order to ensure a vibrant music and cultural scene in Christchurch, this is excellent as we continue the ongoing earthquake recovery.

Coupled with Te Kaha Stadium we can have a world class upbeat central city, and a strong night time economy making our city even better and more enjoyable for all.

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think it's great you've taken on board feedback to ensure our venues can continue to put on events. I enjoy going to gigs at venues like space academy and the dark room and it would be a great loss for Christchurch if venues for local music were no longer financially or practically sustainable because of noise restrictions. Part of the appeal of coming into the CBD is to go to events, have a buzz, vibrancy. And part of chosing to live in a CBD is being aware that that's where nightlife happens.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think that higher noise limits is extremely important for the wellbeing of our local performing arts, and the artists that work in that area. The city should feel alive, and we have the modern sound insulation needed so that quietness should not come at the expense of a thriving city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It extends out to cover many of the venues i frequently visit, as a music in a local underground scene I know if would be a great shame for these venues and business to struggle from noise restrictions as they support a great depth of the local music scene.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

It doesnt extend out to cover the Embankment Tavern, on the corner of ferry road and phillips street, which is another very active venue that supports the local music scene in christchurch

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Don't know / not sure

Q17 **What do you like about the proposed plan change and why?**

Long Text

It increases the noise limits for more than just the stadium allowing for more business oppurtunities for a more diverse group of people.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

It supports the stadium functionally, which I do not like as the Stadium is going to make living in Christchurch worse. (i.e. worse parking, worse traffic, more tourists and focus on developing tourist sector, less focus on creating an independant self sustaining economy, less housing space, more pressure on pipes and other vital infastructure during our life-support system crisis, ugly visual obstruction, etc.)
I would prefer greater restrictions placed on the stadium, if it was what the public wants (which the majority certainly don't), until public transport options are improved and the city was densified so car use doesn't significantly increase around that area during events. And if, under those quality of life restrictions, it does not succeed ecenomically (which, as far as I know, it isn't projected to anyway), it can then be demolished to build sensible infastructure that benefits us who live here.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Decrease of car use and car noise, via building more pedestrian prioritising infastructure and public transport. We have loud planes, mowers, building projects, street parties and so on, so it would be nice to make the average street a fairly quite place to enjoy the noises of people talking or birds chriping which at present is a luxury here.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I feel that it will enable entertainment in the city without fear of egregious noise complaints. The city should be vibrant.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

It does not go far enough. We should require soundproofing from apartment builders.

Q19 **Overall, do you support the proposed Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like that it is supporting local music and cultural venues. So they can do what they do, with realistic boundaries that support legitimate venues that have been working for years.
Rather than limiting their hours and sound levels to please new residents and developers who may have only just moved into the inner city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The fact that it'll only come into effect next year.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

Some attempt to mitigate impact of noise on residents.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

You will need to improve the way noise limits are imposed and monitored.
You seem to have forgotten that there are numerous noisy events in North HagleyPark and the impact of these in residents. These events eg beer festival and Electric Avenue should be relocated to places like the stadium and South Hagley Park (fewer residents). Above all, I am concerned that these proposals favour commercialism and the alcohol industry over the rights of city residents. You can’t encourage people to live in the city and then impose more noise on them.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Noisy cars and motorbikes are very intrusive. Much stricter policing of this is required.

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

Outside to inside nearby dwellings noise standard.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Omits mention of emergency vehicle sirens - sounded when not necessary. All day long.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

St. John ambulances insist upon constant siren noise irrespective of absent traffic volume, straight roadways without intersections, park land adjacent. Like screeching tyres, breaking bottles, shouting. . . sirens are deliberately alarming. Methods and techniques for city centre sirens need to be imposed.

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

The best thing has been seeing that businesses have been consulted. Though residential properties have increased in the central city recently, so many venues have deep roots in the heart of Ōtautahi. Without them, supporting local artists, it would be a miserable place. Landlords and property developers should not be prioritised.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It allows the city to continue to grow as a vibrant and creative one that supports our creative communities - important for any central city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

We shouldn’t allow people to purchase homes in the central city who will pose a risk to the vibrancy of it. There must be a way to test/vet them, or have them sign a contract with the council stating they understand that living in a central city means central city noise and they are opted out of any noise complaints being taken seriously.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like that it supports healthy attitudes to vibrant city life which is what makes Christchurch so good. Christchurch has a culturally significant local music scene and nightlife which so many businesses rely upon, not to mention vital contribution to a quality lifestyle in Christchurch that makes the city worth living in.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

65dB is a relatively low limit of noise for places to adhere to given that standing next to a busy road would be higher than that, for example.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

By setting slightly higher noise limits in the zones where nightlife is and has been for years, means those places can continue to pro ide their style of entertainment. This will.also protect them from unreasonable complaints from New inner city residents. This will also regulate inner city development, by making it clear to buyers where they are buying in to. I am a musician and l go to live music events, so this also effects my city living in Christchurch

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Nothing

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Response No: 895

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think this is a step in the right direction for creative a creative and vibrant central city, people choosing to live in a central location should be aware of and be prepared to deal with noise, it’s the choice they make when moving to a central location,

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I think you need to re assess your noise limits and how they relate to the real world, in my opinion the proposed noise limits are unrealistic and should be higher - the proposed limits will still not allow for live music and events to operate

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

No concerns about noise, I have concerns about how the complaints of a few people, who have decided to live in a central location to enjoy what that offers, can complain about one of the things that provides that vibrancy to the city and ruin it for others

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think it makes sense for places actually in town town ie from smash palace to the terrace and new regent st to have a higher noise threshold as these jave always been places of night life , and residents in this area would know this.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I don’t like the extended parts ie the green zones by Morehouse ave and bealey ave having a higher house decibel limit as these are predominately residential areas and I wouldn’t expect there to be bars and nightlife etc there. Fair enough workplace industrial areas may be noisier and that’s expected but only during the day. Therefore I think the proposed green zones especially those in residential areas (yes I’m being selfish as my house is near Morehouse!) should be more like yellow (is that the one with the higher standard of lower noise). Thanks!

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

The Sydenham underpass is too loud too late sometimes - how is that allowed .

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think it is great in that it helps to protect existing music venues such as darkroom and Space Academy who could face closure if these noise limits are not changed.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I think that music venues form an essential part of the fabric of creative communities within Ōtautahi so must be looked after - I would love to see the changes go further in prioritizing them over nearby residential developments because it seems ridiculous that people living nearby can complain about the noise from live music venues when the responsibility should be on developers to provide adequate noise insulation when building in central city areas.

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I experience significant noise late at night and particularly at weekends from venues on Victoria Street around the intersection with Peterborough Street - The Bog in particular. The noise does not come from within the buildings but more from rowdy behaviour on the street outside and especially the line up to enter the venues. Whilst I want to see these venues continue to operate I am frequently woken at night.

Your Plan Change seems to do nothing to address noise generated outside entertainment venues rather than from within them.

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think it is wise to put more of the city in a category which allows for more noise, since it is naturally going to be noisier and having harsher noise limits prevents there being an active nightlife in the city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I dislike there being a lack of category 2 buffer zone around parts of the stadium buffer zone but it is a minor issue

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Killing the live music scene in the city center.
Live music venues are a key part in bringing in money not only to Ōtautahi but the city council itself.
Admittedly it does get loud, but people need to know what they are moving close to and do their research. Most music venues run at 80-90db and dropping it down to 60db, there is no point of having a music venue or even the one ONE stadium.
Speaking as a sound Tech, 60db is a normal conversation. if you think you can have live bands playing and a conversation level, you have clearly done no research into it.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

LIVE MUSIC VENUES.
60DB is a conversation level. not a live music level. Most live music venues will run at 80db to overpower a crowd.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Includes St Asaph St bars (such as Space Academy and Darkroom) which would otherwise be at risk. These two bars have been vital, and amazingly run, places for young and old musicians to develop, perform and entertain during the post quake period, and they continue to allow Chch to produce world class acts that we are very proud of. Bands out of Chch punching above their weight is a tradition to protect and nurture.

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

The proposed plan change finally recognises where many night-life venues have established themselves in the city in the post-quake era, rather than solely on one central zone where only a limited amount of mainstream night time and music culture takes place. This provides more protection to music culture outside of the mainstream in Christchurch - which is an important part of the city's creative fabric and makes the city a more vibrant place to live.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

One New Zealand Stadium at Te Kaha is such a major investment in the city, there is a real risk that it will fizzle if there is not hospitality to support it (see Forsyth Barr Stadium for example). This change is vital to achieve that. There are several venues within the new Category 1 that hold such an important role in Christchurch's arts scene - there are many bands that got their first start at the darkroom, and without this change, it will surely soon shutdown.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I think in general the onus should be on Developers to build soundproof buildings. Ideally, there would be a retrospective obligation on the big developers to go back and soundproof their developments to current standards or they don't get new Building Consents. I appreciate this is probably not possible. I live within an area changing to a Category 2, and that doesn't matter because the Developer went above and beyond with their acoustic screening.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

No, I think this Plan Change addresses everything that needs to be addressed

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Our city finally has a heart beat and we need to encourage people come and enjoy what the central city has to offer. As a parent of young adults we need to ensure they have places to meet friends, be loud and enjoy themselves late night. If people choose to live/stay in the central city they need to accept that it will be noisy.

Q18 **What don't you like about the proposed plan change and why?**

Short Text:

Q13 **Do you think we've got the category locations right?**

Multi Choice: No

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: Victoria Street should not be treated the same as the Central City, the central City where the high volume of entertainment venues are eg The Terrace are doesn't have high volumes of residential housing around it. Victoria St is surrounded by residentia

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Victoria St between Bealey and Sailsbury should not b zoned and treated the same as the city centre.There are old residential houses that surround the part of Victoria St. The zoning is a hang over post quake and we now are constantly fighting the CCC on

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: I think the idea of enabling entertainment venues to be able to operate is OK in principal in the CBD BUT when you combine all of the plan changes together it seems that no one in the Council is looking across all the rule changes and the IMPACT on EXISTING RESIDENTS. Build tall buildings in the same area, not scattered, don't mix old residential areas with night clubs, late night closing 4am and higher enabled noise levels - this is not conducive to healthy living of existing residents. The CCC planning is treating human beings worse that we (as a society) finds acceptable to treat egg laying chickens. Chickens are now free range, and humans are being put in small cages.

If you are going to change the noise levels do this in the areas where you will not aggravate existing residents who bought into quiet residential streets, just because THESE STREETS HAVE NOW BECOME CENTRAL BECAUSE OF THE CHANGES TO YOUR CCC MAP BOUNDARIES we didn't choose to live in the CBD you are bringing your city boundaries and rules to our front doors. I have no problem with noise levels around Te Kaha stadium as the area around here is non residential, I have no problem with increased noise levels in the CBD.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: Could you sleep in a room where this is ongoing conversation, or in an office with people constantly talking and laughing? Could you sleep opposite The Terrace on a Friday night at 11pm No? Well why do you expect us to be able to do this. I strongly object to having noise levels increased around the Victoria Street area. The main reason is that we've been there, done that before and the impact on the residents was significant. It's a proven thing, you know it, we know it.

The main issue underpinning why I am against having increased noise levels in the Victoria St area is the impact on people who live and stay in the area. CCC have recently enabled more housing as well as longer opening hours for licensed premises in Victoria St area, and now you want to add more noise. This will take us back to where we were post quake having to deal with rowdy, intoxicated people vomiting in our gardens, pre loading in our streets, walking drunk and shouting outside our homes (which are very close to the street boundary because of our old small sections, many bedrooms are literally within 2-4 metres of the pavement), urinating on fences & in alley ways, damaging our cars and generally being antisocial. This is a fact. There is well document evidence of this that accepted and recognised in demonstrating that having later opening bars, with loud music caused a massive disturbance to residents within the VNA area. It was so bad that some residences left our neighbourhood because of it. See attached document from the VNA.

Occasionally, even now we are woken by people on the street, beer bottles left on the pavement, vomit on our drive along with shouting, car doors slamming, arguments of drunken people - it's very frightening and there is nothing you can do. It's not worth calling the Police (and they won't come anyway), as a single female I'm not about to go out to the street and confront them or ask them to move on as this is not safe. So you just have to put up with it, and hope for the best. It's not healthy to be scared in your own home. With CCC relaxing the opening hour of licensed premised AND noise levels you are encouraging late night drinking bars to open up and as a consequence the anti social behaviour that is the fall out into our surrounding streets in areas that have people trying to live quietly in their homes in this VNA area. Remember the houses were here long before the bars, you are trying to bring the bars to our doors, it's not the other way around. Please respect and remember this. The new housing you are putting in the CBD and proper city centre like Manchester St is different - these are NEW houses being built in the city. VNA is an old neighbourhood. Very, very different.

Add to this that there are high quality hotels in the Victoria St area that have recently been built being The Mayfair, and The George, attracts high end tourists and business people. It's not a great look or experience for visitors to have to deal with vomit on the streets and sleepless nights as well as antisocial behaviour and fear of abuse from drunken party goers hanging about outside late night bars on Victoria St. Keep this in the CBD where it's all together and the Police can be concentrated in one area to manage antisocial people who drink too much enabled by late night venues.

I'm not sure how many CCC employees and Councillors who read these submissions actually know what its like to try and walk from Victoria Sq along Victoria St, past the Casino and past The Bog and past the kebab shop at 11pm at night on a Friday or Saturday night. I encourage you to do it, and do it alone, as a female, then let me know how safe you feel. I did this two weeks ago and it's terrifying. Having more bars opening later (big mistake) and then potentially being able to pump out loud music will encourage night clubs like CRUZ to reopen on Victoria St. there is no positive outcome that comes from this. It will stop me going out at night, I won't go to the new Court Theatre, I won't go into the city in the evening.I won't spend my money on higher value entertainment, becuase you are potentially enabling RTD drinking youth to run riot all over the city. The CBD is already a really scary place at night, it'll just get worse and you will have brought it to another area beyond the CBD. you already have problems with drunk and disorferly people in the CBD, why spread the problem our further when you can't control it now?

Please think carefully about the zones for entertainment in all of the city. Victoria St is a nice place to go for a cocktail and a meal, please don't allow it to turn into The Terrace after 10pm, we live here! We didn't choose to live opposite The Terrace.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

See the attached submission on the following page

Victoria Neighbourhood Association

Log of Incidents re Late Night Trading on Victoria Street 2011 - 2017

Names & addresses of residents deleted; photos inserted

Date + Time	Name + Address	Reported Incident
Introductory Note re the situation prior to 2011: We checked the minutes of the Victoria Neighbourhood Association from October 1990 and confirm there were no references to any problems re licensed premises on Victoria Street prior to 2011. At some point after the earthquakes, the VNA discussed CCC's proposal to create 'precincts', in particular Victoria Street being designated an Entertainment and Hospitality Precinct. No concerns were raised by residents because we considered Victoria Street an 'entertainment' area already and had not experienced any problems—in fact, it was seen as a positive. We checked with the City Council at that time whether there were any unidentified implications to such a Precinct and were told there were not. The VNA, therefore, did not oppose the precinct designation and did not anticipate any problems.		
Cruz opens, 77 Victoria Street, May 2011 [4:00am] *initially described as temporary* **Revival Bar opens, 94 Victoria Street, with temporary resource consent, November 2011 [3:00am]** *New name '(The Little Neighbourhood') and new license, 2016*		
26/3/12 VNA Committee meeting	VNA Committee meeting attended by 6 non-member residents (from 4 streets in the area) who wanted to report problems w/ licensed premises on Victoria Street. First time ever raised w/ VNA.	**Excerpt from minutes** *Noise: amplified music right up to 3:00am closing.* *Rubbish: bottles thrown around streets, shop fronts/doorways used as urinals, vomit on empty sections.* *Gatherings: Groups of noisy youths congregating behind More FM building, Telecom and other areas. Some residents contacted police, but appears to be a problem moving people off private land.* ***Action:** Contact owner of Revival Bar to discuss and report back* Note: Full report distributed April 2012, with agreed actions between owner Brett Giddens and the VNA. Summary also included in the 27 May 2012 AGM, reporting in very positive terms about our follow-up contact with Mr Giddens on behalf of residents.
Began consulting with residents, continued to receive reports of disturbances at weekends. Met with bar owners, Council staff, public health and police re how to handle problems. Did not keep formal records until the situation was at the point we decided to file formal objections to alcohol licenses trading later than 1:00 am and to be actively involved in the Local Alcohol Policy process. Many residents confirmed their preference for 11:00 pm or midnight closing, but acknowledged the difference between this area and other residential neighbourhoods; agreed to compromise on 1:00 am.		
Smash Palace opens, Cnr Victoria St + Bealey Ave [1:00am], May 2012 *Shifted to another location April 2015* **King of Snake opens, 145 Victoria St [3:00am]**		
21/7/12 Time not recorded	Beveridge Street *now at 18A Beveridge*	Loud noise in middle of street; turned out to be a fight (5 – 6 obviously drunk young men); police called.

Date + Time	Name + Address	Reported Incident
Report #1: Excerpts from CPTED Workshop Report re Victoria Street (Lisa Speight, Crime Prevention Advisor, Christchurch City Council), 27 – 28 September 2012 *'The bars are significant activity generators in the area, especially at night…This located in close proximity to residential areas, which can create issues of conflict between business owners and patrons and residents' groups. This conflict tends to centre on noise levels from bars and behaviour of intoxicated people moving through the area'* [p 19 – 20]. *'Although Victoria Street was known pre-quake as an evening entertainment area featuring restaurants, cafes and wine bars, the nature of the area has changed post-quake and is now increasingly a late night entertainment area focussed on bars and clubs. This draws a very different demographic into the area, with a different set of issues. It is questionable whether the current environment in Victoria Street features the supporting collateral necessary to allow a late night entertainment area to operate safely'* [p 27].		
Mid-October to end-December 2012	Beveridge St *Temporary address during EQ repairs*	Reported that most weekends, especially Saturday nights, there were individuals and groups walking along Durham Street, often yelling or singing loud enough to be heard through double glazing. Observed a woman sitting on wall in front of former Women's Hospital site, obviously drunk, wailing at top of her voice. Was 'rescued' by three males who appeared drunk as well, and walked off to the south. Also observed males urinating on same wall or in front of dwellings next door. Followed one group after midnight, who entered Revival Bar, and another group on a different night who turned onto Conference St and then left (as if to enter Victoria St).

Entries from 2013

Date + Time	Name + Address	Reported Incident
27/1/13	Vegie shop owner, cnr Montreal-Salisbury-Victoria *Closed shop late 2013*	Reported the worst fortnight since opening—vomit on premises, scratched windows, one broken window and door. Regular occurrence on Thursday – Saturday nights. Confident damage is from patrons at Revival Bar.
Confirmation from Brett Giddens that *'All premises have committed to the Accord but Cruz Bar…'* (11/2/13)[1] Report tabled at Victoria Streetscape Project meeting (24/2/13), describing measures *'being advanced by the licensees in response to the concerns'* [from residents].[2]		
4/3/13 Objection to Revival license	Owner, local restaurant Salisbury St	*'We have seen and been advised of the effects* [of late night licenses] *on local residents and businesses, creating late night noise, disturbances and personal safety issues. We hold grave concerns that this will create long term problems with the drunken and disorderly behaviour due to the nature*

[1] Requested copy of Accord 28/2/13; received Version D dated 27/5/13 on 17/7/13—unclear whether this is the final version and who has formally joined, as copy is unsigned).

[2] Indicates that this includes radio contact among partnering premises, street security trial, consistent dress codes, banning *'misbehaving people'* from the various premises.

Date + Time	Name + Address	Reported Incident
		and type of patronage…We do not want a manifestation of the problems once experienced in the central city area transferred to Victoria Street, which is essentially residential and tourist in nature. In our view, this would reflect poorly on the recovery of our city. We feel an appropriate operation designation for this type of operation would be no later than 12:00 am.'
4/3/13 ARLA license hearing [Revival]	Conference St	*'I am a resident to the east of this bar* [Revival] *and on many occasions I have been woken by bad behaviour and language emanating from the bar's patrons at 3am during weekends.'*
4/3/13 ARLA license hearing [Revival] *Not allowed to present evidence due to time constraints*	Gracefield Ave	***Excerpt:*** *'From my two-storey townhouse* (which is double-glazed), *I can hear the beat of music…noisy people on the street and slamming of car doors late at night/early morning. This was not the case prior to Revival Bar, despite the fact that there were many more establishments with liquor licenses in the area.'*
4/3/13 ARLA license hearing [Revival]	Family on Salisbury St	**Excerpts:** *'The ongoing noise from Revival has been relentless, supposedly remedied by a temporary opening plastic roof. This has had no mitigating effect….'* *'The excessive noise from patrons in early hours has had a major effect on my family. I have an 11 year old* [daughter] *and a 3 year old* [son] *who cannot cope with late night noise…* *My fence has been vandalised several times along with two break and enter violations never before known here.'*
11/3/13	8 residents / families in townhouses on Peterborough St **See also 15/6/13 entry.** *All shifted from area by end 2013*	*'What we personally experience are the crowds that leave Revival at the early hours of the morning coming down here to try and get into Cruz. Most of them are drunk, leaving bottles etc on the road and footpath, some in our front yard. They sit on our front wall—some residents are very distressed with all the noise. We witnessed a vanload [party bus] urinating on our property and then walking around to Cruz'* *'It's absolutely mayhem sometimes in the early hours of the morning'* *'Have already contacted Police several times and the Cruz owner. Very concerned about The Bog coming into the area.'*
Report #2: Excerpt from Decision [2013] NZARLA PH 212 (B M Homes, Deputy Secretary for Judge Hole) re license application, Anchorage Frankton Ltd / Revival Bar, 20 March 2013 *Name changed to Little Neighbourhood in 2016* *'Objections were filed by neighbouring residents and businesses alleging unacceptable patron behaviour, disturbances and disorder and that the hours of trade were excessive*....[para 4, p 2]. *The Police and Inspector opposed the application on the existing conditions because of perceived*		

Date + Time	Name + Address	Reported Incident
management and operational shortcomings....' [para 3, p 1]. *'Issues such as noise and poor patron behaviour (relevant matters contained in the objections) go to the suitability of an applicant. They are matters germane to the Authority's inquiry. Thus, whilst the location of premises and issues arising from that location are resource management issues, how a licensee deals with those issues is a matter for the Authority'* [para 10, p 3]. *'The truncated terms of the renewal is intended to put the licensee on notice that, given the fragile location of the premises, a pro-active approach to dealing with the objectors' and the reporting agencies' concerns must be implemented and maintained....'* [para 18, p 4].		
March 2013	Family on Salisbury St *Shifted to 15 Salisbury St because of noise*	*'Weekend hours to 3am keep us and our children awake to 4am with intoxicated hooligans yelling out, vandalizing anything in their path…since the opening of the bars.'*
Summary [reported to VNA 20/3/13]	Family on Peacock St	*'Burning cigarette holes in our baby's sunshade on car window late one night; frequent navigating of glass and vomit in the morning, with the baby buggy and dog (I have to watch the paws, as there is great interest in the vomit), mainly on Montreal St.* *Shouting usually about 3:30 am on Friday and Saturday nights, coming from direction of Victoria St and Bealey Ave; Audible vomiting outside our house, getting into car and roaring off at 4:00 am; Shouting, swearing and laughing up and down the street at all hours, often between 4:00 - 5:00 am. We have children and the impact on them is significant.*
March 2013: CCC material on deliberations re Local Alcohol Policy available; VNA's first deputation advocating 1:00 am closure on Victoria Street [24/4/13].		
Early May 2013	Montreal St	Reported that police were called to his address well after midnight on Saturday night to break up a fight (several intoxicated male youths) on veranda of his historic cottage directly across from back of Revival. Faeces and urine found on veranda and front section.
8/5/13 CCC Planning Committee submission	Family on Peterborough St *Shifted 5/2013*	Described noise and disruptions that have become so unbearable for her and family (including a young daughter) that they have reluctantly shifted. She confirmed they had experienced no problems prior to new bars opening, despite living close to the Casino.
16/5/13 Full CCC meeting	Montreal St	Described how he and his partner are no longer confident taking late night walks around the area as they did before late-night bars opened. Has been physically threatened by intoxicated males coming from direction of Victoria St when confronted re damage being done to his parked car. Also found urine, vomit and faeces on his property.
16/5/13 Written statement, CCC meeting	Family on Peacock St	'*We have lived on Peacock St since 2009, now with two children under 3. Recent late-night activity …with levels of street noise more apparent from*

Date + Time	Name + Address	Reported Incident
		Thu to Sat night, generally from 1.00-3.30am....Recent [examples] *are broken vehicle mirrors, damage to fences, broken bottles and vomit on pavement, all an aftermath of late-night activities around Victoria St. As residents living close by, we are directly and adversely impacted.* *We support entertainment and hospitality on Victoria St, however not hours to 3.00 am. We would like to see 1.00 am (at the latest). We would like to see Victoria Precinct not only a thriving shopping and entertainment area but also a family friendly inner city neighbourhood that lives and works together.'*
16 May 2013: City Council unanimously approves the Draft Local Alcohol Policy and opens formal consultation (from 31/5 to 1/7). All of Victoria Street included in Area B (1:00 am maximum trading). Only Area A allowed 3:00 am (or 4:00 am if a nightclub).		
30/5/13	Family on Beveridge St	*'After 1am there has been ongoing disturbance at my end of Beveridge St. There has also been an impact on the sleep of my school age son.'*
30/5/13	Peacock St	*'Up until the new bars opened we had a very quiet area. Now I am scared to go out at night.'* Explained this is because of aggressive and intimidating behaviour from people who obviously were intoxicated.
30/5/13	Beveridge St	*'I have phoned police several times to clear drinkers from outside my house.'*
12/6/13	Family on Durham St	*'We occupy a very small section close to the footpath; my wife often is woken up by louts at 2:30 – 4:00am.'*
15/6/13	8 residents / families in townhouses on Peterborough St *All shifted from area by end 2013, as art of EQ pay-out, but decision affected by the problems described in this entry*	**See 11/3/13 entry above as well.** Reported having no problems (including from the Casino, across the street) prior to Revival, Cruz moving in. Described cumulative effects from multiple bars attracting young people who drink very late. They now monitor sightings of migration as well as they can and confirmed seeing groups coming from the north along Victoria or Montreal Sts, including those leaving Revival and heading their way. All support 1:00am closing as the only way to alleviate regular disruptions to sleep and other disturbances they now experience. One resident described taking photos of groups sitting on their front wall late at night, obviously having been drinking and being very noisy. When the flash went off they started throwing bottles over the fence. One resident described the impact on her young daughter, and another described effect on her unwell partner.

