Long Text

We have been in communication with Jacqui Miller from the CCC about the potential to involve colour and creativity into the plan. As an urban arts trust, we believe in the important engagement art in public space can play in enlivening locations and forming a sense of activation and connection, especially for tamariki and rangatahi - it has been identified that this was raised by students from Haeta Community Campus in the Neighbourhood Play Systems report which Sport Canterbury conducted in 2024. In the central city, we have worked with the installation of the 'giant spray cans' at the St Asaph Street site as a space for people to be able to paint and draw - leaving a record of presence (including visitors to the city), events - used for workshops and activations in events such as the Little Street Art Festival - and education - we have engaged with a variety of schools to use the cans as a canvas. We have two cans currently in storage that could potentially be reinstated as part of the Wainoni Park plan - the cans are approximately 3m high and require a 1.5m square concrete block. The location of the cans would be most appropriate in an active area where they can be partnered with a programme of activity - potentially connected with the community library.

If the 'Cans' are not suitable for any reason, we would still advocate for some form of active creative space that can be used to give a visual presence to young people in the park - harnessing creative talent and providing potential for development. This could be in the form of in situ options, such as panels applied to existing fencing or standalone panel bases, or space for panels to be attached after being painted off site. By ensuring that there is a recurring refresh of artworks through workshops and community engagements, these could become meaningful forms of expression and communication for local community - providing an active and aspirational presence in the park.

Q11 Is there anything else the community board needs to consider?

Q14 How does your organisation/group use Wainoni Park?

Long Text

While our organisation does not currently specifically use Wainoni Park currently, we would be excited to discuss potential engagement opportunities and to support development of an evolving/active art presence within the development plan. We are advocates for such opportunities and for art to connect with communities and public spaces across Ōtautahi.

Wainoni Park Masterplan

Sport Canterbury Submission

About Sport Canterbury

Sport Canterbury is one of 17 Regional Sports Trusts operating throughout New Zealand.

We are an independent, Charitable Trust governed by a Board. We have been operating for 30 years with a presence in Christchurch, Ashburton, Timaru and Greymouth.

Our vision is 'Kia Nui Ake, Kia Kaha Ake, Te Tokomaha Ake (More People, More Active, More Often) and everything we do is about getting and keeping people engaged in sport, physical activity and play. We connect community leadership to make healthy choices more accessible to families /whānau where they live, learn, work and play, so, our communities thrive.

We achieve our outcomes through partnerships, initiatives and programmes that align to the strategic priorities set out within our strategic plan.

The Value of Sport and Recreation

Sport NZ undertook a [study](#) that explored the value of sport and recreation to New Zealanders, their communities and our country. *The Value of Sport* is based on extensive research, including a survey of around 2,000 New Zealanders and a review of previous studies from here and around the world.

People consulted saw real value in participating in sport and recreation. Findings included:

- 92% believe being active keeps them physically fit and healthy and helps relieve stress.
- 88% believe that sport and other physical activities provide them with opportunities to achieve and help build confidence.
- 84% believe sport brings people together and create a sense of belonging.
- 74% say sport help builds vibrant and stimulating communities.

Provision of play, active recreation, and sport facilities, infrastructure, resources, and opportunities is important to a large proportion of the population.

In 2022:

- 73% of the adult population and 92% of young people (aged 5-17yrs) participated each week in play, active recreation, and sport
- 79% of adults and 63% of young people would like to be doing more play, active recreation and sport

- High deprivation, Asian and Pasifika population groups are significantly less likely to participate.¹

Research into New Zealanders' beliefs around the value of sport and active recreation in 2017 found a broad base of support for sport and active recreation and a belief in its value to New Zealand and New Zealanders. The value of sport and active recreation is seen to lie in the contributions it makes to individuals, families, communities, and the country as a whole.²

The value of investment in play, active recreation, and sport is a cost-effective investment towards local government wellbeing outcomes

