LEGEND

- Catchment Area
- Council Owned Land within the catchment
- Utility Site
- Overhead powerlines
- Contours (10m)
- 8m Planting height restriction
- Waterway / tributary
- Fire break management margin (10m)
- Totara Ecology Zone
- Riparian Margins
- Rocky Bluffs Ecology Zone
- Kahikatea Ecology Zone
- Signage/Interpretation
- Mixed pastoral grazing & tussocks
- Existing Tracks
- Potential future track
- Existing fences
- Existing trees & shelter belts
- Existing buildings
- Management line

Valley Floor Area

1. Current Ranger-led planting area, progress regenerative planting occurring from North to South (up to the fence line).
2. Existing fenced paddock to remain with a vision to plant the open space with a patchwork of Kahikatea Ecological Zone plants while providing pathways (mowed strips). Dogs under effective control
3. Bay View Road entrance vision to provide a more welcoming transitional space into the park which signifies the waterway and provides some park amenity items such as signage, water, and bin.
4. Native riparian planting along Rifle Range Drain to create an ecological corridor and enhance bank stability. Upgrade existing pedestrian bridge and install fencing along the northern paddock.
5. A vision to recognise a past use of Barnett Park's valley floor as a Rifle Range through interpretational signage and enabling the site to regenerate through Kahikatea Ecological Zone plantings.

Wider Valley Area

6. Fire Break Management Margin, a minimum of 10m from the Council fence line of adjoining areas of urban development. These areas maintained to be free of scrubs like gorse and broom.
7. 8m Planting Height Restriction area for active planting within or under the overhead wires to meet obligations under the Electricity (Hazards from Trees) Regulations 2003.
8. Rock Bluff Ecological Zone to be supported through targeted weed and pest management.
9. In the Totara Ecological Zone, foster renewal and growth by implementing targeted weed and pest management strategies. Expand the existing coverage by introducing seed sources within the catchment, where appropriate.
10. Progressive Riparian Margin plantings of existing tributaries and gully to support stabilisation, ecological corridors and water quality improvements.
11. Area of pastoral grazing to be retained.