Date + Time	Name + Address	Reported Incident
17/6/13	Montreal St *Shifted 2014*	*'I live CLOSE to the bars. Drunks, fights, fouling on my property, destroying cars now happen regularly.'*
22/6/13 7:45 pm	Conference St *Shifted 2014*	*'When driving north along Montreal St from lights at Clock Tower, suddenly 5 males came out of Revival Bar and proceeded across Montreal St, between the cars taking their time and putting themselves and others at risk. They appeared drunk, unsteady on feet.'*
26/6/13: VNA submission to CCC supporting Draft LAP (151 signatories, with written comments; 72 VNA members, 65 other residents/property owners, rest home managers representing 80 residents, and 14 business operators, including 3 licensed premises).		
27/6/13	Peacock St *Shifted 2016*	*'I am on the corner of Montreal St and rarely sleep between 2 – 4 am because of rowdy pedestrians coming from Victoria Street.'*
29/6/13 2:15am	Gracefield Ave	Observed *'many young people—probably 75 – 100, on the streets from Cruz/Casino-Bealey. All very loud. Witnessed two young women ducking behind Filigree on Victoria-Salisbury corner to urinate in full view of anyone walking by. Two males went behind greengrocers and yelled* 'Hey someone has shit back here'. Q*ueue about 10m long at Revival, with others coming and going from direction of Conference St. Atmosphere felt unsafe, even for adult male.'*
7/7/13 Midnight	Gracefield Ave	*'Between Cruz and Revival saw young male so drunk he could hardly stand; long, boisterous queue at Revival. Felt quite wary.'*
17/7/13: Copy of Victoria Street Precinct Accord (2012) provided to residents (Version D 27/5/13); previous communications indicated it was in place since 11/2/13, although unclear whether all have signed the agreement and/or whether still a draft.		
21/7/13 10:30 am	Peacock St	*'Late on Sunday morning, I took a walk through the neighbourhood and along Victoria Street. In two blocks between Salisbury & Beveridge St, smelled strong odours of beer/wine, urine and vomit. Saw vomit in two places and what could be urine along the footpath.* *Further on, saw man hosing down the footpath in front of Revival and next door. Obvious that alcohol, urine and vomit on footpath were result of late-night drinking.'* ***Photographic evidence #1 on next page***
Report #3: Excerpts from Observations Report, Peter Shaw (Liquor Licensing Officer, CDHB), 28 July 2013, 1:30 – 2:40 am ***0035hrs:*** *Durham St, just north of Peterborough St, very audible music, treble and bass. Confirmed to be coming from Cruz Bar.* ***0130hrs:*** *Outside 406 Montreal Street. (between Conference & Peacock). Some music bass but mostly loud, especially female, voices coming from Montreal St side of Revival Bar.*		

Date + Time	Name + Address	Reported Incident
4 young males walking from Victoria Street between buildings previously occupied by MORE FM.two carrying beer bottles. One with penis exposed, urinating on the ground as he walked. Headed across Montreal Street towards Conference Street. *On Victoria Street, observed 4 males standing in doorway just north of Revival Bar. On passing, smell pungent smell of marijuana. Once finished, males return to Revival and gain immediate entry.* ***0230hrs:** Outside 29 Peterborough St. Clearly audible female voices shrieking from Cruz Bar. Also sound of bottles being tipped into a bin—crashing and smashing. ...Music still very clear and loud in Durham/Peterborough area.* ***2.40hrs:** Durham/Conference Streets Loud voices clearly heard above traffic.*		
Photo #1 Refer entry dated 21/7/13 at 10:30 am Victoria Street, footpath hosed off in front of and on either side of Revival Bar  *[photo taken on a later date as illustration of the ongoing need to hose down the footpath outside the two bars on Victoria Street]*		
28/7/13 Letter to the VNA	Montreal St apartment *Shifted in 2014* ***Refer follow-up 28/10/14***	***Excerpts from letter to the VNA*** *'My partner and I have lived here for 4 years; prior to Sept 2010 earthquake we occupied an apartment at 399 Montreal Street (now Revival Bar). I am writing this letter to convey my experiences of how the area has changed over the past couple of years and to express my concern about the negative effect this has had on residents such as ourselves. I also want to dispel the notion that this is a problem*

Date + Time	Name + Address	Reported Incident
		perpetuated by 'older' residents. We are in our early thirties. *'On a number of occasions, I have witnessed late-night altercations between individuals/groups which have required intervention by the police. I have also seen people urinating on signs outside Gordon Smith's grocer and have had to negotiate vomit on the pavement on Saturday and Sunday mornings. I have also noticed an increase in empty beer and RTD bottles on Montreal and Conference Streets.* *'My opposition to 3:00 am closing is twofold: my own quality of life is adversely affected by invasive noise from bar patrons, but there has also been a negative impact on the environment surrounding the bars.'*
31/7/13 Excerpts from submission to full Council re LAP	Peacock St	*'I have lived in the CBD since 1995. I have major concerns about the current lack of regulations about the hours of trading of pubs and nightclubs in the central city area. Unfortunately, as the number of businesses selling alcohol has increased there has been a steady increase in the number of noisy, abusive, intoxicated individuals around the residential area overnight that frequently disturb the peace, including vandalism to private property. I have had several incidents of being abused and threatened by intoxicated individuals or groups as I bike home from the Emergency Department between 0000-0330h.* *Most of this disruption occurs between 0000-0600h…makes residents and visitors feel unsafe.'*
1/8/13 Excerpts from letter to the VNA	Another Montreal St apartment *Shifted 2015*	'*For at least a year after the opening of Revival Bar, I frequently experienced disruption to sleep, Thursday - Sunday nights, caused by patrons, particularly those entering and exiting the bar… Significant increase in alcohol related incidents include:* *damage to property in Clocktower Lane:* *broken pot plants; stolen pot plant (4/13)* *broken drain pipe (Flat 1)* *vomit on my pot plants; vomit on the letterbox* *Increased police presence to deal with alcohol-related incidents, including fights, and associated noise disturbance.* *Change to my own recreation, including an increased desire to leave Christchurch over the weekend to avoid disruptions caused by the Victoria St bars.* *It may also be useful to have a record of my age: 29.'*

Date + Time	Name + Address	Reported Incident
		Update: She and her partner shifted in early 2015, citing problems on Victoria St as one reason.
Tequila Mockingbird opens, 98 Victoria Street [3:00am] sold 9/16; resold 2/17 [now Chopped and Staff Only, opened 4/17] **The Carlton reopened in rebuilt premises sometime in 2013, with 2:00am closing**		
24/8/13 3:15 am	Montreal St	From upstairs window, witnessed a male walking up the drive at 6 Beveridge Street, unzipping to urinate, then changing his mind and urinating on section next door. Reported *'waves of noisy people entering the area at various times from 10:30 pm – 3:30 am.'* Didn't go out to count numbers but woken up at least 3 times.
24/8/13	ChCh City Councillor	Reported verbally *'a surprising level of noise and rowdiness all along Victoria St',* including a fight at the Cruz end; also very noisy between Conference + Beveridge Sts on Montreal.
21/9/13 Late at night	Gracefield Ave	Very loud music and bass late at night (well after midnight)—seemed to be coming from Victoria St in vicinity of Revival. Woke me up, but did not get up to check.
8/9/13	Montreal St	*'Currently the Revival Bar is open until 3am in the morning. The aftermath between 3am – 5am when patrons are leaving that area in a drunk/disorderly state start vandalising, yelling, swearing and urinating around residential homes and general drunken behaviour that still goes on to date.'*
7 October 2013: The Provisional Local Alcohol Policy unanimously adopted by the City Council [notification to be considered by next Council after local body elections]		
Mashina opens at the Casino [24-hour license, but usually closes by 3:00am] *Name changed to '66 on Peterborough' in 2016, now an event/functions centre, not nightclub*		
16/11/13 From after midnight to 1:30 - 1:45am	Gracefield Ave	Heard very loud voices and thumping bass from their house near Durham St corner. '*We walked over to the Salisbury end of Victoria St where there were <u>streams</u> of young people walking south from Bealey Ave and north across Salisbury St, cutting through the residential area. It must have been over 50 just in the 2 blocks.* In *a 30-minute period, we witnessed (i) young male urinating by Whiskey Galore on Victoria St (ii) 2 males and 2 females weaving along the street, yelling out to everyone they passed, including us, about how drunk the female companion was. Hung around in front of Revival for awhile, yelling and laughing; said they were going to Mashina, but instead they entered Beveridge St (iii) one of the males unzipped his pants and urinated at the entrance of a residential property. Continued along to Durham St and turned toward the Casino and (iv) female stopped in front of a house with low*

Date + Time	Name + Address	Reported Incident
		wall, sat down and wailed loudly to the others'
28/11/13 Midnight - 12:30 am	Gracefield Ave	*'Very noisy at Cruz—loud bass clearly audible a block away; people literally screaming / yelling. Revival Bar also very noisy; group of 5 males who seemed very drunk trying to get in.'*
28/11/13 12:30am	Montreal St	*'Very noisy, including a group of 5 obviously drunk males standing outside Revival. Walked around to Montreal St to their car, talking loudly; then walked around the area for another 30 – 45 minutes.'*
17/12/13	Montreal St	Heard a loud noise, which was someone kicking in his front door. Saw resident was home, so ran away. Resident waited a few minutes, then drove around looking for intruder; saw him on another residential street and rang police, who found him at Papanui Rd bottle store. Arrested. Resident said he had no such problems before this; changed after Revival and other bars with larger capacity than previous premises opened.

Entries from 2014

Date + Time	Name + Address	Reported Incident
9/2/14	Property Mgr, Bishopspark Retirement Village, Dorset Street	Contacted VNA re significant increase in noise, police callouts and vandalism since new bars. Intoxicated people entering Bishopspark carpark (many times in past 8 – 9 months), including intruders found inside parked cars. Wanted to register support for LAP and 1:00am closure because it would *'consolidate such bars closer to the CBD instead of residential areas.'*
17/3/14 9:30 pm	Cranmer Square	Loud music/other disruptions from The Bog; both doors open, despite rules prohibiting this. Police called on site. Ruling: EXCESSIVE **Attachment 3, report**
17/3/14 ARLA license hearing [Chinwag]	Conference St [residence located across from the access way connecting Montreal and Victoria Streets]	*'We are often bothered by patrons' alcohol-fuelled noise e.g. shouting, singing, slamming car doors in the early hours of the morning. We feel these disturbances will only increase if more bars open....* *This was a very rare occurrence prior to existing bars. We feel that patrons pre-load with alcohol and food, then dispose of litter in the residential area before approaching the bars.* *We love the vibrancy of inner city living. It is not our intention or desire to kill nightlife on Victoria Street.* However] *each time a new liquor license is granted it encourages someone else to plan a bar.* [We do not want repeats of] *a recent assault at 3:30 am after a man left Revival Bar and was set upon by a group of assailants.'*

Date + Time	Name + Address	Reported Incident
Report #4: Excerpt from Decision [2014] NZARLA PH 000230 (Judge J D Hole) re license application for Ghetto Ltd / Chinwag, Tony Astle, licensee, 28 March 2014 (hearing 17/3/14) Tony Astle described how different Victoria St is from when he operated there pre-quakes. Excerpts from Judge Hole's decision as follows: *'Prior to the earthquakes the licensed premises on Victoria Street attracted an older type of clientele whereas today patrons...are inclined to be younger, more noisy and create more nuisance. The behaviour of this new group of patrons... is unacceptable to Mr Astle and he is hoping that that type of clientele will move away from Victoria Street in due course. However, because of the current type of clientele favouring Victoria Street, the proposed premises will need a doorman to keep undesirables out of the premises'* [para 7, p 2]. In his verbal presentation, Mr Astle said he had not needed security guards/doormen at the former Chinwag or at the King of Snake, but is now necessary at Mexicanos and Dirty Land.		
Additional excerpts from Report #4 (28/3/14) *'Like Mr Astle, they* [objectors] *noted how before the earthquakes Victoria Street was a safe and pleasant place at night. Now it is quite different and the residents experience considerable nuisance and noise problems up until about 3:30 am on Friday and Saturday nights. They are no longer able to sleep and they spend the following mornings cleaning up the debris. Some of the objectors gave detailed evidence as to specific occasions when the noise and nuisance problems were at their worst. ...'* [para 9, p 2]. *The Authority is very conscious of the problems being experienced by the objectors. The evidence indicates that the cause ...is primarily the influx of young persons into a street that previously attracted a more mature and responsible clientele'* [para 16, p4].		
20/3/14 Letter to Police re problems with Revival Bar when living at 27 Salisbury St:	Family on Salisbury St	*'Every weekend the carpark beside our house is alive with youths preloading alcohol and then going backward and forward to the Revival Bar. My wife and myself has* [sic] *been threatened with abuse* [sic] *language when we asked them to leave the carpark.'* Also described other police call outs, including from Bishopspark Retirement Village residents.
Mexicano's opens, using previous Chinwag license, 131 Victoria St [3:00am] **The Dirty Land, part of Mexicano's, opens soon after [3:00am]** **The Bog opens, 50 Victoria St [3:00am]**		
Late March 2014	Conference St *Shifted 2014*	Reported people still park on Conference St at weekends and are very noisy when returning at 3:00 or later, waking her up. Confident they are drinking at Victoria St bars because she can hear them taking about it.
9/5/14: Six-week trial of Victoria Street Safe, described by B Giddens in 16/5/14 email as *'very different than on-premise security, it is about keeping control on the streets and increasing safety and good order'.* *This scheme no longer operates.*		
10/5/14 1:30am	Family on Peacock St	Young male entered cottage through unlocked window into children's bedroom. Dog started barking, Nathaniel got up, saw intruder running out front door. Found mobile phone outside window; messages included several re being in various bars (last one Mashina). Police able to identify intruder;

Date + Time	Name + Address	Reported Incident
		reported he was so drunk he did not even realise what he had done. Family has lived here 4 years, with no other problems.
10/5/14 9:45pm 11/5/14 3:30 – 5:30 am	Montreal St	Heard noise outside; saw 2 males crouched behind his car where tools kept. Scared them off, then realised things were stolen. Saw intruders climb over wall on Conference St, joined by another male. Phoned police—apprehended with stolen goods; confirmed either drunk or high. Said there are now disturbances almost every weekend, e.g. '*10 - 11 May particularly noisy—groups walking by up to 3:30 am. Two very drunk, hung around my cottage yelling at each other, then chasing each other up + down street. At 5:30 am, two more groups of 3 – 4, half-hour apart, weaving down the street with piercing laughing and screaming.'* *'Have lived here for many years. By 6:00pm the street used to go very quiet. Changed instantly when Revival opened; Mashina and The Bog made a big difference in foot traffic late at night / early morning.'*
15/5/14	Montreal St	*'It's been a zoo around here lately'*, after being quiet for a while. Interviewed by CTV re Victoria Street and described what it's like compared to 3 years ago.

Report #5: Pre-loading Survey, Christchurch City Council, Safer ChCh and NZ Police (author Sue Ramsay, CPTED), observations carried out on 5, 12 and 19 July, 2014 from 10:30pm – 1:00am

Survey and observations (N = 465) outside Mashina, Bog, Revival and Carlton (the only bars with queues on the 3 Saturday nights). High percentage (67%) self-reported already being intoxicated to one level or another; interviewers recorded signs of intoxication as 79%.

Relevant tables reproduced on next page

Report #6: Excerpt from CDHB Alcohol Licensing Officer's report (P J Tweed) re renewal of license, Caliente Kitchens / Tequila Mockingbird, 29 July 2014

'.....it seems obvious that the local residents have not been well served by the Resource Management Act process. ....it would appear that there is little hope for the objectors receiving any relief from the effects that the increase in late night licensed premises in Victoria Street has had. It appears that the stable door is open and the horse has bolted.

I believe that the residents' concerns are very real. They are genuinely affected. It would seem that the draft Local Alcohol Policy recognised this when proposing 1am closing time in Victoria Street. The residents have been clear in there [sic] *support of a 1am closing time. They understand the area is identified as an entertainment/hospitality precinct and accept this as part of inner city living. They are however asking for compromise.* [page 2].

Findings from Victoria Precinct Preloading Survey Results July 2014,
Crime Prevention Team Leader Sue Ramsay [page 11]

Date + Time	Name + Address	Reported Incident

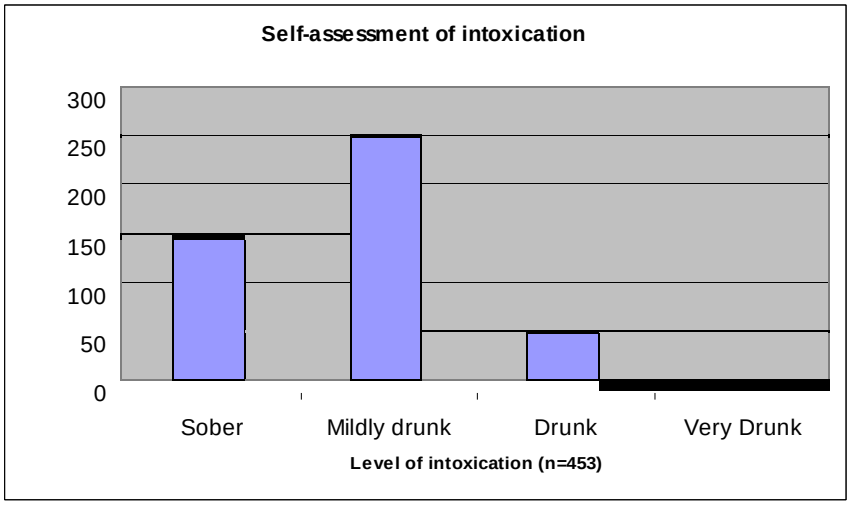

Table 28: Self-assessment of intoxication

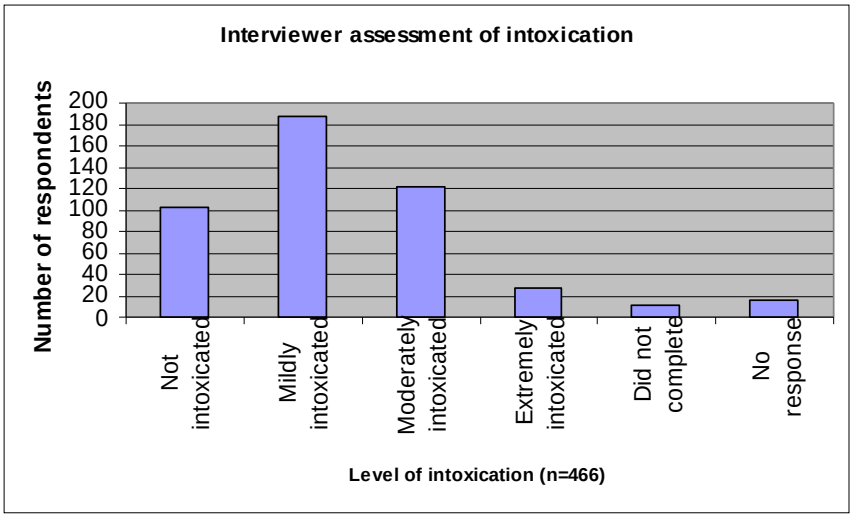

Table 29: Interviewer assessment of intoxication

Chinwag opens in new location, 104 Victoria St [3:00am] *Changed to 'Rockstar Pizza', 4/17*		
8/8/14 10:30m	Peacock St [*currently at 10/271 Bealey Ave while repairs carried out]*	*'...on 8th August at 10:30pm after visiting friends I was getting into my car parked on Montreal St behind Tequila Mockingbird. Two car-loads of girls were dropped off right behind my car. Eight girls stood on pavement drinking, talking and shrieking. They left empty bottles on the pavement and headed towards Victoria St.'* No sign of any street patrols.