International and domestic evidence clearly demonstrates that play, sport, and active recreation generate significant value for society across multiple wellbeing domains and outcomes, many of which are specifically relevant to the outcomes sought by local government:

- The combined value of taking part in community sport and active recreation in Aotearoa New Zealand in 2019 was \$20.8 billion. This is made up of \$16.81 billion of social value and \$3.96 billion of economic value³.
- Of the almost \$4 billion of economic value generated by the sport and recreation sector, 36% was in services such as construction and manufacturing that are related to sport and active recreation. This highlights the strong connection between sport and active recreation industries and the rest of the New Zealand economy.
- The sport and active recreation sector is also an important employer which generated 53,480 jobs in 2019 or 2.5% of all employment in New Zealand.
- Recently published research from a Social Return on Investment⁴ study found that for every \$1 spent on play, active recreation, and sport, there is a social return of \$2.12 to New Zealand. This means that for every dollar invested in play, active recreation, and sport, the social return is more than doubled. This is a conservative figure and the actual return, especially for those currently missing out on opportunities to be active, is likely to be higher.⁵
- In 2019 participation in play, active recreation, and sport generated \$3.32 billion return in subjective wellbeing (life satisfaction and happiness) within New Zealand.

Play, active recreation and sport contribute to social, economic, environment and cultural wellbeing in the following ways:

¹ Sport New Zealand (2023). Active NZ. Changes in Participation. The New Zealand Participation Survey 2022. Wellington

² Angus & Associates (2017). Better Understanding the Value of Sport

³ Sport New Zealand (2024). The Combined Value of Sport and Active Recreation in Aotearoa New Zealand. Measuring the Social and Economic Impact of Sport New Zealand. March 2024. Wellington

⁴ SROI measures the non-market value of outcomes generated through sport and recreational activity and the net costs of providing opportunities. Social impact is monetised by comparing the changes in wellbeing (measured by "life satisfaction" or "happiness") induced by an outcome with the change in wellbeing induced by income.

⁵ Sport New Zealand (2022). Social Return on Investment (SROI) of Recreational Physical Activity in Aotearoa New Zealand. Summary Report. October 2022.

- **Social wellbeing:**
 - Development of social skills
 - Strengthened social networks
 - Bringing communities together and increasing a sense of belonging
 - Improving pride and reducing antisocial behaviours in communities

- **Economic wellbeing:**
 - Economic value generated for local communities and businesses
 - Employment of New Zealanders in the play, active recreation, and sport sector
 - Productivity gains as a result of physical activity
 - Savings for communities as a result of the volunteer workforce
 - Economic impact of major events

- **Environmental wellbeing:**
 - Creation of pro-environmental attitudes and behaviours
 - Creation of more environmentally friendly urban environments
 - Reduced emissions from active transport
 - Improved mental wellbeing from being active in natural environments

- **Cultural wellbeing:**
 - Strengthened cultural ties from participation in play, active recreation, and sport
 - Increased wellbeing from participating in culturally relevant physical activity.

Sport New Zealand has developed a resource for local government that illustrates the significant value that local government investment in the local play, active recreation, and sport system delivers. The resource can be accessed here: <https://sportnz.org.nz/media/u41hdovx/the-value-of-play-active-recreation-and-sport-for-local-government.pdf>.

This document summarises the evidence about how play, active recreation, and sport can support the four types of wellbeing that local government is expected to deliver (social, economic, environmental, and cultural), and includes some relevant case studies from around New Zealand.

The research also showed the ability of sport and recreation to create connected young adults and improve the health and wellbeing of New Zealanders.

Wellbeing is more important than ever following the COVID-19 pandemic and the current cost of living crisis both having an impact on all aspects of our wellbeing.

The impact of COVID-19 and the cost of living crisis on the play, active recreation and sport sector

COVID-19 and its subsequent economic fallout has placed significant pressure on Aotearoa New Zealand's play, active recreation and sport system.

