Three new trees to be added into playspace (indicated by x). One to replace dying tree at northern entrance and two more on the planted berm to provide shade for play elements

Circular platforms - 500mm diameter - each at different heights above surface (250mm, 400mm and 550mm)

Wooden 'tree hut' with roof - platform 1500mm above surface with log climb, ladder and fire pole as access. Enclosed on two sides, balustrading on other sides with 500mm wide access points for climbing elements

Certified soft fall chip - installed to depth specified by supplier. Dotted lines indicate fall zones required

Single bay basket swing with timber frame

Footpath
Midhurst Street

Existing Cypress tree

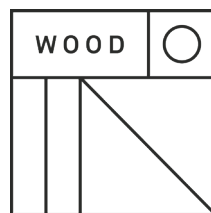

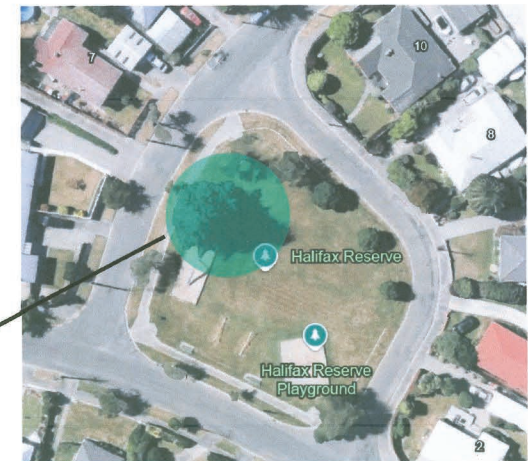

Low fort connected by a bridge, surrounded by planted berm. Platforms at different heights above safety surface (300mm, 500mm, 900mm). 300mm platform with roof. Paths as accessible access

Double slide 900mm platform height.

Posts with low ropes network (ropes below 600mm)

Planted berm to retain soft fall chip. Height of berm 400mm at highest point. Log as balancing pathway into playspace

Wooden ramp access to swing

Playspace - Halifax Reserve