Date + Time	Name + Address	Reported Incident
Report #7: Excerpts from Inspector's Report (Jennifer Davison, Alcohol License Inspector, Christchurch City Council) re renewal of license, Caliente Kitchens Ltd / Tequila Mockingbird, 11 August 2014 *'Nuisance and vandalism is a concern of the agencies on Victoria Street. I believe the concerns of the residents are real and they are affected by the licensed premises in the area. They understand they chose to live n the central city and I believe they are asking for a compromise in relation to hours. .....* *I have to question the applicant's link between being located in a vibrant commercial area and nuisance and vandalism. I cannot see a link between vibrancy and nuisance and vandalism'* [page 5]. *'The agencies have also seen patrons refused entry to this premises and then allowed entry to Revival Bar* [owned by the same operator].....*This premises...turns into a nightclub with loud music and attracts different patrons to those dining, causing a queue to form on most Friday and Saturday nights. ....* [page 6].		
31/8/14 Morning	Beveridge St	Found vomit on driveway behind gate. ***Photographic evidence #2***
9/10/14 2:50 – 3:15am	Montreal St	'*Group of 4 males and 2 females stood on corner of Beveridge & Montreal Sts, talking loudly and waking me up. One was sick in the hedge. Obviously, I do not know where they'd been, but seems logical they were at one of the bars open at that time in this area.* *Around the same time, another group (4 – 5) of very boisterous males made enough noise to be heard a block away. A few minutes later, another group got into their car on Beveridge St, also very loud for that time of night in a residential area.'*
12/10/14 10:51 pm	Cranmer Square	Crowd noise from The Bog heard across Cranmer Square. Spoke to Duty Manager, who took steps to reduce noise. **Attachment 3**
24/10/14 Summary of disturbances	Beveridge St	*'Have lived here since August 1986. My house is only 15m east of Montreal St. I can hear noise from nearby bars and since the late night bars moved into this part of Victoria St I have had considerable disturbance at all times of night from rowdy, noisy and antisocial patrons going to and from these bars, and creating mess and vandalism in the process.'* <u>Examples of recorded disturbances include:</u> Noise from patrons coming to and from parked cars on Beveridge St, from 10:00pm – 4:00am. Talking loudly; often groups standing on street for 15-20 minutes, then banging car doors and driving off. Damage to paintwork of my car parked on street—in over 28 years, this is the first time. Vomit on front lawn and driveway; passerbys coming onto drive to urinate. Bottles/cans thrown into front garden.
28/10/14	Montreal St apartment	**Follow up correspondence on 28/10/14**

Date + Time	Name + Address	Reported Incident
	Shifted from area 2014	*'We have just moved from clocktower lane so are not residents of the area anymore. A major factor in our decision to leave was the way the area has changed since bars like Revival opened and you are welcome to make this known if it is useful.* *I know our neighbours are also about to leave for the same reason.'*
6/11/14 [report to VNA]	Montreal St	Confirmed problems described in Nov 2013 still occur, '*Eased off a bit, but now back full force. Worse now that accessway between Montreal + Victoria St has reopened.'* Suggested likely reason for short hiatus is colder weather and continuous road closures.
9/11/14 3:00am	Peacock St	Reported being woken up by loud voices and laughing, mainly female. Carried on for awhile, then slammed car doors and drove off.
Nov 2014	Family on Beveridge St	Reconfirmed problems from late night drinkers roaming up and down Victoria St making noise, and of finding evidence of urinating + vomiting. Also instances of noise/disturbances on Beveridge St, especially patrons returning to cars or walking through residential area late at night/early morning. *'We have children and this is making it difficult for families.'*
 **Photo #2 31/8/14 early am** Beveridge St: Vomit is the pale patch just to left of gate		
Sept – Nov 2014 reported to VNA 14/2/15	Cranmer Square	**Excerpts from email communication:** *From Sep to Nov 2014, crowd noise started to keep me awake until 4:30 AM. After getting no sleep on yet another Friday night in Oct 2014, the following evening, I spoke directly to both the Duty Manager and the General Manager of The Bog and expressed my concerns about the crowd noise. They both assured me it couldn't possibly be them.* *The following day, Cat Whistling and Excessive Shouting and Crowd Noise was again coming from the outside areas of the Bog. Immediately I made a*

Date + Time	Name + Address	Reported Incident
		direct approach and spoke to the same Duty manager. She had NO IDEA that Cat Whistling and Excessive Shouting and Crowd Noise was coming from her own premises!! After listening to me, she went out and told her patrons to stop the noise. *After these occurrences, I made several noise complaints to after-hours noise control and also spoke to the Acting Manager of CCC Liquor Licensing.* **Attachment 3, report**
20/11/14: Victoria Street Residents + Business Owners Forum organised by Victoria Street Alcohol Accord; residents suggested mobile phone contact to reach Street Patrol if needed. Received confirmation 9/9/15—10 months later—that this will be actioned.		
24/11/14 10:30pm	Peacock St	Queue of 18 at Tequila Mockingbird, pushing and shoving, seemed to be ready to start a fight.
28/11/14 and 29/11/14	Conference St *Email reconfirming support for 1:00am closing*	*'We deplore the noise and drunken revelry all along Conference Street, slamming of car doors late at night and bottles/cans/other litter outside our house.'* Did not happen before, even when living in Clocktower Lane. ***'Photographic evidence #3 + 4 on next page***
28/11/14 ARLA license hearing [Tequila Mockingbird]	Beveridge St	Noise from bars in vicinity of Revival, Tequila and Mexicano's keeps them awake on regular basis. Tried unsuccessfully to raise noise issue on his own, with little success; then joined VNA primarily because of these problems.
Boo Radley's opens above Tequila Mockingbird, 98 Victoria St [3:00am]

3Conference St: Signs of pre- or side-loading, a regular occurrence.

Photo #4 29/11/14 (taken 20/9/15 at 5:30pm, but sighted early am)
Montreal - Conference St: Signs of pre- or side-loading by residence, across from accessway to Victoria St

Date + Time	Name + Address	Reported Incident
Report #8: Excerpts from Victoria Street Environmental Scan report, CCC Licensing Inspector, Police and CDHB Licensing Officer), 22-23, 29– 30 Nov, and 6 – 7 Dec 2014 *'At 2250hrs a group of 8 females observed standing on Papanui / Victoria corner talking very loudly about* 'being pissed already'. *Were declined entry to the Carlton, migrated south on Victoria St'* [page 4]. *'On 23/11/14 at 0130hrs four females showing signs of intoxication sat on the wall outside the Carlton and were not moved on by security'* [page 4]. *'People later at night showing visible signs of intoxication... Beer bottles half full with beer seen in the entrance of 104 Victoria Street at 2100hrs on 22/11/14'* [page 6]. '*At 0155hrs on 23/11/14 two men were observed taking what appeared to be drugs in the doorway next to Saggio di Vino. ...'* [page 6]. *'...closer to 2300hrs people began congregating if they had been refused entry to a premises, mainly from Revival Bar…The later the time the more breaches of the liquor ban were observed, directly outside some premises and in the private access way....'* [page 8]. *'Males seen consuming alcohol in parked car with very loud music next to Caxton Press building. One male seen vomiting in this area and further north there was vomit on the footpath near the fencing of an empty section.* *On 23/11/15 at 0300am a rubbish bin was set on fire outside Revival Bar'* [pages 9 – 10]. *'At 2230am on 22/11/14 a party bus was seen dropping people off on Salisbury Street. One night at 1125hrs two known females were observed fighting in the car park to the north of the Bog, a crowd gathered and Police intervened'* [page 11]. *'On 7/12/14 at 0120hrs a group of females were observed congregating outside townhouses on Montreal Street, they were showing signs of high intoxication. They were spoken to and stated they had been in Revival Bar and were waiting for a friend to pick them up'* [page 11]. *'Liquor ban breaches were identified at 2300hrs* [on 6/12/14]*... Intoxication increased on the street as the night progressed'* [page 12]. *'The car park to the north of the Bog was being used as a toilet, this use increased later in the night. The eastern wall of the Bog facing the casino car park was also frequently used as a toilet.* *A broken wine glass was also located in the green area opposite the Bog along with empty bottles'* [page 13]. *At 0030hrs on 7/12/14 two females were seen consuming alcohol in the green area…..'* *From 2300hrs it was noted that the small lobby areas located around the Casino and the wall behind the Bog by the Casino were being used as toilets'* [page13].		
13/12/14 Midnight	416 Montreal St	*'Coming home from The George. Two guys leaning on ute on Montreal St opposite Revival Bar, drinking from cans.* *Saw Street Safe guys at back of Telogis having a smoke—told them and they went off to investigate. Victoria St very noisy and intimidating tonight.'*
Report #9: Excerpts from Decision No. 60B [2014] 2958 (P R Rogers, Christchurch District Licensing Committee) re license renewal for Caliente Kitchens Ltd / Tequila Mockingbird, Brett Giddens, 23 December 2014 (hearing held 27 – 28 November 2014) *'The lack of a Local Alcohol Plan* [sic] *which the Committee considers is at the nub of the problem. The residents are right to say they expected a change with the full enactment of the Sale and Supply of Alcohol Act 2012. In the draft LAP, which has been for public consultation the area of Victoria Street in question has been identified as being an area affected by noise, nuisance and vandalism and a closing time of 1:00 am was recommended. This doesn't mean to say ...the draft will not change*		

Date + Time	Name + Address	Reported Incident
prior to coming into force... but the final policy will reflect the desire of the community as a whole. In this instance the delay in implementing the LAP is having a significant impact on this community. Another problem identified was that there are a number of bars which do not trade as restaurants later into the night in the vicinity, which are a catalyst for the migration which causes issues within the residential neighbourhood' [page 3].		

Entries from 2015

Date + Time	Name + Address	Reported Incident
3/2/15	Salisbury St apartment *Demolished by 2016*	Particularly concerned if Bog serves alcohol on footpath. Described noisy queues, increased vandalism + theft (flat directly behind Bog).
3/2/15	Another apartment on Salisbury St *Demolished by 2016*	Particularly concerned if Bog uses footpath; also migration of groups along Victoria St late at night/early morning; very noisy, often intimidating (experiences as taxi driver).
7/2/15	Montreal St	Email reconfirming earlier problems: *'Living so close to the bars is horrible. It used to be very quiet at night and even on weekends. My partner is now reluctant to visit weekends because of the noise, unsafe behaviour, litter, drinking on the streets. The Bog added to the number of late night drinkers in the area, almost immediately noticeable.'*
10/2/15	Peterborough St townhouse *Shifted from area*	Verbal description of noise from patrons in queues at The Bog, which can be heard a block away at his townhouse early on weekend mornings. Indicated he will be objecting to any expansion (e.g use of footpath to serve alcohol)
Report #10: Excerpt from CDHB Alcohol Licensing Officer's report (P J Tweed) re renewal of license, Crotalus Ltd / The Bog, 13 February 2015 *'I am aware that later at night the area outside the premise becomes quite congested with the queue that forms...together with the pedestrians passing the premise and the accumulation of taxi's* [sic] *that illegally queue on the road in front of the premise'* [page2]. **Refer also entry dated 14/3 – 15/3 2014 (with related photographic evidence)**		
6/3/15 – 7/3/15 10:15pm – 2:00 am	Observations carried out on behalf of the VNA and for CPTED training by 3 residents	**Situation at 10:35pm:** King of Snake, Chinwag and most other restaurants closed or closing. Bars open. Loud music from Cruz, but no sign of anyone outside or on ground floor; also loud music at The Carlton, but neither problematic at this hour. **11:10pm:** 2 large piles of vomit across from The Bog. **11:15pm:** Group of 10 females (two self-reported as having already drunk too much and *'not being let in anywhere'*) arrived at The Bog from Durham St; not admitted, so proceeded north on foot. Two obviously intoxicated and talking openly about it.

Date + Time	Name + Address	Reported Incident
		Were immediately admitted to The Dirty Land. Observers asked bouncer why; replied *'They are a hen party and OK'.* Asked about agreement among bars to be consistent re who was admitted (refer Note below); bouncer repeated '*They met my personal standards for entry'.* Observers actively looked for Street Safe patrol to report this breach; no sign of any on duty. ***Note from 26/2/13 Victoria Streetscape Committee minutes:*** *Reported that bar managers from Alcohol Accord use radio-phones for communication. Anyone removed from one bar will not be allowed to enter another bar.'* ***Photographic evidence #5***
7/3/15 10:15pm	Peacock St	Reported group of 35 walking *'in a pack'* south from vicinity of The Carlton through residential area. Already very noisy and threatening.
14/3 - 15/3/15 10:20pm – 2:30am	Observations carried out for VNA and CPTED by 3 residents	**Situation up to midnight:** Very congested outside Revival and Castrol's. Large group (30-ish) in front of The Carlton—took up entire footpath. Group of 9 then walked south, followed by groups of 3 and 6. Horns honking; group of 5 on Peacock St corner yelling out at the cars. **Around midnight:** Group of 14 walking from Dorset St, south onto Victoria St, followed by very loud group of 6; two obviously drunk. **Midnight:** Two males on Montreal and Conference St corner, smelling strongly of alcohol; crossed over and turned into Revival; could not see if admitted. Another group of 7 males arrived from Conference St. **1:00am:** 5 police and group of 9 males outside Ken's Camera on Dorset St corner. Could not see what the problem was. **1:45am:** Vomit and urine on Montreal – Salisbury St corner (against Castrol's). **2:00am:** People noise from Revival clearly audible from residential area of Montreal and Conference St; too much for 2:00am. **2:15am:** Saw male urinating against office on Montreal – Salisbury corner. **2:29am:** Fresh urine north of The Bog and vomit across the street. No sign of Street Safe Security patrols. ***Photographic evidence #6 – 10***

Date + Time	Name + Address	Reported Incident
Report #11: Excerpt, Inspector's Report (J Davison, Alcohol License Inspector, Christchurch City Council) re license renewal, Crotalus Ltd/The Bog, 17 March 2015 *'The agencies have been working with the applicant for the last year. Intoxicated patrons were consistently identified at this premises from the opening night to the end of December 2014'...* [page 4].		
Report #12: Excerpts from Safer Christchurch CPTED 'Victoria St Precinct and Residential Area Improvement Report' (Sue Ramsay, April 2015); observations 22 March 2015, 1:00 – 2:45 am *'A police car observed travelling at low speed following a group of four from Montreal into Conference Street....laughing and calling to each other; may have created disturbance to neighbours'* [p 6]. *'The manager of security staff at Revival / Tequila Mockingbird commented that most problems they experience with violence and disorder occurred in the through block alleyway to the north of the bars. He said fights and arguments happened there on occasions and people urinated there frequently'* [p 7]. (Note: Access connects Victoria and Montreal Streets, directly across from residential area, mentioned elsewhere in this Log). **Photographic evidence #11 – 13** *'Signs of urination were noted in several public places and vomit was observed in the recessed entrance to the Casino on Durham Street'* [p 12]. **Photographic evidence # 14 – 15** *'Overall activity levels* [on the nights observations carried out] *were lower than expected. A doorman at The Bog commented that this was the quietest night of the year'* [p 5].		
27/3/15 3:05am	Peacock St	Reported very loud male voices on Montreal – Peacock corner. Continued for quite some time so unable to get back to sleep until 6:00am. *Cannot confirm they had been drinking, but at 3:00am in this area, that is the most likely scenario.*
28/3/15 unrecorded time but was after 1:00am	Montreal St	Taxi pulled up in front of More FM on Montreal St; male passenger got out drinking from beer bottle and started arguing with someone on street (very loud and aggressive and was there for some time). No sign of Street Safe patrols.
Report #13: Excerpt from objection from the NZ Police (Jon Harris, Alcohol Harm Prevention) re license application for Casino Bar Ltd/Calendar Girls, 9 April 2015 *'The draft of the Christchurch Local Alcohol Policy (LAP) considered a significant quantity of material from local residents. The residents in the Victoria Street area were particularly well represented. After lengthy consultation, the draft LAP established that 1 am is an acceptable closing time for licensed premises. Unfortunately, the LAP has not been implemented. In the interim, Police cannot support a closure time later than the other licensed premises in the immediate area'* [para 1.3]. *'Regardless of whether or not that situation materialises* [being allowed to trade until 7 am], *Police are concerned that after 4 am, the night life of the city will focus on the single area containing the Casino and the applicant's proposed business. With the increase in patronage will come the inevitable increase in levels of noise, nuisance and vandalism. One might argue that it will be easier to Police to deal with such matters if they are combined in one area—this may well be true. It will be of cold comfort to those residents in the immediate area however. An increased Police presence will ironically contribute to increased levels of noise'* [para 1.5.1].		

Date + Time	Name + Address	Reported Incident
16/4/15 Christchurch City Council meeting	Operations Manager Anglican Living [Bishopspark] *No longer employed there*	Sufficiently concerned re disturbances on Bishopspark premises and the negative effects on residents to attend a City Council meeting and present reasons why the LAP needs to be publicly notified as soon as possible. *11 residents attended, all planning to speak. Mayor ruled no discussion of LAP allowed because of current deliberations undertaken by the Council.*
21/4/15 Summary report of occurrences on Victoria St	Montreal St	Reported regular occurrence of very noisy groups of 5 – 6 drinking on top of MORE FM building, climbing down and walking through accessway to Victoria St (presumably to bars), then returning to roof. No sign of Street Safe patrols for many months, so no action taken. ***Photographic evidence #16 and 17***

Photo #5 6/3/15 at 11:15pm

Photos #14 and 15 April 2015 report, as observed by CPTED team

View of recessed entrance to the Casino, Durham Street: Vomit and urine

View of accessway connecting Montreal and Victoria Streets: Fresh urine

Date + Time	Name + Address	Reported Incident
25/4/15 6:55pm	Gracefield Ave	5 young men parked on Conference St, walked through accessway drinking beer; into either Revival or Tequila, could not see which one.
8/5/15 PO21133506 Constable Harland	Family on Salisbury St	Police contacted after busload of about 20 youths were dropped off in front of house for 10 – 15 minutes talking loudly, urinating, leaning on parked cars/fences, chanting, throwing broken bottles etc. Daughter very distraught. On Victoria St when police arrived.
9/5/15 Midnight + later	Montreal St [temporary residence]	*'Couple arguing loudly on pavement under bedroom window, one in car, the other on footpath, yelling.* 'F..you, I'm not giving you drugs'. *Saw me looking out window and drove off [man continued walking up street].* *Twenty minutes later, single male screamed repeatedly* 'F… you, I am going to kill you'. *Heard him from several hundred metres coming north on Montreal St from Victoria St direction. Went past my window screaming as if he was demented and then I heard crashing and breaking—too scared to go and look. Next day, saw fence two doors along was broken, the wire fence around a building site had been pushed over and Peacock St street sign pulled out of the ground. Ever since then, I have felt a bit nervous going out at night on my own.'*
Castrol's Garage opens as bar with live band, 88 Victoria St [11:00pm] *Closed mid 2016*		
28 May 2015: The new City Council unanimously agrees to publicly notify the Provisional LAP (adopted by previous Council in October 2013); now open to appeals		
7 July 2015: Appeals against the Provisional Local Alcohol Policy close		
Early July 2015 [reported 20/8/15)	Montreal St	Reported Charlie's party bus and another company have been dropping passengers off behind Revival / Tequila Mockingbird since at least Christmas. In July, he heard passengers getting out—very noisy and looked drunk—saw them walk through accessway to Victoria St. Approached driver who said Tequila owner invited them to park there and bring passengers in. Richard talked w/ owner, who said he would tell them to stop, but please not to report this to anyone. ***Note:*** *Darren Tait (Casino manager) confirmed months ago that the Accord informed party bus operators no passengers would be admitted to bars.*

Date + Time	Name + Address	Reported Incident

Photos # 16 and 17 21/4/15

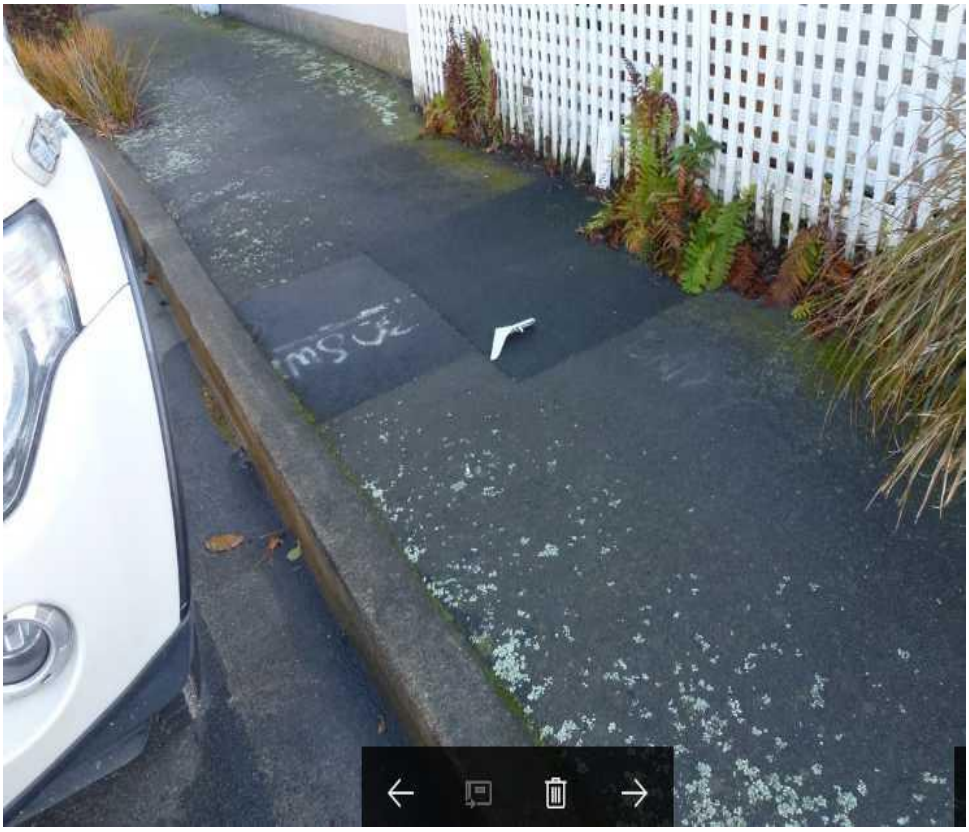

Former MORE FM building facing Victoria St and backing onto Montreal St (close to Revival Bar (now The Little Neighbourhood) and Tequila Mockingbird (now Chopped): Numerous sightings of noisy groups climbing up to the rooftop to drink, throwing empty bottles/cans into accessway or parking area and then walking through the adjacent accessway (presumably to one of the bars) before returning to the roof. Did not occur prior to opening of bars after the earthquakes. ***Also referred to in CPTED report (April 2015)***

Date + Time	Name + Address	Reported Incident
17/7/15 From midnight on	Montreal St	Large number of people walking by, talking loudly, getting into cars and slamming doors. Woke up several times and could not get back to sleep. *See note below*
Email and telephone correspondence (June – July 2015): Follow-up with Anthony O'Donnell (Orion property department) re reasons for not re-opening the pedestrian pathway (alongside the Orion electrical substation and connecting Montreal St to Victoria St), which had been used for many years prior to the earthquakes with no problems. Reasons for closing off the pathway included *'operational problems with graffiti, vandalism and prostitution activity'*, which were '*observed as threats'.*		
24/7/15 Police # 150731/9296	Montreal St	Very noisy—woke up 4 – 5 times throughout the night. Discovered broken car mirror next morning, not happened before. *See note below* ***Photographic evidence #18***
25 – 26/7/2015	416 Montreal St	Also particularly noisy, with people walking by, talking loudly, slamming car doors etc. Woke up several times so could not get back to sleep. *See note below*
Note from the VNA re entries from 17/7/16, 24/7/16 and 25/7/16: *Without getting out of bed and going outside to talk with the offenders (not a wise thing to do at this hour), it is not possible to confirm they had been drinking or where they had been drinking.* *The pattern of evidence is such that they were most likely returning from drinking at one of the nearby bars at the northern end of Victoria Street, having parked on Montreal or Beveridge Street.*		
Reported 9/8/15	Durham St	Reported regular sightings of party buses dropping passengers by former Women's Hospital. Could hear noise from bedroom (often midnight or later). Found signs of urinating and broken bottles next morning. Watched once and saw them turn onto Conference St towards Victoria St. Last sighting 4 – 5 weeks ago. Also reported party buses off Bealey Ave near Peacock—passengers walking up Durham St.
Report #14: Excerpts from article in *The Press* ('A night on the town....crime is picking up'), Myles Hume, 22 August 2015, page A7 *'Further north on Victoria Street, the heart of Christchurch's post-quake social scene—a 44-year old man is arrested by another policing unit for disorder. He was groping patrons and soon found himself at the centre of a scuffle outside The Bog Irish Bar & Pub.'* *'The computer modelling* [of police-generated crime and crash reports] *shows the number of police call outs on Victoria and St Asaph Streets has risen every year since the quakes'.* *'Police have endorsed the CCC decision to push ahead with Local Alcohol Policy, describing it as potentially the single-biggest crime prevention tool of a generation'.*		
Reported 2/9/15	Temporary resident Peterborough St	Reported that 4 - 5 weeks ago party buses were regularly parked in front of Salvation Army office on Peterborough St, letting off 20 – 30 passengers. Often appeared to have been drinking—very loud, usually urinated on street or against wall of her/others' properties and then walked off towards Victoria St.