Organisations are a critical component of the sport and recreation eco-system. As a result of increasing costs and decreasing memberships. The unsustainable nature of some

organisations in the city is increasingly apparent. These organisations provide many benefits to the wider community and can not afford to be lost.

The importance of councils to the sector

Sport Canterbury covers an area that includes 10 Territorial Local Authority areas. Councils are an important partner for Sport Canterbury and Sport New Zealand.

We see councils playing a key role in our goal to ensuring everyone has access to quality physical activity options.

Councils have a key role in facility planning, development and operation that enables play, active recreation and sport but are increasingly involved in running or supporting local programmes which drive physical activity and wellbeing as well.

Prioritising investment in facilities, infrastructure, resources, and opportunities to encourage participation in play, active recreation, and sport can support the wellbeing of communities and the achievement of a broad range of local government priorities and outcomes. There is clear evidence about the value of play, active recreation and sport in supporting the social, economic, environmental and cultural wellbeing of our communities.

Sport Canterbury and Sport New Zealand will always aim to maintain their independence while working with councils to achieve the best outcome for the sport, active recreation and play sector.

A regional approach to facility planning and delivery.

Since 2017, Sport Canterbury (with support from Sport New Zealand) has led the development of three Spaces and Places Plans covering the Greater Christchurch, South Canterbury and West Coast areas. These plans aimed to provide a cross-boundary approach to facility planning and prioritisation to ensure needs were met on a regional basis avoiding duplication.

Sport Canterbury has reviewed these plans to ensure they are up to date. We see these plans as being beneficial to councils when considering investment in sport, active recreation and play facilities.

These plans are available on our [website](#) and have been integral in forming the basis of this submission.

Caveat

Sport Canterbury work with many sporting and community organisations nationally and across the region and often advocate on behalf of sport and physical activity. However, the comments presented within this submission are those of Sport Canterbury only and do not necessarily represent any individual or other sporting organisation, or other group.

Using this Feedback

This written feedback is to be considered and reported in its entirety. No partial use, excerpts or subjective interpretation of this document is permitted.

Submission Points in relation to the Wainoni Park Masterplan consultation

We support the proposed Masterplan for Wainoni Park, particularly the inclusion of the fitness circuit, increased tree cover, and upgraded pathways.

We believe these improvements will be a fantastic addition to the park, encouraging greater community engagement and aligning with Sport Canterbury's goal of *"More people, more active, more often."* The tree cover will offer a level of safety and comfort for whānau to enjoy the park. The fitness equipment will encourage opportunities for physical activities for individuals and groups. The pathway can support accessibility through the park.

To support this submission, we encourage you to refer to the Neighbourhood Play System (NPS) Haeata Community Campus report.

Opportunities within the NPS Haeata Community Campus report that relate to the Wainoni Park Masterplan include but are not limited to:

- *Installing water fountains*
- *Installing more rubbish, recycling, and compost bins*
- *Increasing lighting at the park*
- *Adding artwork, colour, or murals to play spaces, such as the skate park*
- *Better monitoring and upkeep of the park's grounds, that is removing glass and other potentially harmful objects.*
- *Play trails and play-on-the-way opportunities*
- *Installing BBQs at Wainoni Park so that whānau can use the space to celebrate milestones or birthdays*
- *Improve independent mobility and active transport modes*
- *Strengthen connections and partnerships with local enablers*
- *Cultural representation within the Aranui neighbourhood*
- *Increasing tamariki voice in the design and decision-making process on kaupapa that impact them.*

You can read the whole report [here](#).

We also encourage ongoing engagement with tamariki, rangatahi, and whānau within this hāpori, as well as individuals living with disabilities, to ensure the plan supports accessibility, cultural equity, and inclusion at Wainoni Park.

Additionally, if new signage is introduced in the park, we recommend including Core Boards (communication boards).