Date + Time	Name + Address	Reported Incident

Photo #18: Montreal Street, 24/7/15

Broken mirror on footpath side of car after a particularly noisy night

9 September 2015: Notice from Alcohol Accord re mobile phone for residents to ring if problems (suggested by a resident at Residents + Business Forum 10 months earlier)		
18/9/15 [email, with follow up phone conversation on 20/9/15]	Montreal St	Noise from Castrols Garage Bar *'becoming unbearable'* (going on since it opened, but this was one of the worst). Contacted Noise Control multiple times—said they talked w/ owner after one complaint, but the situation has not improved.
9/10/15 2:00 am	Conference St	Sun umbrella (presumably from a Victoria St bar) set on fire by someone walking by; caught boundary hedge on fire. Heard someone yell, then run away; neighbour rang Fire Brigade. Plants also pulled out on neighbours' section.

Report #15: Excerpts from Decision No. 60B [2015] 2640 (P R Rogers, Christchurch District Licensing Committee) re license application for Casino Bar Ltd / Calendar Girls, Aaron Greenwood Director / Vicki Samson shareholder, 10 November 2015

'The Committee now needs to turn its mind to section 105(h) of the Act in relation the amenity and good order of the locality. A great deal of well thought out and considered evidence was produced by the Objectors in relation to what they saw as a reduction of the amenity and good order of the

Date + Time	Name + Address	Reported Incident
locality. It was difficult for them as this is a new business in Victoria Street, to establish what the amenity and good order issues would be in the future with the addition of this licensed premise.....' [para 75). *'The evidence of the Objectors concerning vandalism, noise and other issues in the area was well documented and presented. Unfortunately it was not specific for the premises in question particularly as this was going to be a new business in Victoria Street. For this reason we did not find that we could lay any reduction of the amenity and good order of the locality at the door of CG' [para 77].* **DLC decision appealed by Police, Licensing Inspector, Medical Officer of Health, VNA and other residents (decision re hours upheld; some new conditions)**		
4/12/15 12:30am	Flat on Peacock St	Reported seeing three obviously drunk people dismantling Peacock St sign, leaving it lying in middle of road. No sign of Street Safe patrols.
5/12/15 3:30 am	Townhouse on Peacock St	Reported two incidents of males shouting loudly for several minutes on Montreal St corner and heading to Bealey Avenue. Was sufficient to wake her up from deep sleep.

Entries from 2016

Date + Time	Name + Address	Reported Incident
5/1/16	Townhouse, Peacock St	Found large deposit of vomit on driveway.
10/1/16 2:00 am	Cranmer Square	Very loud noise and shouting from The Bog, clearly audible across Cranmer Square and inside double-glazed townhouse. Police intervention required. Ruling: EXCESSIVE with 'stern warning' **Attachment 3**
Report #16: Evidence in Chief (James Murdoch for Papanui Road Lts / The Carlton), Christchurch Replacement District Plan Hearings, 14 January 2016 *'It* [The Carlton] *is also functionally connected to* Victoria Street. *Our customers will often leave The Carlton and visit other bars and restaurants on Victoria Street, or, alternatively, will visit us after being at other bars and restaurants on Victoria Street.'* [Included in the Log as corroboration of residents' observations of migration from one bar to another, often going through the residential area].		
23/1/16 1:35 am	Cranmer Square	Loud noise from The Bog, clearly audible across Cranmer Square. Contacted Inspections + Enforcement Unit. Ruling: EXCESSIVE (abatement notice in place for 72 hours) **Attachment 3**
24/1/16 Mid-morning	Family on Beveridge St	Walking south on Montreal between Beveridge and Clock Tower had to negotiate four piles of vomit only partially cleaned up.
31/1/16 12:30 am	Beveridge St	Lots of shouting on Montreal – Beveridge St; found broken glass on corner the next morning
20/2/16	Montreal Street	Large splattering of vomit outside private residence

Date + Time	Name + Address	Reported Incident
1:30 pm	behind licensed premises	at 406 Montreal Street; bottles / cans and other rubbish on Montreal Street; other rubbish + beer bottles in access way between Montreal and Victoria Streets. ***Photographic evidence #19***
21/2/16	Montreal Street behind licensed premises	Signs of pre-/side-loading in corner of former More FM building by accessway. Given this is in immediate vicinity of several bars open to 3:00am, it is likely the two are related. ***Photographic evidence #20 + 21***
28/2/16 7:20 – 8:00 am	*Sighted by a resident all along Montreal + Victoria St	Evidence of pre/side-loading on Montreal and Victoria Streets, primarily around Revival / Tequila Mockingbird area and The Bog (empty beer cans / spirit bottles). ***Photographic evidence #22 + 23***

Photo #30 17/4/16, sighted at 11:15am

Victoria Street: Example of vomit and (one of the) bottles on footpath and in gutters (not cleaned up by mid-day)

Date + Time	Name + Address	Reported Incident
23/4/16 2:00am	Flat on Peacock St	Woken up at 2:00 am by four males standing on Peacock/Montreal St corner, yelling out for a long time. Went onto veranda and yelled at them to stop. Obvious they had been drinking.
23/4/16 2:00 am onwards	Montreal St	Very noisy night—was woken up twice from 2:00 am onwards by loud voices and yelling out. *See note re 21/2/16 entry, above*
24/4/16 Morning	*Sighted by residents on walk into city	Several lots of vomit on Victoria and Kilmore Streets and Cranmer Square (residential area) ***Photographic evidence #31 and 32***
1/5/16 2:35 – 3:35 am	Peacock St *Shifted 2016*	Constant disturbances early Sunday morning, with at least three very noisy groups on Montreal St, as well as noise from cars parked on Peacock St when driving off (doors slamming, cars revving). Could not see them long enough to determine if they were intoxicated, but at this hour and in this location, it is logical to presume they had been at one of the nearby bars.
1/5/16 12:45 – 12:55 am	Beveridge St	*'Quite a disturbance last night on Montreal Street—a lot of very loud shouting, real top of the lungs stuff.* *As far as I could see, a group of half-dozen young guys were walking along being jerks, rather aggressive. They eventually moved away, still being noisy.'*
10/5/16: First PLAP appeals hearing timetable (hearing date 3 October 2016) **11/5/16: Mediation meeting held re on-license appeals**		
15/5/16 3:50 am	Montreal St	Woken up by five slow moving males walking north on Montreal St, talking/yelling loudly. *See note re 21/2/16*
15/5/16 Starting 1:30 am	Peacock St	Loud music, yelling coming from Victoria Street. Had to close bedroom window, but could still hear the noise up to 2:30 am.
19/5/16	Consultation meeting with CCC re changes to Victoria St [attended by several resident]	Several business owners talked about problems on weekends because of *'the mess we have to clean up and having to lock gates now'.* Mentioned by reps from Palazzo Kitchens, Jane Daniels and one other (Palazzo no longer opens on Sundays because of this).
The pattern of disturbances on the same nights, illustrated above, indicates the situation has not improved, despite the Alcohol Accord and licensed premises opening elsewhere in city.		

Date + Time	Name + Address	Reported Incident

Photos #31 and 32 24/4/16, sighted in the morning

Kilmore Street – Cranmer Square corner:
Vomit on in front of a residence, currently unoccupied

Also on Cranmer Square: More vomit

Date + Time	Name + Address	Reported Incident
Report #17: Excerpts from Decision No. 60C [2016] 1212, R J Wilson, District Licensing Committee, re license renewal, Caliente Kitchens Ltd / Tequila Mockingbird 26 May 2016 (hearings held 27 – 28 November 2014 and 2 March 2016) *'The behaviour complained of by the objectors is exceedingly well documented in the full and detailed submissions of the Victoria Neighbourhood Association. I commend the Association on the quality of its research and presentation. Nothing much is served in the context of the present decision by repeating in detail what the Association has so graphically described.* *Nevertheless for the record I note that vomiting, public urination, noise and vandalism seem to have become the norm on the streets in this area at night particularly at the weekends. I have no doubt that amenity and good order of the locality has been reduced, to more than a minor extent, as a consequence of the issue of licenses collectively....'* [para 8]. '*The District Licensing Committee has taken the view that it does not wish to disadvantage any particular establishment by reducing its trading hours just because its license has come up for renewal when neighbouring premises could continue to be open later.* *It hoped that the Local Alcohol Policy might resolve the situation by stipulating hours that would apply to all. Unfortunately Christchurch still does not have a Local Alcohol Policy and applications for renewal such as this one are now long overdue to be decided'* [para 6]. *'As noted above, all objections have now either been withdrawn or are considered to have lapsed. Nevertheless the concerns raised have not been resolved....The Victoria Neighbourhood Association for its part is in the meantime concentrating on attempting to influence the drawn out process towards a Local Alcohol Policy. The promulgation of such a Policy may, as already observed, do much towards improving the situation for local residents as well as providing some certainty for hospitality operators'* [para 9].		
2/7 – 3/7 2016 11:30 pm – 4:00 am	Montreal St	Four incidents re groups of rowdy people, starting at 11:30 pm and at hour intervals. Once woken up, could not get back to sleep. Included four males parked outside the house who drove off about 3:30am, after two used the next door property (1 Beveridge St) as a urinal.
14/7/16: Second PLAP appeals timetable (hearing date still 3 October 2016)		
22/7/16 About 8:00 am	Young Hunter Lawyers 134 Victoria St	Resident observed a man in a suit coming out of Young Hunter Lawyers office, with a dish brush and bowl of water, to clean up vomit that was right in their entrance way.
12/8/16 Time not recorded	Security Manager, ChCh Casino	Charlie's Party Bus seen dropping off patrons at Peterborough / Durham St corner Friday night. '*As you may be aware the Victoria St businesses all agreed we do not want party buses in our area as the patrons tend to be heavily intoxicated.* *In this instance the patrons debarked from the bus and proceeded to urinate on the surrounding buildings as well as on the Casino car park'.*
18 August 2016: Preliminary PLAP hearing re appeals and notice to amend LAP		
9/10/16 1:30 am	Durham St	Heard loud, slurred talking coming from Durham St which woke him up (noted it was a male and female who appeared quite drunk).

Date + Time	Name + Address	Reported Incident
26 October 2016: Christchurch City Council resubmits the Provisional LAP to the Alcohol Regulatory and Licensing Authority (with amendments from 5/16 mediation)[3]		
November 2016: Victoria Street Safe patrols no longer operating as per decision made by owners of licensed premises		
9 November 2016: Christchurch City Council, Medical Officer of Health, NZ Police, Canterbury DHB, the VNA, Dave Kelly and Robert Manthei file Joint Memorandum to ARLA, confirming appeals against the amended PLAP will not be made.		
2 December 2016: Third PLAP appeals timetable (hearing date *'as soon as possible after 15 May 2017'*)		
6/12/16 Letter of support	Director, Anglican Living [Bishopspark Retirement Village]	Letter of support received, stating that, *'Prior to 2011 the number of licensed premises in the neighbouring Victoria Street area was small, and associated mainly with restaurants'* and that *'Anglican Living supports a limitation on any increase in the number of licensed premises in Victoria Street, and a limitation on the operating hours of licensed premises, i.e. no later than 1pm.* **Attachment 4, letter**
17/12/16 2:24 am	Family on Beveridge St	Emailed re loud music and shouting audible from their house half-way down Beveridge St, waking them up. *'Cannot work out where it is coming from. Tried ringing Police but could not get a connection.'* [Noise later confirmed by a resident on Montreal St from 11:00 pm onwards on same night and two other residents (see below).
17/12/16 2:50 am	Conference St	Reported very loud voices and thumping bass coming from direction of Victoria Street.
17/12/16 Time not noted	Another resident on Conference St	Reported loud music coming from Victoria Street early on Saturday morning.

Postscript re 2017 Entries

The VNA stopped collating incidents at the end of 2016 on the understanding that the Provisional LAP hearing was to be held early in 2017. Some residents continued to report disturbances, so with further delays to the filing and hearing dates, we reopened the Log. By the time the hearing is held, the Log will be incomplete. We will provide details of additional incidents at the hearing if requested.

. Date + Time	Name + Address	Reported Incident
17/1/17 3:00am	Conference St	Woken up by group who obviously had been drinking *[not the first time, but have not been reporting to the VNA for inclusion in the Log]*

[3] Includes the splitting of Victoria Street at Salisbury Street, a three-year transition period for licensed premises north of Salisbury to cease trading by 1:00am and the inclusion of The Carlton as part of the Precinct.

. Date + Time	Name + Address	Reported Incident
Sometime in Jan or Feb 2017 about 3:00am	New residents on Gracefield Ave	Reported a very drunk male entered their fenced front patio and started banging on the glass sliding doors. Was yelling 'Let me in' very loudly. Woke everyone up, frightening the two young children.
23/2/17 3:04 – 3:18 am and 15/4/17	Family on Beveridge St	**3:04 am**: Woken up by 4 people talking and laughing as they walked to their car from direction of Montreal St. One inebriated male urinated on neighbour's wall. **3:12 am**: After getting back into bed, heard 3 others (looked in early 20s) walking up the street from Montreal St, immediately followed by 2 females and another male—chatting and laughing noisily as they approached Durham St. Were clearly intoxicated as well. **3:18 am**: After getting back in bed again, heard several loud male voices from Montreal St—faded into the distance after what sounded like a disagreement. Sounded like they had been drinking [Did not get up again to have a look] **Postscript:** Described problem re Little Neighbourhood bar: *'Is catering for smokers sitting outside, with extremely loud music played to them.* *As soon as I see the sun out and a dry evening ahead, I prepare for a disruptive night.'*
19/3/17	Montreal St	Rang VNA coordinator to talk about ongoing problems from Victoria Street. *'The noise and stuff going on is getting completely out of hand. Something needs to be done—it's getting worse and worse'.* Confirmed main problem is loud music from The Little Neighbourhood bar.
Chopped bar and restaurant open, 98 Victoria St [1:00am] **Calendar Girls applies for extended hours, 63 Victoria St [from 3:00am to 4:00am]** **Sister Kong applies for license, 123 Victoria St [1:00am]**		
14 March 2017: Fourth PLAP appeals timetable (hearing date to be advised)		
April 2017: Louis/Red Light District applies for license [1:00am / 3:00am] *Red Light District agreed to pull back to 1:00am until PLAP appeals heard* **Rockstar Pizza opens, 98 Victoria St [3:00am]** *Previously Chinwag* **The Carlton's previous application for extended hours being considered [from 2:00am to 3:00am]**		
7/4/17 [re previous 4 – 6 weeks]	6 Beveridge St	Have noticed an increase in noise on Montreal St on Friday and Saturday nights. One example occurred on 7/4/17, when my son was trying to get to sleep (about 11:15pm). Heard a lot of noise and decided to investigate.

. Date + Time	Name + Address	Reported Incident
		Observed the following: Group of 6-7 young men and women, apparently parked on Montreal St and were moving down the footpath towards Victoria St (slowly, with lots of shouting); Appeared inebriated from the noise, rowdy comments, etc. Watched until they got to Montreal – Salisbury corner, when one male lay down on the footpath and began shouting; Others milling around; equally noisy. At this point they noticed I was watching so I headed back home. Although still relatively early, it was obvious that excessive drinking had already taken place.
16/4/17 1:30am	Peacock St	Very loud group on Peacock St; looked out, saw them throwing road cones onto other properties (eg over the wall at 21B Peacock, hitting hard against the garage). Smashed one cone against her own car, shattering the windscreen. From their behaviour, was clear they had been drinking to excess.
18 April 2017: Fifth amended PLAP appeals timetable (hearing date to be advised)		
29/4/17 Around noon (for half-hour)	Montreal Street and adjoining residential streets	Resident collected empty liquor/beer cans and bottles from the top end of Conference and Beveridge Streets (adjoining Montreal) and the connecting accessway to Victoria St. Given proximity to the bars, most likely scenario is pre- and side-loading associated with late night drinking. ***Photographic evidence #33***
7/5/17	New resident on Gracefield Ave	Children found fresh vomit on footpath in front of their house (close to Durham St corner); also seen by another neighbour the next day.
8/5/17	Montreal Street, between Salisbury and Beveridge Streets	As above, empty alcohol / beer cans and bottles in the immediate area suggest ongoing pre- and side-loading taking place close to the licensed premises. ***Photographic evidence #34***
14/6/17 + 15/6/17	Family on Beveridge St	Reported that it had been quiet for awhile, probably due to cold and rainy weather, but that these last two nights were *'on the trot again, just after 3am.'*
16/6/17 + 18/6/17 9:45pm + 8:00am	Peacock St	While walking home on her own, saw fresh vomit across the footpath just past Aroy Thai restaurant (across from The Bog). Two men and 1 woman who appeared drunk were having loud argument, so she crossed the street to avoid them. Bouncers at The Bog were blocking the footpath and she had to ask them to let her pass. On Sunday morning, she saw at least 27 cans and bottles in the gutters on Victoria St.

. Date + Time	Name + Address	Reported Incident
3/9/17 2:50am	Montreal St	Rock thrown at the house resulting in a broken window in the spare bedroom. The police have been notified. Glass breaking woke me up, but with the spare bedroom door shut I assumed it was outside on the street, especially as a car pulled out about the same time on Beveridge Street. The next day, we realised it was a rock. Unfortunately fingerprints can't be got off rocks…. Later: Discovered that the rock is from the front garden at 408 Montreal St (cottage owned by couple who live out of town and seldom in ChCh). Will ask Brett Giddens if the security camera at Little Neighbourhood captured anything. ***Photographic evidence #35 – 36***
16/9/17 Ongoing until 2:30 am	Montreal St	Noisy music from one of the bars until 2:30 am Sat morning. Was home alone, so did not go outside to investigate (especially after incident on 3/9/17—see above).
27/10/17	Beveridge St	Some time after 11:00pm, a group of intoxicated young people arrived at (home of Victoria St bar operator, who lives nearby) and tried to get the multi-seat 'beer bicycle' ready to use, *'making a lot of noise (shouting etc) for maybe 20 minutes.'* Emailed owner about this, stating that *'I have no problem with you storing a bar accessory at your house. I have no problem with the bar using a bicycle for people to have fun on. But it is quite disruptive if the bar accessory is going to be operated from our house in a residential area late at night.'* Owner was overseas, replied immediately, apologising for the disturbance, confirming that he had been informed of this in the nightly shift report from his staff. The 'beer bicycle' was being stored at his house temporarily and was not intended to be used. *'This is unacceptable to me and I am very embarrassed about it. I will send a message through to the* [bike] *owner shortly to remove the bike as I do not want the issue to occur again.'*
27/10/17	Montreal St	[responding to email discussion between the above]: *'Yes it was chaos, there were a few of us neighbours out of our homes; one logged a call with the police and one saw some of the girls urinating in the street and in our shared driveway.'*
28/10/17 3:26 am	Montreal St	[continuation of email discussion, above], describing being woken up at 3:26am '*by half dozen people standing in the middle of the street, waiting for* [staff member at nearby bar] *to turn up to let them into your house. They left at 4:17am in Ubers.'*

Date + Time	Name + Address	Reported Incident
22 March 2017: High Court hearing (Hospitality NZ, Canterbury branch vs CCC) **21 June 2017: Notice from Alcohol Regulatory & Licensing Authority, confirming High Court ruled in favour of Hospitality NZ; PLAP appeal therefore delayed until further notice** **31 July 2017: ARLA confirmed no further consideration of PLAP '*until such time as the High Court has issued their decision…we will not hear the PLAP this year.'***		
High Court decision issued: '*The Christchurch City Council did not give sufficient regard to the Replacement District Plan'* when developing the PLAP **23 November 2017: CCC agreed to discontinue the current PLAP process, including '*disestablishing the PLAP Appeals Working Party.'***		
Note that the VNA had filed the required evidence for the ARLA hearing before the decision was made not to proceed with that hearing. The Log of Incidents formed the basis for the evidence, which was never heard.

Photos #33 and 34

Empty liquor / beer bottles and cans collected on 29/4/17 (around noon) from top end of two residential streets adjoining Montreal Street and from the accessway connecting Montreal to Victoria Street.

Empty alcohol and beer bottles collected from Montreal Street (between Salisbury and Beveridge Streets), Monday morning 8/5/17.

Photos #35 and 36

Broken window on Montreal St, caused by rock thrown at 2:50am, 3/9/17

The rock (later discovered taken from another property on Montreal St

Attachment 3: Noise complaints record: 50 Victoria Street, The Bog

noise	date	time	on site time	assessment & action
MUSIC/BASS	6/03/2014	9:11:00 pm	9:37:00 pm	Not excessive *Bar opening night.*
MUSIC/BASS	17/03/2014	8:41:00 pm	9:06:00 pm	Excessive/other. *Police on site. Volume of sound system reduced & doors closed. Both sets of doors were open.*
CROWD NOISE	12/10/2014	10:55:00 pm	10:55:00 pm	Log only. *Caller spoke to Duty Manager & noise was reduced.*
Music/Shouting	10/01/2016	1:52:00 am	1:58:00 am	Excessive/other. *Police on site. Manager given stern warning. Police & Noise Control told him to lower volume of sound system.*
Music/Bass	23/01/2016	01:35:00 am	01:55:00 am	Excessive. *Excessive Noise Direction (END) served on Duty Manager. Noise to be immediately reduced and kept that way or enforcement action will follow. END in force for a period of 72 hours.*

As at 25/01/2016

Attachment 4: Letter re Bishopspark Retirement Village

6 December 2016

To Whom it may Concern

Re the Provisional Local Alcohol Policy – Victoria Street

1. The Social Service Council of the Diocese of Christchurch (known as Anglican Care) owns and operates Bishopspark Retirement Village which has entrances at 24 Dorset Street, 100 Park Terrace, and via Westwood Terrace (off Salisbury Street).
2. Bishopspark Retirement Village was established in 1984 and is operated by Anglican Living, a division of Anglican Care.
3. It is home to approximately 70-75 elderly people at any one time as follows:
   - 29 bed rest home in Molly Pyatt House providing care for very frail elderly residents who require assistance;
   - 9 studio units, also in Molly Pyatt House providing assisted living;
   - 32 cottages/apartments where residents between the ages of 69-96 live reasonably independently.
4. Prior to 2011 the number of licensed premises in the neighbouring Victoria Street area was small, and associated mainly with restaurants.
5. While there have been no recent complaints, that has not always been the case since the earthquakes.
6. Anglican Living and the residents and staff of Bishopspark Retirement Village support a closing time for licensed premises, of 1am so that elderly residents can have 'quiet enjoyment' of their homes in their final years – as is their right.
7. Anglican Living is particularly concerned that when the site on the corner of Victoria St and Dorset St is (previously operated as Spagalimis) is repaired/ replaced anti-social behaviour as experienced in the past on our site, will occur once again, especially if licensed premises are permitted to operate beyond 1am.
8. **For these reasons, Anglican Living supports a limitation on any increase in the number of licensed premises in Victoria Street, and a limitation on the operating hours of licensed premises, i.e. no later than 1pm.**

Alison Jephson
Director, Anglican Living

38 Guild Street, Richmond | PO Box 26146, Christchurch, 8148

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like the proposed changes because it allows smaller venues and venues around the wider central city to operate as the need to. Specifically venues like Space Academy & The Darkroom have created spaces for musicians and music enthusiasts. They have created a welcoming environment which is being talked about over the wider community. Not allowing the noise changes would create a stagnant city that won't be able to grow it's nightlife - which is desparately needed for our hospitality venues and also to be seen as a modern city by tourists too.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I like the changes

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Having spent nearly $1,000,000,000 on projects such as the stadium, we must ensure these get the use they deserve and generate revenue for our city. The CBD is the heart of Christchurch and the entertainment hub. Live music venues have struggled with noise limits, this cannot continue.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Having 45dB limit areas next to 65dB areas seems a little odd

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

The plan does not appear special audible characteristics such as those discussed in environmental noise standards NZS6801 and 6802:2008 (tonality, impulsive noise etc.). Unsure if CCC require these to be monitored under the new plan

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

This is a fantastic idea and will hopefully help preserving live music venues and night life in Christchurch. It is unfair that residents who have bought or rented new accommodation near venues which have existed for many years without any problems have been able to make complaints.

It is also successful in starting to apply reverse sensitivity provisions which should have already been considered for new development in the city centre.

It is good that the responsibility for mitigating noise, which is a fact of life for city centre living, is being put more on developers and builders who are benefiting most from this type of construction.

It also provides certainty to buyers and residents that new housing close to noise will consider this and be built to ensure effects are mitigated.

Multi Choice: Somewhat

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: Yes, have louder music. Can't have a concert with limit on sound and time it goes on till.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Most of them

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: Why have a limit when in town. Town was there first. Have the loud music, that's what town centres are for.

Houses are being built everywhere. Only person making any money is the developers. Why should the bars/restaurants/etc all be penalised because of developers making money ?

Q18 **What don't you like about the proposed plan change and why?**

Long Text: Stop letting developers develop and make money.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It’s not inclusive for creative and social events being held in the inner city. Gives some life to the central city that has recently been snuffed out.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I think any and all change is a step forward seeing as so many venues have had to stop live music events in recent years and this proposed change would allow venues to start doing it again, Christchurch is aching for its venues and nightlife back.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

No

Short Text

Q13 **Do you think we've got the category locations right?**

Multi Choice

No

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

The planned areas do not cover all areas where live music and nightlife are active or planned. Hagley Park is home to large festivals and events, there should be a higher allowed sound limit in all surrounding areas as Hagley is the centre of the city.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Protect existing venues under “Agent of Change” - New residential developments must take responsibility for soundproofing when they locate near established music venues. Without this, noise complaints from new apartments could threaten long-standing venues

Align noise limits with city centre expectations - Surveys show strong local support—90 % of businesses and 71 % of central city residents accept higher noise levels as part of a vibrant core. Noise limits should reflect this reality, not suburban peace-and-quiet standards. The accepted levels of noise that have been include in this Plan Change are too low for a vibrant night life.

Support live music and festivals - Venues, concerts, and festivals are essential to Christchurch’s central city revival.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Yes, I do have concerns that haven't been fully addressed in this Plan Change. While it’s encouraging to see some progress, the lack of clear adoption of the Agent of Change principle is a major issue — existing venues and event spaces remain vulnerable to complaints from new residential developments, which could limit the vibrancy the city is trying to promote. The proposed noise limits, while a step in the right direction, still feel overly conservative for a city centre and may discourage live music, festivals, and one-off events. There also appears to be a lack of clarity around how noise will be measured and enforced, which could lead to inconsistent application of the rules and uncertainty for businesses. More fundamentally, the plan seems to prioritise residential quiet over the kind of energetic, mixed-use environment that successful city centres need. If Christchurch is serious about supporting a thriving arts, music, and hospitality scene, the rules need to go further to explicitly protect and enable that vision. The majority of Christchurch's suburbs provide a quiet place to live if people are offended by live music and events which help

establish New Zealand's second biggest city as a desirable place to live.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

The change to include the stadium and established music venues. A 5db change is better than nothing.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The 65db LAeq is not enough level for any kind of event at the stadium and does not suffice even outdoor establishments. A quick search on google can reveal that 65dbA is quite quiet.
For example a normal conversation can range from 60-70dbA, a vacuum cleaner can be 75dbA and most notable traffic is typically 85dbA. So technically by the status quo and the proposed change it is breaking noise limits to drive down the streets? It is also breaching noise limits by speaking too loudly? It seems unreasonable to have such a low level surrounding a stadium which has cost over 600 million dollars when majority of concerts require levels of 100dbA and sports can be very similar. It begs the question of why bother hosting anything at the stadium if the 30,000 people in there can shout no louder than a normal conversation? Though I am unsure of the stadiums noise isolation I am concerned that the isolation will not be enough to meet the 65dbLAeq Limit.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Has any research been done into how Dunedin deals with their stadium noise and rules surrounding it?

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Don't know / not sure

Q17 **What do you like about the proposed plan change and why?**

Long Text

It will make it much easier for businesses and venues across the city to host events and operate smoothly and frequently. This in turn gives us citizens more freedom and options on how to enjoy ourselves within our city. As someone while lives south-east, I'm also pretty stoked to be very close-by to the areas with least restriction. Its also great to see that much of the city will be category 2, which is equivalent to the current category 1. More noise, more culture, more entertainment!

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Make the whole map a sea of orange (Category 1).

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Protect the city centre and the culture and vibrancy that it needs - to become an energetic and exciting place

The number of new builds is important but it shouldn’t impact on local business in the centre that have brought so much to the community.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Short Text: Most of the green area.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text:

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text: It's great, so many cities have major issues with new residential development closing well established venues. If anything I think you should extend category 1 so that any new development within the city makes sure it is well insulated. Unfortunately a lot of small fringe venues don't have a lot of money so the more freedom given the better. Let's be honest it's the developer that will cut costs and the new homeowners or renters which will pay the cost if the buildings are not properly built.

Q18 **What don't you like about the proposed plan change and why?**

Long Text:

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Don't know / not sure

Q17 **What do you like about the proposed plan change and why?**

Long Text

Needs to include music venues on Tuam street - which it looks like these have now been added in. Its always sad to hear that music venues feel like they are going to get shut down due to noise requirements. ecpecially good ones that really add to and create communities.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Pleae ensure these venues can hold music events without the fear of being shut down.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

want to see vibrant energy in the CBD — a booming nightlife and music scene, concerts, live performances, and theatres. Like the lively city centers in Europe, Asia, and elsewhere, I hope we can create that same buzz here and inspire people to embrace life in the heart of the city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I just worry that small venues will be given a hard time for not having the opportunity to live in the heart of the city.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

No. I’m the opposite I want noise in the central city,

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

We need to support central city music venues like DarkRoom and Space Academy. Music is so important to NZ that we have a whole month dedicated to it. We are still feeling the big hole left from the earthquakes. The fact that music venues have even managed to stay open after Covid as well, it's amazing. It shows how important these establishments are.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Q3 **Last Name**

Short Text: Carding

Q4 **Name of organisation/business**

Short Text:

Q13 **Do you think we've got the category locations right?**

Multi Choice: Somewhat

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: Hagley Park is a fantastic outdoor venue for large and loud events (think Electric Ave) which is pretty unique to Christchurch, and really puts our city on the map. No one lives in there. Why isn't it a higher category (Category 1)?

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: I agree that everywhere within the four avenues should be one of these higher noise limit categories. It would be ultimate NIMBY behaviour to go and live right in the middle of our CBD and expect silence.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text: I like that you are increasing noise limits generally throughout the CBD, and you have focussed the higher limit areas on the new stadium + existing nightlife areas. This provides certainty for those existing venue operators to invest in their venues, and for new spots to open up too. Thanks CCC for listening to residents and moving to do this, because positive change in the city doesn't happen by itself and business owners need your support to make things happen.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: I think the Category 1 should be at a limit that is loud enough for any stadium event, concert or nightclub to not have to restrict their loudness.
I don't understand how this plan change is presented, as a lay person and not a sound engineer. I have absolutely no idea what "65 dB when averaged over 15 minutes" means in practice. Is it your average rugby game? Is it a loud Coldplay concert? Is the 65dB measured at source or down the road?
I just Googled it and it says: "A 65 dB average sound level over 15 minutes could be associated with activities like a business office, normal conversation, or a quiet restaurant. The sound of a household refrigerator is also in this range." If anything I think the limit should be much higher?

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text So long as the noise limit in the main CBD areas that hosts bars & the new stadium remain / return to being high, that's my preference. When I heard a couple of years ago that Dux Central couldn't have late gigs anymore due to local residents complaining, I thought it was madness - the bar was there long before the new residential builds were put into place. There's already a lower night life that in other NZ cities, so to better Chch's nightlife bars need to be able to make noise, otherwise folk will just stay home!

Q18 **What don't you like about the proposed plan change and why?**

Long Text As above - So long as the noise limit in the main CBD areas that hosts bars & the new stadium remain / return to being high, that's my preference. Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think the noise limits should increase further! Christchurch has the most vibrant music scene in the entire country and is being crippled by restrictions, unlike any seen in any other major city in the world.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I like that it’s a step in the right direction

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

None other than I believe it should be louder.

Response No: 1002

Yes

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I agree with the proposed plan because it allows Christchurch nightlife to thrive and make our city more welcoming for events. Although there is a high amount of residential property going up in the central city, people need to be aware of the things that come with living in the city - eg sound noise and road noise. But I also think that measures should be taken to ensure soundproofing in all new homes in the area.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Nothing

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Multi Choice

Somewhat

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

I believe catagory 1 and 2 could have slightly higher noise limits than 65db, I propose 70-75db as that’s a greater musical and listening experience where live music is held, and we know how loud some stadiums can get

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Nope a I think a larger area for catagory 1 and 2 is required

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like that there is acknowledgement that the city thrives off its live music and something is being done to allow for louder events, I also believe that if you choose to live in a catagory 1 or 2 area that it’s your own decision and need to deal with that consequence

Q18 **What don't you like about the proposed plan change and why?**

Long Text

It’s really hard to regulate insulation in a way that stops sound leaking in spaces where people are constantly moving in and out of, maybe a little more understanding around that would be great

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

If Christchurch had access to a medical cannabis museum (like in Auckland) there would be less drinking violence and overall more peaceful events that can get loud and fun, the founder of the Whakamana Cannabis Museum lives in Christchurch atm, try get that going

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think Christchurch need a more vibrant nightlife, which in turn creates revenue for hospitality and artists.
I think currently the noise limits don't reflect the needs of a growing city, and prohibit cultural life from happening.
I like the fact that these proposed changes will bring life back to the city, and provide an alternative to binge drinking at home.

Q18 **What don't you like about the proposed plan change and why?**

Short Text No

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text I like the idea of allowing more hospitality and music venues to open in the city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text Initial thoughts...
- Prescribing noise insulation requirements instead of internal design noise levels typically leads to "Acceptable Solutions" which goes against the recent move away from that in the District Plan when addressing road traffic noise intrusion onto sensitive uses.
- Depending on the sensitive building design it may not be necessary for every element of a building facade to provide the same high level of noise insulation. So, if needing an acoustics specialist to help the proponent determine what they need in terms of construction build-up (assuming no acceptable solutions), why not get that specialist to just tell them which parts of the building need to provide what level of noise insulation? With the aim of providing an acceptable internal noise level, based on the allowable Category limit.
- IF going ahead with outside to inside performance requirements, need to be careful what noise descriptor you apply to the arbitrary numbers 30 and 35. Some District Plans which still have this older style approach make it very difficult for the proponents by applying a quite stringent descriptor which has a low frequency penalty component, such as in Porirua and Palmerston North.
I assume you have an acoustics specialist on board to help with the plan change, wonder if it might be worth having their advice peer reviewed along the way? Two heads and all that...

Q19 **Overall, do you support the proposed Plan Change?**

How are noisy emergency service vehicles such as ambulance, fire, Police along with other service vehicles such as rubbish trucks supposed to get through narrowed down streets that are blocked by traffic? Where are the cars supposed to go in order to make room? Imagine the chaos. It is only a matter of time before the death even of many trapped in a burning building will die because service vehicles will not be able to get there on time! That will make a noise! Is the CCC ready for that? It is atrocious!

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I fully support the proposed changes to allow higher night-time noise levels in parts of the central city. These updates are a practical step toward encouraging a more vibrant, dynamic nightlife and supporting events, hospitality, and entertainment businesses that help bring people into the city.

It's important that central Christchurch remains a destination – not just on Friday or Saturday nights, but throughout the week. Relaxing noise restrictions in appropriate areas will help enable this, without placing unreasonable limitations on businesses that rely on energy, music, and atmosphere to succeed.

Living in a city centre comes with certain expectations – noise being one of them. It's not reasonable to choose to live in an urban hub and expect suburban quiet. My mother lives in an apartment in the central city, and what she enjoys most is the hustle and bustle. If peace and quiet were the priority, the suburbs would be a better fit.

Overall, this approach strikes the right balance – encouraging growth and nightlife while still protecting genuinely noise-sensitive spaces. I hope these changes are adopted and that Christchurch continues to build on its identity as a lively, welcoming place to live and visit.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Nothing.

Q17 **What do you like about the proposed plan change and why?**

Long Text

It gives more freedom to night time venues. i welcome the higher noise limits wholeheartedly.

noise is a natural part of living in the city and the venues and entertainment businesses in chch deserve to be able to blast their music. people who go to bars and night time venues also deserve to enjoy LOUD music. i understand that not everyone is interested in nightlife, but that is what the suburbs are for. plenty of those to go around in chch.

coming from europe, i see that chch has very poor night life and i'm hoping this plan will be a step towards improvement. now, if only you could introduce night time buses and extend venue's and bar's open hours... :)

Q18 **What don't you like about the proposed plan change and why?**

Long Text

it's good, definitely an improvement. i think the decibel limit could be even higher in the category 1 areas...

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I support the proposed changes because they reflect a positive step toward fostering a more lively and dynamic Central City that makes Christchurch a more fun place to live and helps us move past the quake rebuild. I appreciate the emphasis on creating a more entertainment-friendly environment, which I believe is crucial for Christchurch's cultural vibrancy and economic development. The central city needs more entertainment venues, density and public transport links, instead of a bunch of Wilson's carparks everywhere.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

There is nothing in the proposed plan change that I actively oppose.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

My main concern is ensuring that future residential developments within or near designated entertainment zones are appropriately designed with adequate noise mitigation from the outset. It is critical that residents moving into the Central City understand and accept that a certain level of ambient noise is part of urban life in a vibrant area. This cultural and planning shift should be supported with clear information, building codes, and ongoing engagement.

Additionally, I encourage the Council to consider long-term monitoring and adaptive management strategies—so that if unforeseen issues emerge, they can be addressed without undermining the goal of supporting a vibrant nightlife and entertainment scene.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It is important to have realistic noise levels that enable us to get the full potential out of the stadium. I also think that if people are buying and/or building close too it then they are aware that there is likely to be increased noise sometimes (as they are close to the stadium). Having increased insulation requirements in these areas is also common sense.

In order to grow CHCH as an international destination and to also be part of the "growing up" of NZ culture it needs to be understood that the centre of the city must be a vibrant all-hours attraction, not some rest-home zone for inner city dwellers. There is peace and quiet in ROLLESTON.

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think that inner city life should be vibrant and fun. Live music should be encouraged. Bring on the noise.
This includes some outdoor music on summer nights, which is difficult to insulate.
Inner city residential buildings should have double glazing and noise insulation.
If you don’t want to live with some noise, choose a quieter suburban dwelling.

I am an infrequent visitor to the areas where there is loud noise from entertainment venues. For me the biggest noise problem is from vehicles with modified exhausts. They are a scourge in the central city.

Noise from entertainment venues may be more tolerable if there was not noisy vehicles.

Q17 **What do you like about the proposed plan change and why?**

Long Text

One of the main reasons people choose to live in a city (myself included) is to be part of the energy, culture, and life that make it vibrant and interesting. Over-regulating noise risks can dampen this energy and underme efforts to bring the central city back to life. Christchurch has been working hard to rebuild its identity and attract people back into the CBD. We should be encouraging more events, more nightlife, and a thriving hospitality scene—not putting limits on it. Slightly higher noise levels, especially in the evenings, are a natural and expected part of a vibrant urban environment.

Speaking from experience (I have lived in the city centre for the past 5 years), the central city is far from being too noisy. Before moving to NZ eight years ago, I that spent my life in European cities where lively streets, music, and social venues are embraced as part of city living. Compared to those places, Christchurch is still relatively quiet - and could absolutely benefit from a stronger buzz.

Living in the city means being part of a shared space, where we support local businesses, encourage creativity, and welcome vibrancy. I fully support creating an environment that encourages a more dynamic, welcoming, and enjoyable city for residents and visitors.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Noise is part of what makes a city feel alive. If someone is looking for complete quiet, there are wonderful, peaceful suburban areas nearby that might better suit that lifestyle.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Road noise is far more significant than I was expecting as a new central city resident. The background noise of traffic is fine, but the more than occasional driver who feels the need to accelerate quickly can be somewhat disturbing. I would advocate for lower central city speed limits in areas that have high density housing.

Q13 **Do you think we've got the category locations right?**

Multi Choice: No

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: Yes there should not be a category one with a 65 decibel level , only needs 2 category levels of 60 decibel and 45 decibel

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Cancel category 1 altogether

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: Do not agree, why should private property developers be required to go above the current building regulations to appease council who are only imposing this so they can increase the decibel levels, They should not have to have increasing costs that will ultimately be passed on to any property purchaser and increased pricing may turn potential buyers off.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: No one can actually justify increasing the levels of noise coming from any of the identified entertainment venues , also you can not in anyway guarantee just how far any sound would carry on any given night and especially in summer times with warmer weather venues will have windows and doors open as will residents. , Council says they want to attract even more residents to shift to the inner city yet I for one would never consider it given the intentions to increase noise levels across the city.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text:

Something that I do not believe has been taken into account is a health and safety issue not only for patrons visiting venues but more so all staff that maybe employed for anytime they may be asked to work at any venue and have no choice of being exposed to excessive noise levels.
Have council consulted at all with Audiologists whom know best about how deafening and constant noise has on the human hearing system, with such deafening noises staff will struggle to hear patrons putting in orders which could have an effect on any patron who may have an allergy of some kind and the staff member misheard what they were saying and could serve them something they should not be having.
Council talk about inner city residents should be able to expect a reasonable level of comfort, but then the question must be asked what is a reasonable level of comfort, increasing noise levels shifts that so called comfort level to a more minimal comfort level which is not reasonable and who can actually say what is a reasonable level as for some it maybe reasonable but for others especially the older generation that may want to live closer to the city it is not reasonable.
Just like alcohol sales , that despite all efforts it has no fixed boundary to stop alcohol harm, and the same can be

said about sound and no one can prove beyond any reasonable doubt that all sounds generated irrespective of noise will not travel past the inner city roads bound by Moorhouse Ave, Fitzgerald Ave, Bealey Ave and Deans Ave and the final reality that venue operators are not talking about is factual , patrons are not coming into town and frequenting their venues because the noise is not loud enough it is more about the costs of getting there, and the costs of the food and drink served once they get there that is what is really behind lack of support. I never ever buy food or drink at Apollo Stadium anytime I went there simply because of horrendous costs and nothing will change that. Even with 60 decibel rules it can be heard from miles around.
So unless you are going to build walls between the 3 different identified areas to deflect the sound (which we all know you won't) then you are operating in La La Land if you think you are ensuring central city residents will still get a reasonable level of comfort should you choose to increase decibel levels to 65 , but as we already know council staff have already made their decision of recommendation to council to approve and are only doing this consultation to once again tick a box of requirement

I like that this option sees higher-noise areas extended to include places where clusters of night time spaces have developed organically since the earthquakes, such as the block of St Asaph St between Barbadoes and Fitzgerald where the likes of Darkroom and Space Academy have been for over ten years now. I also like that it includes other key music venues such as Hide, A Rolling Stone, Dux and Flux. This option also includes scope for new night time economy operators to open in the Central City in future.

Long Text

While this plan change is a huge step in the right direction, I do still have some concerns that I feel will require additional regulatory and non-regulatory changes, beyond just PC21 itself:

- I am concerned that noise control officers do not take dB readings, and rather that noise notices are given out subjectively - based on what they perceive to be excessive or not.
- I am concerned that Air BnBs in very close proximity to music venues, such as those at 373 St Asaph St, are being advertised as "tranquil" and "peaceful". It would be great if Air BnB, TradeMe and other rental listings were made to mention that they are located close to night life spaces. One of the biggest issues with noise complaints has been from residents and guests saying they didn't realise venues were right next door when they rented or booked the property.
- I am concerned that is hard for established venues, despite making an effort, to build lasting positive relationships with new residents when so many of the new townhouses inside the 4 avenues seem to be rental properties or Air BnBs (in the case of 373 St Asaph St, not a single one of the new 18 townhouses is owner-operated, they are all investment properties being rented out, with at least 3 of them listed on Air BnB.) Further non-regulatory support from the Council would be appreciated in this area (at a previous council meeting we were told the non-regulatory side of the process was now "completed")

- I am concerned that this Plan Change, should it come into effect, won't be in place until at least the middle of 2026. The St Asaph St venues first came to Council in 2022 for help and it would be great to have some more help between now and the plan change coming into effect.

Yes

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I believe the plan is correct, handing over the provision of level 2 areas to level 3 areas where there really isn't a large amount of music-related commerce, to the left of the status quo line. This way, all music-related commerce is protected within the city center, and a standard and order are maintained that contribute to the harmonious progress of the city.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I don't have a negative opinion about it

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

not at this moment

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I consider that the proposed sound limits are quite reasonable, since it is understood that a stadium of this magnitude will allow for massive activities. therefore it is necessary to have a safeguard.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

nothing in particular

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I hope that this change does not generate problems with the residents of those areas (mainly catergory 1). understanding that this is a living city and in progressive growth, so extending more the sound limit areas can be well seen by a sector and perhaps negatively affect the residents, well, anyway time will tell them which way to go.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

its seems like a return to pre-earthquake logic with the city being allowed to have a nightlife and accepting of the increased noise levels.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

these issues should never have happened and the CCC should have recognized that the city needs to be alive and vibrant and while you have allowed / encouraged an increase in inner city living it should never be at the expense of events, music and the nightlife of the city.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

That you continue to listen to people who have chosen to live in the city when they complain about noise levels. They should be reminded that they chose to live in a noisy and lively part of the city and therefore have accepted that environment and the noise associated. You should not disrupt the city live by acting upon these complaints and instead ensure that you encourage and support events, bars live music, performance to flourish in our city.

Short Text:

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text: We need to allow businesses and entertainment to happen in the CBD and not be hindered by apartments. If people choose to live in the city then they need to accept noise. We want people to spend money in the CBD before and after going to Te Kaha. We do not want people being told to leave quietly and go home. I like that you have extended the categories to include all within the 4 Aves and Hagley. We need to encourage the use of Hagley to also get people into the CBD and spend money.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: You are not reconsidering Te Kaha. We need to use the stadium as much as possible and to have the use restricted due to people moving in next door is crazy.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

The proposed changes reflect a forward-thinking approach that balances the need for a lively, diverse central city with the protection of residential areas. Fostering an environment where hospitality, entertainment and cultural venues can thrive is essential for attracting both locals and visitors alike. These venues draw people in, create jobs and contribute to the local economy, so it’s crucial that we enable them to operate successfully.

Long Text

We need extra protection for spaces such as darkroom and space academy as they are huge assets to the community and the local music scene. There needs to be accomodations and more understanding that heavier genres tend to have noise control called on them sooner - for example punk bands get noise control called on them more than a jazz band despite the jazz band being louder.
Feather and Nick in particular have create a safe home for everyone in the music scene. They are often a second home to us, a bunch of "misfits" who feel they don't fit into the other bars within the city.

Encourage activities in central city

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Noise values seem low
People at 7.00am are using chainsaws mowers etc
Not to mention motorcycles and boy racer cars
planes particularly in north west conditions are loud for the city
People should either live elsewhere, install sound proofing or get a life

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

We live on the hill overlooking the city . We are often commenting about helicopters flying over, train movements to and from port , rubbish trucks working early morning. This is all part of living
in a great vibrant city. the city is looking better all the time shame about the Cathedral.

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I really agree with increasing the allowed noise in the center city. I think increasing what is allowed will make the city more vibrant, keep the venues safe, keep young people living in Christchurch as there will be a lot of nightlife and cultural events to attend. If the venues were to be shut down, myself and a lot of other people I know would lose interest and move overseas

Q18 **What don't you like about the proposed plan change and why?**

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Allows for a vibrant inner city night life where events can play out for the benefit of central-city livers (which I aspire to be soon) and suburban Cantabrians.