Summary

Sport Canterbury:

1. Thank Christchurch Council for maintaining investment in sport, active recreation and play across many areas during some extremely tough financial times.
2. Support Council's prioritisation of investment in the completion, redevelopment and development of a number of key formal and informal physical activity spaces and places.
3. Advocate for Council to consider the needs of all of the Community from a formal sports approach to a more informal active rec and play approach when developing facilities, sports parks and play spaces.

Long Text
Lighting around the park is very limited. We have many children and teenagers who walk the park . During training sessions field lacks sufficient lighting and is hazardous.

I think having fields more accessible for our whanau would be beneficial.

More rubbish bins

The Wainoni Park masterplan looks great! I like the flow of the proposed new pathways; it makes the park more assessable whether to use the facilities or to pass through and I think it promotes the use of the park in general. A lot of the children and young people we work alongside use the park often and would use the existing walkways around the community centre to access it. The proposed fitness stations are an awesome idea to promote physical activity (our groups would make use of these facilities). And we are all for the tree planting and the shade it will provide for many generations to come.

The team have done some beautiful work on this plan, keep it up!

Long Text
I have submitted but wanted to give more detail about my concerns re the specific stations on the fitness trail. I work with people with long-term conditions (like osteoarthritis) and older adults and I am concerned the needs and capabilities of this section of the community have not been taken into account when the stations were selected. It seems those consulted were maybe involved in younger communities or sports teams and what they have chosen would be appropriate for them I'm sure. I would be happy to speak to the board.

Q10 Is there anything you think is missing?

Long Text
Overall I highly support the plan as someone who uses the park 5 days a week. I am a huge fan of the pocket park with shelter seating and indigenous planting themes. It will be a fantastic spot for library users to enjoy a book and a rest. Some things I would love to see is even more seating with back rests for our elderly community to take breaks, extra rubbish bins in strategic places so the few don't get so overfull and a couple of fruit trees. Please don't plant anything that commonly causes hay fever though!

Q11 Is there anything else the community board needs to consider?

Long Text
A partnership with a group keen to make a community garden in Wainoni park could be something worth looking into for the future and planning ahead for.

Q10 Is there anything you think is missing?

Long Text
More rubbish bins situated around the park. Having 1 for the whole space is not good enough. There should also be another drinking fountain closer to the playground. The old lamp post that sit at the edge of the park don't work. We need better lighting to improve safety for anyone walking through. The playground, although was moved from its original position has been the same for over 20 years, it is in desperate need of an upgrade. On the main structure of the playground, after the tunnel was damaged, it was never replaced, just boarded up. Everything is old, peeling and no longer in a good condition. The skate park could also use some attention as it is ugly to look at, could it possible be painted?

Q11 Is there anything else the community board needs to consider?

Long Text
I think that although the tree planting has great intentions, it becomes a hazard. We don't want trees to line the league fields because it will block the view for the spectators and interfere with the seating that people bring. On rainy days, parents watch junior games from the car parks on Ben Rarere and their view will be blocked. Having trees lining the new pathway gives people places to hide and lurk in the dark which is dangerous for all tamariki, men and women walking alone. The park was kept open to improve safety through visability. I think the trees need to be kept to the fence line next to the playground and over to the library but not lining the fields down Ben Rarere, and down the pathway that will cross from Ben Rarere towards the Boxing gym and Hall. Some extra trees will be fine but there is far to many on this plan. Not long ago, every second grass shrub was removed from around the playground as they had grown and blocked view from parents and were also fire hazards. Adding more trees around the playground will do the same thing, block visability and increase fire hazard. I think they should be kept to the edges of the park.

I think that the gym equipment should be catered for adults. 2 out of 3 stations are but I think the one by the library that is aimed at tamariki is unnecessary. I think that the tamariki should just enjoy the playground area. I like the station by the hall and think all the stations should be like this and be able to work the whole body. I think having 2 tire flips at the other station is a waste as well and it should be replaced with something else.

I'm happy that the park is getting some work completed, but I think it needs some slight alterations.