I respect the wishes of those who want to enjoy quiet, but there is an inherent bustle to living in the centre of a city, and to deprive all residents of events that are available in most other cities on earth seems like a high price to pay to appease a small number of inner-city residents who want the benefits, but not the costs, of living so centrally.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Q3 **Last Name**

Short Text Cox

Q4 **Name of organisation/business**

Short Text

Q13 **Do you think we've got the category locations right?**

Multi Choice Somewhat

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text The special events area of North Hagley Park should be at least a category 2.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text Extend Category 1 up to Rolleston Avenue

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text Bumping night noise limits up by 5–10 dB, but backing it with mandatory insulation and mechanical ventilation across the board. That's a fair trade, *if* the standards are enforced properly.

Category 1 allowing living near nightlife zones with 35 dB bedroom insulation and ventilation. That opens the door to more mixed-use development without killing off bars and venues with noise complaints. Good move.

The risk? Costs get pushed onto developers, rents go up, and enforcement falls flat. Good rules on paper mean nothing if they're not policed.

This setup could support a thriving night scene, but only if the council's serious about drawing a firm line between entertainment zones and quiet ones, and not caving the minute someone with a penthouse gets annoyed at music on a Friday night.

Q18 **What don't you like about the proposed plan change and why?**

Long Text The plan doesn't clearly delineate entertainment precincts. If noise permissions are too broadly applied, you'll end up with residential streets complaining about late-night noise and a council left enforcing vague boundaries. Policy fine-tuning only goes so far. Ultimately this all hinges on proactive enforcement. Current noise-control services feel reactive. Without stricter oversight, this feels like policy by hope instead of policy by design

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text The plan change heads in the right direction but still leaves some glaring holes unaddressed. The biggest issue is that Council's playing catch-up. You've admitted most of the old Category 1 zone is now poorly suited to hospitality, yet the proposed fix relies on pushing venues into newly defined areas where some homes were built without insulation. Then you bump up noise limits and hope redevelopment will eventually sort it out. That's a patchwork approach, if we are honest.

On top of that, there are some serious gaps:

1. No clear enforcement strategy: You're lifting night noise limits across wider zones, but where's the operational plan for enforcement? There's nothing on proactive monitoring, staffing levels, or tech upgrades. If someone breaches the new limits, what happens? Because right now, enforcement feels like a 9-to-5 phone line and a hope that the venue picks up the call.

2. Construction noise is completely ignored: Plenty of people living centrally are being woken up at 7am by concrete trucks, not DJs. This plan hones in on nightlife while completely ignoring the impact of daytime and early morning construction, which is just as disruptive in mixed-use areas.

3. No transition strategy for mixed-use growth: You're allowing more residential development near nightlife, but there's no long-term vision for how you'll manage inevitable friction. Are you expecting future residents to just tolerate more noise? Or are you planning for spatial separation, cultural norms, or incentives to cluster venues?

4. No recognition of cumulative noise: You measure each source in isolation, but that's not how sound works in practice. Three bars, a street party, roadworks, and late-night revs all bleed together. There's no modelling or policy for how these layers impact actual livability.

5. Event noise is a wildcard: Te Kaha and pop-up events will have major noise impacts, but they're lumped in under normal rules. Residents deserve clarity on how those events will be managed, how often they'll happen, and what mitigation is expected. Right now, it's vague.

The intention behind Plan Change 21 is solid, supporting nightlife, enabling more venues, updating insulation rules, but the execution lacks backbone. Without proper enforcement, clear boundaries, and a plan for long-term growth, you're just shuffling conflict around the map. If Council is serious about building a vibrant, liveable city, it needs to stop relying on passive redevelopment and vague "future-proofing" and start making hard decisions now. Define entertainment zones. Strengthen enforcement. Set expectations. Otherwise, we'll be right back here in five years doing the same song and dance.

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like it because it makes the central city a proper entertainment area, so will attract visitors with events etc and make it a vibrant city that people want to be in and enjoy as it should be.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

This is forward thinking and will protect local music venues and local artists to keep CHCH nightlife thriving. The social and economic benefits of live music are well documented. I know plenty of people who "found their people" through local music.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I think as it's focussed within the four aves it might be missing a handful of relevant spaces - Sydenham Underpass comes to mind, for example.

I would have liked some recourse for a contestable fund for venues to apply to help soundproofing and ventilate their venues appropriately.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Noise alone as a metric is a bit of a blunt instrument (pardon the pun). A concrete saw is not the same as a jazz band. But I understand the limitations when considering this particular Plan Change, and applaud the work that has gone into getting this far. Onwards and upwards.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think this is a great initiative — Christchurch needs more vibrancy and sound to grow its culture and nightlife. This kind of environment not only boosts tourism, but also strengthens the city's creative and social energy.
One of the biggest challenges affecting the mental health of both young people and adults in Christchurch is the lack of cultural spaces — places to express ourselves, connect, and explore. Without these, we've seen the rise of tall poppy syndrome, and a noticeable impact on creativity, well-being, and overall quality of life.
By embracing and encouraging a lively atmosphere, rather than enforcing silence, we position Christchurch to become a cultural hub of the South. This would benefit the entire community and help younger generations thrive here, instead of feeling the need to leave in search of something better.

Christchurch is in a unique position compared to many other cities — we still have the opportunity to rebuild with better sound insulation from the ground up. If the city were already fully developed, upgrading existing homes would be much more difficult and expensive.
Now is the right time to make these changes, while Christchurch is still in active rebuild mode. We shouldn't miss this chance to future-proof our city in a way that supports both culture and community. Delaying these decisions would only make it harder and more costly to retrofit poorly insulated buildings later. Acting now means we can avoid dragging this conversation out unnecessarily and start building a city that's better prepared for growth, creativity, and a vibrant nightlife.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I love it — as long as there's flexibility for adjustments and ongoing conversations in the future.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I believe it's important to give serious consideration to venues that are already established and allow them to keep supporting Christchurch's night culture.
While I don't live in the city, if I did, I would see it as my responsibility as a resident to consider noise when choosing a home—not to expect venues, which naturally generate noise, to change.

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like that more entertainment venues are being included in Category 1.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

65db is far too low of an expectation for live music venues, and it will hurt their business if this is enforced.

Q19 **Overall, do you support the proposed Plan Change?**

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like that it protects our local music venues such as Darkroom and Space Academy as they are crucial venues for supporting our local music scene ensuring up and comers and established names have somewhere to perform as well as providing venues for people to socialise and keep a vibrant city. I also like it allows for future venues to be able to open and operate.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

The expanded zones include some of Ōtautahi's best independent music venues that are currently in Category 3 areas. Allowing these venues more freedom to operate without having to close early due to noise complaints is a net positive for our city's local music scene.

Q18 **What don't you like about the proposed plan change and why?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like that it is expanded to fit with the newer layout of the city. As things have shifted a lot the current rules don't really account for live venues very well. A lot of town houses are going up in town with poor sound insulation and being sold deceivingly not letting buyers know about the surrounding live entertainment on weekends.

Q18 **What don't you like about the proposed plan change and why?**

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

As someone who works in the music industry and loves the music scene in Christchurch, I think it's of vital importance that we protect our live music venues and the night-life of the city.
Understanding that live music can be noisy and loud and making that a part of the noise plan for the city centre and surrounding areas is incredibly valuable.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think the proposed changes will greatly inspire the growth of the until now neglected performing arts industry in the Christchurch Central city. I believe this fledgling scene needs further encouragement to grow.
Furthermore, I believe that the improved noise isolation requirements will protect visitors and perminant occupants alike of the central city, many of whom will be attracted to the area by the performing arts scene.
All in all, this is much needed, and very timely indeed

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I believe that the improved noise isolation requirements should be extended beyond Fitzgerald avenue, if a sufficient density of residential properties is present in the area.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

None at all. I believe that there is nothing wrong with raising the noise levels in the central city

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Things like this need to be future proofed better.
It should have been so obvious that this would be a problem after the earthquakes and the rebuilds beginning.

But most importantly residents that move in to town should have unilateral power to get places shut down like what happened to the dux.

Q17 **What do you like about the proposed plan change and why?**

Long Text:

Q18 **What don't you like about the proposed plan change and why?**

Long Text: This city has been through everything, earthquake, mosque shootings, and yet you propose to take away the vibrant night life that keeps a city together. The proposed plan makes no sense in terms of trying to move a city forward. To blend both residential, and a vibrant night life areas are not feasible.

Who pays for the upgrade in insulation in establishments and homes? When the NZBC (NZ building code), is a very poor standard to build against and these building are all single glazed, 70mm wall with an insulation value of no more than R3.2.

The proposed plan also didn’t think about the new stadium. How much noise will that generate and yet your plan doesn’t incorporate that all.

Overall I believe this is a poor use of resources and council planning, and not an issue that needs to be addressed now or for a very long time. Ask yourself how many earthquake damaged areas and building are still unoccupied, and yet there is no plan in place to fix it.

Check yourself before you wreck yourself

Q19 **Overall, do you support the proposed Plan Change?**

Q17 **What do you like about the proposed plan change and why?**

Long Text

This is a great step in the right direction, we know a vibrant inner city that can thrive and let business make the most of what they can offer. As well as, opening the opportunities for new businesses to come and invest in the inner city with exciting projects. This believe there needs to be a strong view from the council that this is the route we want, and that any residents moving in nearby understand that. They can’t be allowed to come in and dictate that the city centre become a retirement home. The council should also make this clear by also coming out now and expanding the amount of major events Te Kaha is allowed to host, as well as expanding the hours of these events. If memory serve me right, it’s around ten major events till 11ish pm and one till 1ish am a year? We should change it to one or two major events till 2am a year, and twenty major events till 12am a year. While twenty may seem excessive, it would be unlikely to get near there anyway, but it does allow us those opportunities if they occur. We don’t want to be like Eden Park where artist aren’t coming to NZ because the six night of concerts have been booked up. And remember to put it into perspective, 20 days is nothing spread over 365 days.

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

There will be times around the Stadium where noise will exceed all guidelines. Nothing should change because people chose to live in the central city, and in the well known entertainment areas of the city. It's what draws people to our amazing city. Construction companies are responsible for sound proofing and mechanical air ventilation, after all, they are making money from their buildings. People don't move to the country then complain about cow noise. You people are shoving your noses in where it's not needed. You did the same on my new build in New Brighton. You decided that I would hear too much road noise and decided I needed double gib and 6ml glass in my double glazing. That would have cost my builder in excess of $50.000. I am on a fixed price contract. It cost my builder 3.5k for a sound engineer to deal with that. Stop trying to justify your jobs and do better.

Christchurch is a young and thriving city. These noise plan changes would ensure that it continues it's growth in the arts and music sector giving it an edge on other city's like Auckland and Wellington. These changes would make it the most liberal city in the country in terms of noise restrictions. Attracting more artists and musicians.

I'm sorry that I'm not making a more informed submission but I would like to put forward my 2 cents before submissions close.

Music is a big part of my life.
I listen to it, I make it, I live it, I breathe it.
I have had multiple conversations with musicians and event planners/promotors, lamenting the way that all around the world, there is always a trend towards "noise suppression".
Any seed of a cultural initiative through music has a hard time getting off the ground, because as soon as people start having a really good time they make noise.
Neighbours complain and then you have to be quiet.
Repeat complaints mean the scene dies.
Human voiceboxes can't be limited the way a speaker system can, which is it's own issue as well in these cases.

But it's not Music's fault that the default venue is a bar, and so a segment of any scene will always be intoxicated and loud.
Because we lack imagination, cultural efforts wither on the vine.

It's a tragedy.

Please let us move towards a city where artists can have a voice and not be shushed, where music and noise can be themselves unapologetically.

Give live music a chance. Give culture a generous space in which to grow.
If people move somewhere in the city that historically has music venues, or has become such a place in the rebuild, please respect the fact you chose to move there, cause music was already there.
The Real Estate Agent might not have wanted to miss the sale so these things aren't always disclosed with the proper gravity.

Safer. richer. more vibrant communities together.

Nāku noa, nā Tim

I like that you're trying to cultivate a vibrant nightlife in the city. After travelling overseas in Europe through vibrant cities I've seen that there needs to be enough freedom for entertainment and art that includes noise to occur. These changes can hold space for people to create a beautiful and enjoyable atmosphere in the city.

Q17 **What do you like about the proposed plan change and why?**

Long Text: Christchurch has a lot of potential to be a wonderfully vibrant city. This is due both to the incredible depth and breadth of the entertainment and performing arts and sporting talent in this city, and also to the better state of the housing supply here (vs. Wellington and Auckland).
This proposed plan lays out a good balance of giving flexibility to entertainment venues, while ensuring that new housing is suited to those spaces in the most cost-balanced way.
I'm a firm believer that anyone moving into the central city should expect to live in noisier surrounds (the cause of that noise is why you move into the central city after all) and should prepare accordingly. But that can be tough on new home-owners living in noisy homes. The noise-sensitive regulations ensure that future homes are suited to the eviron they're situated in, making cohabitation in this wonderful city easier.

Q18 **What don't you like about the proposed plan change and why?**

Long Text:

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text:

I have general concerns about the suitability of existing properties for renters. Renters can't typically view properties at night or when events are on, so have to take the landlord at face value in regard to regulatory status and insulation etc. Unlike property owners they also don't have the same agency to change the insulation in their property. Renters would typically have agency in the form of moving elsewhere, but with the rental market as it is that's not as reliable an alternative as it should be.

I'm not necessarily suggesting requiring these regulations to apply retroactively to existing noise-sensitive properties as that could be a prohibitive cost on landlords, worsening the rental supply. I think what could be workable is some sort of requirement for landlords to state whether a property doesn't meet the sound insulation requirements of its regulatory category before the next lease is signed on the property. This could either be by way of registration with the council or by notification to interested renters.

Music & culture is an extremely important part of any city's nightlife, as well as developing the incredible amount of talent that comes out of our small city. As a Christchurch musician, I feel lucky to be able to play our music at our small venues, and if those were to close due to noise complaints I would have to look for a new home city.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It is crucial for Christchurch to support central city music venues, and since the earthquakes it has been lacklustre. I welcome residential infill in the central city, but this comes with the expectation of increased noise within reasonable limits. If tenants are complaining of noise within the current scope, the complaint should lie with the developer not covering off soundproofing instead of with the venues.

Multi Choice No

Q17 **What do you like about the proposed plan change and why?**

Long Text Nothing

Q18 **What don't you like about the proposed plan change and why?**

Long Text This proposal effectively re-zones many existing ‘East Frame’ residential neighbourhoods into Category 1 High Noise Areas whilst also increasing the noise limits in this category. This retrospective rezoning is bad policy and a perverse solution that will have the opposite effect to that which the council is aiming to achieve. That being easing tensions between residents and noisy hospitality venues currently in the lower noise Category 2 zone.
Current residents chose to live in these new residential areas based on the existing zoning rules and while many would acknowledge and accept the inevitable buzz of inner-city life, they also have the reasonable expectation of not having to deal with excessive nighttime noise just like residents in other parts of the city would.
As a resident who’s lived on Manchester Street for a year, this proposal feels like the council is trying to change the rules in favour of bar owners while totally ignoring the concerns and expectations of existing residents.
The rationale behind these changes seems to be that current noise limits are a barrier to commercial or entertainment development in the CBD. This appears speculative at best, unsupported by robust evidence, and solely based on the hearsay and opinions of a few influential, interested parties.
These new noise limits would allegedly set a precedent that is unmatched across any other main center in New Zealand https://www.thepress.co.nz/nz-news/360703436/proposed-noise-limit-changes-could-make-christchurchs-city-centre-loudest-nz
The council needs to answer the question of why it thinks why Christchurch requires higher noise limits when the other big cities don’t? This proposal certainly doesn’t make a convincing case for it.
Furthermore, the assertion that properties in the east frame are effectively protected from noise by the new acoustic insulation requirements, is farcical to say the least. Even homes that have been fitted with acoustic insulation, like my own, are not adequately protected against proposed increased noise levels, especially during night-time hours. Acoustic insulation is effective to a point, but it cannot eliminate the impact of loud street activity in the early hours or continuous high-decibel noise, particularly bass frequencies and other vibration-heavy sounds that can penetrate structures. Also not considered here is the fact that residents cannot reasonably be expected to live with their windows closed, hermetically sealed off from the outdoors. Opening windows for ventilation is essential, especially in the summer.
If Christchurch is to thrive as a genuinely mixed-use, inclusive urban center, then the noise concerns of residents should be considered and not ignored. The council has a duty of care to the new residents that it has actively encouraged to move into the central city by creating and developing these residential areas. Imposing higher noise levels retrospectively on these residential neighbourhoods is not only unfair, but also unnecessary as the case for the proposed changes are one sided and based on flawed assumptions that the current noise settings hinder economic activity in Central Christchurch.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Christchurch 8011

Submission opposing the Draft Plan Change 21 - Central-City Noise

Dear Sir/Madam

This proposal effectively re-zones many existing 'East Frame' residential neighbourhoods into Category 1 High Noise Areas whilst also increasing the noise limits in this category. This retrospective rezoning is bad policy and a perverse solution that will have the opposite effect to that which the council is aiming to achieve. That being easing tensions between residents and noisy hospitality venues currently in the lower noise Category 2 zone.

Current residents chose to live in these new residential areas based on the existing zoning rules and while many would acknowledge and accept the inevitable buzz of inner-city life, they also have the reasonable expectation of not having to deal with excessive nighttime noise just like residents in other parts of the city would.

As a resident who's lived on Manchester Street for a year, this proposal feels like the council is trying to change the rules in favour of bar owners while totally ignoring the concerns and expectations of existing residents.

The rationale behind these changes seems to be that current noise limits are a barrier to commercial or entertainment development in the CBD. This appears speculative at best, unsupported by robust evidence, and solely based on the hearsay and opinions of a few influential, interested parties.

These new noise limits would allegedly set a precedent that is unmatched across any other main center in New Zealand https://www.thepress.co.nz/nz-news/360703436/proposed-noise-limit-changes-could-make-christchurchs-city-centre-loudest-nz
The council needs to answer the question of why it thinks why Christchurch requires higher noise limits when the other big cities don't? This proposal certainly doesn't make a convincing case for it.

Furthermore, the assertion that properties in the east frame are effectively protected from noise by the new acoustic insulation requirements, is farcical to say the least. Even homes that have been fitted with acoustic insulation, like my own, are not adequately protected against proposed increased noise levels, especially during night-time hours.

Acoustic insulation is effective to a point, but it cannot eliminate the impact of loud street activity in the early hours or continuous high-decibel noise, particularly bass frequencies and other vibration-heavy sounds that can penetrate structures. Also not considered here is the fact that residents cannot reasonably be expected to live with their windows closed, hermetically sealed off from the outdoors. Opening windows for ventilation is essential, especially in the summer.

If Christchurch is to thrive as a genuinely mixed-use, inclusive urban center, then the noise concerns of residents should be considered and not ignored. The council has a duty of care to the new residents that it has actively encouraged to move into the central city by creating and developing these residential areas. Imposing higher noise levels retrospectively on these residential neighbourhoods is not only unfair, but also unnecessary as the case for the proposed changes are one sided and based on flawed assumptions that the current noise settings hinder economic activity in Central Christchurch.

Yours faithfully

Robert Fox

I’m a frontman for a local band that frequently plays local venues - we’ve received noise complaints many times playing at venues like Darkroom and Space Academy. This makes very little sense to us. The plan change gives us and others like us the freedom to pursue our art and boost the stunningly vibrant local music scene, for which more support is sorely needed.

Long Text

If it keeps open the Darkroom, I'm happy. I, as a Goth, am so frustrated with how little of an alt scene NZ, especially Christchurch has and would be devastated if we lost what little of an alt music scene we actually have.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I'm worried that noise requirements will shut down pre-existing bars and especially locations for alternative music as we just... don't have enough of it.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

If you're worried about housing being built around known areas that make a known amount of noise because it's known that they're music venues... don't build them there. Please. Don't take away our music because of poor planning. Please... music is community and we've already lost so much community.

Residential areas immediately adjacent to commercial activity noise after 11pm

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Averaging decibel noise over 15mins doesn’t exclude very loud noise which maybe brief but wakes residents from sleep.
We are frequently woken by fire engines or other emergency vehicles using their loud sirens after 11pm at night and late night revellers at weekends from venues at the bottom end of Victoria street. Our building contains residential apartments and a hotel and I’m sure hotel guests are not happy about being woken either.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Limit noise after 11pm, perhaps by restricting some licensing hours, and request emergency vehicles to only use sirens after this time when absolutely necessary.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like that it strikes a good balance of strengthening controls to manage for noise where noise is going to be produced, while not making the rules unwieldy. I like that it will reduce reverse sensitivity.

I want the centre of our city to be vibrant and mixed-use. To me this means having both awesome venues and liveable apartments. The onus needs to be on housing developers to build for this, and I like that this is what the proposal does.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I don't like that it can't go back in time and deal with the housing that already got built!

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I appreciate that the plan prioritises the original purpose and cultural value of the central city as a live entertainment zone. Music and nightlife have always been vital to a thriving urban centre, and this proposal supports that identity. It also rightly places the responsibility on new residential developments to adapt, through insulation and ventilation rather than restricting existing venues. I like that it aims to support both vibrant nightlife and peaceful homes, rather than forcing a choice between the two.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Nothing!

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

One concern is whether enforcement and implementation will be strong enough, particularly around ensuring new residential builds meet the updated insulation and ventilation standards. Without consistent oversight, there's a risk that future conflicts will still arise. I also wonder if enough education and transparency is being provided for prospective home buyers so they understand what it means to live in a central-city entertainment zone.

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Previously, after the quakes, we endured a lot of late evening and night-time noise mostly from excited and likely drunk people leaving venues. The only way I can see to reduce this sort of noise is to confine the entertainment zone as much as possible i.e. maybe larger but preferably in one block, not several smaller areas all over the city centre. I think it would be inequitable to make changes which would force people already living in ‘residential areas’ to undertake expensive alterations in order to get to sleep at night.

Q19 **Overall, do you support the proposed Plan Change?**

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Don't know / not sure

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like the fact that we as a city are recognising art created and performed within the city as being inherently valuable to city as a whole, as opposed to an annoyance or something to put up with. Creating zones likes the central city Category 1 zone makes sense as it will allow the reputation for the area as a nightlife and artistic hub to grow quickly and will allow new spaces access to an accessible audience instead of trying to start something completely out of the way and on their own.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

While supporting the nightlife around Te Kaha and the Central City is important and why I support this Draft Plan Change - it is fair to say that overheads such as rent, as well as availability of property for renting will become more expensive and harder to access. I would love to see some proactive steps taken to not only enshrine the Central City nightlife but to promote its growth in new areas of the city - possibly areas where property is available and rents are lower (industrial or underdeveloped areas).

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

No I dont.

Short Text: No

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Yes, Residential areas in The East Frame / One Central should not be in Category 1 (or 2)

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: Insulation and mechanical ventilation requirements.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: Increased night time noise limits for a lot of homes.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text:

What does "night time" mean? It may be acceptable to raise noise limits around the stadium by a small amount to accommodate some events. However if these have a limit of 10pm or 11pm (in weekends) then that would be more palatable to local residents.
Following the Canterbury earthquakes, the central city was master planned to create a safe, liveable, and vibrant residential neighbourhood. The East Frame – or One Central — was specifically designed as part of the Christchurch Blueprint to support urban living and attract people back to the city centre. Increasing noise limits to levels where they adversly affect these homes will: -
- Undermine the vision and investment in this master-planned precinct.
- Discourage future residents in the area
-Create an atmosphere inconsistent with family-friendly, community-oriented events and
- Further hamper the goal of a thriving and safe central city.

Q13 **Do you think we've got the category locations right?**

Multi Choice: Somewhat

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: The noise restrictions should be lightened for all existing venues.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: No

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: Existing venues should be allowed to exist as they have been been since they were founded.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: It imposes further financial strain on the entire community of venues and performers. I'm a professional musician and soundtech. Our industry has suffered enormously since Covid. The noise restrictions dampen the chances of Christchurch ever competing as a destination for touring acts, national and international. This severely limits the music industry.
Past restrictions in the early 2000's decimated the Christchurch music scene. We could have learned from these mistakes.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text:

"Require mechanical ventilation to be installed. This is a system that actively moves air in and out of a building, providing fresh air without the need to open windows which reduces the effectiveness of insulation."
- Music venues should not be required to bear this cost. The music scene is precious. It currently supports hundreds of musicians and techs, which is amazing for a city of our size and not to be taken for granted. As the city grows a thriving music scene like ours is poised to put us on the map internationally as a destination.

Nightlife in Christchurch has always been an important part of what makes Christchurch a great place to live. Live music and entertainment activities are an important part of that and to not allow things at full volume or within particular radius of the city centre will impede on that. More music, more venues, more volume!!!!

Q18 **What don't you like about the proposed plan change and why?**

Long Text

There are seven units on 44 Peterborough Street (one of which is ours) which are roughly thirty years old and survived the earthquakes. Our unit's insulation is not to current standards.

The units with their slate roofs, gardens and trees provide ambience to a commercial area. The owners clean up broken bottles and takeaway containers, wash down urine on their fences (from current hospitality patrons), remove leaves, sweep footpaths etc. taking pride in the area.

The proposal would translate to a allowable 34% unit onsite dB increase and 8% increase from current hospitality close by, let alone new operators. The noise is already easily heard inside the unit without these increases.

Increasing music and hospitality economy also involves increased alcohol consumption. We remind grandchildren who stay with us on Friday and Saturday nights that 'people have been drinking' and not to be afraid of the loud shouting/arguments, reviving cars, tipping over of scooters, broken bottles and other noises alcohol related. This is until 3am by CCC approval.

We love living in the city and agree that includes noise. Does this mean a vibrancy and economy focus forgets the effects of noise pollution and alcohol where people already live? Please consider the positive effects that city dwellers also have on the vibrancy and economy of our city.

Short Text:

Q13 **Do you think we've got the category locations right?**

Multi Choice: No

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: Averaging noise over 15 minutes does not effectively measure disturbance value. Mechanical ventilation systems do not address summer heat requiring open windows. Cat 1 locations must be severely restricted & not in areas of residential development.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: yes - council has developed inner city areas of high residential intensity - these must not be Cat 1 areas. This is a very radical change and totally at odds with the initial plan.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: None.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: While living in the inner city is going to be noisier than in quiet suburbs, it is completely illogical for the council to create and permit high intensity residential city development and then make significant changes to noise levels allowed. While ventilation systems ensure clean air, they do not address cooling, which is a significant issue in summer (including at nights). There should be no residential developments inside the Cat1 zone. Entertainment premises must be required to contain noise through sound barriers and sound levels. This is critical after 10pm. There should be no expansion to the Cat 1 area as it is incongruous with council approved inner city residential living.
The council has an obligation to protect its ratepayers from adverse environmental influences.
World Health Organisation (WHO) principles must be followed - the city council must not put limits in excess of these.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text: The noise intensity level should be measured over a 2 minute average and not 15 minutes - 15 minutes is far too long for an average - there should also be an instantaneous maximum. There must be maximum requirements as well as average requirements. Thought must be given to the "type" of noise as this can be very pertinent to disturbance. Any noise intensity after 10pm should be seriously curtailed.
Indoor sound level guideline values set by WHO for bedrooms are 30 dBA Leq for continuous noise and 45 dBA Lmax for single sound events. Standards to reduce noise inside residential dwellings in mixed-use environments must use these as a target.

Q13 **Do you think we've got the category locations right?**

Multi Choice: No

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: I feel that you are expanding this area and there are older houses near the increased area.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Keep catefory 2 and 3 away from the west side .I feel that you are expanding this area and there are older houses near the increased area. Even with better insulation we can hear noise in the city. It also means we can't go to sleep with windows open

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: I do not like this.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: We have watched the number of events in Hagley park expand and increase having lived in the area since 1989. The events are loud and Impact on boarding schools and the hospital.
Also with increased events and noise comes drug and unruly behavior. We regularly get people urinating against our cars and on occasion pooing. Last big event that happened whilst I was here both I and then later our neighbor watched 4 initially males and then a group of 4 females urinate in our shared private driveway. The city council does not provide guards and railing to stop this. On the rare occasion that this happens the guards are dismayed by the behavior.
You also block access to our houses which means that we cannot plan our own social occasions as we can't get into or out of our properties and neither can the neighbors. there is no cohesive parking area to support large crowd. During any firecracker event, people park on the pavement and the last one this year parked in our driveway and went to the event.
NO Councilor has ever asked what happens and you don't seem interested. This is driven by your desire to get money. In other cities that are 3 big events are held where there is a stadium and rail and metro access. You have a desire to increase the no of residents in the inner city without thinking about wellbeing of the people who move into the city. We generally go away for 2-day events and are lucky enough to afford this. However, we have to clean our driveway after the event. Please consider using the stadium or going to a rural area for large events

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text: See above. It is difficult enough living here with you increasing the noise level.
We love living in the inner city but hate the time of events. The city would be dead without residents to support the inner city.
If you are going to increase noise , you could experiment and change the whole of Christchurch and see what

happens then!

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

As a resident living in the central city, I already find the current noise levels at the upper end of what is tolerable, especially on weekends and public holidays. Music and loud noise from bars and people on the street regularly spill into my home, often late into the night. Increasing the permitted noise levels would make this situation significantly worse.

If this plan goes ahead, it would seriously affect the quality of life for residents like myself. It could even make the city centre unliveable. I choose to live here because of the balance between vibrancy and liveability — raising noise levels would tip that balance unfavourably. I don’t want to be forced to leave my home simply because it becomes too loud to relax, sleep, or enjoy my own space.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Yes — raising the allowable noise levels in a mixed-use area like the CBD sends the wrong message. It could normalize excessive noise and antisocial behaviour even outside the immediate bar district. When loud, disruptive activity is tolerated or encouraged through looser regulations, it invites more disorder: public drunkenness, urinating in alleyways, even vandalism or public indecency.

The city needs to set clear boundaries between hospitality zones and residential zones. Increasing noise levels undermines that balance and punishes residents who are trying to live peacefully in the central city. I strongly oppose any change to the District Plan that makes residential areas more vulnerable to the negative spillover effects of nightlife.

I have been involved with live music for over 25 years in Otautahi, and have witnessed incredible changes to the scene over those years for myriad reasons; alcohol reform, RMA's, the Canterbury Earthquake sequence, inner-city gentrification, and of course the long and far reaching Covid response and persisting sentiments. There have been so many challenges to live music and entertainment venues, that there are protections required for their longevity, of which a major one is favourably covered under this PC proposal, namely the category re-zoning and decibel limit revisions of the noise emittance allowances for existing hospitality and entertainment precincts.

I have seen far too often the onus for managing the frankly utterly restrictive regulations unfairly thrust upon the venues in order to remain operational, when they have been unfairly and somewhat insanely impacted by residential developments at the boundary of, or across the road from their pre-existing entertainment venue. Common sense has not prevailed. As with those choosing to purchase/live/occupy near other pre-existing noise emitting activities (go-kart tracks, motorsport parks, shooting clubs et al) they have been disproportionately empowered to negatively, and indeed in some cases terminally impact venues and their ability to conduct their business. These new zonings and regulations are fair and proportionate, provide certainty and flexibility to the venues, and reduce the onerous tasks involved with compliance to lesser and inferior regulations.

Supporting the local bars and music scence which have been consistently undermined by boring peolpe who move into the centre of the city for the quiet life?! The council has already alienated youth from the city and encouraged people to shop in malls by charging for parking in town. This is your chance to do something positive for the creatives who give Chch it's life (even if you are only doing it to serve the private interests of those who will benefit from the new stadium).

Long Text

Christchurch city needs nightlife for the hospitality industry to not only survive but to thrive and grow. Which in turn makes the city a desirable place to visit and to live. Since the east end of the city nightlife has developed (St Asaph St. post quake) the city has become a destination for many who didn't frequent it before. Myself for example, we had approx 1 or 2 nights out in town each year, now it is several times each month, which has also led to more daytime visits by us too. We had discussed moving away from the city, but the improving nightlife (along with the Port Hills) gives us reason to stay. Any residential accommodation built in the city must be built to exist in harmony with the city center, not to cause friction. The venues on St Asaph work hard all year and contribute hugely to our communities by having fundraisers (City Mission, Women's Refuge etc) supporting new and up and coming artists, musicians and production. A later bus service would be great to get more vehicles off the roads as 11.30 for the last bus home often cuts it too fine to risk.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Response No: 1267

Contribution ID: **37096**

Walker

Q4 **Name of organisation/business**

Short Text

Q13 **Do you think we've got the category locations right?**

Multi Choice

Yes

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I think it nicely includes existing night life venues as well considering space for venues to come.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Ideally there would be no noise limits in some spaces of the city, allowing gigs to experiment with different ways of performing music.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

No really

Response No: 1268

Multi Choice

Yes

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like the fact that the noise limits are raised to give more realistic options for live entertainment.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I think the proposed noise limits are restrictive. These should be up to 85 – 95dB in the main areas. Otherwise this may be restrictive for large acts playing in the new stadium.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Perhaps only increase dB rating when large concerts are held at the new stadium. Should be up to 95dB.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Christchurch has come a long way, the central region is finally starting to seem some life to it. Though it's still got a long way to go, encouraging a night life is a great way to bring more people, money and culture to the central city. People are aware that noise will come hand in hand with moving within the 4 avenues. This plan change is good.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Nothing, there will always be people complaining no matter what. Businesses are struggling enough as it is, this will bring business in. Good thing

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

No other concerns.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Currently, you have the noise limits and insulation right where we live - 5/197 Hereford Street - close to the new stadium.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

It's important to ensure that, as we live in the central city, we have a reasonable level of comfort and that our health isn’t put at risk by noise, particularly when it comes to sleep. The current noise regulations are working well.

Louder night-time noise will cause disturbance and lack of sleep for us - the limits and times are right at the moment, so why change them?

We do not want to allow louder nighttime noise for Category 1, as our home at 197 Hereford Street is in the central city, close to the One New Zealand Stadium, and more noise will reduce our ability to sleep at night. Our property was in place here well before a new stadium was even being considered.

Noise levels should remain as is - they are working well, especially after 10 pm each night.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

The patrons and the bars on Manchester Street (opposite our property) are extremely boisterous late in the evenings on Fri, Sat -past midnight -especially when events are taking place.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I support live music venues, and would like to reduce the difficulties in running them. I like cultural institutions.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

It only concerns the centre of the city. Ideally, one would not need to travel so far to reach cultural institutions. They should also exist, or be allowed to exist, in the peripheries of the city.

Q19 **Overall, do you support the proposed Plan Change?**

Short Text:

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text: It makes more allowances for nightlife and live music in the CBD, and will allow for the development and maintenance of more social spaces. Social spaces, especially those open after work, are something that is still lacking post-quakes. It also protects the comfort and wellbeing of the residents, as lack of sound insulation is a major issue in CBD living spaces and puts the onus on the occupier, who may be a tenant and not able to readily modify their home.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: The lack of consideration of Hagley Park as a live events venue that may need a high noise limit at times

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Q17 **What do you like about the proposed plan change and why?**

Long Text

I love attending live music in the city centre including st asaph street area, and am looking forward to concerts in the arena.
I think for the city to be vibrant like in pre earthquake days, noise limits shouldn’t be too low. Every central city is noisy at night so those choosing to live there shouldn’t have the right to complain about noise.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

The places people could go for night life should be able to open late and of course if people are awake, there would be noise.

Residential building requirement should fit in with the purpose of being in the city.

City centre is city centre.

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Ive got concerns knowing many of my friends livelihoods are at stake by jamming in more residential areas in areas that have previously been nightlife for a long time.

For example, Darkroom on St Asaph St which is one of the few entry level bars for performers, musicians and the like which is now almost being boxed in by multi-housing without getting much say.

I want to ensure my friends and the smaller venues aren't compromised.

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

the idea to lower noise in the city makes sense, but also puts clubs, bars and venues in certain areas under pressure

Q18 **What don't you like about the proposed plan change and why?**

Long Text

it puts many small privately owned music venues at risk of being shut down. venues that have been a integral part of a lot of people's lives and have helped musicians and performers alike to find a audience. music venues should be able to provide a stage where people can turn their passion into maybe something bigger.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

venues. important to a lot of people in certain subcultures. just because land owners decided to make flats in areas that already had existing music venues, it doesn't mean they get to shut down something that means a lot to some one else

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

It is an improvement over the current plan. I believe that it is important that the City supports a vibrant night-time economy and that proposal is an advancve on what is the present situation.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I wonder whether there should be higher limits available in Category 1 in the day time and possibly up to midnight in the areas surrounding One New Zealand Stadium at Te Kaha (well at least on the west side) as the higher limits set for the stadium should have some flow over to this area. The area has already been planned for more noise due to the stadium so it is logical in my opinion to extend that to the entertainment facilities in Category 1 to the west of the stadium and out a distance. Experts would have an idea as to how far, but I would suggest out to half way to the boundary of the One New Zealand Stadium outer noise insulation area.

Q17 **What do you like about the proposed plan change and why?**

Long Text

Increase of noise level in the Cathedral Square area and along the terrace.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Victoria st area having noise levels increased when it has a different atmosphere to it mainly been restaurants and not loud music business. The expanding area it would include are our units on peterborough st which do not have modern insulation and the noise level from the public between the hours of 11pm and 3am especially on the weekend now leaves a lot to be desired. Don't change what it is but let the change happen in the main hub of the city.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Its easy to say increase the noise levels but for what , music festivals or venues right in the city centre but not right across the board.

Q3 **Last Name**

Short Text: McCracken

Q4 **Name of organisation/business**

Short Text:

Q13 **Do you think we've got the category locations right?**

Multi Choice: No

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text: Victoria Street should not be treated the same as the Central City, the central city where the high volume of entertainment venues are eg The Terrace which doesn't have high volumes of residential housing around it. Victoria St is surrounded by residentia

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Victoria St between Bealey and Kilmore should not be zoned and treated the same as the city centre. There are old residential houses that surround Victoria St on both sides. This includes all the houses recently built around Cramner Sq and Montreal Stree

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: I think the idea of enabling entertainment venues to be able to operate is OK in principal in the CBD BUT when you combine all of the plan changes together it seems that no one in the Council is looking across all the rule changes and the IMPACT on EXISTING RESIDENTS. Build tall buildings in the same area, not scattered, don't mix old residential areas with night clubs, late night closing 4am and higher enabled noise levels - this is not conducive to healthy living of existing residents. The CCC planning is treating human beings worse that we (as a society) finds acceptable to treat egg laying chickens. Chickens are now free range, and humans are being put in small cages.

If you are going to change the noise levels do this in the areas where you will not aggravate existing residents who bought into quiet residential streets, just because THESE STREETS HAVE NOW BECOME CENTRAL BECAUSE OF THE CHANGES TO YOUR CCC MAP BOUNDARIES we didn't choose to live in the CBD you are bringing your city boundaries and rules to our front doors.

I have no problem with noise levels around Te Kaha stadium as the area around here is non residential, I have no problem with increased noise levels in the CBD.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: Could you sleep in a room where this is ongoing lous conversation, or in an office with people constantly talking and laughing? Could you sleep opposite The Terrace on a Friday night at 11pm? No? Well why do you expect us to be able to do this? I strongly object to having noise levels increased around the Victoria Street area. We've been there, done that before and the impact on the residents was significant. It's a proven thing, you know it, we know it.

The main issue underpinning why I am against having increased noise levels in the Victoria St area is the impact on people who live and stay in the area. CCC have recently enabled more housing as well as longer opening hours for licensed premises in Victoria St area, and now you want to add more noise. This will take us back to where we were post-quake having to deal with rowdy, intoxicated people vomiting in our gardens, pre loading in our streets, walking drunk and shouting outside our homes (which are very close to the street boundary because of our old small sections, many bedrooms are literally within 2-4 metres of the pavement), urinating on fences & in alley ways damaging our cars and generally being antisocial. This is a fact. There is well document evidence of this that has been accepted and recognised by the CCC. We (the VNA) have already demonstrated that having later opening bars, with loud music caused a massive disturbance to residents within the VNA area. It was so bad that some residences

left our neighbourhood because of it. See attached document from the VNA.

Occasionally, even now we are woken by people on the street, beer bottles left on the pavement, vomit on our drive along with shouting, car doors slamming, arguments of drunken people - it's very frightening and there is nothing you can do. It's not worth calling the Police (and they won't come anyway), as a single female I'm not about to go out to the street and confront them or ask them to move on as this is not safe. So you just have to put up with it, and hope for the best. It's not healthy to be scared in your own home. Luckily these incidents are few and far between nowadays.

With CCC relaxing the opening hours of licensed premised AND noise levels you are encouraging late night drinking bars to open up in Victoria St one again; and as a consequence the anti-social behaviour that is the fall out into our surrounding streets in areas that have people trying to live quietly in their homes in this VNA area. Remember the houses were here long before the bars, you are trying to bring the bars to our doors, it's not the other way around. Please respect and remember this. The new housing you are putting in the CBD and actual city centre like Manchester St is different - these are NEW houses being built in the city. VNA is an old neighbourhood. Very, very different. Plus people don't actually live in these city centre houses – the vast majority are AirBnBs. (more great planning by CCC – not!)

Add to this that there are high quality hotels in the Victoria St area that have recently been built such as The Mayfair, and the more established The George. Both hotels attract high quality visitors to CHC. It's not a great look or experience for visitors to have to deal with vomit on the streets and sleepless nights as well as antisocial behaviour and fear of abuse from drunken party goers hanging about outside late night bars on Victoria St. Keep this in the CBD where it's all together and the Police can be concentrated in one area to manage antisocial people who drink too much enabled by late night venues.

I'm not sure how many CCC employees and Councillors who read these submissions actually know what it's like to try and walk from Victoria Sq along Victoria St, past the Casino and past The Bog and past the kebab shop at 11pm at night on a Friday or Saturday night. I encourage you to do it, and do it alone, as a female, then let me know how safe you feel. I did this two weeks ago and it's terrifying. Having more bars opening later and then potentially being able to pump out loud music will encourage night clubs like CRUZ to reopen on Victoria St. There is no positive outcome that comes from this. It will stop me going out at night, I won't go to the new Court Theatre, I won't go into the city in the evening. I won't spend my money on higher value entertainment, because you are potentially enabling RTD drinking youth to run riot all over the city. The CBD is already a really scary place at night, it'll just get worse and you will have brought it to another area beyond the CBD. you already have problems with drunk and disorderly people in the CBD, why spread the problem our further when you can't control it now?

Please think carefully about the zones for entertainment in all of the city. Victoria St is a nice place to go for a cocktail and a meal, please don't allow it to turn into The Terrace after 10pm, we live here! We didn't choose to live opposite The Terrace.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

You are seriously disadvantaging my right to a peaceful existence by proposing to loosen the noise rules in the Victoria Street area. Moreover, your letter on notification was disingenuous by NOT mentioning the Victoria St. area in the proposal.. I had to go look for this and I think that the notification was fundamentally dishonest because it omitted the Victoria area.

Response No: 1329

Contribution ID: **37442**

Q2 **First Name**

Gorman

Q4 **Name of organisation/business**

Short Text

Q13 **Do you think we've got the category locations right?**

Multi Choice

No

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

Part of Victoria and St Salisbury,St Beveridge St Conference St and Peacock St are residential and should be allowed MORE protection than the commercial areas. They should not be included.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

See above for areas that should not be in 1 or 2.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Nothing. Rather than increasing decibel levels leave well alone.
One would think that the new levels present a health and safety risk. The present levels allow for enjoyment and should not be increased.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The proposed increase will decrease our quality of life. The occasional event at proposed levels would be acceptable but not on any / every day. We were in this area before the proliferation on entertainment venues and expect our health and comfort levels to be respected. Living in an inner city area requires tolerance from residents towards entertainment but the new proposed new levels are not acceptable.

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

It should be the business making the noise that is required to install their own insulation to stop their noise disturbing others.
We already have a residential apartment in the new proposed category 1 - it will only be people building new buildings that will get the opportunity to instal the sound insulation. We are currently category 3 and proposed to jump straight up to category 1.
We already get very lound constant reptititive base banging sounds coming from the late night night clubs in St Asaph St - enough that wake you up from sleep ! and you are proposing to increase the sound levels again, not acceptable. This noise pollution already goes on for more than 15 minutes at a time.

Q19 **Overall, do you support the proposed Plan Change?**

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I live in a category 2 location, road noise due to ambulance and fire services routes, plus late night traffic from the casino has a real impact at times.
Improvement in restrictions and/or added protection to the homes would be really appreciated.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I agree with both perspectives, the increase in music and social spaces is a good idea, but as you say housing so many more people in close proximity to the city centre requires solutions to enable people’s health and well being.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

My major concern is really the casino(s) and the late night foot traffic means you have people not in a good state stumbling around, in town that’s an expected thing, but we’re right on the corner of town and the gardens, Hagley park area. So wonder if any changes to the Casino opening hours are up for consideration in the future? It’s not like a music venue, but I know people go there for a good night out aswell. Thank you

Short Text: Residential area from Montreal to Durham streets - Peacock Beveridge and Conference in particular . Also Forest and Dublin streets between Bictorus St and Park terrace.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: No

Q17 **What do you like about the proposed plan change and why?**

Long Text: I like none of it. Why do you think we need an increased decibel limit? Who has requested this and what criteria have planners used.
The current limit of 50 for Victoria St and 45 for surrounding streets is for after 11pm.
65 is one hundred times louder than 45 .!!!!
Each ten is a ten fold increase.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: Decibel rating proposed is far too high.
Audiology NZ recommends bedroom readings not exceed 30db and that 45 can disturb concentration. 55 db can impact heart function, pain levels,immune responses and inflammatory markers. 9 February 2024.
World Health Organisation echoes this opinion as does the Courtney medical group.
The Courtney medical group

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text: As a long term resident of the area adjacent to Victoria St I have vivid memories of the post quake era when enormous disturbance was caused by 4am closing times at the hospitality establishments there.
Vandalism, high noise levels as all patrons exited at the same time. Vomit, urination and worse made the streets horrifically spoiled. So much so that early morning hosing down of footpaths and gutters was needed.
It has been stated that the louder the music the more people drink when they can't hear themselves talk.
Owners of these bars will tell you that make most of their money between 1 and 4 am.
In previous submissions at this time a pages long log itemised the extent of this situation.
Perhaps no one involved in this proposal was employed by council at that time so have no background understanding of the stress caused to a very long standing- more than a hundred years- community.

Victoria Street and west of Cathedral Square

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Q18 **What don't you like about the proposed plan change and why?**

Long Text

While living in the central city naturally comes with more noise than the suburbs, the noise from events in Cathedral Square already shake the windows in the West End. Furthermore, bringing higher noise limits even closer have a detrimental effect on people's sleep and quiet enjoyment of their properties. Also, retrofitting double glazing would be prohibitively expensive for many existing apartment buildings, including a number that survived the quakes. All businesses must manage the externalities of their operation, and local government should create bylaws to protect those parties affected by those externalities. For example, we wouldn't accept businesses polluting the Avon because we should expect that in the centre city and their business added to the vibrancy of the area. The same must be true for noise pollution. Businesses should be able to turn a profit, but they have to manage their noise in the same way others manage other externalities.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

There is already noncompliance with noise now. I could not find an increase in compliance monitoring. Also, a lot of the noise comes from antisocial behaviour of people moving between Victoria Street and the Terrace. I didn't see any mention of engaging with Police to help with antisocial behaviour (I.e. moving on the drunk people who loiter on streets very early on Sunday mornings).

Short Text:

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text: I like that we are considering that this is growing city, still in recovery from the earthquakes, and that we are being forward-thinking by proposing a large area (espicially arounnd the stadium) to increase the noise limits. Pubs, clubs and dance music venues will want to invest in that area very soon and we need to allow noise for them to be able to make that investment. Entertainment is a crucial element to any city that thrives, and we have a great opportunity to have a world class entertainment district.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: Nothing. Its a great initiative.

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like that it is giving businesses in the central city a chance to operate and add to a thriving and energetic central christchurch. Something that has been planned and attempted for quite some time. What a helpful chance for music venues and hospitality businesses to work together with the council to create a vibrant scene.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

There is potential for this issue to come up again in the future if more housing is built outside the proposed areas or around venues that aren't currently included in the extension of the new category areas. Also, the potential cost to businesses and home owners for sound proofing. Otherwise it is a great step in the right direction.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I am in support of this provision to help venues such as XCHC darkroom and space academy provide opportunities for artists and have a more appropriate noise level limit!
We should be advocating for these spaces and making laws which are easeful to their operations and not tending to the needs of new developments,
residences or homes in a vicinity of such venues. These venues are sacred infrastructure the cultural equivalent of complaining about the sound of the ocean when buying a bach. Art and music venues supporting the cultural life blood which is the inherent value of this city. Do not sell out in the short term and undercut that which really generates long term value for property, residence and city - art & culture.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text: Victoria St should not be in Category 1

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text: Allows for noisy venues in the mixed use part of the central city and around the stadium. This is an area that has an increasing number of residents, but almost entirely in new buildings that have appropriate noise insulation (double glazing, etc). Also these are new housing developments so people are moving into an area that may have noise, rather than noise moving closer to existing residents.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: Victoria St is a very inappropriate place for these higher noise limits. It's a narrow finger of commercial use running through an existing, densely settled residential area. I lived for 35 years at 6 Beveridge St (and still own the house, my sister lives there and may put her own submission in on this proposal). That end of Beveridge St has old houses (my house is 1895, four cottages next door are 1880s, etc) which don't have modern noise insulation standards. The area was very quiet at nights until post-quake when the central city was cordoned off, and late night bars moved into Victoria St. We had about 4 years of major hassles with late night noise (till 4am), which only stopped being a problem when the Oxford Terrace strip re-opened. Given that a long standing aim of the City Council is to get more people living in the central city, a good way to achieve that would be to ensure people currently living there are not forced to move out. Unlike other areas covered by this plan change, the Victoria area is existing, high density, old houses very close to the narrow commercial area. If this plan change applies to Victoria St, the noise is moving closer to existing residents, who mostly live in properties that are ill-equipped to insulate the occupants from the new noise. But it's important to note that Victoria St is shown with "hospitality venues". There is no problem with Victoria St having hospitality like that currently there - mainly restaurants and cafes. These are perfectly compatible with being close to residential, in fact both cafes and restaurants are a bonus for nearby residents. The only thing that should not be on Victoria St is venues that need these new higher noise limits.

So I feel very strongly that the new noise limits are a good idea EXCEPT along Victoria St where they should not be changed. Keep the current noise limits along Victoria St. I now live in Beckenham so this won't affect me directly, but having lived through the 2012-2015 period close to Victoria St, I think that not allowing high noise limits on Victoria St is important for the goal of increasing the number of residents within the Four Avenues.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Supports valuable businesses (particularly those in the entertainment, music and arts industry) to continue operating. This will keep our city vibrant and support a talented and passionate local community who wish to continue contributing to the economy of the city. Many of the smaller entertainment venues within the central city have been operating for many years and are crucial to the fabric of the community.
I support housing intensification within the city and believe developers have a responsibility to appropriately insulate new developments to ensure that they are providing accommodation suitable to the area. It is unfair on new residents if new builds are not suitably insulated to support enjoyment of their homes, and it is unfair on active operating music venues if their businesses suffer or have to close as a result of noise complaints.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I think it is much wiser to leave the categories and the noise levels as they are and carefully evaluate public reaction over 12-24 months. It is far easier to change things in the light of experience than to risk unknown outcomes and costly reversals. The relationship between Te Kaha and concerts vis a vis the residential complexes nearby cannot be defined until concerts are held. It is worth noting that for much of the year in Christchurch we are fortunate enough weatherwise to enjoy windows of residential housing being open. Generally, people enjoy and need fresh air. Then, of course, no amount of insulation or double glazing etc constrains noise.

I also note that in your council information you write about certain businesses which NEED to have high or higher levels of noise. Capitals are mine. The word should be CHOOSE not NEED.

I have lived in London and Birmingham in the UK for long periods of time. There I enjoyed attending cinema and live theatre. On returning here I have attended concerts and performances at the Theatre Royal but have invariably found the noise level too high so I simply don’t go now. I have excellent hearing and desire to listen not to be bombarded by sound which is discomforting. This is an experience which is pertinent to this present discussion; hence, my inclusion of it. Besides, a number of my friends much younger than I by between 10-15 years who unlike me enjoy popular and rock concerts have made similar decisions. I was frankly amazed!

I am hopeful that I will manage to remain in my treasured cottage into the future without sleep and well-being affected by musical events at Te Kaha but that remains to be seen. I simply cannot buy into the argument that higher levels of noise are NEEDED.

Q19 **Overall, do you support the proposed Plan Change?**

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Residents choose to move into the city center. They should know in advance that there will be additional noise when compared to the suburbs. If noise disturbs them (within reason) then they should not have relocated to the city center.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It finally addresses the need for better noise policies in the central city and surrounding major entertainment venues. This will also make sure future property development is meeting those standards and not forcing venues to shut down because the housing is built with paper thin walls.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

It doesn't really cover the noise changes that can happen at the Stadium. A music concert could be a lot louder than a Rugby game. Slightly higher DB limit there would be great.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

The current housing that has been built. Those apartments have really band sound insulation, to the point you can hear street traffic and your neighbour talking in the room next door. I think you need to address that if this bill passes, those property developers and residents will have to accept the change.

Q17 **What do you like about the proposed plan change and why?**

Long Text

I moved to Christchurch from Wellington in 2021 because of the creative diversity the inner city has to offer. I love that this plan will mean that already well established night-life areas like Hide, Darkroom, Space Academy, The Rolling Stone etc will be able to continue operating moving into the future, and contribute still to a vibrant inner city life. I also really like that the council listened to the music venues when help was asked for, and I want to thank all the council members for all of the work that has been put in to helping make this change happen.

It's also worth noting that this proposed change will aid the council in achieving their goal of cutting red tape and making things more accessible moving forward, which is a fantastic achievement.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I think the proposed plan is really reasonable and will be fantastic to see this change go through, however its important to note there are music venues outside of this proposed plan such as Exchange and the Sydenham Underpass who put in extreme amounts of effort to add to creating a vibrant inner city life, and supporting creative communities. Overall, I really like the proposed plan, and would be good to see this continued in the future perhaps.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

The insulation and ventilation plans for new buildings and townhouses are important, but I'm concerned that new buildings are mostly going to become investment properties, leaving to renters or airbnb accomodation. I was shocked to find out that not a single one of the 18 townhouses recently built at 373 st asaph st are owner-occupied. This worries me because airbnb listing are often advertised as "quiet", or as a "retreat", when in reality inner city living is loud and I believe people should be made aware of this.

I appreciate that the council has taken so much of the feedback onboard!! The alternative was our music venues being shut down, and our night time economy being killed. I play shows at Space Academy often, and attend Darkroom shows, but I also attend educational lectures at Space Academy where people of all ages attend, and it would be awful if these places had to close down. Christchurch is becoming the cultural powerhouse of New Zealand, artists and musicians and creatives are all moving here, and our city council has done a fantastic job at pushing Christchurch to be a great place to grow up in. When I was younger I used to want to move to Wellington or Melbourne, now I am deadset on staying in Christchurch.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

There are a couple of music venues (or places that might eventually contain music venues, say Allen Street) that are left out, but overall I think this is wonderful!

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Short Text

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like the fact that the council is taking some long overdue action on an issue that affects not only venue operators and customers, but also the wider community, and in a way that acknowledges the alignment with its own values and plans for the future.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I don't like how it is focused solely on central city, when there are other venues not far outside those limits that would be affected by this proposal.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Possibly anti social behaviour and noise generated by large crowds going to and from the new stadium. I am aware there are other plans covering Te Kaha so they might appear there.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like expanding the "noisy" zone of the city which helps make it all much more vibrant and a cooler place to be. Like one of the reasons I chose to live in the central city is to be closer to places like Darkroom and Space Academy, and I would hate to see them pushed out by noise requirements. I'm also super close to Te Kaha so I know that I'll be hearing plenty from them when that opens, so these changes really need to be made and probably should have been made earlier but better late than never.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I wish it went further on building requirements for noise insulation.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I mean I would also like traffic calming measures on side streets like mine so people don't feel comfortable revving their cars up really loud and going 60km/h when no one is around to look.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

I like how much work the council has put into this. I really value being able to go out to venues like Galaxy Bar and the Sydenham Underpass and Darkroom and it would be an absolute loss to the Christchurch music scene to see these venues get crushed under regulations.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I'm concerned about noise complaints to venues that are institutions. Venues that were there long before the residents who are now making the complaints. I'm worried that if these places close there will be nowhere to see live music. I think the livelyhood of a city depends on access to social spaces and music. Imagine Melbourne or Berlin without any live music venues. It would die.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It allows hospitality businesses to get on with business without the looming possibility that a local resident may see their business shutdown or hindered.
Look at any vibrant city in the world - there is a mix of residential spaces and hospitality spaces. Residents have to understand that there is personal responsibility for choosing to live in a space where bars and music venues exist. Both can coexist but if residents dominate venues and bars by using outdated bylaws then the bylaws need to change. That's why I welcome the changes that are proposed.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

I think the decibel limit could have been 70 instead of 65, and I think Riccarton could have been included in this as well.

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice No

Q17 **What do you like about the proposed plan change and why?**

Long Text I like the spatial extent of the zones.

Q18 **What don't you like about the proposed plan change and why?**

Long Text The difference between an Entertainment Venue and any other is not at all defined, and can change with time. You could buy in the city and someone could them deem themselves to be an Entertainment Venue and change the noise levels that you are subjected to. Also, it may be the combined noise of a non-entertainment venue and other venues that creates noise that pushes beyond the limits. The policing of the separate category makes this more difficult, and also easier to get around the rules. There should not be a separate category for Entertainment Venues. Noise is noise.

There is nowhere else in NZ, Australia, or in the western world that allows 65dBALAeq as an acceptable noise level after midnight. We should not have to suffer it. The argument that with greater noise insulation in houses, and the use of mechanical ventilation, allows for higher limits is presently baseless. There is only a very small percentage of dwellings in the city center that have been built after 2015, or 2022, and therefore fully comply with the current insultation standards. The majority of the dwellings do not have the benefit of modern insulation standards and therefore the reduction inside houses cannot be relied upon. Furthermore, there is a not-insignificant cost to running a ventilation system in a modern house, these are often turned off and never used form a cost and maintenance perspective (rightly or wrongly).

Category 3 sits at 45dBALAeq for the nighttime, whereas 65dBALAeq is proposed for Category 1 dwellings. This is 100 times more intense than Category 3. Council is not being open by not explaining that the noise level is approximately four times greater. Most people do not understand the scale and Council has duty to clearly explain that this is not linear.

A lot of the issues with late night noise could be controlled by not allowing speaker systems to be used outdoors after midnight, or by allowing entrances to open directly opposite residential areas. Likewise smoking areas directly fronting onto residential areas should not be allowed after midnight.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Health - World Health Organization recommend that nighttime outdoor noise levels should not exceed 40dBA. Council is well out of step with this guideline. Sleep disturbance occurs when noise levels are above this limit. There is an increased risk of stress and cardiovascular disease when noise persists above 60dBA. I recognise that higher levels are reasonable in the city, but definitely not above 60dBA.

The entire central city including Hagley Park

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

I support the category one change to 65db or preferably even louder. I love live music and i love how it can support the local like nothing else can bringing people to the city from other areas, even other countries to spend their money on food, drinks, accommodation, travel and entertainment. I often travel to other cities for concerts. Hopefully this plan change will support more artists coming to Christchurch particularly with the new stadium opening. The entertainment industry provides employment and should be nourished and encouraged by local authorities.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

Only that it could be louder. For the hundreds of millions spent on the stadium, it should be getting used as much as possible up to 5 days every week, with little to no noise restrictions.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

There needs to be policies in place to deal with (and ignore) malicious complainers, such as the person who bought an apartment opposite Dux Central and immediately started complaining about the live music there forcing them to limit their live entertainment. That sort of behaviour from residents should not be tolerated. Any limits to noise levels of a live venue limits their ability to generate income, attract punters and provide employment and opportunities for up-and-coming local artists. Residents in central Christchurch (and beyond) have had over 12 years notice of the stadium opening which is plenty of time to move or further insulate their property against noise. Ignorance of potential noise issues by those buying property in the city should not be tolerated as far as complaints go either.

Q17 **What do you like about the proposed plan change and why?**

Long Text: Increases in CBD around the stadium are acceptable if staffing to handle increased crime, injury and property damages are adequately funded.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: Expanding noise limits along Victoria Street would compromise the health, safety, and livability of our neighborhood. I urge the Council to maintain current noise restrictions and protect the character of our community. Please reference attached "Herring Letter to CCC on Noise Raise.pdf" for detailed explanation and reference materials.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice: Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text: It is established fact that increased nighttime entertainment increases crime, health incidents and property damage. The current plan does not address how those additional costs will be offset.

See the attached submission on the following page

July 17, 2025

To Christchurch City Council,

I am writing as a resident of 22 Peacock Street, Christchurch, and a member of the Victoria Neighborhood Association (VNA). I am deeply concerned about the proposed expansion of noise limits along Victoria Street as outlined in the Christchurch City Council's Plan Change 21 ("PC21") proposal (Christchurch City Council, 2025). I respectfully urge the Council to reconsider extending these limits to our neighborhood.

We chose to live in the Victoria Street area because of its quiet, friendly atmosphere. If we had wanted to live amid nightlife and high noise levels, we would have moved into the city center. Victoria Street is a mixed-use residential area, and it should not be treated the same as the central business district. Increasing permissible noise levels and encouraging late-night entertainment will directly impact our community's mental health, safety, and property conditions.

Research from the World Health Organization (2011) shows that nighttime noise above 40 dB can disrupt sleep and increase stress levels, contributing to anxiety and depression. A meta-analysis by Schreckenberg et al. (2022) found that individuals highly annoyed by noise had a 23% higher risk of depression and a 55% higher risk of anxiety disorders. The level increases proposed by PC21are more than 10 times louder than those showing harm in the established research. These are not abstract concerns—they reflect the lived experience of residents exposed to chronic noise.

Safety is also at risk. Studies have shown that extending bar hours correlates with increased violent crime. For example, a policy change in Baltimore that moved last call from 2 a.m. to 10 p.m. led to a 29% annual drop in violent incidents and a nearly 50% reduction in homicides (Whitehill et al., 2024). International reviews confirm that each additional hour of late-night alcohol sales is associated with a 17–50% increase in assaults (Rossow & Norström, 2012).

Property damage and environmental degradation are further concerns. Nightlife zones often experience increased vandalism, graffiti, and littering (van Dijk et al., 2019). Christchurch City Council has previously spent millions annually on graffiti and vandalism cleanup (Christchurch City Council, 2010), and a single incident in Victoria Square cost $14,000 to repair (Stuff, 2024). Several dozen incidents occurring after the 2011 earthquakes have been cataloged by VNA and made available to the Council.

In summary, expanding noise limits along Victoria Street would compromise the health, safety, and livability of our neighborhood. I urge the Council to maintain current noise restrictions and protect the character of our community.

Sincerely,

Charles D. Herring

Resident, 22 Peacock Street
Member, Victoria Neighborhood Association

Short Text:

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice: Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text: Having higher limits in the CBD promote a vibrant city that means events will come to the city instead of only going to the likes of Auckland.

Q18 **What don't you like about the proposed plan change and why?**

Long Text: How it is only focusing on the CBD, it needs to also include the outlying venues and businesses that would benefit from having an increase in noise level.

If people are going to buy houses inside the four avenues then they need to be realistic about the amount of noise a city produces and having venues and bars in the city bring people here. We shouldn't be dictated to by people complaining about living in the CBD of Noise because they chose it and they can go live in Rolleston if they dont like it, dont punish the hard working people bringing events to the city by restricting noise because of people who have bought poorly noise insulated houses in the middle of New Zealands second biggest City.

Q19 **Overall, do you support the proposed Plan Change?**

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text NO - THE CURRENT POSPOSAL IS OUTRAGEOUS . The change from current status quo to proposed noise increases are will mean "hyper accusis" for everyone living in those zones in the inner city.

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text VICTORIA STREET

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice No

Q17 **What do you like about the proposed plan change and why?**

Long Text ABSOLUTELY NOTHING !!!
The proposal has gone from a reasonable plan that considers residents and inner city living to one where the noise particularly on Thursday, Friday and Saturday nights will be increased.

Q18 **What don't you like about the proposed plan change and why?**

Long Text Already the residents at 44 Peterborough Street experience significant noise issues from the Irish Bar on Victoria Street, sometimes on a Thursday, and every Friday and Saturday night till up to 3 in the morning... And then we have the litter to pick up as well, bottles, cans, debris, as well as cars revving up and noisily roaring off. I use ear plugs in the weekends.

It is a pity the Irish bar near our units does not have some screening perspex e.g. perspex screens mounted on mobile planter boxes that could keep the noise from expanding out towards our homes. e.g. like the thick perspex put on the roof top bar balconey near Manu and Miro restaurants.

Increasing the areas of noise pollution will significantly affect the pleasure and enjoyment of inner city living in a huge amount of the city. The newer builds might have double glazing, but realistically the bulk of buildings are unlikely to have gone to this expense.

Unfortunately alcohol consumption goes along with a lot of loud noisy people. There is a lot of "screaming and yelling " from patrons leaving the bars, and the monitoring of any of this is basically non existent. Music tends to be inside the bars etc, but the noisy patrons spill out onto the street and are basically tanked up and loud - male and female. The NZ mating ritual in full swing. I am sure David Attenborough would be able to compare the noise levels to "howler monkeys". Cues of howlers outside the Irish bar waiting to get in, are also an issue at times .

Older buildings such as the town house we occupy do not have "triple" glazing which would make much more of a difference than the old double glazing we have in place.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Yes and thank you for this question . St Johns have been requested to ask their ambulances to NOT use their sirens where ever possible - but they are always turning their sirens on at 7am till 11pm even when there is no traffic ahead of them (coming down Montreal street northwards). It has literally fallen on deaf ears.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Entertainment and hospitality venues must be allowed to thrive in the inner city. Venues such as Dux Deluxe should be allowed to function as music venues as they were originally planned, without individuals being allowed to stymy them through out- of -date regulations. Music venues on the fringe of the central city, eg the Dark Room should not have to close down, just because housing has been built close by in a former light industrial area.

In regard to decibel levels, it is essential that venue owners are consulted on what they consider to be optimal noise levels, and this has informed the planned regulations.

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Hospitality and entertainment venues are the lifeblood of a city and people expecting to live in central locations should accept that they will experience higher noise levels than in the suburbs. It is likely that residential owners in such central locations will have the resources to soundproof if they wish. If they are tenants they will likely be making a deliberate choice to be in such a central location where they would expect to pay higher rents. They would likely choose to accept higher noise levels for the buzz and convenience of being part of a busy metropolis. It is not reasonable to expect people would have no choice but to accept accommodation inside the avenues when there are plenty of other cheaper options nearby.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The council should be willing to support some inner city operations with soundproofing and compliance if they have a community focus such as a nonprofit that has a reason to be in a central location but may otherwise be unable to afford extensive improvements. From needle exchanges to mental health services to art collectives to minority organisations, there may be many groups that are a welcome and needed addition to inner city life but who might struggle with costly soundproofing or other improvements to be compliant. The council should be willing to provide rates relief, interest free loans or other avenues to help.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Apartment and residential building owners should not expect noise levels to be as restricted as they would be in the suburbs. However council should also recognise that a city that has people living and working in the inner metropolitan area has enormous benefits, from reduced crime and increased foot traffic to better and more consistent patronage of local stores. Offering a wide range of options for people and businesses to live and work together will support long term growth.

Multi Choice

No

Q17 **What do you like about the proposed plan change and why?**

Long Text

Venues should be allowed to have live music from at least Thursday to Saturday. By having a 65 decibel limit, live bands cannot perform. If people want to live in the cbd, they must be willing to live in a city that supports creativity and night life.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

The 65 decibel limit. Christchurch's night life took a significant hit from the 2010 and 2011 earthqaukes. Instead of restricting businesses we need to support them. This can be made by increasing the noise limit they emit by allowing them to have live performers.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

No

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

This allows music venues (like the Darkroom and Space Academy) to continue and thrive in the city - supporting local and emerging artists. It is sensible in a city to have higher noise limits in certain areas to support a vibrant night life and allow for people to enjoy cultural and sporting events.

Q18 **What don't you like about the proposed plan change and why?**

Christchurch is already struggling with its culture in keeping the old city life, so by dicurraging and making it harder to enjoy the night life In Christchurch I dont agree that any changes should be made, keep it as is keep the bars as is and instead add more nighttime bars. Just cause imagrates arnt happy with noice dosent mean it should be changed keep the new zealand structure as is not get rid of it for those coming in they can always live outta Christchurch. Don't make Christchurch harder and less enjoyable for those who were born here.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Q14 **Are there any areas that you think should be included in category 1 or 2 that aren't proposed?**

Short Text

I think category 2 should be included in category one, with category 3 inheriting the noise levels applicable to category 2

Q15 **Are there any areas that you think shouldn't be in category 1 or 2?**

Short Text

N/a

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Somewhat

Q17 **What do you like about the proposed plan change and why?**

Long Text

Simply put I think that I like that this proposed plan has sparked a kōrero about the nightlife in our city. But also that the decibel limit is meant to increase.

Q18 **What don't you like about the proposed plan change and why?**

Long Text

N/a.

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Somewhat

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I think as long as the quality of life for integral venues such as the darkroom, space academy, flux, etc, is preserved, or better yet, uplifted with the capacity it can operate in then it will be fine. But if you take these places away or suffocate their ability to flourish people will be vocal.

Short Text

Q16 **Do you think we've got the noise limits and insulation requirements right?**

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

Great idea to have a large area surrounding the stadium that is focused on nightlife sound limits. Will allow many loud events at the stadium and encourage commercial growth around the area.

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

I think that rather than just townhouses, this area needs more high density mixed-use apartment buildings with commercial spaces on the ground & first floor. This would allow for a more vibrant nightlife, while also enabling better noise isolation and setting more realistic expectations for those wishing to move into the area.

Multi Choice

Yes

Q17 **What do you like about the proposed plan change and why?**

Long Text

It allows long established music venues to continue to operate when they were established before Air Bnbs and housing were developed in traditionally industrial areas. These areas only became popular because of venues established in these previously unused areas.

The council has put so much work into this and it'd be good to see this happen.

Long Text

Q19 **Overall, do you support the proposed Plan Change?**

Multi Choice

Yes

Q20 **Have you got any other concerns around noise in the central city that you don't believe have been addressed through this Plan Change?**

Long Text

Yes I'd like to hope our city doesn't become a haven for AirBNBs rather than housing for our people.

Also, to see a once lively inner city just become cheap accommodation for traveller's would be a disservice to our arts and culture sector.

We are seeing inaccurate listings for homes and temp accommodation which is causing more noise complaints because of improper information.

Also venues like Darkroom are often targeted without being the culprit for noise complaints in the city.

So many flats, townhouses being built with limited appeal and nil parking clogging the streets with cars... give more parking areas to new buildings ridiculous decisions being made there. Getting to the point, if a venue has been opened for
live music long before new buildings too bad, the building companies do not take busineses and venues into account, just want profit
and no respect for these businesses and the owners are expected to put up with it.

The inner city needs more of a heart beat and it seems to be the minority ruining it for everyone. By the minority I mean people who live in the city but expect it to be quiet all the time with no liveliness. If they want that, go and live in Rangiora. The city should be humming all the time.
